If a child shows the first signs of whooping cough call the doctor, and follow his directions absolutely.

The child frequently vomits because of hard coughing. As a result many children lose weight and become weak. In this condition they easily get T.B. pneumonia or other serious conditions. Do not give the child heavy food. Give those easily digested. Milk and eggs are very good. Lately an egg well beaten in milk every time he loses a meal.

All discharge that comes from the mouth and nose while the child is sick should be received in a piece of clean old linen or rags and burned. It is through carelessness on this that the disease is spread. Keep separate cups, glasses, plates, and spoons for the child while he is sick. See that the child gets plenty of fresh air. Keep the room well aired night and day. Unless it is raining, take him out every day, in the yard, or into the park.

Keep the child away from others, even after the whoop has stopped he can give the disease to others. Wait until the doctor says he is well. Remember that whooping cough is very catching. Be sure that your child does not spread disease and possible death to others

Pamphlets on communicable diseases can be had from the Canadian Red Cross Society, 603 Civic Block, Edmonton

DUCK HUNTING

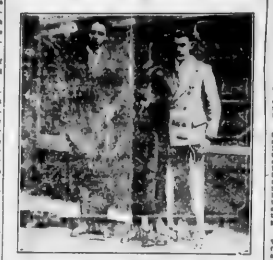
Local duck fans have had a great deal of sport so far this year. Both the fifteenth ushered in the open season there were thousands of birds feeding on the wheat fields of the district a rather unusual occurrence for this time of the year. In some places the damage they have done to the standed grain has been considerable, and the farmers are glad to have the hunters keep them away.

A number of fine bags have been reported by local shot gun artists.

It is remarkable how the farmer for the game gets up in arms by. This is realized when we come to that there are some of our young fellows ambitious enough to arise [illegible] morning at 4 a. m. and sit out in the cold frosty stubble for several hours just for the opportunity to bag a few "quack-quacks".

WEATHER NOTES

The weather has been very fine for the past few weeks with only an occasional threat of snow or rain. Considering what this week there have been several sharp frosts, the mercury running away down about half-way between freezing and zero during the night and early morning. The days on the other hand, are very warm and fine, a fact that is especially appreciated at this time of the year.



Travelling School's Promising Trio

[illegible] a new [illegible] in this province is the value three young lads from the backwoods [illegible] all during from a wonderful week spent in [illegible] Edmonton. The trio, aged 14 years French Canadian from the [illegible] Lake district of Wetaskiwin, [illegible] Paquette, aged 15 years, Ukrainian of Edna, aged 16 years. They are [illegible] pupils of [illegible] Pacific Railway travelling school [illegible] up between [illegible] to attend the school in which [illegible] are [illegible] Pacific Railway [illegible] Edmonton [illegible] Portage la Prairie [illegible] Portage Mehod [illegible] the guests of [illegible] Pacific Railway [illegible] Edmonton [illegible] the face of the [illegible]

Real Foundation of Modern Business

The so-called practical man of business, the financier, the farmer, during the many centuries of the past has been inclined to regard the scientist as hopelessly unpractical, a dreamer, a faddist. With more recent years, marked change in this respect has taken place, and today the scientist, the chemist, the laboratory research worker, is recognized as among the most practical and essential of the world's workers.

To the great [illegible] of the world and to Governments must be attributed in large degree the recognition now accorded to the scientist, while many of the world's foremost industrial concerns now regard their research departments as being among the most profitable departments of their great enterprises.

A recent article by Dr. E. Free in "Chemical Markets," New York, declares that science earns for the United States more than thirty billion dollars a year, or nearly half of the national income. It has, he says, doubled the productivity of agriculture and more than quadrupled that of mining. Continuing, Dr. Free wrote: "Surely the business men of America ought to be convinced by now that it is worth while to exhaust every one of science's industrial resources, yet the surprising fact is not only that these resources are unexhausted, but that only a small fraction of them have been put to use. Not a tenth of the facts that scientists know are being used. The rest of them lie idle in the heads of professors or in the unread pages of scientific books."

Some years ago a gentleman named Dudley became a chief chemist of one of the large American railways. He devised methods of testing coal and coke and lubricating oils that saved millions of dollars for his road. He helped the steel people find out how to make more lasting rails. He invented cheaper and better paints. He tested the available water supplies to the engines and saved millions of boiler tubes from being burst out or corroded. It is estimated that the scientific improvements devised by Dr. Dudley and his successors on other railways have saved more money than all the railroad wages ever paid in the United States.

Sometimes a scientific problem solves itself as if by magic. The origin of the potash industry is an example. The salt miners of Germany a generation ago were bothered greatly by some bitter, evil-tasting stuff mixed with the salt they were trying to mine. This bitter stuff had to be taken out, but if they piled it up anywhere the rain always washed some of it down into the rivers where it spoiled the water and poisoned the fish. Then a great chemist, Dr. Justus von Liebig, happened to hear about this worthless stuff. He found out there was potash in it. He knew that crop plants need potash, that it could be used as a fertilizer. He suggested this to the farmers of Germany. Now the potash industry is one of the greatest in the world. The useless, bitter stuff became the chief assets of the mines.

Tons of sulphuric acid and arsenic used to be blown out of the smoke stacks of copper smelters, sometimes killing animals and crops on neighboring farms. A scientist made an electric apparatus which collects these poisonous particles out of the smelter smoke. The apparatus is now in use all over the world, and the sulphuric acid, instead of floating out to damage the farms, is used in chemical industry, while the arsenic has become the chief reliance of the scientists who are fighting the boll-weevil, which threatens the destruction of the cotton plantations of the southern states.

In like manner we have the story of the botany professor who cleared the western United States irrigation ditches of a weed that was choking them and compelling the farmers to employ a man night and day to clear the intake of the pipe line. "Suspend a few crystals of copper sulphate in the ditches in little canvas bags," he advised. The weeds died and disappeared in a week. This scientist knew that copper was especially poisonous to that kind of weed. His practical knowledge increased the [illegible] of the whole irrigated region.

In Saskatchewan a [illegible] industry was having trouble with [illegible]. One of the professors of the University of Saskatchewan was called in, and as a result of his knowledge, investigations and tests, he found that the correct mixture of clays was not being made. He found a remedy, and the industry is now on a paying basis and expanding its operations.

The battle against rust in wheat and other parasites, the removal of [illegible] from wheat without impairing its milling and baking qualities, these and other important subjects are receiving the attention of the scientists of Canada, and [illegible] will mean hundreds of millions of dollars to the farmers of [illegible].

All of which only goes to demonstrate that every industrial interest [illegible] whether it be [illegible] or on the work of [illegible] from the farm [illegible] the forest or the fisheries, should strongly support the present movement for larger and more extensive research work in this Dominion. And of all [illegible] the farmer will probably prove to be the greatest gainer.

Alberta Crop Yield

It is estimated that the crop yield [illegible] Alberta [illegible] yield.

Little did our grandparents think [illegible] the day would ever come [illegible] the steering wheel would be the [illegible] circle.

New Match Company

The Columbia Match Company of Canada has taken out a Dominion charter with the purpose of acquiring the [illegible] of the Columbia Match Company, [illegible] and of erecting and operating a plant in Montreal.

Bing: "What! You and your wife [illegible] quarrel?"

Wing: "Well, we haven't quarreled [illegible] three weeks."

Bing: "How's that?"

Wing: "We're not on speaking [illegible]"

Shampoo Yourself With Cuticura Soap

Anoint the scalp, especially spots of dandruff and itching, if any, with Cuticura Ointment. Then shampoo with a suds of Cuticura Soap and warm water. Rinse thoroughly. A healthy scalp usually means good hair.

Cuticura Shaving Stick 25c.

Honor For Lost Fliers

Monument On French Coast Dedicated To Memory Of Nungesser and Coli

A monument honoring the memory of Captain Charles Nungesser and Captain Francois Coli has been dedicated at Etretat where the French airmen left the coast of France on their ill-starred attempt to fly to New York more than sixteen months ago. It bears the inscription: "To the Fliers Who Dared."

At the base of the column, which [illegible], are marble figures, three times life size, representing the two flyers. The monument has been erected on the cliffs at Etretat at the point over which Nungesser and Coli in their plane "White Bird" passed on May 9, 1927, before they disappeared in the west. On the front are engraved the words, "Nungesser and Coli, May, 1927."

The inscription on the reverse side recalls their attempt.

WEAK AND NERVOUS

A Condition Always Due To Thin, Watery Blood

Thin blood and weak nerves generally are found together. Red blooded people seldom complain of nervousness. The reason is that the blood feeds the nerves and keeps them toned up to do the work nature intended. When the blood is thin and weak it fails in this important function and nervous troubles follow. The following case will interest those who need a tonic for the blood and nerves. Mrs. D. Vene, Union Square, N.S., says: "With a feeling of gratitude I write to tell you what Dr. Williams' Pink Pills did for me. I had become badly run down, and reached the stage when I could not do my house work. I was not only weak, but my nerves seemed completely shattered. The least noise would startle me and I was subject to nervous headaches. Worse still, I could not sleep at night. Perhaps I would get an hour or two sleep, and then lie awake for the rest of the night. I had reached a stage when I actually feared I would lose my mind. Up to the time I decided to take Dr. Williams' Pink Pills, nothing I had taken seemed to do me any good. I got a few boxes of these and soon there was no doubt they were the medicine to help me. As I continued the use of the pills I gradually grew stronger, ate better and could sleep at night, and now I am as well and strong as a woman could wish to be. I hope some other weak, nervous person will be benefitted by my experience."

Dr. Williams' Pink Pills are sold by all medicine dealers or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

To Serve One Customer

Paris Store Opened For Sultan Of Morocco To Shop

One of the world's largest department stores ran full blast for just one customer recently.

Si Moulay Hemada, Sultan of Morocco, wanted to buy a thing or two and he insisted on doing his own shopping. His wish was a command to the Printemps store in Paris and for an hour, in the early evening, during the Sultan's recent incognito visit to France, everyone of the hundreds of clerks stood behind counters, scores of floorwalkers were at attention, and managers and French secret service men peered from behind piles of goods, while the young ruler, with his Grand Vizier, wandered about, buying everything that pleased his eye, leaving it for the Grand Vizier to foot the bill.

Do not allow worms to sap the vitality of your children. If not attended to, worms may work irreparable harm to the constitution of the infant. The little sufferers cannot voice their ailment, but there are many signs by which mothers are made aware that a dose of Miller's Worm Powders is necessary. These powders act quickly and will expel worms from the system without any inconvenience to the child.

"I wonder if that old fat girl is trying to flirt with me?"

I don't know, but I can easily find out by asking her, she's my wife.

The Man With Asthma, almost longs for death to end his suffering. He sees ahead only years of endless torment with intervals of rest which are themselves fraught with never-ceasing fear of renewed attacks. Let him turn to Dr. J. D. Kellogg's Asthma Remedy and know what complete relief it can give. Let him but use it faithfully and he will find his asthma a thing of the past.

Death Of Sir Horace Darwin

Sir Horace Darwin, son of Charles R. Darwin, who wrote the "Origin of Species," died recently at Cambridge, Eng. Sir Horace, who was himself noted as a scientist, had been in failing health for some time. He had invented and constructed many delicate seismological and aeronautical instruments.

Minard's Liniment—Popular for 50 years.

Transform Cadillac For Railway Service

Canadian Pacific Uses High Power Sedan For Inspection Work

A high power Cadillac sedan specially equipped with flanged steel tired wheels has just been issued from the Angus shops of the Canadian Pacific Railway at Montreal for the use of the Engineering Department of the company. Capable of travelling on the rails at as great a speed as upon the road, the machine will be used for inspection trips on C.P.R. lines throughout the country.

Service conditions are harder on the tracks for braking, and there are three systems on the car, the ordinary foot brake operating on the rear wheels, the conventional emergency brake, and a special supplementary brake applied by turning the steering wheel, acting through brake-shoes on the front wheels. The axels have been changed, the front axel being rigid and more rugged, and the rear axel, instead of being mounted in conjunction with the differential, [illegible] replaced by a one-piece alloy steel axel. This is driven by a single gear with a ratio of 4 to 1, in place of the ordinary differential ratio of 4 and ten elevenths to 1.

The wheels themselves are of special design and are equipped with rubber insulation between the steel tyre and the wheel centre in order to deaden shock at rail joints, switch points, diamonds and crossovers. The lighting system, moreover, has been supplemented to comply with railroad regulations.

The car is a comfortable sedan model and will enable officials of the Canadian Pacific's engineering department to cover great distances in a short time on their inspection trips under any weather conditions. It is the only machine of the kind at this time officially in the company's service, although other smaller motor cars on rails have been improvised in other parts of Canada.

Drawback To Ocean Service

Airplanes Forced To Take Fuel For Entire Trip

Sir Eric Geddes, chairman of Imperial Airways, Ltd., states a scheme to establish an air service between England and India is now being organized, and it is hoped that within 18 months machines will be taking passengers from England to Karachi in five or six days.

On the subject of trans-Atlantic flight Sir Eric said an ocean service was not now commercially possible for whereas on the projected Empire service the machines could be re-fuelled at intervals, the trans-Atlantic flyer had to take all the necessary fuel with him.

A Household Medicine. They that are acquainted with the sterling properties of Dr. Thomas' Eclectric Oil in the treatment of many ailments would not be without it in the house. It is truly a household medicine and as it is effective in dealing with many ordinary complaints it is an inexpensive medicine. So, keep it at hand, as the call for it may come most unexpectedly.

Entertained War Veterans

Belgium Honors Badly Wounded British Soldiers

Forty disabled British ex-soldiers were recently the guests of the British Disabled Soldiers' Association, Antwerp, who asked the British Legion to select a party of the most badly wounded men in Britain for a ten days' tour in Belgium as an indication of Belgium's admiration for, and gratitude to, the British Army.

The whole of Belgium's official life was represented in this feting of British heroes, who were selected by the Legion irrespective of social standing or rank. Some were so badly disabled that the War Office had sent with the party a detachment of the R.A.M.C. to attend to them on the journey. Practically all the men had lost limbs.

Schwartz: "Vare iss you working now?"

Krause: "I'm vorking in der zink mine."

Schwartz: "Der zinc mine?"

Krause: "Chess. Press one button und you come up, press anodder button und you zinc!"

We reckon if a kid could choose his own mother it wouldn't take him long to make the choice between one who could bake cookies and one who always knew what hand or bid to make when she had two five card suits.

An anti-aircraft shell, thought to be live, was unearthed by workmen excavating the roadway at Queen's Gate, Kensington Gardens, in London.

Headache? Relieve with Minard's Liniment.

"Modernize" Your Farm This Modern Way

Nearly every building on the farm can be greatly improved and "modernized" by Gyproc.

This famous wallboard is recommended by leading contractors for both new and old construction because it gives advantages offered by no other material—fire-safety, rigid strength, economy and cold and heat resistance.

All these vital advantages! And you get them for nothing—because Gyproc costs no more than products that have none of Gyproc's remarkable qualities.

Gyproc makes durable, permanent walls and ceilings in less time and at less cost. Gyproc Joint Filler on the joints assures a smooth, flat surface which takes any decoration—particularly suitable for Alabastine.

GYPROC Advantages for Farm Buildings

Easy to use.
Low cost.
Workable as lumber.
[illegible]
Takes any decoration.
Resists heat and cold.
Vermin proof.
Eliminates repairs.
[illegible]
Ideal for lining garages, poultry houses, barns, [illegible] and other farm buildings.
[illegible]

Radio May Control Street Cars

Radio experts prophesied a day when street cars and aeroplanes would be operated by distant radio control, following a demonstration at Chicago in which a surface car was operated by wireless from an automobile.

Ballplayer: "We gave the umpire fifty bucks to let us win the game."

Friend: "And still you lost?"

Player: "Yeah; the umpire was crooked."

A geographical mile is the length of one minute of latitude.

Humane Society Awards

The following were among the awards by the Royal Canadian Humane Association recently announced: Medals, David Johnston, Broadview, Saskatchewan; John D. White, Vancouver; John McHugh, Yukon Territory; Margaret Martin, Waterton Lakes, Alberta. Parchment certificates: Howard Mayers, White Rock, B.C.; Mary and Victoria Sherwood, Kaslo, B.C.; and W. H. Hepher, Powell, B.C.

Happiness and misery are the names of two extremes, the utmost bounds whereof we know not.

ASPIRIN

To break a cold harmlessly and in a hurry try an Aspirin tablet. And for headache. The action of Aspirin is very efficient, too, in cases of neuralgia, neuritis, even rheumatism and lumbago! And there's no after effect; doctors give Aspirin to children—often infants. Whenever there's pain, think of Aspirin. The genuine Aspirin has Bayer on the box and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

PROVINCES WILL CLAIM RIGHTS TO WATER POWER

Ottawa.—Dominion and provincial rights to water powers will be argued in the supreme court of Canada next week. Recognized as one of the most important questions with far-reaching ramifications which has come before the courts in years the matter undoubtedly will be carried to the Privy Council in England for final adjudication.

Development of the potential water powers of the St. Lawrence, international and interprovincial in character, development of water power on the Ottawa river and a number of other power projects, all these are vitally concerned in the points to be decided respecting Federal and provincial jurisdiction. The case probably will extend over two weeks.

The Dominion government and at least five of the provinces, Ontario, Quebec, Manitoba, Saskatchewan and British Columbia, will be represented.

Ontario and Quebec, through counsel, will take the leading part in opposition and will be supported by British Columbia. Manitoba and Saskatchewan probably also will be heard in argument in answer to the claim of the Dominion.

These provinces, broadly speaking, will contend that the water powers were vested in the provinces before confederation and were not transferred to Dominion Domain by virtue of the British North America Act. A further argument would put forward on behalf of the provinces that the Dominion has no right to these water powers and that any treaty respecting an international waterway must subordinate to the British North America Act.

Saskatchewan has its own legal representative at Ottawa who has already received instructions to appear at the Supreme Court hearing and watch Saskatchewan's interests.

Withdrawing From League Of Nations

Argentine Parliament Is Discontinuing Appropriations To Meet Dues

Geneva. — Argentina intends to withdraw from the League of Nations, it was indicated by advices from Buenos Aires stating that the Argentine parliament had decided to discontinue appropriations to meet league dues.

The news caused surprise and consternation in league circles. It was pointed out that the Argentine decision is tantamount to withdrawal, as no nation may remain a member of the league unless the financial obligations are met. Under the rules of the league any member nation that contemplates withdrawal must pay dues for two years after notification of withdrawal is given.

Canada Helps Storm Victims

Ottawa.—Hon. Ernest Lapointe, acting prime minister, announces that the government of Canada is subscribing the sum of $30,000 to the British West Indies hurricane relief committee. Mr. Lapointe stated that the step was taken after consultation with and upon the recommendation of the Canadian Red Cross.

May Appeal To Privy Council

Ottawa. — Permission to carry their appeal to the Privy Council in England will probably be granted to the Proprietary Articles Trade Association, found by the department of labor to be an association in restraint of trade. The matter, it is stated, is now before the department of justice.

Chinese Soldiers Face Starvation

Shanghai, China.—Generals of the Nationalist army notified Nanking headquarters that 100,000 soldiers are in danger of starving to death in the Chihli vicinity. The message also said the villagers were suffering from lack of food and soldiers were not provided with boots or blankets.

Fighting In China

Peking.—More than 2,000 Chihli-Shantung soldiers have been killed opposing the Nationalists northeast of Tien Tsin, says the Kuowen news service, reporting the surrender of the former Northern army.

Air Mail Service Starts

Toronto. Daily air mail service between Montreal and Toronto, and an international service between Montreal and Albany, N.Y., started October 1.

Does Not Need Warships

South Africa Protected By British Fleet, Says General Smuts

Capetown, South Africa.—Speaking to an audience which was predominantly of Dutch origin, General Jan Christian Smuts, leader of the opposition in the assembly, was vigorously applauded in a memorable speech on the [illegible] question.

General Smuts at one point declared: "If we were not within the empire we would have to go to America or France, or some other big country to protect us because we are not safe. One warship could bring us to our knees. But today we are not considered in a kraal. We are in a friendly circle with a powerful British fleet to help us if any injustice is planned toward us.

"We need not spend millions on a fleet," General Smuts continued, "but can concentrate on projects of development so necessary to a young country. The British Empire is not a bond tying us, but also is a helping hand."

Cement Firms Protest

Producers Will Contest Move For Removal Of Duty

Ottawa.—Contesting the application of the Canadian Council of Agriculture for removal of the import duty on cement, representatives of the cement producers in Canada continued the survey of facts relating to the industry before the tariff advisory board.

In the brief of the Canadian Council of Agriculture, which was filed recently, it was claimed that the prosperous condition of the industry did not justify continuance of the existing import duties. In opening the case for the producers generally, Professor J. Jackson, Toronto, categorically denied the claims of the applicants. He sought to prove that the cost of production did not leave 87.5 per cent. of the sales to provide overhead and profits, as maintained in the brief of the council of agriculture.

Will Make Second Attempt Next Year

American Pilot Stranded On Flight [illegible]

Copenhagen.—Bert Hassell, American flyer, who arrived here from Greenland with his trans-Atlantic companion, Parker Cramer, announced he would make another attempt next year to fly from the U.S. to Stockholm by way of Greenland. Hassell and Cramer, who were rescued in Greenland after having been stranded in the Arctic wastes, arrived at Copenhagen aboard the steamer Fulton.

They were accompanied by Prof. William H. Hobbs, leader of the University of Michigan Greenland expedition, which had brought them to safety.

Canada Will Be Represented

Ottawa.—Canada will be represented at the International Air Conference, which takes place in Washington in December. This was stated officially at the Department of National Defence. Canada's representative has not yet been selected but an announcement with respect to the selection will be made later. The conference has to do with civil aviation.

Zeppelin To Start October 10

London. — Germany's new trans-Atlantic dirigible, Count Zeppelin, will start its first flight to America not later than October 10, says an Exchange Telegraph despatch from Berlin. The generally favorable weather predicted for the North Atlantic during the first two weeks of October makes a start at that time almost certain, the despatch said.

B.C. Cabinet Unopposed

Vancouver. — The nine portfolio holding members of the British Columbia cabinet, headed by Hon. Dr. S. F. Tolmie, premier and minister of railways, were re-elected to the provincial legislature when they were unopposed at nomination proceedings. Voting was to have taken place on October 4, if there had been contests.

Swedish Government Resigns

Stockholm.—The government of Premier Ekman, leader of the central bloc, resigned as an outcome of the recent election in which the government party lost several seats, including that of Foreign Minister Lodgren.

Mayor Of Cardston Dead

Lethbridge.—Mayor Mark Spencer, Cardston, pioneer and eight times chief magistrate of that town, died recently at Rochester, Minn.

Will Analyze Frosted Wheat

Scientists At University of Saskatchewan Have Started Work

Saskatoon, Sask.—Now that four Canadian scientific laboratories, including that of the University of Saskatchewan, have determined that milling and baking qualities are not lessened by toughening or dampening of grain, scientists here, in collaboration with the investigations carried on elsewhere in Canada, are turning their attention chiefly to frosted wheat.

With painstaking effort as to detail, the Saskatchewan University laboratory, under general supervision of Dr. T. Thorvaldson, professor of chemistry, and direct supervision of Dr. R. K. Larmer, has begun work with the object of determining the actual damage done by frost to the milling and baking quality of wheat.

FEDERAL AID FOR HIGHWAYS SHOULD CONTINUE

Regina. — That federal aid for highways should be continued with additional aid to the various provinces was the view of the delegates attending the 15th annual convention of the Canadian Good Roads Association who dealt with many other matters of interest during the sessions here. Elimination of level crossings, building cement bridges and roads, the financial responsibility of urban municipalities in road development, gasoline taxes and winter roads all had their place on the agenda.

Hon. O. L. McPherson, minister of public works for Alberta, was unanimously chosen president of the association and other officers were elected. Seven invitations were presented for next year's meeting place and, while no decision was arrived at, Prince Edward Island would seem to be in favor with the delegates.

When the subject of Federal aid for highways was under review the discussions arising from this topic were crystallized in the following resolution:

"Resolved, that in view of the very marked and acknowledged benefit which comes to Canada as a whole because of the large investments being made in the highway construction and maintenance by various municipal and provincial bodies, such benefit being of a far reaching nature and affecting many branches of Dominion government service; and whereas the Federal government has collected in excess of $200,000,000 during the past 10 years which can be directly or indirectly traced to highways; and in view of the fact that the Federal government recognized its interest in highways by a first grant of $20,000,000, which has been expended, and, in view of the increase in highway travel throughout Canada, this association, in annual convention assembled, reaffirm its oft-stated belief in Federal aid to highways and that additional aid should be granted at the earliest possible moment to the various provinces and the executive committee is hereby instructed to make every reasonable effort to have this resolution made effective."

Director Of Cancer Research

Dr. Ellice McDonald, shown above, who believes that he can forestall cancer by treating the subject through the administration of thyroid gland extract and other means. Dr. McDonald is director of cancer research at the University of Pennsylvania and the Philadelphia General Hospital. Dr. McDonald is a Canadian who had his early education at Winnipeg and finished it in Toronto. He has three brothers, Brig.-Gen. H. F. McDonald, C.M.G., D.S.O., of Winnipeg; D. H. McDonald, M.P.P., of Qu'Appelle, Sask., and F. A. McDonald, Winnipeg.

Attending University Of British Columbia

Percy Williams Will Take Freshman's Course In Vancouver

Vancouver. — Percy Williams, Olympic 100 and 200 metre champion, will attend the University of British Columbia here for one year. After that he will take the business administration course at the University of Washington. This was decided at a meeting of members of the committee in charge of Williams' affairs here, [illegible] Williams attended.

Williams spent two days in Seattle and returned home in order to discuss all angles of his situation with his friends here. He had been invited to attend the Washington institution.

"He is remaining in Vancouver for the year because he feels that it would be unfair to those who welcomed him so wonderfully and who have been so good to him to leave," a member of the committee said.

Expresses Sympathy For Florida Sufferers

King George Cabled Condolences To President Coolidge

London.—That King George takes a keen interest in world affairs is evidenced by the cable sent by him to President Coolidge, expressing his sympathy to the people of the U.S. for the sufferers in the Florida hurricane.

The message read: "I desire to express to you and through you as kind intermediary to the American people, my sincere condolences upon the disaster which has recently overwhelmed Porto Rico, the Virgin Islands and the state of Florida as a result of the recent hurricane and my sympathy with all those that have suffered from its effects."

E. Philpott, British harvester from Liverpool, England, at work in a farming field of Vulcan, Alta.

Anglo-French Naval Pact

United States Government Rejects Agreement In Note Sent To Both Powers

Washington, Sept. 28.—An unqualified rejection of the so-called secret Anglo-French naval accord as a basis for renewed discussions on naval arms limitations is understood to be contained in the United States replies to Great Britain and France which were forwarded to Paris and London.

A separate note for each government was sent the American embassies for transmittal to the foreign offices.

It had been expected one note would be sent to both governments. Although it was learned the notes are not identical in form they are understood to be similar to each other in their essential facts.

It is understood both notes comprise a lengthy discussion of the American stand on naval disarmaments with respect to cruisers and submarines. This subject has been the centre of disagreement between the United States and Great Britain and is held to have caused the failure of the 1927 Geneva conference.

As indicated at the White House it is expected the notes will reiterate the United States stand on naval disarmaments as outlined at the 1927 Geneva conference.

Entertaining Premier King

Entire British Cabinet Invited To Dinner At Savoy Hotel

London.—Premier Stanley Baldwin and the whole cabinet have been invited to the dinner to be tendered to Premier Mackenzie King of Canada by the Canada Club on October 18. This will be Mr. King's only speaking engagement in England. He will spend only one week in England and during that time is in hopes of getting about to see the countryside. Hon. P. C. Larkin, Canadian High Commissioner, will preside at the dinner, which will be held at the Savoy hotel.

Forty Killed By Explosion

Powder Magazine In Old Spanish Fort Caused Accident

Melilla, Morocco.—By an explosion of the powder magazine of the ancient Spanish fort of Cabrerizas Bajas forty persons were killed and 200 injured, some of them probably fatally.

The explosion demolished the old citadel, on a rocky hill overlooking the town. All houses around the citadel were destroyed.

Women and children were among the dead and injured. Nine soldiers of the Spanish garrison at the fort were killed. The government appropriated 25,000 pesetas ($4,125) for relief of the families of victims.

CAMPAIGN IS ON FOR ELECTIONS IN GREAT BRITAIN

Yarmouth, Eng.—The first open move in a nation-wide campaign for the forthcoming British general election, when Prime Minister Stanley Baldwin and his government appeal to the British voters for another five-year mandate, will be made here when 2,600 Conservative delegates, a record gathering of its kind, go into conference to hammer out a party platform.

Within a month from now Conservatives, Liberals and Labor, by means of their annual conferences will determine the issues upon which they will wage the biggest party struggle in this country since the Great War.

The most intense fights are expected on tariff questions, the extension of protective measures by means of "safeguarding" of industries by special import duties.

British political strategists are getting ready to adopt new means and methods of appealing to the public.

Close watch is kept on the rapid development of wireless and talking movies. "Talkies" are being made of Baldwin and other political leaders; motor cars and trucks with the latest broadcasting apparatus made ready for swift campaigns through the country districts. The hunt for party songs is on, and again the Conservatives are in the lead with song sheets already issued.

One ditty delicately alludes to the "flapper" vote, that uncertain bloc of five million newly-enfranchised young women for whom all parties are angling, all claiming flapper support, and none too certain of it.

MAKING EVERY EFFORT TO BRING BRITISHERS HERE

Winnipeg. — That there was no foundation for the charge made by Bishop Lloyd of Saskatchewan at a luncheon here "that there has been and is today a deliberate attempt to keep the British out of Canada," was the declaration made by Hon. Robert Forke, minister of immigration.

Speaking over the long distance telephone from his farm at Pipestone, Hon. Mr. Forke said: "We are doing every thing possible to bring in Britishers whom we think are willing and capable of working on Canadian farms, no matter what district they come from.

"We are paying, with the help of the British Government and the railways, their passage to their Canadian destination. We are giving them this money so that their start will not be surrounded with so many difficulties encountered by the earlier pioneers and those who today are coming in from non-British countries.

"We are associating ourselves with every good organization, having the British people's best interest at heart, to advance the settlement of British in Canada and we are doing nothing for members of any other nationality who are coming into Canada.

"What else should we do or can we do in all practical commonsense that we are not now doing?"

Manitoba Resources

Mr. Justice Turgeon Appointed Chairman Of Commission To Deal With Question

Ottawa, Ont. Mr. Justice Turgeon, of Saskatchewan, who was appointed chairman of the commission appointed to inquire into and decide upon the various matters in connection with the return to Manitoba of her natural resources, is in the capital arranging for the organization of the commission.

Mr. Justice Turgeon's colleagues on the commission are C. M. Bowman, of Lordon, Ont., and Hon. T. A. Crerar, of Winnipeg. A secretary to the commission will be appointed in a few days, said Mr. Turgeon, and thereupon an organization meeting will be held, probably in Ottawa.

Gate Receipts Cover Expenses

Montreal. Quite contrary to all expectations and customs, the Olympic games at Amsterdam paid for themselves this year. This was learned in an announcement made by the Netherlands consulate here. Official figures are lacking, but it is understood that gate receipts will pay for all monies advanced the Dutch Olympic committee by the government and individual subscription.

Decline In Unemployment

Stockholm.—Unemployment is on a steady decline in Sweden. Latest government figures, just released, show that the number of people out of work who applied for aid in July was 9,800 as compared to 11,160 in June, or a decrease of about 14.9 per cent.

Support For Gov. Smith

New York.—Representative Mary T. Norton, Democrat, New Jersey, in an address broadcast from here, appealed to women to vote for Governor Smith, whom she termed "the greatest humanitarian this country has ever produced."

Rain Damages Ontario Crops

Sault Ste. Marie, Ont.—Heavy rains and continued cold weather are alarming farmers of this district. Scores of acres of grain are said to be rotting in the fields, and potatoes planted on low ground are being ruined by excessive moisture.

Exhibit Of Canadian Fruit

Winnipeg, Man.—Choice Canadian fruit for English exhibition and display passed through Montreal on the way to Manchester and London, being conveyed with special precautions by the Canadian National Express Company.

Enters Novel Plea

Detroit.—A plea that he was walking in his sleep when he shot and killed his wife, Amelia, has been entered as a defence for Chester Kutalek, 48, on trial here charged with murder.

France is the only European country whose present birth-rate shows an improvement on the pre-war figure.

TO THE PEOPLE OF THE CHUR... will be given to who ever your wood inspector is next week.

HILL M.D. NO. 697

In taking over the duties of ... I should also like to thank the ... for the assistance ... during ... past in ... namely to ... power to help the farmer and ... owners ... bring under control the most dangerous of our noxious weeds.

I should like through the medium of the paper to thank the farmers and others for the co-operation given me in this work this summer, and I trust that the same co-operation

Yours for continued prosperity

Tofield Farmers Supply Co., Tofield

WHEAT POOL NEWS BULLETIN

During the month of August, 1933, a total of 3,551 carloads were received at Pool elevators. The number of contracts executed a total of 613,764; acres of wheat or an average for 27 working days during this period of 143 contracts and 16,446 acres per day. Since the opening of the Second Series contract 19,264 new members have been added to the association.

Deliveries to Alberta Pool elevators reached a high water mark on September 24th when over one million bushels of grain were reported.

British Columbia Wheat Growers are joining the Alberta Wheat Pool, they find it much to their advantage to do so.

Leighton McCarthy, K.C., a Toronto lawyer and financier, said in a speech delivered in Calgary that the Wheat Pool was Canada's largest commercial undertaking, and remarked that western farmers appear to be realizing the advantages of close organization.

By the end of the present year the total number of Alberta Pool elevators will be 507 or an addition of 141 houses during the year.

BRITAIN HAS AUTOMATIC GEAR CHANGING DEVICE.

For the first time in the history of British motoring, an automatic gear changing device will be available to the motoring public at the Olympia Show in November on a high class car. The Armstrong-Siddeley 30 h.p. and 20 h.p. models will be thus equipped. A pointer on a small dial on the steering wheel selects the gear after which the pedal actuates the mechanism automatically.

The new device, it is claimed, allows rapid getaway, a quick fast-speed gear change, and equally silent running of all gears.

EDMONTON FIRE CLAIMS THREE LIVES

Sleeping in a reeking room filled with smoke in the basement and near the stairway, five members of a family of three and caused the fire, others in the building escaped. Jasper Avenue, shortly after 5 p.m. on Wednesday. Within a quarter of the time the fire was first discovered, a searing, stifling mass of flames roared up the stairway of the block, cutting off the occupants of the front rooms from the fire escapes which were at the rear.

Chrysler Plymouth Cars

MECHANICAL EXCELLENCE THAT GOES FAR BEYOND ACCEPTED STANDARDS

In new and original engineering features, and in its construction all the way through, the new Plymouth goes so far beyond the accepted standards that it is a revelation even to mechanical experts. Chief among the new developments is the latest and greatest product of the Chrysler engineering staff—the new "Silver Dome" high compression engine. Through the perfection of this great motor the advantages of high compression—greater power, greater climbing ability, greater speed and greater acceleration—can be obtained through the use of the ordinary gasolenes.

MAIN STREET. — TOFIELD

LOCAL AND PERSONAL

Mr. and Mrs. L. C. Hay motored to Edmonton on Thursday last.

D. M. Morrison spent Tuesday in the city.

Mr. A. B. Evanson visited at the Jobb home over the week end.

Mrs. Hannan left for North Bend, Ontario, on Tuesday, to see her father who is ill.

Mr. and Mrs. Rowe and Mr. and Mrs. Bruce motored to the city one day last week.

Don't forget the dance and basket social in the Community Hall, on Friday, October 19th.

Born.—To Mr. and Mrs. L. Scott, on October 5th, at the Royal Alexandra hospital, Edmonton, a daughter.

Quite a large number of young people are going to Viking on Friday to attend a Young People's Church Conference there.

Mrs. W. L. Parsons was the chosen delegate to the ninth quorum convention to be held at Camrose, October 12th, 13th, and 14th.

There are more new hats at Lisolle's Beauty Parlor, and nothing is or $6.50. These millinery creations represent first class value.

Mr. and Mrs. Clotterham and Blake and Miss L. Ross motored to Viking on Sunday. Miss Eva Clotterham returned with them.

The Women's Institute will hold a tag day on Saturday, October 28th, in aid of the Wood's Home, Calgary. The little girls will go round with the tags.

Mrs. Gordon and children, who have been visiting Mr. and Mrs. A. J. Jones, returned to their home at Innisfail on Sunday. Mr. and Mrs. Ross motored to Innisfail with them.

Mrs. Herndon, who has been visiting Leadle for some time, returned home this week. Just prior to returning home she visited her daughter, Mrs. Church, at Wainwright.

A number of members of the W.I. motored to the home of Mrs. Verge, DeVille and held their regular meeting. In addition to attending to business matters, a very enjoyable social time was spent.

Mrs. J. B. Hyslop of Edmonton (nee Miss Alice Van Dusbirk) suffered the loss of her little son Bertram Algwin, on September 29th. Mrs. W. Hopgood attended the funeral, which was held in Edmonton on Monday.

Mr. Eldon Rook has been spending some time at the Roy Rook home. Eldon will be remembered by many of his old neighbors when he lived here with his parents some ten years ago. Later they moved to Manitoba and from there to Kansas.

Something approaching a record, if not a record, was made recently by Mr. Peter Lee marketed four pigs. These pigs were five and one half months old and weighed, all together, 1,000 pounds. This makes an average weight of 217½ pounds.

Mrs. Gordon was taken to an Edmonton hospital early this week, where she will undergo treatment for heart trouble. At time of writing her condition is grave, but her many friends are hoping and praying for her recovery.

The first Wiener Roast of the season was held in the pasture of Mr. and Mrs. Wallace Herndon on Thursday last. The weather was glorious, and the rousing bon fire made a most festive scene. Ample justice was done to the bountiful lunch and and roasted wieners and gobed stories were told and jolly games played by the camp fire light. Everyone voted a grand good time and extend hearty thanks to Mr. and Mrs. Wallace Herndon.

RED ROSE TEA "is good tea"

Red Rose Orange Pekoe is the finest tea in the best package—Aluminum

The Progress of Canada

Canada is forging steadily, even rapidly, to the front among the nations of the world. In all things material it is making great growth. Its trade both domestic and foreign is expanding as never before and as a result every branch of industry is active. The country has just harvested one of the largest crops in its history, mining discoveries and operations are proceeding at an unprecedented rate, factories are working overtime, building operations in all provinces are reaching totals hitherto unrecorded, with the result that employment is general, wages good and population increasing.

Important and gratifying as the material growth and prevailing prosperity is to the people, a much more vital matter to Canada is whether the Dominion is making progress in those other directions which are essential to the building of a nation in the truest sense. Are the Canadian people becoming merely a nation of money-seekers measuring their success in terms of dollars and valuations, recording economic development and growth, or are they utilizing the larger advantages and increased power which material prosperity is conferring upon them to encourage and develop those aims and characteristics which stamp a people as truly advancing to greatness?

We believe we can generally point to the fact that the people of Canada, taken as a whole, more intensely interested today in the spiritual, ... growth of their country than at any previous period, that ... are deeply concerned and very determined that the national ideals and character shall be maintained at a high level.

The widespread interest in and discussion of the subject of immigration is but one manifestation of this spirit. Considered solely from a material standpoint it would probably pay Canada to enormously increase its population just as rapidly as possible. Economically Canada would probably gain by annexation by the United States. But Canadians are insistent that quality rather than quantity shall be the governing factor in our immigration policy and it would be hard to muster a corporal's guard of outstanding men who favor the policy of United States annexation.

Throughout Canada increasingly sympathetic attention is being given to the assimilation of the non-British peoples within our borders into the Canadian family. Here and there people may adopt an unfriendly and unfair attitude towards these people, and to that extent retard the good work, but they are exceptions to the generality of Canadians. More and more is it being realized that these people are making a real contribution to the national life of Canada, bringing to us music, poetry, traditions and handicrafts which are enriching this Dominion.

The increased attention being given to musical festivals and symphony orchestras, to the establishment of art galleries and museums, to scientific research, to literature and the rapidly increasing number of libraries, and to the steady improvement in Canadian magazines and publications ...

CUTICURA HEALS SKIN TROUBLE

Sore Eruptions Broke Out Over Face. Itched and Burned.

The whole world knows Aspirin as an effective antidote for pain. But it's just as important to know that there is only one genuine Aspirin. The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it is not. Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any drugstore—with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

VISCOUNT PEEL VOICES THANKS OF EMPIRE PARTY

Sydney, N.S.—Delegates of the Empire Parliamentary Association have bade their farewells to Canada. "We have been treated like princes. We have been received like old friends," exclaimed Viscount Peel, chairman of the delegation, addressing a ... given by the Canadian club and city of Sydney. And to his words of farewell and gratitude were added those of representatives from every parliament in the Empire.

In their journeyings through Canada, Lord Peel felt, members of the British delegation had been able to remove misconceptions. It had been thought in some quarters apparently that the Empire marketing board was an instrument for pushing British goods in Empire markets. In reality it was designed to push Empire goods in the British market and the cost fell on the British taxpayer. It had been thought, in some quarters, that the unemployment insurance, miscalled the "dole," was demoralizing charity. In reality the employee paid his share to a fund and was entitled as of right to his insurance payment when the curse of unemployment fell upon him.

"We have heard it suggested," Lord Peel added, "that we desire to load Canada with inefficient unemployed.

Fire Takes Four Lives

When Farm Home Near Brandon Was Completely Destroyed

Brandon, Man.—Four persons were burned to death when the farm home of Alex Wilson, near Moore Park, Man., was destroyed by fire.

The dead: Mr. and Mrs. Alex Wilson, Mervin Wilson, their son, and Miss Sarah Wilson, Mr. Wilson's sister.

The fire was discovered by I. M. Harrison, a neighbor, when he was awakened by the reflection of the flames upon his windows. He put on his clothing and rushed out to discover that the Wilson house was on fire. The blaze was too far advanced at the time to permit rescue work.

W. E. Mann, general storekeeper at Moore Park, father of Mrs. Wilson, was also quickly on the scene, but the heat was so intense that he could not get near the building.

All of the bodies were recovered. The cause of the fire is a mystery. The barn, garage and other buildings on the farm were unharmed.

HOLY TRINITY CHURCH HARVEST THANKSGIVING SERVICES OCTOBER 14th

The annual harvest thanksgiving services will be held in the Holy Trinity Church on Sunday, October 14th. Holy Communion will be celebrated at 11.00 a.m., and service will be held at 7.30 p.m. Rev. Nugent Wilson, former Anglican clergyman here, will conduct the services.

PUBLIC NOTICE

Town of Tofield—Re Sanitary Conditions.

Notice is hereby given that all persons having accumulations of garbage, or privies in an unsanitary condition, will be expected to clean up within a reasonable time after the publication of this notice. It is expected that a thorough inspection of the town will be made by a Provincial Sanitary inspector in the near future.

Mr. T. Walkington is available and prepared to undertake any work of this nature at the present time.

J. W. CHAPMAN,
Secretary, Local Board of Health.

APOLOGY

I, Donald McCowan, having made certain statements to neighbours that Gilbert Braaten intended to charge me at [illegible] price for certain [illegible] which were lost from [illegible] pasture and for which I was responsible, hereby wish to tender an apology to the said Gilbert Braaten, and to say that such said statements made by me were [illegible].

LAKE SHORE

We are pleased to report that Marven Seale who was quite ill last week with pneumonia is much improved. Miss Ardis Wood cared for him for several days.

Mr. and Mrs. Sewell Booth of Ryley were Sunday guests at the T. W. Ferguson home. Mrs. Elmo Ferguson and children visited there also.

APPLICATION FOR LEASE OF ROAD ALLOWANCE OR SURVEYED HIGHWAY

Notice is hereby given that Grahn Bros. of Hay Lakes has made application to the Minister of Public Works, Edmonton, for a lease of the following road allowance or surveyed highway, viz. Fraction of Road allowance through Stove Lake between sections 19 and 20, Township 50, Range 20, west of the 4th.

Any protest against the granting of the above mentioned lease must be forwarded to the Minister of Public Works, Edmonton, within thirty days from the date of this notice.

Dated at Tofield, September 20th, 1928.

GRAHN BROS., Hay Lakes, Alta.

C.P.R. TO BUILD SETTLERS' HOMES

Winnipeg, Oct. 9.—Confirmation of the statement that the Canadian Pacific railway was proceeding to the construction of 100 cottages in the prairie provinces in accordance with the British land settlement scheme proposed by Col. J. S. Dennis, of Montreal, head of the Company's colonization department.

Twenty cottages will be built on property of farmers in districts yet to be selected and applications already exceed the number to be constructed this fall. They will be available for settlers in the spring it is hoped.

Dr. McCord and friend from Edmonton spent the week end with Mr. and Mrs. Roe Phillips.

Mr. and Mrs. Johnston Ferguson of Tofield were callers at the A. N. Booth home on Sunday.

Mr. and Mrs. R. C. Phillips visited Mr. Peter Gates of Ross Creek on Sunday afternoon and evening.

Mr. and Mrs. John Chapman, Mr. and Mrs. W. Chapman and Mrs. Emery of Tofield, called on Mr. and Mrs. Jack Johnson on Sunday.

Archie Pruden of High River spent a day or two last week with Wm. Seale of this district.

W.I. NOTES

On Saturday, October 20th, there will be a tag day in Tofield for the Woods Orphanage at Calgary. This is a very worthy cause and we all should be happy to be tagged on this day. This home not only takes in but those children in the same home who have been left without parents. In this way Mr. Wood keeps families together. The girls will be around to see you all and kindly respond as we never know the amount of happiness our help will bring to these unfortunate children.

HARVEST THANKSGIVING SERVICES AT ANGLICAN CHURCH WELL ATTENDED

The Harvest Thanksgiving services held at the Holy Trinity Church on Sunday last were well atended, the church being comfortably filled at the evening service and about forty or fifty present at the morning service.

The Rev. Nugent Wilson, of Lincolnshire, England, former minister here, conducted both services preaching appropriate sermons.

The church had been very tastefully decorated for the occasion, and the spirit of thanksgiving was in the air.

Rev. Nugent Wilson left on the evening train for Edmonton, and will shortly leave Edmonton for the east.

Chrysler Plymouth Cars

MECHANICAL EXCELLENCE THAT GOES FAR BEYOND ACCEPTED STANDARDS

In new and original engineering features, and in its construction all the way through, the new Plymouth goes so far beyond the accepted standards that it is a revelation even to mechanical experts. Chief among the new developments is the latest and greatest product of the Chrysler engineering staff —the new "Silver Dome" high compression engine. Through the perfection of this great motor the advantages of high compression—greater power, greater climbing ability, greater speed and greater acceleration—can be obtained through the use of the ordinary gasolenes.

LOCAL AND PERSONAL

Mr. and Mrs. Fred Griswold motored to Edmonton on Sunday.

Mrs. Paridis of Edmonton was in Tofield over the week end.

Mrs. C. Craig was visiting in Edmonton over the week end.

Miss Dorothy Hay spent the week end in the city.

Mr. and Mrs. L. C. Hay visited the city on Tuesday.

Mrs. W. Robinson of Wainwright was a visitor at the Rowe home last week.

Mr. and Mrs. Will Bowick and family visited with their daughter, Mrs. Harman Lewis at Edgerton this week.

Lawrence Hawkey of Vegreville, was a guest at the Rowe home over the week end. Mr. Hawkey is Mrs. Rowe's nephew.

Mr. and Mrs. Fontaine had some friends from Edmonton and Pickardville, visiting at their home during the week end.

Mrs. M. L. Shupe of Wichita, Kan., U.S.A., is visiting at the home of her daughter, Mrs. A. Hosler and son, Frank Shupe.

Mr. and Mrs. A. Hosler, Mr. and Mrs. Frank Shupe, and Mrs. L. M. Shupe motored to New Sarepta on Sunday and visited at the Allan Lewis [illegible].

Mr. and Mrs. Tom Robinson and family of Scott, Sask., visited relatives here for two weeks leaving on Monday for their home.

Mr. and Mrs. Wm. Thompson and family visited at the W. A. Mitchell home on Saturday evening.

Mr. and Mrs. John McGinitie spent Sunday with Mr. and Mrs. Thompson.

A report appeared in the daily papers this week, of a number of Alberta candidates had successfully passed the medical council examinations. Among the list was the name of Dr. C. G. Bain, of Tofield. Dr. Bain has for the past year or so been on the medical staff of the Mayo Institute at [illegible].

W. BELLAMY TO MANAGE THE SKATING RINK

At a meeting of the Town Council held on Monday night last, the question of rink management was well to the fore.

A proposal was put to the council by W. Bellamy whereby he would assume management at the rink for $50.00 per month for four months, the council to lay the ice and put in new stoves and do some general repair work.

The town will receive all proceeds from the sale of tickets, rink percentage of hockey games, etc.

HEALTH CLINIC TO BE HELD AT TOFIELD

On October 20th and 21st, in a building yet to be procured, there will be held at Tofield, a health clinic.

During the present week, Nurse Thompson, has been examining all the children in the Tofield schools and during the forthcoming week will examine children in a number of the rural schools near Tofield.

The following is the proposed schedule: Monday, October 22nd Ingram school in the forenoon; Amisk Creek in the afternoon; Tuesday, Anderson school; Wednesday Grand Forks in the morning, afternoon Farmington; Thursday morning Ketchamoot; afternoon, Woodlawn; Friday forenoon Lakeshore; afternoon McKenzie.

DELEGATION WAITS ON COUNCIL RE SKATING RINK

On Monday night a delegation consisting of R. W. Pipcott, A. P. Harold, R. McCarthy, and W. Worton waited on the Tofield Council regarding the management of the Tofield skating rink.

R. W. Pipcott addressed the council regarding conditions there for the past two seasons and urged that some better arrangement be made.

Brief speeches were also made by the other members of the delegation.

The council accorded the delegation a courteous reception and promised to do all in their power to improve conditions.

Those present on the council were G. Bruce, acting mayor; J. Chapman, L. C. Hay, E. Rogers, W. C. Swift.

C.S.E.T. AND C.G.I.T. CONFERENCE HELD AT VIKING

The annual C.S.E.T. and C.G.I.T. conference was held in Viking from Friday, October 12th, to Sunday night October 14th. There were delegates there representing Irma, Daysland, Wainwright, Tofield and other towns.

The Tofield delegates were Rita Burnett and Marge Craig for senior C.G.I.T.; Winnie Worton and Dorothy Kendall for junior C.G.I.T.; Ed. Hill and Sidney Worton for the Tuxis boys; and Blake Clutterham, Gerald Thompson and Jack Whyte for the Trail Rangers.

All the delegates on Friday night assembled in the church and were divided into discussion groups, each group discussing certain phases of the boys and girls work. On Saturday morning this discussion work was resumed and Saturday afternoon was entirely devoted to sports, consisting of baseball, basketball, volleyball, high jump, running, etc. At 6:30 in the evening everybody assembled at the church where the ladies had prepared a most appetizing supper, after which a sing-song was enjoyed, interspersed by speeches given by Mr. Gordon Lapp and Miss Mabel [illegible], Mr. Tom Haythorn and Mr. John Farrell. The speakers were boy and girl work leaders.

Sunday was spent at Sunday school and church.

Other Tofielders attending the conference included W. Swift, W. Landie, P. Thompson, W. Worton, E. McLean, H. Bowick, Bert Swift and Gordon Jobb.

TENDERS WANTED

Tenders are requested for the caretaker's position of the Tofield Curling rink for the season of 1928—9.

Parties interested are requested to apply to W. Chapman for full particulars.

LAKESHORE

Born.—To Mr. and Mrs. John Wood on Thursday, October 11th, a daughter. Congratulations.

The Eaton families motored to Lamont on Sunday.

The Noland family visited friends at Deville on Sunday.

The young people from the Ferguson family and Miss Emma Bruha visited at the latter's home near Shonts on Sunday afternoon.

Mr. and Mrs. Chas. Plants and Son, Clifford of Woodlawn, visited Mr. and Mrs. Phillips on Sunday.

Mrs. Bethel and daughter, Mildred, called at the John Wood home on Sunday morning.

Mr. and Mrs. Bethel were visitors at Chas. Kallal's on Sunday afternoon and evening.

KETCHAMOOT

All the threshing was finished last week, the earliest yet. The crops were very light owing to hail and frost, but we are hoping for better next year.

Mrs. Austin McBeth and children returned to their home in Calgary on Wednesday. Mrs. O. Barnes accompanied them home.

Mr. and Mrs. Hugh Mitchell, Mrs. M. Ingram Sr., and Mrs. P. F. Ingram were the guests of Mr. and Mrs. G. W. Sears on Sunday.

Miss Martha Soma is spending the week at the Frank Hull home.

The many friends of Mrs. Gordon are glad to hear she has taken a turn for the better and sincerely hope she will continue to improve.

In spite of the threshing season and disagreeable weather a pleasant afternoon was spent at the Wm. Lee home last Wednesday, when Mrs. Lee entertained the M.A.S. A large gathering of members was present and several visitors. These were Grandma Mitchell, Mrs. Shupe Sr., Mrs. P. F. Ingram, Mrs. Kitchener, Mrs. Harrison and Mrs. Torie, Misses F. Fawcett and Mildred Lawson. After the meeting a social hour was spent when Mrs. Lee and daughter served a delicious lunch. The November meeting will be held with Mrs. Geo. Lawson.

Mr. and Mrs. Hugh Mitchell and daughter Mrs. P. F. Ingram left on Tuesday for their home in Victoria, where Mr. and Mrs. Mitchell will spend the winter with their daughter. We will miss them but look forward to seeing them back again and wish for them a pleasant trip and a safe return.

Mrs. Shupe Sr., of Witchata, Kan., is visiting her son, Frank and family and daughter Mrs. Hosler and family and old time friends.

Mr. and Mrs. Frank Shupe and daughter, Mr. and Mrs. Hosler and mother, Mrs. Shupe, motored to New Sarepta on Sunday and spent the day visiting Mr. and Mrs. Allan Lewis and family.

The ladies of the M.A.S. will hold a Thanksgiving "At Home" on Friday afternoon and evening, November [illegible] at the home of Mr. and Mrs. J. Appleby. All kinds of fancy and useful articles will be on sale also sale of home cooking and a social evening. A 25c. lunch will be served both afternoon and evening. This "At Home" will take the place of our annual Thanksgiving supper and no doubt will prove more satisfactory. Come and meet your friends and have a delicious farm lunch lunch, and take the extra amount home to eat later. A pleasant time is anticipated.

AMISK CREEK

Mr. E. A. Moen the local shipper for the Pool shipped four carloads of cattle and hogs from Tofield last week.

The Ladies' Aid held their monthly meeting at Mrs. E. A. Moen's home on Wednesday of last week. The attendance was good, a number of visitors and nearly all the members being present. The following day being Mrs. Moen's birthday, the friends and neighbors presented her with a small sum of money and many good wishes and happy returns of the day. The next meeting will be at A. Erickson's home with Mrs. C. Kjoring as hostess.

A social meeting was held at the P. O. Flaaten home last Friday evening. A Young People's League was organized with Gunvald Flaaten as president and Wilburn Anderson as secretary-treasurer. The young people are going to have a program every Sunday evening in the church and social meetings once a month. We wish them every success.

Mr. and Mrs. R. O. Berg and Lloyd, Mr. and Mrs. P. O. Flaaten and Gunvald, Mr. and Mrs. Sand and Elsie and Dorothy Swenson motored to Viking last Sunday and visited with relatives.

Mrs. I. H. Olson is spending a couple of weeks visiting with her daughter, Mrs. J. Blackburn, near Lavoy.

Mr. and Mrs. Annebu motored to Camrose last Saturday to visit their daughter who is attending High School there.

KINGMAN

Miss Alice Bard visited with relatives in Edmonton for a few days last week.

Mrs. O. Bray has been visiting in Edmonton for a few days.

Mrs. R. D. Bruce and children and Harry Bowes of Minburn visited with Mr. and Mrs. J. Bowes over the week end.

W. MacIntosh the local station agent is spending his two weeks vacation in Edmonton and other points.

Ed Tollefson motored to Edmonton on Tuesday.

Mrs. J. Anderson had some dental work done in Edmonton on Tuesday.

Miss Mabel Simonson spent the week end in Edmonton.

Mr. and Mrs. Tollefson and family visited with Mr. and Mrs. C. O. Peterson Sunday.

A. Shultz returned on Sunday from Calgary, where he has spent the last three months.

Mr. and Mrs. Jack Erickson and daughter spent the week-end in Edmonton.

Mr. and Mrs. Fred Landin and family of Malmer, Mrs. L. Gustafson of Water Glenn, Gotfred Nelson of Bashaw and Mr. and Mrs. J. Munson and family of Camrose visited with Mr. and Mrs. C. R. Blyckert on Sunday.

Mr. and Mrs. A. Asp and family motored to Daysland on Sunday.

U.F.W.A. NOTES

The meeting was held in the municipal hall on October 12th. The roll call was answered with conundrums. There was a goodly attendance to welcome the president who has been away for more than two months. Mrs. Phillips read a paper on "Co-operation between the home and the school."

The next meeting will be our birthday anniversary and will be on October 25th, at the home of Mrs. Ferguson. The meeting will be a whist drive and it is hoped all members will be present.

Mrs. L. Carlisle is baking the birthday cake and Mesdames Dodds, Geo. Francis, J. H. Ingram, Barnes and Carlisle will be hostesses.

Kindly be as prompt as possible as meeting will open at 2.30 sharp.

Travelling School's Promising Trio

More good than a row of medals pinned on them is the value three young lads from the backwoods of Ontario will derive from a wonderful week spent in Toronto. These three boys are Rene Thibault, aged 14 years, French-Canadian from Ramsay; George Kingston, a little 6-year-old Indian of Wye, and John Paul Paquette, French-Canadian of Esher, aged 14 years. They are ardent pupils of the Canadian Pacific Railway travelling school car, and are up betimes each morning to attend the school on wheels the week it spends in each month on a siding in [illegible] of the North. Their teacher, Mr. McNally, chose three [illegible] spend a week in Toronto and the Canadian National Exhibition, [illegible] of Premier Ferguson, the boys of the entrance class of the [illegible] School and the Canadian Pacific Railway.

[illegible] by all he saw young George Kingston scarcely [illegible], although he is learning English rapidly, and even the smallest [illegible] he saw brought a shy smile. He had never been upstairs until he [illegible] the train that brought him to the city, and the largest body [illegible] he had seen together at one time was 20. He was intensely [illegible] and his pockets were stuffed with a [illegible] of mechanical toys. He has not yet mustered up enough [illegible] to talk on a telephone and when he saw a parade of cadets in bright red tunics it was difficult to hold him back. The two older [illegible] were most interested in aeroplanes and the animals they saw at [illegible] exhibition.

A Double Escape

DOCTOR'S DAUGHTER'S STORY

Aunt her Toronto home provides evidence of how a severe cold, properly attended to, may prove the way to deadly blood poisoning, and how vital is the need for keeping Zam-Buk always handy!

When called upon Dr. A. Bernard Harrison, Bible House, Toronto, Canada, to attend his daughter, Miss Ethel Harrison, aged 19, he found a bad case of blood poisoning in the left leg with the beginning of a shocker. A nasty pustule had developed and it dotted all the skin at and around it. Healing remedies were applied, but Zam-Buk had failed to prevent a trial. To any great relief, the boil soon ceased spreading to set in. All inflammation and poisonous matter was quickly removed by Zam-Buk, and it healed the sore without leaving a scar.

Miss Harrison's experience is a most typical one, and Zam-Buk has in many cases saved our Medical Staff from a severe operation could prevent the spread of inflammation and pus. But I again passed my faith in Zam-Buk and it cleansed and healed the wound. All druggists and stores sell Zam-Buk at fifty cents per box. Equally valuable for eczema, blood poisoning, ulcers, burns, etc.

WORLD HAPPENINGS BRIEFLY TOLD

The demand for registered seed next year will be even greater than in previous seasons in the opinion of the Saskatchewan Registered Seed Growers' Association.

Dr S Parkes Cadman, chairman of the Chaha Federal relief organization in New York City, received information of the reported massacre of about 200,000 persons by Kemalist Moslems in Kazan Province, China.

For the twelve months ending August 31, the Dominion Bureau of Statistics reports that alcoholic beverages valued at $23,816,178 were exported from Canada to the United States.

More than 1,500 Saskatchewan old timers were in receipt of old age pensions under the plan approved at the last session of the provincial legislature at the end of September and there are about 2,000 more applications under investigation.

Capt. T. P. Worsnop, 64, formerly Port warden of Vancouver and one of the first to operate a vessel on the upper Yukon river during Klondike gold rush, died at his home in Kamloops, B.C., after an illness of several months.

Stocks of surplus military explosives, including more than 136,000 pounds of TNT accumulated by the government during the World War, have been put to industrial use, the United States Bureau of Mines reports.

Men would do well to copy the fair sex in the matter of smart garments, Dr Gerald E. Wade, of Colorado Springs, told physicians conferring at the New York Academy of Medicine. Short skirts and light clothing worn by women prevent pneumonia, he said.

Up to October 8, this year, 100,439 unemployed people have accepted licenses for privately owned automobiles. The total number of cars licensed, not including the licenses issued to dealers, is 136,976. During the corresponding period of the previous year, the total was only 102,-858.

Dr Wilhelm Groener, minister of defence, has issued a decree ordering all officers of the reichswehr to learn any function at which the former kaiser or any of the former ruling princes are seated. The reichswehr members are ordered to leave if any function should develop into a demonstration against the German republic.

Chch woven by Mayans 2,000 years ago in America has been found, according to Prof Frank Blom, of Tulane University New Orleans

HE DIDN'T THINK DYSENTERY COULD BE RELIEVED

Mr John Melling, Fenne, Alta., writes:—"I am a returned soldier, and when I came home from overseas I suffered greatly with dysentery. The doctor said it was chronic and did not admit it could be relieved. However, he factored me for quite a while, but did me no good. One day the druggist asked me if I had ever tried

"No, his recommendation I bought a bottle and after I had taken it got some relief, so I got two more, and have never had the dysentery since 1919."

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

Value Of Tourist Traffic

No Official Figures On Amount Of Money Spent Here Given Out

How much money do people from the United States leave in Canada every year? No official figures have been given out, but guesses run all the way from $100,000,000 to $400,000,000. The Royal Bank of Canada estimates that $275,000,000 was left by United States visitors to Canada in 1927, compared with $140,000,000 in 1926.

This year traffic has been unusually heavy. In October alone 6,420 cars from the United States entered, as in 1927, 425,000 cars were expected to enter this year. Ontario shows a larger figure, but the length of stay is less.

It is estimated that 3,000,000 cars from the United States will have entered Canada before the close of the present year. Canada, having what is about, is busy spending millions of dollars for good roads.

ARE YOU AFRAID OF YOUR MEALS?

Proof That the Stomach Is Weak and Needs Toning Up

Are you one of the many sufferers who dread meal time? Do you say, "I'm afraid to eat, because of the pains and discomforts that follow. When the stomach is out of order the whole system suffers, and as the blood becomes thin and watery the nerves become increasingly difficult to control. The digestive disorder, which is the cause for the stomach's that is not a tonic for the whole body. Now, when building tonic such as Dr. Williams' Pink Pills, get only relief from indigestion, but adds to the general strength. Mr. D. J. Bissett, Selkirk, Man., has proved the value of Dr Williams' Pink Pills in a severe case of indigestion and relates his experience for the benefit of other sufferers. He says:—"I suffered from indigestion for a number of years. In my case was so bad that words fail to describe it. My appetite was gone, constipation was present, and my nerves were all on edge. I could not sleep well at night, and the world was a dark spot for me. I tried a number of remedies, but without any benefit. Then Dr. Williams' Pink Pills were recommended, but refused them at first, after so many failures, I decided to give them a trial. After taking three boxes I noticed a change for the better. Then I got three boxes more and in all I used a genuine remedy. I continued the treatment, took moderate exercise, could take plain food without suffering as formerly, and gradually all these pills made good blood, and that this good blood will make in the stomach and nerves. Anyone suffering from stomach or nerve trouble will make no mistake in giving Dr Williams' Pink Pills a fair trial."

Dr. Williams' Pink Pills are sold by all medicine dealers or may be had by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont. Write today for a copy of the free booklet "What to Eat and How to Eat."

Small boy: "Say, mister, give me a penny or I'll spank you."

Dealer: "We sell oysters by the measure, my boy, not by the pound."

Small Boy: "Well, then, give me a yard."

ALBERTA WHEAT POOL NEW TERMINAL ELEVATOR

That the Alberta Wheat Pool is anticipating in future years the great bulk of Alberta's crop will seek the world's markets by way of Pacific tidewater is evident from that organization's activities in building and acquiring terminal elevator space at Vancouver and Prince Rupert.

Just recently a great new terminal has been completed for the Alberta Pool, at Vancouver, by the Northern Construction Company and J. W. Stewart, and with C. D. Howe & Company recognized as one of the foremost designers of terminal elevators, as the engineers. The capacity of the new terminal is approximately 2½ million bushels which brings the total storage controlled by the Alberta Pool on the Pacific coast up to 5,500,000 bushels.

The new Alberta Pool terminal is located adjacent to the Second Narrows Bridge on the city side of Vancouver Harbor. There its workhouse towers 200 feet into the air. Flanked with huge bins 123 feet high, as material testimony to the foresight of the Alberta Pool leaders, and indeed more than they were able, to foresee the rapid growth, Portland Pool at first thought the Macedonian advance would be ample for the initial collection, for as now says that the Lord "increased the fruits of their righteousness and fellowship." The committee, to whom they had Christian work really compassionate to the giving or withholding.

Strange to say, it is not those to whom the gospel comes most readily, and whom it imposes little, who are most compassionate. Poverty, in the contrary, it is those who have suffered little, who are most wrapped up in and acquire that touch desired air of individuality. Price of the book 10 cents the copy.

SUNDAY SCHOOL LESSON

OCTOBER 21

CHRISTIAN STEWARDSHIP

Golden Text: "First they gave their own selves to the Lord." 2 Corinthians 8:5.

Lesson: 2 Corinthians 8:1-6, 13. Devotional Reading: Psalm 50:1-7a.

Explanations and Comments

The Example Of Christian Generosity (Verse 1). By "Churches of Macedonia, 8:1-5. Paul calls to the mind of his readers, the Christians of Corinth, the example in generosity of the Macedonians, the churches of Philippi, Thessalonica and Berea. And describes how they had manifested love for the poor at Jerusalem (Verses 2-4). Paul's appeal to Christian generosity was effective, which had put their Christian character to the test. The Christians were not only giving (v. 1) Thess. 1:6), and their liberality was not only generous but actually rich; great liberality. For they were willing (v. 3) to give beyond their means, indeed more than they were able, to bestow this kind of generosity. Increasingly difficult to exercise the digestive disorder, which is the cause for the stomach's that is not a tonic for the whole body. Now, when building tonic such as Dr. Williams' Pink Pills, get only relief from indigestion, but adds to the general strength. Mr. D. J. Bissett, Selkirk, Man., has proved the value of Dr Williams' Pink Pills in a severe case of indigestion and relates his experience for the benefit of other sufferers. He says:—"I suffered from indigestion for a number of years. In my case was so bad that words fail to describe it. My appetite was gone, constipation was present, and my nerves were all on edge. For COLDS of All the Family

This Modern Externol Treatment is best

Mothers prefer the external treatment, Vicks VapoRub, for children's colds, because it avoids the constant "dosing" so disturbing to delicate little stomachs. Just rub it on the throat and chest at bedtime.

Other members of the family prefer Vicks for their own colds, because it is convenient, and quick in bringing relief.

For five example, write Vick Chemical Co., No. 1 Lee St., Greensboro, North Carolina, U.S.A.

VICKS VapoRub

A Fresh Or Distinction

Decidedly smart is the frock pictured here. The pointed tunic is joined to the skirt having plaits at front and a slightly flared back, shaped collar, and long sleeves gathered to deep cuffs. No. 1276 is in sizes 34, 36, 38, 40 and 42 inches bust. Size 36 requires 5¼ yards 36-inch material, and ¾ yard 36-inch contrasting for View 1. Price 2 cents the pattern.

Every woman's desire is to achieve that smart different appearance which draws favorable comment from the observing public. The designs illustrated in our new Fashion Book are originated in the heart of the style centers and will help you to acquire that touch desired air of individuality. Price of the book 10 cents the copy.

Recipes For This Week

(By Betty Barclay)

LAMB SOUFFLE

1 cup soft bread crumbs.
2 cups thick white sauce
2 eggs.
1 teaspoon chopped parsley.
½ teaspoon salt.
¼ teaspoonful salt.
¼ teaspoon pepper.
1 teaspoon onion juice.

Make and cook white sauce, then mix it with crumbs, seasoning, and chopped meat. Add the beaten yolks of eggs then fold in the stiffly beaten whites. Put into a well-buttered baking dish and set in a hollow pan containing one inch of boiling water. Bake in oven 1 hour. Serve from dish in a moderate oven. Serve at once.

LEMON GRASSHOPPER PRUNE WHIP

1 packet lemon jonket.
1½ cups stewed prunes
1 pint milk.
White 1 egg.
Sugar.

Put the stewed prunes through a coarse sieve into a large bowl; sweeten to taste. Add the white of the egg and beat with wire whisk 10 minutes. Fill tall dessert glasses half full. Dissolve the jonket powder in the pint of milk and pour over prunes carefully into glasses, holding a spoon flat over the whip to catch the milk as it is poured in. This careful pouring will keep the whip from floating. Let set in warm room until firm. Grate a little nutmeg over top. Chill.

Demand For Registered Seed

The demand for registered seed next year will be even greater than in previous seasons in the opinion of the officials of the Saskatchewan Registered Seed Growers' Association in Moose Jaw.

Knew His Was Safe

"I think we should tak' a walk doon the toon and see the shops, Jessie," said an Aberdonian to his wife.

"But there's a bull there," she replied. "D'ye think I dinna ken that?" he said. "I'm no' daft a' th' gither."

"You're doing well, young fellow," said the shipping clerk encouragingly, "the foreman praises you to the skies."

"I'd sooner he'd praise me to the boss," was the quiet reply.

We understand that there is a footmen in Greenland who wears the Commissioner in the house so it won't freeze.

Scotchmen are said to be untidy, but they like their whisky neat.

Caticura Balks Comfort And Refresh The Skin

Cleanse and freshen your skin by bathing daily with Cuticura Soap. If there are signs of pimples, redness or roughness, follow with a gentle application of Cuticura Ointment to soothe and heal. Cuticura Talcum, smooth, cooling and fragrant, is the ideal talcum powder.

Soap 25c. Ointment 25 and 50c. Talcum 25c.
Cuticura Shaving Stick 25c.

Artificial Clouds a Success

German Invention Makes Country Entirely Rainless For Air

Experiments in making cloud screens capable of hiding an entire country side from airplanes have been concluded near Stuttgart, and the results are pronounced highly satisfactory.

Flame throwers of the same type employed during the war were used for distributing gas which, upon striking the air, becomes heavy and opaque. The purpose of the test was to determine if an entire industrial section could be made invisible to hostile airplanes. The flame throwers were mounted on the ground on all sides of the area around which it is desired to lay a screen. Thus the entire section could be hidden regardless of the direction of the wind.

Planes flew over the region after the cloud was laid and observers declared they were unable to detect a single building through the gas cloud. Photographers returned with photos which proved worthless as far as identification was concerned. The composition of the cloud forming gas was kept secret.

Right Be Good Advice

Rockefeller's Idea Of How To Get On In World

From New York comes a new story concerning John D. Rockefeller, the multi-millionaire.

A young man asked his advice as to how best to get on in the world.

"Work hard and set yourself to buy a gold watch," was the reply.

"Yes," queried the listener, "and when you've bought the gold watch?"

"You don't buy a gold watch," replied Mr. Rockefeller, "you buy a good watch and start all over again for a nother one."

"And when you've got the money for a motor car?"

"Well, you remember the watch, if you're not a fool, and go on wishing to business."

CHAPTER III.—Continued.

Janet laughed. "I will go now to give you the chance." With a playful flick of her whip toward Douglas' she was off like an arrow.

Donald turned to his friend. "I hope that you are satisfied now that you have made an ass out of me."

"Quite happy, old dear. I didn't find it a hard job."

Donald laughed. "I'll race you to the gate."

At the hour was to take place on Monday, this was to be the last day of training for the horses, and Sockgo to see Donald in his work-outs satisfied that he had a wonderful speed but would be unable to stay the twenty rounds with the formidable Turkey. Douglas was under the impression that it would take more than a snapper like Janet to lift the leaven from the champion who possessed the virtue of the terrible punch.

To the horse training is a trying ordeal. The daily grind of road-work, bag-punching, sparring and rubbing down becomes monotonous. The nerves become irritated and the temper is unfavorable for good work. Add the boxing rule that a man must not weigh more than a certain number of pounds and there is anything but a cheerful companion.

As Donald prepared for bed that night he thought with relief that the nearer would be a day of rest. "I'll be glad when it's over," he mused. His meditations were interrupted by a rapping on the door. In answer to his invitation to come in, the door opened and a small man of unimpressing appearance entered.

The visitor was indeed a most repulsive man, of uncertain age, and with skin of a sickly pallor. One eye was eighteen, which he carried to an accident during a football game. Thomas familiar with his daily habits, averred that it was caused by the vigorous application of an adversary's thumb during a bar-room brawl.

"I'm Garrion's manager," he said importantly.

"What do you want?" demanded Donald curtly.

"Now, me here, Kid. We've got a dead cinch to cop de champ. It's dis way. Young is a sanchover. Here's a chance to do wold to beat de Biggar. Get me? Well, dere ain't a bit of sense in de Slugger backing him up for nuttin', so we frames de bout. De beauty bittin' pit be on de Biggar, so we fixes it for de Slugger to go 'till about de last round, so's to give de kaw a run for dere money." We gets all de money dat we can beg, borrow and steal and puts it on to win. We puts up a stean-bang fight. You can take do drop a couple of times, and den down goes de Biggar. De fans will just eat it up. De lotst round will find you stannin' toe to toe, den de last minute you neets home de fake step-back. De bookies will t'ink it's on de square. Den in a moment we gets a return fight and we pulls off de grudge stuff and we packs de beans. Of course, we have to win den, and all our money will be placed on de Slugger. Dat means dat we cop de change twice. Get me?" His ugly lips parted in what he intended as an ingratiating smile. "You come up to do club tomorrow and we rehearses de whole t'ing. Get me?"

Donald's face turned pale with rage. "I get you," you damned little rat!" he hissed. Seizing the surprised Pursell by the collar, he jerked him to his feet, dragged him to the door and threw him out with such force that he struck the wall with a thump and fell in a heap in the floor.

Pursell rose with a snarl that would have done credit to the fangs of a bestial hate shot from the one glaring eye. "We'll fill you Monday, you big stiff," he hissed with his vilest objurgations

During the door, Donald walked to the windows and opened them wide as though to rid the room of the air his visitor had breathed. A moment's cool breeze was so much rotten-ness in the nostrils of a human being," he said disgustedly.

At the same hour, at the other side of the city, Douglas was also entertaining a visitor, but of a very different character. He had just entered the room when he heard his sister's voice.

"Stay I come in a minute, Doug?" Janet came to the point quickly. "Who is that Mr. McLean who was with you today?"

"C," there was a—" Donald Mc-Lean," he answered evasively.

"You know what I mean. Who is he? What is he. Where does he come from?"

"I'll look him up in Brainstreet's," he said. "He's a serious, Sis."

"Is it a serious matter, Sis?"

"I think he is interesting," he replied beatingly.

"He do I. I liked him the first time I saw him," said Douglas warmly.

"Well, you haven't answered my questions yet," prevaled Janet

For all his fluency of speech Douglas was for the moment nonplussed. "Let's see—er—what was the last question?" He was sparring for time. "Oh, I remember. Where do you meet him?"

"I met him a long time ago through a mutual friend by the name of Percy McLean is his partner Flora Isaac McLean and Percy."

"What is their business?"

"Oh—er—store business."

There was an interval of silence. "I'm not a bad little liar," thought Douglas. "I wonder if she's thinking of." He yawned strenuously and stretched his arms. "My! I'm sleepy," he said.

Janet rose slowly and moved toward the door.

"Are you going to ask him out some time?" she enquired.

"Sure thing!"

At the door she turned. "Will you let me know when he is coming?"

"Yes, dear."

"Good-night, Doug."

"Good-night, Sis."

Douglas stood for a while staring into nothingness. "I don't blame her," he said aloud. "I don't know anything about him, but I'll bet he is a real man."

CHAPTER IV

The arena and the grand-stand were packed, the R.R.C. sign having been taken out at two o'clock. The cosmopolitan crowd fast in the make, the upon Der. From the select ringside seats to the topmost rail ringside lawyers, doctors and bankers sat with labourers, miners, loggers bartenders, and bootblacks. Men of the underworld sat side by side with men that make and administer our laws. There was a sprinkling of Japs, Chinamen and negroes. The turbanned Hindu made bright splotches of color here and there in the vast sea of faces. Of class distinction there was none; all walked as one in the love of the boxing game.

The preliminaries were over, and the vast crowd had settled in their seats patiently. At last there was a stir, a craning of necks. Across the aisle on the west side of the arena came Donald, followed by Andy and the two seconds, the latter carrying buckets sponges, towels and bottles. Donald wore a dark-coloured bathrobe thrown over his shoulders. There was a murmur of approval that swelled to a tumult as he clambered through the ropes. He seemed cool as Andy piloted him to the corner, but as he sat down and stretched out his long legs, he appeared ill at ease.

Although the crowd had given him a boisterous welcome, prophecies were shouted across the ring that in seconds

WHEAT POOL NEWS BULLETIN

The Alberta Wheat Pool made its final payment, this being 2½c per bushel for wheat delivered to the 1927—28 Pool, except for a few minor grades. The total of this payment was $1,356,603.58.

The Pool paid the following prices for wheat delivered from the 1927 crop: 1 Northern $1.42½; 2 Northern $1.38½; 3 Northern $1.33½; No. 4, $1.14½; No. 5 $1.01½; No. 6 93½; feed 85½.

When the Wheat Pool distributed its second interim payment last July, 4c per bushel was retained to provide for elevator reserve, commercial reserve and administration cost. It was found but 3½c per bushel were required for these purposes so the one half cent balance was included in the final payment along with the 2½c per bushel received from the Central Selling Agency.

The administration costs during the past year were nine twentieths of a cent per bushel, and the commercial reserve was one and one twentieth cent.

The elevator reserve is to total approximately $5,500,000. The money has been used to pay for over 300 elevators and the Alberta Pool's share of the terminal elevator at the Head of the Lakes. The commercial reserve now totals approximately $1,750,000

These reserve funds are required to develop the physical facilities of the Wheat Pool that the organization is extending very rapidly at the present time. An aggressive elevator building program is being carried out

Each member is credited with his share of the elevator reserve and commercial reserve according to the number of bushels delivered. Interest at the rate of 6 per cent is paid to each member to each. In this way a real asset is being built up for the growers and at the same time the organization is building up a comprehensive and modern elevator system.

The meeting of the final payment for the 1927 crop ends the honeymoon of the Wheat Pool's first 5 year contract period. During that time the Canadian Wheat Pool handled approximately 150,000,000 bushels of grain, with a turnover of one billion one hundred million dollars.

The Pools are entering the second contract period with a splendid membership, increased confidence and $20,000,000 in physical assets. They are now handling the bulk of their own grain and are working steadily and surely on comprehensive plans to develop Pool facilities all along the line.

In making this final payment the cheques. This required the labor of 40 employees for three weeks. Before cheques are issued the ledger accounts have to be balanced in bushels and in dollars and cents. Then the cheques are issued and balanced. In this way the number of errors are at a minimum.

CABIN LINERS SET NEW STANDARD

Upper right—A general view of the vessel looking aft. Upper left—An interior view showing the salon, entering room with the luxurious fittings. Lower—The Duchess of Bedford on the opposite page coming up the St. Lawrence River. Lower right—R. Johnson, commander of the Duchess of Bedford

PROOF that the St. Lawrence route is rapidly increasing in popularity and that an era of continued prosperity is predicted for her ports, is shown by the addition of four new cabin class liners of the new "Duchess" type to the Atlantic fleet of the Canadian Pacific.

The Duchess of Bedford, leader of this quartette of the largest liners to Montreal, arrived in that port on the 1st of July, 1928, having completed her maiden outward voyage in exactly seven days after leaving Liverpool. The liner is over 20,000 tons gross register, is oil fuel burning, two-funnelled and measures 600 feet in length and 75 feet in width. She will carry Cabin Class, Tourist Third Cabin, and Third Class passengers. In each class good deck space is available. Canadian Pacific engineers have seen to it that every comfort and convenience is provided for the passengers in all quarters on Atlantic liners of not long ago. The three newest ship sister ships of the Duchess of Bedford, now under the construction in the shipbuilding yards of the Clyde, expected expansion of traffic. The "Empress" class of are the Duchess of Atholl, Duchess of Cornwall, and ships, newcomers to the St. Lawrence also, have been Duchess of Richmond. placed by the Canadian Pacific on an exclusively

The discoveries of radio engineers have aided in making the Duchess of Bedford an outstanding cruise and foreign and continental ports, making almost as line personality. For instance, while the ship's good time as the passenger liners.

orchestra is playing in the Cabin Dining Room music is relayed by means of microphones and amplifiers to the Tourist Third Cabin and Third Class Lounges and decks. Loud-speakers also simplify the transmission of orders to the engine room, bridge and docking decks.

Other interesting facts about the construction of the Duchess of Bedford are that the twin propellers of the largest liners to Montreal, arrived in that port on the 1st of July, 1928, having completed her maiden outward voyage in exactly seven days after leaving Liverpool. The liner is over 20,000 tons gross register, is oil fuel burning, two-funnelled and measures 600 feet in length and 75 feet in width. She will carry Cabin Class, Tourist Third Cabin, and Third Class passengers. The liner is over 20,000 tons gross register, is oil fuel burning, two-funnelled and measures 600 feet in length and 75 feet in width. Would You Like Electricity In Your Home?

THE KOHLER Automatic Electric Light and Power Plant will give it to you with the minimum of expense and trouble and the maximum of economy and dependability.

The KOHLER Automatic Electric Light and Power Plant is exceptionally well made in every particular. Has four cylinder vibrationless engine containing all the refinements of a high grade motor. It is radiator cooled; force feed lubrication; vacuum tank; automatic governor (proportions fuel consumption to load plant is carrying), etc. Dynamo is 1500 watt capacity and is also splendidly made. The plant is purely automatic—that is, when you turn on a light or appliance the plant starts and when the last light or appliance is turned off it stops.

There are thousands in use in the United States and all parts of the world.

Both President Coolidges summer homes are lighted by Kohler plants and many other notable installations have been made.

But while the quality is as high as can be procured the price is no higher than the ordinary run of private electric plants.

A 1500 watt plant, which we recommend for most farm installations come at $700.00 f.o.b. Tofield and at that figure is the best electric light plant investment a farmer can make.

There is an 800 watt model at a lower price and 2000, 5000, and 10,000 watt models for larger consumers.

Further information will be gladly given by—

This means that express matter shipped from Portland may be picked up from Regina Alberta liners at Rimouski speeded by air via Montreal to Ottawa and Toronto, placed aboard another fast train, transshipped to airplanes at Winnipeg and delivered in the interior of Western Canada all carry or placed on a train again at the destination from Portland matter the shipment many

MERCURY ADS PAY!

A Little Sub Here A Little Sub There Subscriptions, Subscriptions ---Everywhere

Like grain stooks standing in a farmer's field—are subscriptions scattered throughout a rural district. Each are holding a promise as good as gold—yes better than gold—yet they must be collected up before they are of real and practical value. With a team, wagon and pitchfork, the farmer can collect his grain stooks, take them to the threshing machine, from which golden grain emerges which in turn is taken to the elevator, where in exchange, the farmer receives coin of the realm.

The newspaper man cannot do this, he is dependent upon the good will of subscribers—when they come to town to drop in and pay. Fall time is subscription time and we would be delighted to renew your subscription now.

Special Note.—After October 1st the price of the Mercury will be $2.00 per year. We are among the very last of weekly newspapers to raise our price, the great majority having been selling for $2.00 per year for the past seven years.

THE HARVEST AND HUMAN PROGRESS

THE CIVILIZED world has been reading for the past few days of the wonderful exploits of the mammoth Zeppelin "Graf," which with sixty souls on board travelled from Germany to the United States, being over 100 hours in the air and travelling over 6000 miles. Journeys across the Atlantic by lighter than air craft have been accomplished before and it is likely that the world will soon hear of another venture along the same lines, that of the giant British Zeppelin which is now being completed. All this is very wonderful as are all high peaks of human endeavour. The Atlantic liner; a modern battleship; an express train; a modern daily newspaper office; these and many other things are marvelous and denotes man's wonderful progress upon this planet. But of all the marvelous things in this world there is nothing more wonderful than a good grain of wheat. In early times, when men lived in caves, in trees and obtained food by cunning and brute strength, the ancester of our modern wheat kernel was growing wild—a gift from God to forthcoming generations. As reason triumphed over passion, as step by step men advanced up the ladder of civilization, some men, somewhere, cultivated and brought to the stage of its present excellence the humble wild plant which in our day and generation feeds and sustains millions. All this a vision of the Creator's co-operation with His people, as also is the travelling of the Zeppelin above the waterr.

The farmers of this country have just completed harvesting their crops, which, while not the only one, the most important is wheat. Truly and literally there has been a stream of golden grain flowing from these prairies, east and west, which akin to the water from the mountains which gives life to the valleys, this wheat will give life, sustenance and strength to millions far removed.

In quality, quantity, method of handling and transporting, the realm of golden grain presents a list of mechanical and biological wonders, all developing one within the other that, when calmly considered, amazes one. There is the gradual betterment of the grain itself through the ages; then the development of methods of seeding from the hand sewn method to the modern tractor with its huge mechanical drill behind it; then the development in harvesting and threshing machinery from the scythe and flail to the modern combine, and last but not least, the railroad transportation facilities and the wonderful terminal elevators from which the grain flows into ships to be carried to all parts of the world; and finally a waiting populace to receive it. And the last is equally as important as the first. We wonder if any of these things would have been a success in every way in other days and times. Modern machinery means greater production per man; seed selection means greater production per acre; and these two need adequate transportation facilities and then sufficient consumers to warrant the increased production. It would appear as if human progress and Divine will goes hand in hand.

At this season of the year one should feel thankful. Spring is a season of promise, but autumn is the season of promise fulfilled. Not always according to our expectation and desires, but always sufficient to supply our daily needs. Famine, not unknown in other lands and climes is a stranger here. And while the lot of the agriculturalist here is not always a bed of roses, neither is this the good fortune of the agriculturalist anywhere; and on the whole, with crops suited to the climate, nature is as kind to us as to farmers anywhere. Most of us work hard. We throw our energy, vitality, knowledge and skill into the pot that promises prosperity, and it is rarely that we are without some measure of return. We should be thankful according to our particular desires; preferably in a way that causes us some sacrifice and does some one less fortunate than ourselves real good.

ALLOWS ANOTHER MAN TO SUFFER FOR OWN CRIME

Innocent Man Given Look for Montreal Robbery; Bus Driver Guilty

Montreal, Oct. 12.—Brooding for a period of ten months over the picture of a man suffering the lash and condemnation in St. Vincent de Paul penitentiary for a crime of which he was innocent, finally proved too great a burden for a Montreal bus driver, he told the police Friday when he confessed that he and Henry Caisse, 23, a former ticket agent for the Montreal Transways, had planned the robbery of $1,300 from the Victoria avenue offices of the company last Hallowe'en for which crime George Starke, 24, was sentenced to two years and twenty lashes, half of which he has already suffered.

Starke, who desperately maintained his innocence with an alibi and appealed his conviction only to lose out, was convicted mainly on the testimony of Caisse who identified his picture as being that of one of the two persons he had seen whom he had sworn had attached him in the Victoria avenue office of the company, bound and gagged his foe and stolen $1,300.

Caisse was arrested Thursday after the bus driver's sworn statement had been made before the investigation officer of the company. The bus-driver declared that the robbery had been planned by himself and Caisse. He had gone to the office at the appointed time and Caisse submitted to their being bound and gagged, his accomplice taking the money. In his statement he declared that he had not anticipated another being punished for the crime nor had he believed that Caisse would give evidence against himself and together with the crime Caisse pleaded not guilty, enquiry was set for October 19th.

A transient school for the encouragement of home industries is being talked of in Winnipeg following a similar school held in that city recently under the auspices of the Canadian Pacific Railway. About 30 may be noted have had to be refused admission to teach their various handicrafts to children of foreign parents. Those who would otherwise be likely not to acquire the skill they would have developed in their own country.

W. N. Beech, a hunter and photographer of wild life, who had the unique distinction of finding two different pairs of banded antlers during his career as a travel visitor to the General Tourist Department of the C. P. R. at Montreal Limited antlers are very rare by hunters and one of the two pairs discovered by him are so firmly interlocked that they cannot be pulled apart by two strong men and to be separated would have to be cut

"In all my experience I have not previously found so general a feeling of complete confidence in this country and its possibilities as I observed in the cities and districts where we made stops and had an opportunity of talking things over with their representative citizens" was the statement made by E. W Beatty, president of the Canadian Pacific Railway when he got returned to Montreal from an eight thousand mile tour over the company's western lines accompanied by a party of directors and Montreal financiers.

Billing and cooing and showing the signs of having their affectionate dispositions dampened by the strain of travel, two cases of Japanese Love Birds passed through the Customs division at Montreal recently on their way from Japan to Vancouver, B.C., and thence by rail to the Empress of Asia, and across the Atlantic on the Empress of Atholl, the shipment of twenty eight Cobalt Budgerigars, as they are also called are under the protective wing of the Canadian Pacific Express throughout. They were of a brilliant blue plumage, long tailed and looked much like a parrot quet

Not only is Canada sufficiently interested in the League of Nations to have the Prime Minister no over to Geneva to discuss its position in this year's assembly, but many thousands of active supporters of the movement are now organized throughout the country. According to information given out by the General Secretary of the League of Nations Society in Canada at this time the membership of that organization has grown in three years from a few hundred to over twenty thousand, thousand in number. Although strongly supported by women's organizations of all sorts and descriptions, its character is by no means feminine as over half the members are business men and in British Columbia 55 per cent are men.

SALE AND REDEMPTION OF IMPOUNDED ANIMALS

Notice is hereby given under Section 46 of The Domestic Animals Act (Municipalities) that one brown horse, one kind foot white, white stripe in face, branded Jo with bar above and below, on left shoulder, was impounded in the pound kept by Samuel Berkel located on the S.E. 36-51-19 wd, on Tuesday, the eighteenth day of September, A.D., 1928, and that the said animal was sold on the fourth day of October 1928 to R. H Phillips of Tofield, Alberta, and that said animal may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in The Alberta Gazette, upon payment of all fees and costs due to the municipality and the purchaser of said animal.

For information apply to the undersigned.

In clean, bright Aluminum

The Farmer and the Research Worker

The prairie provinces of Canada have completed the harvesting and threshing of the greatest grain crops in the history of Canada, judged from the standpoint of volume. It is conservatively estimated that the wheat crop alone will not be less than 500,000,000 bushels and that the other four principal grains, oats, rye, barley and flax, will add close to another 300,000,000 bushels to the total bringing Canada's grain yield for the first time within measurable distance of a billion bushel crop.

In almost every respect the season of 1928 was ideal from the standpoint of seeding, growing, cutting and threshing and the acreage seeded showed a substantial increase over former years. There was an absence of rust and other pests, ample moisture, taking the country as a whole and generally an absence of those conditions which result in a lowering of yield. The only fly in the ointment was the killing frosts of the third week in August which caught the later sown crops and those which from one cause or another had not matured. The result was disastrous from the standpoint of grades and consequently materially lowering in prices of a large part of the total production.

According to a rough estimate of the Saskatchewan crop it is stated that about one-third of the wheat will be of the contract grades of 1, 2 and 3 northern, that another one-third will grade number 4, and that the remaining one-third will grade below that figure.

It is within the power of our farmers to partly offset the losses occasioned by dry seasons through the adoption of the most scientific methods of farming, they can increase yields and grades by using good clean seed and by waging continuous warfare on noxious weeds, they can insure their crops against hail. But they stand helpless before the icy clutch of Jack Frost.

Addressing the annual convention of the Saskatchewan Division of the Canadian Weekly Newspapers Association, at Regina, recently, Hon. W. R. Motherwell said he knew of only one way to beat out Jack Frost and that was to get ahead of him. He had reference to the development of wheat with earlier ripening qualities. In this connection he made mention of the valuable time gained through the development of Marquis over the old Red Fife, and brought the cheering message that as a result of the experiments this year with Garnet and Reward, there was every expectation that a further notable advance would be made. According to Mr. Motherwell, where Reward wheat was grown by farmers in all the prairie provinces, under arrangements with the Department of Agriculture, in over 80 per cent. of cases Reward was safely in stook before the August frosts. He expressed himself as quite hopeful that western farmers would yet be in a position where they could and would beat out Jack Frost.

Experiments have been conducted for some time past to determine to what extent the drying processes for damp wheat affects milling and baking qualities and recent announcement is to the effect that, on the whole the quality of the wheat is not seriously affected.

Now the Universities of the three prairie provinces and the Dominion Research officials are engaged in determining the effect which frost has on milling and baking qualities. Hundreds of farmers this year have had the experience of marketing wheat, weighing the full sixty pounds or more to the bushel but which, because of frost effect on the chaff, has been graded away below what would otherwise have been obtained. Rightly or wrongly there is an impression that this frost, while marring the appearance of the kernel, does not seriously affect the quality and that the producer is sustaining a loss all out of proportion to the amount of damage done the grain; that, in a word, while the farmer-producer loses, the miller gains because he secures good milling wheat at a much less cost. The scientists are now striving to get at the real truth of the matter.

Thus are research workers for Governments and Universities working hand in hand with the farmers in endeavoring to advance the interests and prosperity of agriculture, through the development of earlier ripening grains, the elimination of rust and in determining the actual effects of moisture and frost on the true commercial value of grain. The effort is to save hundreds of millions of dollars to the agriculturists of Canada.

Canada is spending more money than ever before in scientific research work and the Dominion Government announces that such expenditures will be still further increased. No body of men in the Dominion stands to gain more from such work and expenditures than do the farmers of the West. The whole weight of their influence should be back of this enlightened policy.

Made Commander In Royal Naval Reserve

Canadian Awarded V.C. In Great War Receives Promotion

The promotion of Lieut.-Commander Ronald Neil Stuart, V.C., D.S.O., a Canadian, now in the Royal Naval Reserve, to the rank of commander, recalls the thrilling exploit for his participation in which Commander Stuart received the highest decoration for bravery in the gift of his sovereign. Stuart was one of two Canadians awarded the Victoria Cross while serving in the Royal Navy during the great war, the other being Lieut. R. Bourke, of Nelson, B.C.

The action for which Commander Stuart was honored was published in the London Gazette, dated Nov. 20, 1918, seventeen months after the event, and it was under provision 13 of the Royal Warrant which enables a ship's company to select members of their personnel for the distinction that the Canadian was awarded the decoration by ballot. Commander Stuart was a colleague of no less a redoubtable fighter in the war story of British hush ships than Captain Gordon Campbell, V.C., the mystery man of the "special service."

The hush ships were a product of anti-submarine campaign. They comprised colliers, freighters, merchantmen, yachts and even fishing smacks carrying concealed armaments and specially selected crews.

Public Flying Clubs

Toronto and Montreal Lead Dominion In Number Of Flying Hours

The public flying clubs of Toronto and Montreal are leading their sister clubs throughout the country in the matter of flying hours registered by their aeroplanes, according to the latest statistics available at the civil aviation branch of the department of national defence.

The Toronto 'planes have registered 887 flying hours, Montreal 580 hours, and Ottawa, next in line, 460 hours.

Other clubs and their records follow:

Regina, 303 hours; Edmonton, 346 hours; Victoria, 77 hours; and Calgary, 37 hours.

Touches that Add Style to Dresses

By MAE MARTIN

It's amazing to see how easily out-of-style dresses are transformed by a few buttons, a little braid and the quick magic of home tinting or dyeing.

Your tinting or dyeing will always delight you if you are sure to use only true, fadeless Diamond Dyes. Tinting with them is easy as bluing, and dyeing takes just a little more time. New colors appear like magic right over the old colors. They give all the shades, with never a hint of that redyed look which comes from inferior dyes. Insist on Diamond Dyes and save disappointment.

"Color Craft," my big new book of dollar-saving hints, will be sent you FREE. Write Mae Martin, Diamond Dyes, Windsor, Ontario.

Allenby Is Honored

The distinguished service medal of the American Legion, highest honor that members of the former service men's organization can confer, was presented to Field-Marshal Viscount Allenby, of Great Britain, by National Commander Edward E. Spafford, at the Legion Convention at San Antonio, Texas.

WHEN YOUR BABY CATCHES A COLD

In spite of all precautions little ones will take colds—especially during the changeable days of our Fall season. When the first symptoms appear—sneezing, redness of the eyes, running nose—Baby's Own Tablets should be given at once. They will rapidly break up the cold and prevent more serious complications.

Mothers who keep a box of Baby's Own Tablets in the house always feel safe. In fact they are like having a doctor in the house. They are a gentle but thorough laxative that sweeten the stomach and regulate the bowels, thus driving out constipation and indigestion and relieving the baby of the many childhood ailments which are the direct result of a clogged condition of the bowels or sour stomach. They are absolutely safe—being guaranteed to contain no drug at all harmful to even the youngest babe. They cannot possibly do harm—they always do good.

Baby's Own Tablets are sold by all medicine dealers or will be sent by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Not a New Business

Evidence of rum-running 113 years ago has been uncovered at the customs house in Mobile, Alabama. Customs agents, searching through old federal records, found a tiny scrap of paper—evidently the last paragraph of a letter—informing federal officers of the discovery of 143 quarts, presumably liquor, submerged in a marsh.

WHITE STAR LINE CANADIAN SERVICE

HONORED BY NEWSPAPER ASSOCIATION

SAM. R. MOORE

Publisher of the Swift Current Sun, President of Saskatchewan Division of the Canadian Weekly Newspaper Association.

Canadian Weekly Newspaper Association

Saskatchewan Division Elects Officers At Convention Held in Regina

Sam. R. Moore, publisher of the Swift Current Sun, was the unanimous choice of the Saskatchewan division, Canadian Weekly Newspaper Association, as president for 1928-29. The election of officers was held at the closing session of the two-day convention of the organization held at the Hotel Saskatchewan, Regina. Officers elected are: Hon. S. J. Latta, honorary president; C. R. McIntosh, M.P., North Battleford, honorary vice-president; J. H. B. McCullough, the Review, Weyburn, immediate past president; Sam. R. Moore, president; H. G. Sheldrake, North Battleford, Optimist, vice-president; S. J. Dornan, the Despatch, Alameda, secretary-treasurer, and the following members of the executive, W. Ashfield, The Sun, Grenfell; R. M. Frith, The Recorder, Wakaw; R. Zubac, The Citizen, Kerrobert; W. T. Morphy, The Sun, Viscount; Andrew King, The Enterprise, Rouleau; S. N. Wynn, The Enterprise, Yorkton.

Upon the invitation of the Regina City Council and the Regina Board of Trade, Regina was decided upon as the meeting place for 1929.

Manitoba Radio Station

Largest Broadcasting Station To Be Operated In Canada

The largest radio broadcasting station in Canada is now operated by the Manitoba Telephone System.

The new broadcasting set is fully modern in every respect and compares favorably with the best stations in United States. The present station now being operated by the telephone utility was installed a few years ago, but the rapid progress in the radio industry has made it out of date.

The new set will be installed at Manitoba Agricultural College and broadcast by remote control from the Sherbrooke street telephone exchange in accordance with present practice.

Women and Asthma. Women are numbered among the sufferers from asthma by the countless thousands. In every climate they will be found, helpless in the grip of this relentless disease unless they have availed themselves of the proper remedy. Dr. J. D. Kellogg's Asthma Remedy has brought new hope and life to many such. Testimonials, sent entirely without solicitation, show the enormous benefit it has wrought among women everywhere.

Hop Acreage In Canada

The total acreage in Canada of hops in bearing in 1927 was 1,037 acres, or practically double the 594 acres produced in 1926, which was quite the largest acreage up to that time. The average yield per acre was 1,375 pounds and the total yield 1,425,875 pounds, or 7,292 bales. The average price received per pound was 32 cents, making the total value of the 1927 hop crop $456,280, as compared with $367,246 in 1926.

The Oil Of Power. It is not claimed for Dr. Thomas' Eclectric Oil that it will remedy every ill, but its uses are so various that it may be looked upon as a general pain killer. It has achieved that greatness for itself and its excellence is known to all who have tested its virtues and learned by experience.

"Hey, Miss Whatsyourname!" shouted the boss. "What's the phone number of Brown & Company?"

"O," replied the new stenog, dabbing her nose, "approximately 3000 something."

Headache? Relieve with Minard's Liniment.

Many of us are kept out of a lot of mischief by being out of funds.

ASPIRIN

Headaches may be swiftly and safely relieved by an Aspirin tablet. A most efficient remedy, and there's no after effect; its use avoids much needless suffering. Try it next time; see how soon its soothing influence is felt. Just as helpful when you have a cold; neuralgia, neuritis, rheumatism, lumbago. Just be certain you get real Aspirin—the genuine has Bayer on the box, and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

Shortage Of Butter

Canadian Production Not Keeping Up With Domestic Requirements

J. A. Caulder, President of the National Dairy Council of Canada, told the delegates to the annual meeting of the Dominion Mortgage and Investments Association, that Canada this year would be 15,000,000 or 20,000,000 pounds short of supplying her own butter requirements. The dairy industry has not kept pace with increased population, he said, and Canada had the highest per capita consumption of butter in the world—approximately 28 pounds a year.

"Those who thought that mining was an underground operation will be surprised at the growing use of aeroplanes in that industry."

COUGHS

Nail GYPROC right over Old Walls

GYPROC Advantages for Farm Buildings

Easy to use. Low cost. Workable as lumber. Cannot warp, bulge, crack, shrink or burn. Takes any decoration. Resists heat and cold. Vermin proof. Eliminates repairs. Ideal for lining garages, poultry houses, barns, grain bins, and other farm buildings. Especially suitable for converting basements into extra rooms.

How many rooms in your home have walls that are cracked and faded? Make them "good as new" by nailing Gyproc right over the old, unsightly wallpaper. When you've decorated with Alabastine your home will be as attractive and comfortable as any home can be.

Use Gyproc for partitioning off extra rooms, renovating attics and basements, and making grain bins, stables and other farm buildings fire-safe and vermin-proof. You can put it up yourself—easily, quickly and at a substantial saving.

Gyproc Joint Filler applied at all the joints insures a perfectly smooth, flat surface that will take any decoration.

HARVESTER PLAN WAS A SUCCESS STATES AMERY

London, England. — Satisfaction that the great majority of British miner harvesters were employed under satisfactory conditions and that reports of generally bad treatment cannot be substantiated is expressed by Right Hon. L. C. M. S. Amery, secretary of state for the Dominions, in a letter to Right Hon. Arthur Henderson, chairman of the Labor party, made public here.

Mr. Amery's letter was in reply to one from Mr. Henderson in which the former home secretary said the attention of the national executive committee of the Labor party had been called to "various serious statements" regarding conditions under which the miners were employed and the treatment they received in Western Canada.

An officer was sent from England to Canada, and was still there, to deal with sickness and cases of genuine personal misfortune, Mr. Amery said. He mentioned that no harvester was adversely affected under the national insurance scheme.

"No doubt some cases of hardship have occurred—and indeed ability to face some degree of hardship is indispensable— but I am satisfied that no general complaint of bad treatment can be substantiated," Mr. Amery wrote.

"I am also satisfied that the great majority of harvesters got work under satisfactory conditions."

'Plane Crashes In Hudson Bay Area

Machine Forced To Land and One Man Reported Killed

Toronto.—A special despatch to the Toronto Star from The Pas, Man., says that one member of an aerial exploration party is dead, and another badly frozen as a result of a 'plane crash in a forced landing in the Hudson Bay area.

The Star's despatch follows: "One member of the Northern Aerial Mineral Exploring prospecting party is dead and another prospector is badly frozen and is in a critical condition according to word reaching The Pas.

"The men were in the Hudson's Bay area seeking minerals and are believed to be members of a party being transported by airplane to a new field, on what is known as the North Plane. The plane, forced to land, it is understood crashed on a mat.

"Word of the precarious position of the men on the plane was radioed to a Dominion government tug operating in the Hudson's Bay District. It at once rushed to the scene of the wreck and was able to rescue six of the men on the plane. The name of the pilot in charge has not yet been learned.

"As soon as word of the fatality reached here Captain Oakes was sent out by plane to render all help possible."

Canadian Scouts Will Attend World Meeting

Two Complete Troops Going To England For Twenty-Fifth Anniversary

Ottawa, Ont.—At a conference of Boy Scout commissioners of the various provinces, it was decided that Canada would be represented next summer in the gathering of 30,000 Scouts brought from all over world for the great jamboree to be held near Birkenhead, England, to mark the twenty-first birthday of scouting.

Plans were made for a minimum of two complete Scout troops, the final size of the contingent to depend upon the number of boys it was possible to draw from each province.

Floods Hamper Relief Work

West Palm Beach, Fla.—Rehabilitation tasks in the hurricane devastated area about Lake Okeechobee have been seriously hampered by flood waters. The lake and surrounding streams and rivers were out of their banks after heavy rains. Thousands of acres of farm land were under water.

Will Reveal Full

London, Eng.—It is understood that the cabinet has decided to publish a white paper containing full details of the discussions leading to the Franco-British naval compromise proposals with relevant documents and the replies from the powers consulted as soon as certain outstanding formalities are completed.

Unemployment Insurance

Question To Come Up For Consideration When Ottawa House Meets

Ottawa, Ont.—Unemployment insurance, which was the subject of investigation by the industrial committee of the House of Commons last session, will be given further consideration when parliament convenes again. This assurance was given by Hon. Peter Heenan, Minister of Labor, who stated that the majority of the provinces of the Dominion already had declared themselves upon the proposal.

In its report the industrial relations committee accepted and endorsed the principle of unemployment insurance, based on compulsory contributions derived from the state, the employer and the employee. The report further pointed out that the responsibility for such legislation primarily rested with the provincial governments.

On the basis of the committee's findings the department of labor communicated with the various provinces to ascertain which of them would be prepared to consider adopting the proposal and to what extent they were willing to go at the present time. Mr. Heenan intimated that these replies would be submitted to parliament at the next session. The minister refused to divulge the views of the provinces in the matter.

Winston Churchill Joins Union

Chancellor Of Exchequer Is Identified With Building Trade Workers

London, Eng.—Winston Churchill, chancellor of the exchequer, who made quite a reputation as a bricklayer while handling a trowel in the building operations at his home in Kent last summer, has made himself one with his fellow craftsmen by joining the Amalgamated Union of Building Trades Workers. The chancellor who paid his entrance fee by cheque will receive his union card shortly.

Notifying the new recruit to trades union ranks that he will be pleased to enroll him as a member, James F. Lane, divisional secretary, sent Mr. Churchill a copy of the rules mentioning the entrance fee of five shillings and a weekly contribution of nine pence.

"This," Lane wrote, "entitles you in addition to trade protection to one pound a week should you be called out on strike and to additional unemployment benefits should you at any time fall out of employment."

Under the regulations any one employing the chancellor as a bricklayer in the future must pay him the minimum wage.

New Varieties Of Seed Wheat Ready

Demand For Garnet and Reward Greater Than Supply

Ottawa.—Nearly 25,000 bushels of seed wheat of the Garnet and Reward varieties will be provided by the Department of Agriculture this year, it is learned. The demand is stated by officials to be greater than the supply.

The new varieties were developed by L. H. Newman, Dominion cerealist, at the experimental farm here. The grain ripens from seven to ten days earlier than other varieties.

Last year's sale of seed grain amounted to approximately 3,000 bushels. So satisfactory have the results been that this year's production at the experimental farm will not nearly meet the demand. It is sold to the farmer at $3 per bushel.

Tuberculosis In Cattle

Disease Being Eradicated By Means Of Restricted Areas

Ottawa, Ont. — Tuberculosis in Canadian cattle is rapidly being eradicated through the operation of the restricted area plan, Dr. George Hilton, veterinary director-general of the department of agriculture, declares.

Where in some areas as high as 7.9 per cent. of cows had been found infected on the first tests, re-tests had shown a general falling off to approximately one-half of one per cent.

"There is a persistent and increasing demand upon the department for restricted areas," Dr. Hilton said.

"Farmers have found that by replacing infected animals with high class stock they receive greater financial returns with less work."

Antarctic Broadcast a Success

Montreal.—A wireless received by George A. Wendt, Canadian Westinghouse Company, states that the first attempt to broadcast special programs for members of the Byrd Antarctic expedition, now on the way to New Zealand, was completely successful.

Chamberlain Will Travel Across Canada

Reaches Victoria October 29, and Sails From Quebec November 15

Ottawa.—Sir Austen Chamberlain's Canadian schedule has been given out here. He will arrive at Victoria on the afternoon of Monday, Oct. 29, remaining there until Wednesday, Oct. 31, when he leaves for Vancouver, where he spends Wednesday night. Sir Austen will leave Vancouver for Banff on Thursday morning. He will leave Banff on Sunday, Nov. 4, and arrive in Toronto early Wednesday morning, Nov. 7.

The next evening he will leave for Ottawa, arriving in the capital on the morning of Friday, Nov. 9. His stay in Ottawa will continue until Tuesday, Nov. 13, when he leaves to spend one day in Montreal. From Montreal, Sir Austen goes to Quebec, arriving in that city on the evening of Nov. 14. He will sail from Quebec the next day.

FINAL PAYMENT OF WHEAT POOL FOR 1927 CROP

Winnipeg.—Cheques for the final payment of 3½ cents per bushel on the 1927 wheat crop are now in the mail for Wheat Pool members in Manitoba, Saskatchewan and Alberta. Of the total amount distributed, amounting to $4,722,105.89, Manitoba's share is $251,873.53. The Saskatchewan Pool received $2,870,830, and Alberta, $1,600,142.75.

"The final payment this year is a flat payment on all grades of wheat," it was stated by E. B. Ramsay, general manager of the Central Selling agency. "As all marketing costs and all deductions for commercial and elevator reserves were made from the last interim payment, the Pool's final price for the past year on No. 1 Northern, Fort William, was $1.42¼ per bushel, as compared with $1.42 paid last year, $1.45 in 1926, $1.66 in 1925, and $1.01 paid by the Alberta Pool in 1924."

Regina.—President A. J. McPhail commented on the fact that the payment this year is somewhat earlier than the final payment from the 1926 crop, which was made on October 19 last year.

"A detailed report of the operations of the Pools for the crop year 1927-28 is, of course, not yet available, and will not be available until the annual meeting of delegates which takes place on November 20, but it is sufficient to say at this time that the Pool management are satisfied with the showing made during the past year. They are confident that many Pool members did not expect the final price to be so generally satisfactory, and I can only repeat what I have already stated on previous occasions, that the Pool organization, as a wheat marketing agency can only be effective to the extent that it is both efficient in management and in control of the largest possible volume of the total marketable wheat from Western Canada. It is, I think, generally admitted that the Pool organization is to be commended for the progress made to date in building up so rapidly such a huge organization, and we hope that our efforts will be assisted in the future by the addition of many million bushels more of Saskatchewan wheat, now marketed outside of the Pools."

HAS SETTLEMENT PLAN

Lord Melchett, formerly Sir Alfred Mond, who is in Canada. He proposes land grants to settlers by the Dominion and the financing of the undertaking by Great Britain as a solution to the British unemployment problem.

Many Killed When Building Collapses

Faulty Material and Hasty Construction Blamed For Accident

Prague.—The catastrophic collapse of a newly-constructed seven-storey building here may have taken a toll of 64 lives or more, it is feared.

Most of the victims were workmen putting the finishing touches on the building. Faulty materials and too hasty construction are blamed for the collapse.

The architect in charge of the construction of the building committed suicide when informed of its collapse.

A woman pushing a baby-carriage was buried beneath the avalanche of brick and masonry with her child. A chauffeur passing in a motor car suffered the same fate, as did two coachmen and the four horses pulling their vehicles. About a hundred workmen were in the building when it collapsed.

Order Will Be Repealed

Canadian Residents Working In U.S. Are Not Immigrants According To Ruling

Washington, D.C.—Order eighty-six of the United States immigration department may be formally repealed within the next week or so. Promulgated on April 1, 1927, the order caused international turmoil until the Supreme Court of the United States technically nullified it by refusing to review the judgment of a New York circuit court of appeals, setting aside its provision that Canadian residents working on the U.S. side of the border were really immigrants, and must conform to all requirements of the U.S. immigration laws.

China Inaugurates President

Shanghai, China.—General Chiang Kai Shek has been inaugurated president of China. For the first time in 17 years of her history as a republic, China thus attained a unified central government. This was a national holiday. Chiang was installed at Nanking, the Nationalist capital, with impressive ceremony, amid general rejoicing. He was made chairman of the Nationalist government council, with the title of president.

Sails For Antarctic

Commander Byrd Commences Expedition To South Polar Regions

Los Angeles, Cal.—With thousands of his fellow countrymen at the harbor to wish him well, Commander Richard E. Byrd, U.S.N., turned his face this afternoon toward his newest adventure in the ice-crusted regions of the South Pole.

The expedition, which embraces 82 members, will cost approximately $1,150,000. The money was raised by contributions from all parts of the United States. The primary purpose of the trip is to make accurate maps and procure important meteorological and other data of the South Polar regions.

Conditions Are Improving

Department Of Labor Reports Fewer People Unemployed

Ottawa, Ont.—Material improvement in employment conditions throughout Canada during the current year is revealed in figures dealing with employment placements released by the department of labor. Up to the end of August, employment was found for 283,714 applicants at the various public employment offices in the Dominion. In the first eight months of last year work was found for 239,570 applicants.

A WELCOME FOR SETTLERS FROM THE BRITISH ISLES

London, Eng.—"No bigger untruth was ever offered in respect to a nation and a country than to say that Canada does not wish to have migrants from the British Isles," Premier Mackenzie King of Canada declared emphatically in the course of a lengthy speech on Canada's immigration question and diplomatic representation abroad at the annual banquet of the Canada club here.

"Not only do we wish to have but we are prepared to advance money for their passage and indeed in some cases pay the entire passage for those whose labor we specially need," the Canadian Premier stressed after outlining the prosperity of Canada at present and the exceptional opportunities the Dominion held for migrants.

Hon. Charles Dunning, minister of railways for Canada, followed Premier King with a statement that he believed many of the British miner-harvesters who went to Canada this fall would remain in the west.

This experiment was merely the extension to Britain of the practice followed in Canada for 20 years, he remarked. Eastern Canadians had been going west on harvest excursions for two decades and many had settled permanently in western Canada.

The speaker strongly deprecated the idea that any considerable proportion of people without experience in Western Canada could be expected to start immediately to become successful farmers on their own account. Assisted settlement schemes could not in this way be wisely extended he added.

A "certain type of propaganda appearing from Canada in the British press, conveying the impression that Britons are not wanted in Canada" was strongly condemned by the minister.

LEGATIONS AS A SYMBOL OF OUR GOODWILL

London.—Premier Mackenzie King of Canada, addressing the Canada Club here, made the following statement, explanatory of the motives which prompted the establishment of Canadian legations at Washington and Paris:

It is a desire to gain the advantage in international negotiation of diplomatic standing and status for whoever today may be representing Canada's interests in the United States and France and for whoever may succeed to that high responsibility in the years to come.

Next it is to provide means of more effective consultation and co-operation between the British and Canadian government on matters in the United States and in France which are to us of common interest and concern.

But over and above all else is the hope we devotedly cherish that a Canadian legation in the United States and in France may serve increasingly as a reminder of the near relationship our country bears to these great countries and to this old land.

In the United States our legation, we trust will stand as a symbol of Anglo-Saxon friendship and goodwill based upon kindred ties of blood and tongue and tradition between the British and American peoples. And our legation in France will stand as a symbol of that union of French and British minds and hearts which has helped to make Canada what she is, and a never-ending friendship between these two great races.

"Alike in the old world and in the new, it is permanent friendship and goodwill which above all else Canada seeks for herself in relation to the countries, and between these countries and the great community of the British nations to which she is so proud to belong. We are not without hope that our voice at Washington and Paris may be helpful towards that great end.

Farmhand To Stardom

Gordon McLeod, Now Touring West, Once Worked On Saskatchewan Farm

Winnipeg, Man.—A former Saskatchewan farm hand is now visiting the west under circumstances which can best be described as offering several varieties of vivid contrast. Years ago, as a lad, he was one of the humble toilers at the Indian Head Experimental Farm. He also, during that portion of his career, worked for a time at the Imperial Hotel there. At this moment, he is a stage celebrity.

The ex-harvester and student of the evening chores is Gordon McLeod, now heading his own London company on a transcontinental theatrical tour after being pitchforked into fame last year when he took Sir John Martin-Harvey's place on an hour's notice. Sir John was stricken ill in Toronto, and young McLeod filled the breach so sensationally that a number of Canadian financiers came forward and offered him the means to step into stardom.

Between the date of his earlier exertions at Indian Head and his present visit to the same vicinity, he has played in China, Japan, Burmah, from Cairo to Singapore, and from South Africa to London. During the war, he served under General Smuts in the campaign against German East Africa and later, as a junior lieutenant in France.

He has previously been starred in London, but this present year makes the first occasion on which he has scaled the theatrical heights for an international tour.

Death Of Prominent Grain Man

Edmonton, Alta.—Hartley Mansell Pearson, general superintendent of elevators for the Alberta Wheat Pool, who was taken ill at Chauvin several days ago, passed away in an Edmonton hospital. Mr. Pearson was exceedingly well known in the grain trade, and previous to joining the pool some two years ago, was with the John R. McFarlane Grain Company of Calgary for 20 years.

Robbery Motive Suspected

Saskatoon.—Belief that Mike Harrison, whose body was found on blood-soaked newspapers beside the C.N.R. tracks near Saskatoon, was the victim of foul play, was strengthened when it was discovered he had received $193 pay from a farmer a few days before his death. There was only 15 cents in his pocket when he was found dead, his skull badly smashed, and wounds on his back.

WELSH IMPERIAL SINGERS

The famous Welsh Imperial Singers who arrived in Quebec on the White Star liner "Laurentic" recently. They are on a world tour under the leadership of Mr. R. Festyn Davies.

NAVAL AIR STATION, LAKEHURST, N. J., Oct. 16th.—The largest airship ever built, the 3,700,000 cubic feet of its silver envelope filled with inflammable hydrogen, was berthed here today after completing the farthest commercial flight from Europe, and three other dirigibles huddled in the hangar close beside it.

There was a [illegible] feeling of tension in the [illegible] was stern [illegible] certain places [illegible] was all [illegible] except with rubber soled shoes [illegible] small a thing as a spark [illegible] nailed heel cause terrific disaster.

The dirigible [illegible] across the seas was the mighty Graf Zeppelin which floated from the Zeppelin works at Friedrichshafen [illegible] Thursday morning with a crew of [illegible] men and a passenger list [illegible] and landed here at 5.30 o'clock [illegible] afternoon after playing tag with the elements for 111 hours and [illegible] minutes over a course estimated [illegible] 500 miles.

The other [illegible] in the hangar were the [illegible] and two comparatively [illegible] blimps.

Only 5,000 on Hand

[illegible] for three days [illegible] the arrival [illegible] 100,000 persons [illegible] as 500,000 having [illegible] several states [illegible] of the giant.

Yesterday [illegible] there were not many more than [illegible] on hand when a gray smudge appeared on the distant [illegible] horizon and expanded [illegible] of a gigantic fish that [illegible] the skies with [illegible]. The great dirigible [illegible] infancy, the greatest in the world and soon to be completely eclipsed [illegible] three other far greater ships [illegible] the boundary of the air station and dipped toward the flying field as the crowd broke into a [illegible] cheer.

The Graf Zeppelin appeared first as a faint smudge low above the northern horizon. Slowly, as daylight began to [illegible] it took definite form [illegible] metalled coat remained dim grey in the dusk. The Graf Zeppelin seemed to swell as it approached until it blotted out half the sky.

ONE DEAD THREE DYING FROM FAST OF FORTY DAYS

Tragedy is Discovered on Glubisch Farm in Egremont District

An old man named Glubisch is dead and his wife, son and daughter-in-law, all of Egremont district, are at the Royal Alexandra hospital at the point of death as the result of a fast lasting forty days, according to a report received by the Alberta Provincial Police on Friday afternoon.

Neighbors who had [illegible] seen the Glubisch family for [illegible] time became curious and upon investigation found the old man, who [illegible] about 80 years of age, lying dead in the kitchen floor. The son and daughter in law were lying huddled together in a dying condition in another room.

Word of the tragedy was telephoned to Edmonton and two of the Howard and McBride's ambulances rushed to Egremont and brought the dead man and the other [illegible] to the Royal Alexandra Hospital in [illegible]. The wife and daughter-in-law were unconscious and in an extremely emaciated condition.

Statements made by [illegible] neighbors are to the effect that the Gubisch family were religious fanatics and were near the finish of a forty day fast when discovered. The man had died a few hours previously and death would have [illegible] for the others had not help arrived. Their condition on Saturday morning was still serious.

THREE GOVERNMENTS WILL AID IMMIGRATION WORK

Hon. Robt. Forke Held Important Conference With Alberta Cabinet

Closer co-operation between the provincial and dominion governments in regard to the future immigration work was decided upon at a conference held Tuesday afternoon between Hon. Robert Forke, federal minister of immigration and colonization, and Premier Brownlee and members of his cabinet. There will probably result from the conference in the way of definite forward move, an agreement to bring out next year a number of British women for domestic help, the establishment of training schools in the old country for prospective emigrants to Canada, and the erection of twenty or more cottages in the Lethbridge irrigation district for newly arrived settlers was pretty thoroughly discussed between the government ministers and Mr. Forke, particularly as to the extent to which the provincial and federal efforts in this direction might be co-ordinated. Premier Brownlee regards the conference as highly satisfactory and thinks there will be some practical out come [illegible].

All the new policies thus tentatively decided upon will be of a tripartite nature; as between the Alberta, dominion and British governments. The cost of the various projects will be shared by the three parties, which will in this way be closely linked together in the promotion of selected British immigration to this province.

According to Mr. Forke's information a considerable number of British women immigrants can be located as domestic help and it is proposed to give this phase of the question some definite attention during the coming year.

The training schools also proposed as a matter of future policy will be established in both England and Scotland. They will be for the purpose of familiarizing likely migrants to Canada with actual living and farming conditions in this country and will be closely supervised. A great deal can be done in this way in Mr. Forke's opinion, to give prospective settlers a measure of experience and so to ensure their ultimate success.

The provincial government will now consider as part of its future program the building of twenty cottages on Lethbridge irrigated farms, in which farmers newly brought out under the tripartite scheme may be settled. The discussion disclosed the fact that the question of living accommodation is one of the most important factors in the entire situation.

Another matter dealt with in the conference was how use might be made of the provincial government organization in estimating the number of immigrants that the province with a view to getting a regulated flow of settlement.

Mr. Forke's visit was part of his itinerary on a western tour in which he is consulting with all the provincial governments. From Edmonton he went Tuesday night to coast points.

THE TOFIELD MERCURY

Vol. X., No. 27 — Week Ending October 27th 1928 — $2.00 Per Year. To U.S. $2.50

Mr. and Mrs. Hills, of Bardo, left on Wednesday's train for the coast and western States. They have been residents of the Bardo district for the past 14 years and were very highly respected. Their many friends are sorry to see them leave the country and wish them every happiness in their new home. Mrs. Hills has for the past ten years been the Mercury correspondent for the Bardo district, and during that time has rendered very valuable aid to the Mercury and no doubt to her district. The Mercury is very grateful for Mrs. Hill's assistance.

Mr. and Mrs. Hedstrom and family arrived in town from Mirror on Saturday last. They have taken up residence in the Tofield house. Miss Catherine Bowen accompanied them.

Chrysler Plymouth Cars

MECHANICAL EXCELLENCE THAT GOES FAR BEYOND ACCEPTED STANDARDS

In new and original engineering features, and in its construction all the way through, the new Plymouth goes so far beyond the accepted standards that it is a revelation even to mechanical experts. Chief among the new developments is the latest and greatest product of the Chrysler engineering staff—the new "Silver Dome" high compression engine. Through the perfection of this great motor the advantages of high compression—greater power, greater climbing ability, greater speed and greater acceleration—can be obtained through the use of the ordinary gasolenes.

LOCAL AND PERSONAL

Mr. L. Scott left on Monday for Springfield, Mass.

Mrs. Hobson visited the city on Monday.

Mrs. Tofield, of Edgerton, is visiting relatives here this week.

Mrs. R. Wilson and daughter were in the city for a few days last week.

The Misses Minnie and Mabel Woods visited the city on Monday.

Mrs. Hall, Mr. and Mrs. Gould and Mr. Clark spent Sunday at the McLaughlin home.

Mr. Marts of Duhamel is visiting his daughter, Mrs. Snell, for a few days.

Harvey McClymont returned from High River where he has been for the past eight months.

The Misses Annie Swift, Ruth McLaughlin and Helen McCauley went to the city last Friday to attend the C.G.I.T. conference there.

W. Swift, M.A., has joined the teaching staff of the Olds School of Agriculture. He left this week to take up his duties.

Hon. V. W. Smith, minister of telephones and railways, and Mr. Bradburn are in town for a few days hunting.

Among week end visitors to the city were the Misses Lola and Stella Clement, Miss Cooper, J. Robinson and Mr. Skitch.

Mr. and Mrs. Lamont, Ethel and Harvey McClymont motored to Vilna on Sunday to visit Mr. and Mrs. G. Owens.

On Wednesday a very pleasant afternoon was spent at the home of Mrs. F. M. Webb who entertained a number of her lady friends in honor of Mrs. Tofield.

The young baby of Mr. and Mrs. Jesse McMullen was suffering from bronchitis this week. Miss Ardis Wood is assisting Mrs. McMullen in the care of the child.

The Wierenga family who have been living in the Worton house for the past summer, left for Edmonton on Monday. Mr. Wierenga, we understand will take up a homestead north of Edmonton.

A dandy wienie roast was held near the school last week by the pupils of Miss Cooper's room at the Tofield school. A lovely bonfire was lit and games were played around it. The sing-song was particularly enjoyable and a splendid time was had by all.

Among the visitors to the city this week are included, Mrs. Firth, Mrs. Carver, Mr. Hannan, Mrs. McLaughlin, Mrs. Calvert, Miss Minnie Wood, Miss Mabel Wood, Mrs. Agnew, Mrs. Griswold, Mr. and Mrs. Burchard, and Miss Lucille Gray.

A debate will be held in the United Church on Monday evening, October 29th. The title of the debate is "Resolved that capital punishment should be established." The debaters will be Arthur Beirnes, Everett McLean, Raymond Martin and ——————. The debate commences at eight o'clock the judges being Mr. Bullerk, Mr. Lundie and Mr. Worton.

It was announced in the daily papers of Monday or Tuesday that the Red Cross Commissioner had met with an accident near Camrose. It appears that he had a gun in the car and in some manner or other it exploded, the shot going through his foot. He was taken to the Camrose hospital. It is believed here that the injured man was Mr. Adams who was in Tofield a few days previously.

The Names of thirty outstanding Alberta Grade VIII. students were announced in October 17th Edmonton Journal by Hon. Perrin Baker, minister of education. These students are the winners of bronze medals awarded by His Excellency Viscount Willingdon, governor general of Canada, for pupils taking highest marks in departmental examinations. One medal goes to each inspectorate except in the cases of Edmonton and Calgary where two medals are given. Thelma Rose Griffith, age 15 years, of North Cooking Lake was the winner in the Lamont inspectorate. She attended Uncas School and for the last two years was taught by Miss Marion R. Cooper, teacher of room II. in our local school.

Correspondence

Box 20, Tofield, Alberta,
October 24th, 1928

The Editor,
The Tofield Mercury.
Dear Sir::

Re: Hallowe'en Jokes, Etc.

Through the medium of your, no doubt, widely read paper I beg leave to make the following remarks.

In the old days Hallowe'en, as no doubt your readers are all aware, was a time when people, both young and old, went out to play a few practical jokes upon their friends, etc.

These jokes were usually carried out in a true spirit of friendly fun and there was no thought of spiteful annoyance or destruction entertained by the jokers at all.

The fun consisted of various kinds of so called amusing tricks, such as dressing up in a white sheet and playing "ghost"—thereby giving some person a gentle shock, also constructing and wearing funny, and sometimes hideous, masks or faces, and appearing suddenly in front of someone upon whom the joke was on.

There was also the time honored business of going from door to door and demanding certain tribute to the Hallowe'en spirits, such as fruit, candies, etc., and sometimes even money.

All of the foregoing were and still are, undoubtedly harmless even though perhaps a trifle foolish, but the people then obtained a lot of fun out of these so called jokes and it would indeed have to be a very mean minded person who objected to such harmless fun.

Today, however, the harmless though foolish form of fun is not good enough for our super intelligent people of the 20th century. It has become the practice for a certain class of young men, and apparently women also, to take upon theirselves a form of license which is nothing more or less than "hooliganism" of the worst kind.

In case this word is not understood I will define it by saying that it constitutes a form of rowdyism, destructiveness and general lawlessness, all of which is entirely opposed to the true spirit of the Hallowe'en, under the excuse of which it is usually practiced, not to mention the utter defiance shown towards the rights of other people and the laws of the country in which they live. Furthermore this hooliganism consists of nothing more than a foolish and in some cases malicious destruction of people's property, etc., not to mention the many cases of filthy indecency displayed.

The writer of this letter is the local member of the Alberta Provincial Police stationed in the Tofield police district and resident at Tofield, and it is my desire to draw the attention of those persons, if any, who are inclined to participate in any of the above mentioned forms of viciousness to the fact that these acts of destruction to peoples property is very apt to incur a heavy penalty against the parties responsible for same, and I further more wish to make it perfectly clear that as far as I am concerned as a police officer that any cases of this nature brought to my attention by any property owner will be investigated, and where the offender is known, or found out, the full force of the law will be brought into play against him or her, regardless of whom they may be, the excuse of Hallowe'en notwithstanding.

A little harmless fun is alright and quite in order but the deliberate destruction of public and private property is absolutely taboo and forbidden and wherever discovered will be prosecuted to the limit.

I trust therefore, that the "fun" makers of Tofield and district will bear the above facts in mind when celebrating the approaching Hallowe'en and try and behave in a manner becoming of them, according to their age and degree of intelligence, furthermore I would suggest that to those to whom the foregoing remarks may apply will don the cap if it fits and act accordingly thereby saving theirselves considerable trouble and expense, to all others of course it does not apply.

Sometimes a little is lots. Eh?
Thanking you for your space,
I am, Yours truly,
C. J. CARR,
A. P. Police, Tofield District.

KETCHAMOOT

Our Hollander neighbors, Mr. and Mrs. Peterson who resided several months in the Owen house left on Monday to go on a homestead north of Edmonton.

At one time this fall the teacher and trustees had quite a problem to find room and seating accommodation for the pupils. But now six have dropped out, the three Hollander children, the two Tiedeman children and Boyd Johnson.

Mr. and Mrs. Leslie Coombes and daughter motored up from Red Deer a week ago Sunday. They were accompanied home by their mother and niece, Mrs. A. McMullen and Miss Ethel Coombes.

Miss Lillian Corfield returned home on Sunday after a few weeks spent at the Rev. Gordon home.

Mr. and Mrs. John Johnson and family spent several days last week visiting friends and relatives at Vermilion and Holden.

Miss Mildred Ingram returned home on Thursday after a stay at the home of her sister, Mrs. T. D. Ferguson.

Mr. and Mrs. Wm. Lee, daughter Viola and Lorne motored to Edmonton on Friday.

Mr. and Mrs. Chester Coombes and family motored to Red Deer on Saturday, returning home on Sunday. Mrs. McMullen and Ethel returned home with them.

Several families hauled coal from the Bardo siding on Monday. Mr. Hombodal had a carload of Mineral coal shipped in.

Mr Peter Lee suffered a slight stroke on Friday evening, which might have proved fatal, but for the timely aid of Martha and Stanley Dunham who were going home from town. Mr. Lee was stricken out-of-doors, two cars passed but did not hear him shouting.

LAKEBROOK

We are sorry to report that Mrs. Roe Phillips has been quite ill with an attack of flu which seems to be quite prevalent in this neighborhood. She is somewhat improved at present.

The Ben Wildman family of Woodlawn were Sunday visitors with Mr. and Mrs. J. B. Warner.

Mr. and Mrs. Nelsed visited at the Jack Johnson home on Sunday. Mrs. Emory and Mr. and Mrs. Chapman also called then.

Miss Mildred Bethel spent two or three days in Edmonton last week shopping.

Mr. and Mrs. R. C. Phillips and M. H. Phillips motored to Chipman on Sunday afternoon.

Mr. Melvin Bethel made a business trip to Deville on Tuesday.

Bob and Jas. McMurray and friend of Edmonton spent the week-end at the Sam Bethel home.

Miss Margaret Wolfe is keeping house at the Roe Phillips home while Mrs. Phillips is indisposed.

The Tofield High School hockey team held a very successful [illegible] drive on Friday night last.

Mr. Adams, the Red Cross Commissioner was in Tofield last week. He arranged for the holding of a tag day in Tofield on Saturday, October 27th. The Red Cross is doing a great deal of good throughout the province and it is hoped that Tofielders will respond liberally to the requests of the tag committee for donations.

The Tofield Curling Club are holding a dance at the Variety Theatre on Friday night, November 2nd. Trippers of the light fantastic will be delighted to hear that they have procured Martin's orchestra from Edmonton. This orchestra is hard to get owing to their many engagements but Mr. Clutterham took time by the forelock and journeyed to Chipman last week where they were playing and booked them for Tofield on November 2nd. This is the first dance advertised for some time and will no doubt bring out a jolly crowd.

Born.—To Mr. and Mrs. Sinclair, on October 25th, a son.

Born.—To Mr. and Mrs. Herb Arbin on October 22nd, a son.

AMISK CREEK

E. A. Moen shipped a carload of hogs from Ryley to the Pool on Tuesday.

Mr. and Mrs. R. O. Berg and family motored to the city last Monday, returning the same evening.

The Misses Henry Anneke and Ruby Berg who are attending school in Camrose spent the week end at their parental homes.

Mrs. P. O. Fhasten and Gunvald visited at the Riggen's home in Bardo last Sunday.

Mr. and Mrs. E. A. Moen and family visited at the R. O. Berg's home last Sunday.

Some of the visitors had a carload of coal shipped from Tofield to Shonts where it was distributed.

In my last correspondence there was a mistake. The young people have there meeting every two weeks instead of every week, as announced last week.

KINGMAN

H. Mickelson left on Thursday for Sweden where he will make his home.

Mrs. O. Bray visited in Camrose on Thursday.

Mr. Watkin of Edmonton is visiting with his daughter, Mrs. O. Bray, for a couple of weeks.

Mrs. E. Erickson motored to Camrose on Saturday.

Mah Hen, Mah Hong and Mah Dong were business visitors in Tofield on Friday.

E. Erickson, Oliver Thompson and John Erickson spent the week end in Edmonton.

Mrs. Pete Vold and family are visiting with friends in Kingman for a few days before going to Grande Prairie to join Mr. Vold who left a few days ago.

Mr. A. Aup and children motored to Hay Lakes on Sunday.

Mr. and Mrs. Roy Melvik visited with Mr. and Mrs. W. Simonson on Sunday.

Hans Bruce, Palmer Bruce and R. D. Bruce motored to Leduc on Friday.

Mr. and Mrs. Bartness and son were Bardo visitors on Sunday.

LINDBROOK

Congratulations to Mr. and Mrs. J. H. Brown of Lindbrook on the birth of a bonny boy, born at the Alexandra Hospital, Edmonton, October 19. Both mother and baby are doing fine according to latest reports.

A Hallowe'en dance will be given at the Westlake school, Lindbrook North, on Friday evening November 2nd, 1928. Admission price will be 50c. for gents, whilst ladies bring refreshments. The proceeds are to go towards the building of a stable in the school yard. Now you lovers of animals, here's your chance to do your good friend the horse a kindness and at the same time enjoy yourself, so roll up! everyone. Everyone is welcome.

Quite a few cars of cattle, sheep and pigs have gone out from this district lately.

Several of our prominent sheep raisers here visited the sheep sale in Edmonton and we hear that Mr. A. C. Scott purchased some pure bred rams for his flock, also a considerable quantity of woven sheep wire for pasture fencing.

Mr. and Mrs. E. W. Hooper spent a few days in Edmonton over the week end visiting their daughter, Mrs. J. H. Brown and inspecting their brand new grandson.

Mr. Robt. Paskins returned to Edmonton last week after spending a few weeks with his brother, Mr. W. Paskins and family of this district.

Messrs. L. & J. Hooper motored up to Edmonton for the week end.

Miss Pearce went to Edmonton last week after spending a short while here with relatives and friends.

The new siding installed here last summer is sure being used a lot now; in fact one wonders how the railroad ever got along without it.

WORLD HAPPENINGS BRIEFLY TOLD

Shocked by a power current which lighted up his house John William Black, of Ogdensburg, N.Y., died in hospital at Prescott shortly.

E. W. Beatty, president of the Canadian Pacific Railway, recently received his 31st birthday. Mr. Beatty was born in Thorold, Ont., on October 16, 1877.

During nine-days-riveting, ragging and blowing upon the nuts in the boat collier and stone operated by M. S. Bickwell Co. at Wilkin Alta., and got away with about $5,000 in cash.

Lord Birkenhead, secretary of state for India since 1924, has resigned from the Baldwin cabinet in order to follow other commercial activities in London.

A crowbreed of 1,500 head of cattle owned by a group of ranchers from the Peace country, reached Edmonton recently over the Edmonton, Dunvegan and British Columbia Railway.

A guarantee of tonnage, such as was given by the Fitz Fleo interests, is essential before a branch line is built to the Sherritt-Gordon mines in northern Manitoba, said Major Graham Bell, deputy minister of railways in commenting on the project.

Lieut.-Col. A. L. Young, of Souris, Man., officer commanding the second reserve regiment, 12th Manitoba Dragoons, was elected president of the Canadian Cavalry Association for the ensuing year at the concluding session of the 12th annual convention at St. John, N.B.

Whether the wheat pools of the west are liable to income taxation will be the subject of a big case in the exchequer court this fall. The matter has long been in dispute, and while the tax has been paid, it has been under dispute. The Saskatchewan Co-operative Company's case is to be made a test, the decision in which will apply to the other pools, says the Ottawa Citizen.

Medical Examination Of Settlers

Doctors To Be Appointed To Examine Intending Settlers At Point Of Origin

Arrangements are being made by the department of immigration to appoint approximately 500 doctors who will conduct examinations of intending settlers at the point of origin, thus eliminating any possibility of disability in a settler presenting himself at seaboard and being turned down by the doctors at the ports designated Hon. Robert Forke, minister of immigration, who had a conference with provincial officials on the question of immigration at Edmonton.

Japan's Traffic Problem

Traffic congestion has become so bad in the streets of Osaka, Japan, that officials are contemplating one of the old canals. It is proposed to use boats propelled by outboard motors as a part of the mass rapid transportation system.

Singapore's Huge Floating Dock

First Portion Now Completed Highest Dimensions Yet Reached

After a four months voyage from England, the first portion of the huge floating dock for the new British naval base arrived at Singapore having completed a journey of 6,000 miles by way of the Suez Canal.

The Singapore dock, when completed will be the largest floating dry dock in the world and large enough to hold any British warship weighs 50,000 tons and measures 20,000 tons of steel. It can lift 100,000 tons.

The contract for constructing the dock and was awarded to Messrs. Hemmer 27 and called for the fulfillment of the work by 1933. It is estimated that the naval part of the project will cost $27,000,000

Many of Canada's leading social and sporting clubs use Red Rose Orange Pekoe exclusively. The added and inimitable flavor of Red Rose Orange Pekoe make it last longer, go further and taste better. Packed in damp-proof aluminum. adv

New Horse Class For Royal

Shows Canada Is Still Interested In Horse-Breeding

Interest in horse-breeding is halting as even in Canada, in spite of the competition from mechanical transport if one may judge by new class es added to the horse section at the Royal Winter Fair this year in addition to the regular classes for Clydesdales, Percherons, Belgians, Shire Standard Breds, Thoroughbreds Hackneys, French-Canadians, Saddle breed Hackneys or Saddle horses, the draught horse and pony classes a new class has been added for Belgian stallion, saddle horse and army remounts, are in keen demand, a class has been added for mares suitable as brood mares in the production of this type of horse. This class is for mares, three years old and over, owned in Canada and registered in the Canadian Hunter, Saddle and Light Horse Improvement Society. The mares will be judged on saddle horse their qualification to produce high class saddle horses and army remounts. The sections of the class are for heavy weight mares, 1,250 pounds and over; middle weight mares, 1,150 pounds and under 1,250 and lightweight mares, 1,050 pounds and under 1,150

NEW BEAUTY for YOUR CLOTHES

Lustre Creme Shampoo

You can look after live and stylish on less! Learn how to give new beauty and variety to your dresses, and add to durability and charm to things around the home by the quick magic of Lustre Creme Shampoo. Just a few fluffy results are possible only 9 1/2 lb. Dissolves in Dyes. Each package represents the purchase of 50 years of dye strength and quality. Get Lustre Creme Shampoo. They are real dyes, like those used in the dye works. Diamond Dyes are easy to use. The know-how is in the dye. Diamond Dyes are the same dyes that dye cloth in the dye works. Insist on Diamond Dyes and save disappointment.

"Color Craft," my big new book of dollar-saving hints, is free and yours FREE. Write Miss Martin, Diamond Dyes, Windsor, Ontario.

Soundings Will Be Continued In Spring

Progress Made In Survey Work On Great Slave Lake

Soundings of Great Slave Lake as an aid to navigation will be continued as soon as possible, according to H. L. Lendman, engineer of the hydrographic survey branch of the federal department of marine, who recently arrived at Edmonton from the far north. He has been in charge of operations in the vicinity of Fort Resolution during the past season, assisted by W. R. Young, of Winnipeg, and a crew of five men.

Commercial fishing offers great possibilities on Great Slave Lake says Mr Lendman, but he thinks that mining will also be necessary to support a population of any size. He also looks forward to considerable mining activity, and states that aeroplanes carrying prospectors have often been to pass over on the way down the Mackenzie River, to the providing of additional transportation for that country he felt certain of a period of market expansion.

Millions Invested In Cars

Seventy-One Million Dollars Invested In Cars In Province

Over $71,000,000 has been invested in automobiles by the people of Saskatchewan, according to the Bureau of Service recently, in 1929, for the eight months ending August 31 last, 1 cars was licensed by the department. In subdivisions these were: Automobiles, 99 091; livery cars, 326; trucks 13,356

Figuring one class of car at a valuation of $600 each and the rest at only $1 000 each, on the 1927 total of 104 908 motor vehicles in existence this means a grand total considerably in excess of $71,000,000 invested by the people of Saskatchewan.

Sour Stomach

Just a few drops of Phillips' puts You are happy again in five minutes. Phillips' of Magnesia in water That is an effervescent, efficient, and palatable mixture. It has been the standard antacid for 50 years Among physicians everywhere. Use Phillips' Milk of Magnesia.

Don't depend on crude methods Employ the best way yet evolved in all the years of searching. That Phillips' Milk of Magnesia.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acidity. Keep it handy. Each bottle contains full directions for any drugstore.

Plastering Neckline

The chic femininity of the mode is smartly expressed in simple form of printed sheer velvet in combination with georgette crepe The long-waisted bodice showing slip-in-the-front, combines with shirred upper edge of skirt, to create the desired flat hip-line. The shaped collar of Vionnet neckline, that falls perfectly flat in point effect, is flattering new fashion and is made of georgette crepe, which is also used for the cuffs. Bouffant long tight-fitting sleeves. Style No. 2950 can be had in sizes 14, 16, 20 years, 36, 38 40 and 42 inches bust. It is dating in georgette crepe, crepe Elizabeth, crepe Roma or sheer pique velvet for afternoons. Crepe satin, canton-faille crepe, wool crepe and crepe de chine are excellent fabrics to choose for serviceable wear. Pattern price 25 cents. In stamps or coin (coin preferred). Wrap coin carefully.

BABY GIRL HAS DIARRHOEA WHEN GETTING TEETH

Mrs. A. J. Murray, Oak Lake, Man., writes: "Our baby girl, Dorothy, was cutting teeth and became very weak with the effects of diarrhoea. I didn't know just what to do for her as she couldn't retain anything. At last one of my neighbors said to me, 'Haven't you any

why, I wouldn't be without it where there are children.'

"My husband went to town and got a bottle, and the very first dose helped her wonderfully, and in three days the was well over the diarrhoea and was running around as well as ever."

W. A. BLACK.

Director, Canadian Pacific Railway.

William Alan Black, Director of the Canadian Pacific Railway, and President of the Ogilvie Flour Mills, has been in Montreal in 1862, the son of Charles R. Black, and was educated in Montreal Public Schools. He was with the traffic department of the Grand Trunk Railway from 1879 to 1882, in Montreal, and with the traffic department of the Canadian Pacific Railway in Winnipeg, from 1882 to 1884, at which latter date he joined the Ogilvie Flour Mills, in 1887 he was appointed Secretary, in 1902, General Manager of Western division, in 1918 he was elected director, and in 1913 General Manager of the entire corporation, and the following year Vice-President and Managing Director. He has since succeeded Hon. Sir C. C. Ballantyne as President. He was President of the Montreal Board of Trade during 1918-19.

Recipe For This Week

(By Betty Barclay)

ECONOMICAL PUDDING

2 cups milk.
1 teaspoon salt.
1 teaspoon vanilla.
2 tablespoons rice.
½ cup raisins.
1 cup raisins.

Wash rice thoroughly and drain; place in a buttered pudding dish and pour in milk. Bake in a slow oven about 1½ hours, stirring occasionally; add remaining ingredients and bake for three ½ to 1 hour without stirring.

UNUSUAL SWEET PICKLE

4 oranges
3 cups sugar.
1 1-3 cups vinegar.
1 teaspoon clove.
1 teaspoon stick cinnamon.

Peel oranges, removing all white membrane with peel; cut into thick slices; make syrup of sugar and vinegar, boil sugar, vinegar and spices tied in cheesecloth, for twenty-five minutes; add fruit, and put in brown cooker, or steamer slowly, on back of stove, for one hour. Place in glass jar, and let stand a week or two to ripen, before using.

Practicability Of Thrift

True thrift is not a theory; it is actuality. It is a principle that is applied constantly in the practical problems of daily living and economics. One dollar saved is an actual, not theoretical, step forward.

It is never too late to learn; never too late to seek knowledge. One of the finest epitaphs ever placed on a tombstone was that placed over the grave of John Richard Green, the famous historian. It said "He Died Learning."

The writer: "This paper says that in parts of the East a good wife costs fifteen shillings. Disgraceful!"

Her Ladyship: "Indeed, a good wife is worth fifteen shillings, isn't she?"

Nothing Like Her

A well-known comedian is very fond of his pretty, beautiful and talented daughters.

One day an acquaintance and admirer of the comedian's daughters said to him about the family.

"A funny thing," he remarked, "you have nothing but those three girls."

The comedian looked at his friend in astonishment.

"Nothing but girls!" he echoed. "Why, my dear old chap, I wish you were right. As it is, we've nothing but boys all over the place."

Battle Forerunner Of Storm

There is a relationship between static and storms. They are synchronous, it is true, that are accompanied by little or no static. There are other storms, accompanied by static, which are nevertheless difficult to locate because the static appears to come from no definite direction. But as a rule static accompanies a storm and gives in advance of the arrival of the storm definite indication of the direction of approach.

SUNDAY SCHOOL LESSON

OCTOBER 28

FAITH'S LAST JOURNEY TO JERUSALEM

Golden Text: "Remember the words of the Lord Jesus, that He Himself said, It is more blessed to give than to receive." Acts 20:35.

Lesson: Acts 20:1-21:17; 2 Corinthians 11:26.

Devotional Reading: John 10:7-17.

Explanations and Comments

Paul Reviews His Ministry Among the Ephesians. (Acts 20:1-16.) Paul had sailed past Ephesus, for he could not take the time to stop there or elsewhere in the province of Asia, as he was very desirous of being in Jerusalem for the day of Pentecost. But when he reached Miletus he sent a messenger to the elders (or presbyters, forward Version) at Ephesus, bidding them come to Miletus to say farewell. In the churches he founded Paul had established the offices of overseer and elders after the model of the Jewish synagogue. Paul spoke sometimes of elders and sometimes of bishops using the latter term, which means literally one overseen, or superintendent, in churches where there was a large Gentile element. "The presbyters have come from the first day that I set foot in Asia, after what manner I was with you all the time" —thus Paul began his address to the Ephesian elders upon their arrival. The first day that Paul set foot in Asia it recorded in Acts 16:6, 7, but his first preaching there was later, Acts 18:19. He came to Ephesus again on his last missionary journey, Acts 19. "The manner of My life" he proceeds to tell in the next three verses.

Paul first reminded them how faithfully and how humbly he had served the Lord while his heart was filled with ministry for them and his own life was threatened by the plots of the Jews (see 1 Cor. 15:32; 2 Cor. 1:8-10); and how he had told them all things profitable for them to know and had taught them in public and in private the essentials of faith and repentance toward God and faith toward Christ. Fear of giving offense to the Jews and therefore of endangering his own life had not prevented him from preaching a crucified Christ as the great Savior for Gentiles as well as for Jews.

"Repentance toward God and faith toward our Lord Jesus Christ" there is no other way but by repentance and faith. First, realize your sinful need, confess to Jesus Christ, Himself, live as you think you ought to live."

Nothing Like Her

A well-known comedian is very fond of his pretty, beautiful and talented daughters.

One day an acquaintance and admirer of the comedian's daughters said to him about the family.

"A funny thing," he remarked, "you have nothing but those three girls."

The comedian looked at his friend in astonishment.

"Nothing but girls!" he echoed. "Why, my dear old chap, I wish you were right. As it is, we've nothing but boys all over the place."

A Remarkable Request

Blind Alley Editor: "Every Times He Uses Weight

A new steel alloy possessing remarkable powers of magnetization has been discovered by a research engineer. It is cobalt steel alloyed with tungsten, and in the form of a horseshoe magnet It is claimed that it will raise a bar thirty times its own weight. Spectators at a recent demonstration were amazed to see a bar of alloy floating in the air. The explanation lay in a similar bar concealed beneath the floating one. Magnetized with the poles opposite, the two bars were kept apart by the magnetic repulsion between them and as the repulsion was greater than the force of gravity, the upper bar floated!

CHAPTER IV. Continued.

In appearance the champion very much resembled a bear. His bullet-like head was close cropped. The small gimlet eyes were deep set under overhanging, bushing brows, and the nose was flat like a negro's. His lips were thick with a repulsive twist that gave his face a sinister look. His massive jaw was purposely left unshaved to rasp the tender skin of his opponent's shoulders in the clinches. He possessed a barrel shaped chest was covered with a thick growth of hair. His shoulders were broad and his disproportionately long arms, heavily muscled, terminated in two thick hands like hoofs. He gazed confidently at Donald's corner.

A pasteboard box containing the gloves was tossed to the centre of the ring There was a stir as the announcer pushed his way through the ropes. Andy crossed the ring to examine the champion's hands for tape and to test thoroughly the new gloves for any trace of sewed in shot or bit tion that would cause the eye to smart. One of Carrieu's seconds was making a similar examination in Donald's corner

A big man in a wide-brimmed hat, with a mackinaw coat over his arm, came walking down the steps of the arena. The look of astonishment on his face gradually gave place to one of joy, his to the ringside.

"Donald" he shouted joyously, as he sprang through the ropes. "Why what a thrill of pleasure Donald held out his hand to Jack Gillis. The big man's face was beaming. "Just got in," he said. "His lookin' all over town for you! I come to the fight and —holy mackerel!" here you are one of the fighters!"

Andy noted the glad look in Donald's eyes and he spoke sharply to Donald's seconds, who were busy during the boisterous visitor out of the ring. The word "psychology" was foreign to Andy, but he knew that Donald's mind had a moment drifted away from the fight. Donald was surprised to see Douglas greet Gillis warmly as the big man left the ring.

"I have two good friends in the audience, anyway," whispered Donald to himself.

Andy leaned over him, talking in a low voice giving him comfort and advice "It'll try right along Donnie, to get your goal by cursing and using vile language, but don't loose him, and don't lose your temper "If fights with 'is chin inclined to the widow of 'is left shoulder and 'is neck muscles rigid It's mighty 'ard to land on to jaw with a right on the first round." Andy went on "you, just jab 'im light with your left don't 'it 'ard, just a good snappy punch. It's 'ketch you 'ave no sting in it, and the next round 'e'll get careless and let you 'it 'im an's to get a punch Of course, if you see a good opening, let fly with all you 'ave, but 'e won't open up until 'e tries you out a bit. Watch the dirty blighter in the clinches; 'e'll fool you, if 'e gets a chance. Another thing this is to be twenty rounds, so tyke your time Now is everything clear to you, Donnie?"

"Yes, Andy."

Andy patted Donald's bare shoulder affectionately.

The contestants stood in their corners and waited. The announcer had reforce beckoned them to the centre of the ring for last instructions. As Donald slipped the enveloping bathrobe from his shoulders and stepped forward, a murmur of admiration swelled from the crowd. His lean loins and long muscled thighs showed to advantage in the bright light. The long, flowing muscles rippled under the skin and moved like the play of a panther. Lord applause came from all over the arena, Carrieau thinking the ovation was for himself, turned and ducked his head with the gesture that was intended for a bow

A rough voice near the top shouted "Say don't that wouldn't fer you, you big stiff!"

The Judge and the dentist turned in their seats and looked. The owner of the latter seemed to say, "I told you so." The judge smiled and nodded.

A fat man, who could not have been more than thirty-five years of age, yet with rolls of fat at his waistline, a bald head and florid face, bit savagely on a big cigar "By god!" he ejaculated, "that man to be champion! Why a look at his legs action and envy in his red-rimmed eyes. Then do men admire the strong, well-kept body of the athlete, even though their own physical state has degenerated to mere paunch

"Two to one that Carrieau wins inside of ten rounds!" the voice of Douglas covered the bet at once

"Done, sam," instructed the referee, briefly. "I want to be in the ring rounds. You are to fight clean Donald. You can hit with one arm free, but you cannot hold with one hand and hit with the other. When I say 'Break' I want you to break for the and step back. Do you understand fully? Then to your corners."

Donald glanced at his friends, who sat with their eyes upon him. His fair, curly hair and big limbs gently stroking his arm, put he could not suppress the trembling in his limbs.

"Everything's all right, Donnie," whispered Andy softly.

The gong rang.

Carrieau assumed the crouch Andy had predicted, his chin resting in the hollow of his shoulder, his eyes seeming to retreat into his skull under the overhanging brows. This was the champion's famous "fighting face."

"Pretty boy, ain't yer?" he sneered "you gois to knock dose pretty feet down yer throat, you——" he cursed.

Donald snapped a light left to the ugly face and danced out of range. The whispering thirs lips started in a fiendish grin. "My, mamma's nice boy has a terrible punch!" he derided.

Donald continued his cautious footwork, keeping the champion in pursuit and constantly himself with occasional left-hand jabs that kept his opponent's head rocking. He shot glances at intervals to his corner for instructions from Andy, who nodded his head in approval at each tactic.

The round finished in the challenger's favour by a wide margin as Donald, in the clinches, had landed a single effective blow during the round.

The action of the first round caused Donald to forget his nervousness. Andy crowded between his knees and gently massaged his body, all the while speaking words of commendation and counsel.

"Now that you find that you can reach 'im easily with your left, watch me for signals. If I see that 'e's openin' up, I'll give you the sign to shoot your left with all you 'ave. If 'e swings again with 'is left, try for 'is head basket You understand me, Donnie?"

"Easiest thing I've picked yet," chuckled the champion as he came to his corner.

"He may be stalling," cautioned his self-faced manager.

"Huh!" grunted the champion "I can take all he has in dat left and never feel it I'm goin' to open up on him de last part of de next round."

The gong rang for the second round.

Donald caught a glimpse of Pinnell's face as he crouched in the opposite corner. Such a look of vicious hate shot from his one glistening eye that Donald shivered.

The rough element began to boo Donald for his running tactics. Some fans feel that they are being cheated out of the price of admission unless they can witness the spectacle of two fighters slugging toe to toe until one goes down, regardless of the damage with this small minority.

"Wonder ye think this is a moonshine?" they shouted.

"Powder-puff punch" derided another.

Carrieau suddenly tore in, letting loose a terrific right that would have stopped the bout right then if it had landed. From a clinch Donald looked to his corner Andy was through the pantomime of shooting his left, but Donald nodded.

"Powder-puff punch?" again shouted the disgruntled fan.

But Donald's shoulder was waiting, intercepting his mouth into an agonizing grin. He can't hit hard enough to break an egg," was the cry "Save your fist for you now." He leered brutally at Donald, who was now within range.

Donald stopped abruptly in his flight and—just a lightning left across to his pursuer's jaw. The champion went down like a log, and his head struck the floor with a resounding thud. Donald's fists poised, yet enough was left to spare him resting back to the ropes, his head whirling and his knees wobbly With a roar the spectators came to their feet as one man. The gong saved Carrieau.

The crowd gave Donald a deafening ovation as he went to his corner. He looked for his friends and Douglas and Gillis waved in an embrace and dancing madly in the

(To Be Continued.)

A LAUGHING BABY IS A GREAT JOY

What can give more joy in the home than a happy, healthy baby? The well child makes everyone happy and has useful charge and is the laughing eyes. It is only the sickly baby who is cross, fretful baby. For it is the little one's nature to be happy when well.

Mothers, if your baby is ever ill, be sure to give him the help he needs at once and effective remedy. Baby's Own Tablets are a mild but thorough laxative. They relieve the bowels and sweeten the stomach and thus banish constipation and indigestion, break up colds and simple fevers and correct those troubles which accompany the cutting of teeth and in fact do away with things—and doing them well—they make baby happy and keep him happy The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

"And how do you get on with your wife?"

"I've a splendid working arrangement with her. In the forenoon she does what she wants, and in the afternoon I do what she wants."

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Authority of Provincial Dental Boards

TOOTH DECAY

You do not allow your child to have carious teeth any more than you would allow him to have a running sore. Both are infectious and both should receive the same attention.

Now, as you have read, no cause is called tooth decay is a disease that is incited by bacteria. These micro-organisms have the power to change the harmless sugar constituent in soft or semi-carbohydrate matter or ferment, producing acids which attack the tooth substance to dissolve it. In this manner, these organisms gain access through the hard enamel covering.

You perhaps did not suspect the presence of bacteria in your mouth, did you? Yet, a recent scientific finding that more than a hundred different species could undoubtedly be isolated from a single mouth at one time or another.

Now, of course it is neither practicable nor necessary to cut off the bacteria's food supply, nor to rid the mouth of bacteria. But we can do something to check their activity.

However, nature herself is not wholly defenseless against the onslaughts of the acid formed is, as a rule taken up by the saliva and dissipated before it can do injury—excepting where it is "pocketed" between the deep gum or fissures, or beneath food particles lodged in the teeth. In this case proper mouth toilet is not observed.

But you must do your part by assisting nature to rid the mouth of debris foods such as sugars, starches and soft foods. Remember that a too liberal supply of these is to create a favorable soil for the bacteria disaster — especially when proper mouth toilet is the daily rule.

First Parachute Was Used By Frenchman

Successful Drop Made From Considerable Height In 1797

Considerable interest in the parachute nearly in its present shape, is an old as aeronautics. There is supposed to be a picture of such a device dating from 1617, and there is a narrative of a Venetian who made a jump from the 17th century, to the effect that a countenbank at the royal court climbed to the top of one of the towers and jumped off with two umbrellas to support him. Very likely this is true.

Shortly after the Montgolfier accents, the French aeronaut Blanchard seemed to be quite keen on the spectacular experiment in connection with his balloons, but made no attempt himself to the apparatus he attached his dog.

Possibly because the parachute had been designed for the weight of a man and not for that of a dog, but the dog, instead of dropping when released, it went up considerably higher than the balloon, even at about 6,000 feet. After a time it came back to earth, however, and upon the dog got a chance to bark a greeting to Blanchard. At least, that's the yarn that some one has told us. Blanchard reached the ground by the gradual descent that we have come to know as a little later the dog landed unhurt

This successful experiment doubtless seemed to the inventor sufficient proof of the practicability of his device, for presently various forms of parachute were constructed, and almost every one was eventually constructed, and among them some fearful and wonderful arrangements. One of these consisted of folded up when released and resulted in the shape of a huge umbrella. After this it appears the designers returned to the original umbrella form.

The first successful drop from a balloon at any considerable height was made in 1797 by a Frenchman, Garnerin, who staged a performance at Paris in 1802. Garnerin cut himself loose at a height of 8,000 feet, safely landed.

The Middle Course

During his visit to a village school a certain inspector asked a few religious knowledge put this question to a class of little girls:

"If all the good people were white and all the bad people black, what would you be?"

Some answered "White" and others "Black." But little Mary replied: "Please, sir, I would be ready!"

No need to suffer with corns, or to run the risk of paring them Remove them surely and painlessly with Holloway's Corn Remover.

Mistress: "I see that another soldier has called for you, Mary. I thought you had only one sweetheart!"

Cook: "Oh, so must, too. You see, one's regular and the other's a reserve"

Mussel's Liniment for sprains.

"Did you hear about the defacement of Skinner's tombstone?"

"No, what was it?"

"Someone added the word 'friends' to the epitaph."

"What was the epitaph?"

"He did his best."

Trying To Eliminate Hazards Of Submarines

U.S. Navy Will Make Test Of Rescue Apparatus

Shrived by unforseen cruft disasters that have taken the lives of scores of American officers and men, the navy is making strenuous efforts to eliminate the hazards of submarines by devising and perfecting rescue apparatus.

Many experiments are being made and plans started out for exhaustive tests to learn what happens when a submarine is stricken below surface. No man has survived a submarine accident when the vessel was totally disabled and flooded while under water, and none has been able to tell just what occurs under these conditions.

In addition to laboratory experiments, the bulk of the submarine S-4 will be sold to men in their depth charge—in assurance of benefit, costs no little that it is within reach of all. It is the national remedy for asthma, for bronchial troubles, for the cure of deaf- and experimental preparations Time tender loving supply it

EVEREADY Layerbilt

There's been a revolution in the science of battery building—Eveready has found a way to produce more battery for your money than you ever bought before!

The new Layerbilt principle can be understood by anyone. It simply gives you more current-making elements by packing flat cells like crackers in a box, instead of using many round cells with waste space between.

You actually get the equivalent of a much bigger battery and, of course, it takes much longer to use up. That's why you should buy Eveready Layerbilts and save money. New ratings at new lower prices.

MERCURY ADS PAY!

Would You Like Electricity In Your Home?

THE KOHLER Automatic Electric Light and Power Plant will give it to you with the minimum of expense and trouble and the maximum of economy and dependability.

The KOHLER Automatic Electric Light and Power Plant is exceptionally well made in every particular. Has four cylinder vibrationless engine containing all the refinements of a high grade motor. It is radiator cooled; forced feed lubrication; vacumn tank; automatic governor (proportions fuel consumption to fuel plant is carrying), etc. Dynamo is 1500 watt capacity and is also splendidly made. The plant is purely automatic—that is, when you turn on a light or appliance the plant starts and when the last light or appliance is turned off it stops.

There are thousands in use in the United States and all parts of the world.

Both President Coolidges summer homes are lighted by Kohler plants and many other notable installations have been made.

But while the quality is as high as can be procured the price is no higher than the ordinary run of private electric plants.

A 1500 watt plant, which we recommend for most farm installations come at $700.00 f.o.b. Tofield and at that figure is the best electric light plant investment a farmer can make.

There is an 800 watt model at a lower price and 2000, 5000, and 10,000 watt models for larger consumers.

Further information will be gladly given by—

A Little Sub Here A Little Sub There Subscriptions, Subscriptions ---Everywhere

Like grain stooks standing in a farmer's field—are subscriptions scattered throughout a rural district. Each are holding a promise as good as gold—yes better than gold—yet they must be collected up before they are of real and practical value. With a team, wagon and pitchfork, the farmer can collect his grain stooks, take them to the threshing machine, from which golden grain emerges which in turn is taken to the elevator, where in exchange, the farmer receives coin of the realm.

The newspaper man cannot do this, he is dependent upon the good will of subscribers—when they come to town to drop in and pay. Fall time is subscription time and we would be delighted to renew your subscription now.

Special Note.—After October 1st the price of the Mercury will be $2.00 per year. We are among the very last of weekly newspapers to raise our price, the great majority having been selling for $2.00 per year for the past seven years.

RUSSIA AND PROHIBITION

IT IS not often that we are in favor of ideas or application of ideas that come out of Russia. Russia, it would seem to us is a country of topsy-turvy ideas and have brained schemes of government. We may be wrong. We probaby are wrong, for it is more than likely that the violent swing from the one extreme of Csardom to the other extreme of Communism will eventually settle down to an orderly and well balanced system of democratic government. But to the person living outside of Russia this period of adjustment appears to be little less than chaos. Be this as it may, those at present in authority in Russia are bringing into effect a prohibition law which appeals to us as being the best thing in its line yet.

Readers will remember that for a brief time during the war the manufacture and sale of vodka (Russian Whiskey) and beer was prohibited by law, but after a period of prohibition the country returned to the sale of intoxicating beverages. That, when generally used, they do more harm than good is the experience of Russia as well as all other countries and it is now announced that for the next fifteen years the quantity of liquor that can be made is to be reduced by law and at the end of that time the manufeture of vodka will be strictly forbidden. In the meantime a thorough campaign of education to persuade the Russians of the harm that liquor does will be carried on.

It is not so long ago but what most residents of Alberta can remember the prohibition period here. The ardent prohibitionist saw nothing but good in it; the anti-prohibitionist saw nothing but harm in it; but the student of the measure saw that it was a long way from being 100 per cent perfect and if it did away with one set of evils it raised up another set, perhaps not so obvious, but equally as objectionable. To a large extent this accounts for the extraordinary expressed change of public opinion between the first and last prohibition elections. We do not think the opinion of the people actually changed. At heart the people, we believe, preferred a non-alcoholic province to an alcoholic province, but the whole change was too hastily made and the entire problem bungled. The habits of a country cannot be changed over night without violent reaction, but they can be changed and frequently are changed in fifteen years. If drinking alcoholic beverages ever became old fashioned and unfashionable; if habitual drinkers of alcoholic beverages were accorded ridicule instead of praise or condemnation, without doubt the prohibition laws would be easy to enforce. The Russians are working from both sides of the problem and we believe they will meet with greater success than we did. Millions of children now five years old will be taught sobriety until they are twenty; they will hear it discussed pro and con not as a violent "you mustn't drink it" law, but as a problem; yet all the time the gradual change of less and less liquor is going on, until when the change to total prohibition takes place the large majority will take it as a matter of course and there will be little or no reaction against it.

There is one disturbing feature. The Russians as well as other Europeans are the chief offenders against the liquor law[illegible] here. "There is even a humorous side to the writings setting up Russia as a prohibition example. In Russia, even in pre-war days, the peasantry were so poorly paid that they could not afford to buy liquor, and as they could not afford to buy it, and it was the custom to drink it, quite a number of them made it. Coming to Canada to farm, and being confronted with a prohibition province, many of them saw an opportunity to recommence their former custom of making it at home.

The world at large is becoming less alcoholic. Great Britain is consuming half the quantity of alcoholic beverages it did a decade or two ago. There is less drunkenness and a gradual realization that efficiency and alcoholic beverages do not go hand in hand. It will be interesting to watch the progress of events in Russia for the next fifteen years, and if the Russian government's attempts to conquer the drink evil is successful, it will be a standing challenge to the rest of the world.

CHEVROLET

so Smooth so Powerful and so Dependable

ALTHOUGH the "Bigger and Better" Chevrolet offers a standard of beauty never before thought possible in a low priced automobile . . although it offers the features of advanced design and the perfection of detail demanded in the world's finest cars . . the fundamental reason for its tremendous success is its amazing performance . . .

The Grading of Wheat

The heavy frosts which descended upon Western Canada during the third week of August had a most disastrous effect upon a large portion of the wheat crop of the prairie provinces, with a resultant lowering in grades which in the aggregate means a loss of many millions of dollars to the farmer-producers of the west. Just how great the loss is will probably never be accurately known, but thousands of individual farmers will more or less correctly estimate what it means to them. Volume of production remains the greatest in the history of the country, but grades and consequently prices are seriously affected.

Under the circumstances it is but natural that an outcry is raised against the whole system of grading and some very rash statements are indulged in. The farmer who gets Number Three feels he ought to have received Number Two, and the man who is given Number Four contends he ought to have had Number Three, and so on down the line. This is but natural, but the result is that elevator operators, whether in the Pool or line elevators, are charged with taking advantage of the situation and grading too low. Governments, both federal and provincial, are held responsible for the system of grading in vogue, although, as a matter of fact, provincial governments have nothing to do with grading, which, as a matter of trade and commerce, falls wholly within the jurisdiction of the Dominion. If there was any truth in the charge that the Liberal Government, in Saskatchewan, is responsible for low grading this year, then the Farmer Governments in Manitoba and Alberta are equally responsible.

The truth of the matter is, of course, that neither Liberal, Conservative, Progressive nor United Farmer Governments are responsible. It may be that the present system of grading requires revision, but even that cannot be determined offhand. Canadian wheat occupies an enviable reputation in the markets of the world, and because of that reputation commands a good price. That reputation is based on the quality of our wheat, and that quality is guaranteed through our system of uniform Government inspection and grading.

It may well be that in a year like the present, a relaxation in grading would result in a larger proportion of our wheat being placed in higher grades and better prices received by the growers. On the other hand, a lowering in the standards might very easily result in a general lowering of all prices, so that the final result would be much the same.

But assuming that this did not happen this year, the undoubted effect would be injurious to the reputation of Canadian wheat and any gain derived this year would be more than offset in other years because of the poorer reputation for all our wheat that would result. [illegible]

Freedom From Insect Pests

Loss From Insects Has Been Very Light In Western Provinces

General freedom from insect pests in the western provinces is reported by the Dominion entomological branch. Grasshoppers which in former years worked havoc in the crops have been found scarce this year. The sugar beet crop in southern Alberta is stated to have suffered to some extent from the red-backed cutworm but the control campaign instituted by the department has localized the infestation. In the same province the alfalfa crop has been attacked by the Bertha army worm. Dusting of the crop is expected to eradicate the pest. Losses from insects are generally small, officials of the branch indicate.

Minard's Liniment—Popular for 50 years.

Ludendorff Is Worried

General Eric von Ludendorff, former quartermaster-general of the German army is reported to have appealed to President von Hindenburg for help against Free Mason lodges which he claims have "passed a death sentence upon me and my revelations of their pernicious methods."

Canada Supports League

Membership In League Of Nations Organization Is Growing

Thousands of active supporters of the League of Nations are now organized throughout Canada. According to the general secretary of the League of Nations, in Canada, the membership of the organization here has grown in three years from less than a thousand to almost fifteen thousand in number. Although strongly supported by women's organizations, more than half the members are business men—in British Columbia the male membership running to 85 per cent.

Health cannot be looked for in the child that is subject to worms, because worms destroy health by creating internal disturbances that retard development and cause serious weakness. Miller's Worm Powders expel worms and are so beneficial in their action that the systems of the little sufferers are restored to healthfulness, all the discomforts and dangers of worm infection are removed, and satisfactory growth is assured.

Senora Alice Cunha Machado was free on a writ of habeas corpus because the Supreme Court listened to her plea that her child did not deserve to be born in jail.

10 minutes ago-

How many people you know who end their colds with Aspirin! And how often you've heard of its prompt relief of sore throat or tonsilitis. No wonder millions take it for colds, neuralgia, rheumatism; and the aches and pains that go with them. The wonder is that anyone still worries through a winter without these tablets! They relieve quickly, yet have no effect whatever on the heart. Friends have often told you Aspirin is marvelous; doctors have declared it harmless. Every druggist has it, with proven directions. Why not put it to the test?

Aspirin is a Trademark Registered in Canada

BAYER ASPIRIN

HAS PLAN TO AID PRODUCTIVITY OF WESTERN SOIL

Toronto.—The rehabilitation of the soil of the western provinces through the use of nitrate fertilizer developed by electricity, possibly in Manitoba, is envisaged by Prof. J. Watson Bain, head of the Chemical Engineering branch of the faculty of applied science, University of Toronto.

Addressing the Toronto Electric Club, Prof. Bain said that by passing the component parts of water and air through a simple chemical process, ammonium nitrate, the best and most concentrated fertilizer known, could be produced in unlimited quantities. By the fusion of rock phosphate and coke a compound of phosphorous used in the fertilizing process would result.

"I believe," he said, "that before many years pass we will have to supply fertilizer to the west. They have been 'mining' the ground there in the production of wheat. In Germany, to show how important fertilizers are to Canada, it is not uncommon to produce forty bushels of wheat to the acre. In Ontario the average production is twelve bushels."

Before many years, Prof. Bain believed, a great plant would be installed in some of the northern rivers running into Hudson Bay, where electric power could be developed. [illegible]

Heroism At Sea

Harrowing Tale Of Fire Aboard Ship Is Related

Vancouver.—With seven of her crew painfully burned and scalded, the Blue Star Line steamship "Trojan Star," Capt. G. A. Griffiths, arrived here with a harrowing story of fire on board while the vessel was off the California coast on the night of October 12.

William P. Tennison, Hull, Eng., fireman aboard the ship, was burned to death and his body buried at sea.

The fire broke out at 6.30 p.m. October 12, when an oil jet burst in the stokehold, trapping eight men of the engine room force in a wall of flame that sprang up in an instant.

Second Engineer Sydney P. Houston and Fireman James, according to the ship's officers, were chiefly responsible for the safety of the engine room crew.

Seeing that the way to safety on deck was barred, Houston led the men into the bilges under the boiler. The flames roared above them and for three hours and thirty minutes they lay there in oil and water with the plates growing hotter and the water in which they lay steadily approaching the boiling point. James by his cheery conduct and singing of songs, aided his comrades while awaiting rescue. Tennison went temporarily insane from the heat and rushed back to the engine room again, where he succumbed.

Only an act of providence stopped the flames. A big steam pipe in the stokehold burst, pouring a dense cloud of steam into the compartment [illegible]

Workmen Buried In Concrete

Two Men Victims Of Accident At Cleveland

Cleveland, Ohio.—The bodies of two workmen who were buried alive in a 100 foot hole under a fifty ton fall of fresh cement at the Union Depot site here, were cut from the hardened mixture after a desperate 12-hour struggle.

The two men were Patrick Toolis, 30, and Patrick Cleary, 27, both of Cleveland.

Toolis and Cleary were working at the bottom of the hole in which concrete was to be poured. A few feet away was another pit into which concrete had been poured a short time before.

Under the pressure of the tons of concrete the retaining walls of the second gave way. The concrete tore through four feet of earth and poured down upon the two victims.

LOOK FOR BIG GOLD RUSH IN NORTH ONTARIO

Winnipeg, Man.—Valuable gold discoveries made during the past summer and this fall at Crowe River by the Northern Aerial Mineral Exploration Company probably will bring a stampede of prospectors rivalling that to Red Lake a few years ago, Capt. H. A. Oakes, operating manager of the company, states. [illegible]

All planes which operate this winter would be equipped with skis, Captain Oakes said, as there would not be facilities for machines with wheels.

New Daily For The Pas

Expect Publication Will Start Early In December

Calgary.—It is expected that the Northern Star, the proposed new daily for The Pas, for which a Canadian Press franchise has been granted, will commence publication early in December. A building is now in course of construction there to house the editorial, business and printing departments. G. M. Bell, president of the Calgary Albertan Company, is president of the new company which has been formed to undertake the enterprise, and S. L. Cross, Regina, is vice-president. Associated with them will be P. C. Galbraith, at present news editor of the Winnipeg Tribune, as business manager and Fred Johnson, evening editor of the Winnipeg Tribune, as managing editor.

B.C. Settlement Plan Has Been Exaggerated

Reports Being Circulated Are Causing Government Some Trouble

Victoria.—Letters are pouring into the Government offices here from people who would avail themselves of the land settlement offer recently announced by Premier Tolmie. However, many reports concerning how far British Columbia will go to aid the settler have been exaggerated and these are causing trouble.

Some reports stated that the government would give 40 acres of cleared land, a log cabin and $2,000 in cash, but the Premier denied this in a statement issued.

ALBERTA PLANS TO AID SETTLERS FROM BRITAIN

[illegible]

HIGH COMMISSIONER FROM BRITAIN

This photographic portrait of Sir William Clark, first high commissioner from Great Britain to Canada, who arrived recently at Ottawa, was made this summer in London, by Minna Keene, Fellow of the Royal Photographic Society. Mrs. Keene, who lives in Oakville, has done photographic portraits of many distinguished people in America, Europe and Africa, and has also made photographic studies of national types in many parts of the world.

FINE TRIBUTE IS PAID TO CANADA BY U. S. JUDGE

New York.—"The country in which you were born is rapidly coming of age, you have no reason to be ashamed of it and it considers you its liaison officers in the great country of your adoption." These were the closing words addressed by the Hon. Justice E. Fabre Surveyor to the semi-annual gathering of the Canadian Society in New York recently.

Justice Surveyor spoke to a distinguished group which included Sir John [illegible] Armstrong, British consul general at New York, and Mr. Frederick Hudd, the Canadian trade commissioner here. His address was a survey of Canadian progress toward autonomy and nationhood.

The effect of this change he said is to bring Canada closer to Britain than ever. The Canadians would never waver in their fidelity to the British crown.

Justice Surveyor sketched the gradual accession to Canada of broadened jurisdiction in her courts of law and increase in her powers in dealing with other nations of the world.

"Canada's election to the council of the League of Nations," he said, "removed all doubt as to the place it holds at Geneva."

SALE AND REDEMPTION OF IMPOUNDED ANIMALS

Notice is hereby given under section 48 of the Domestic Animals Act, (Municipalities) that One Mare, black with white face, was impounded in the pound kept by Oscar Thompson, located on the S.W. 17-49-19- W4M on Monday the 24th day of September A.D. 1928, and that the said animal was sold on the 10th day of October 1928 to John Johnson of Kingman, Alberta, and that said animal may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in The Alberta Gazette, upon payment of all fees and costs due to the municipality and the purchaser of said animal.

For information apply to the undersigned.

J. O. LETOURNEAU,
Sec.-Treas., Municipality of Cornhill,
Tofield, Alberta.

NOTICE

IN THE DISTRICT COURT OF THE DISTRICT OF EDMONTON

In the estate of John Carter Phillips, late of Tofield, in the Province of Alberta, farmer, deceased.

NOTICE is hereby given that all persons having claims upon the Estate of the above named John Carter Phillips, who died on the 11th day of August, A.D. 1928, are required to file with the undersigned by the 17th day of December, A.D. 1928 a full statement duly verified of claims and of any securities held by them, and that after that date the Executor will distribute the assets of the Deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or which has been brought to his knowledge.

DATED at Tofield, Alberta, this 23rd day of October, A.D. 1928.

A. J. H. McCAULEY,
Executor, Tofield, Alberta.

NOTICE TO THRESHERMEN

Owners or operators of threshing machines and combined harvesters are required to send to the Department of Agriculture at the end of the threshing season a return showing the number of bushels threshed. This applies whether the machine has been used for custom work or only for the owner's crop.

Special forms for these returns may be secured from the

PUBLICITY BRANCH
Department of Agriculture,
Edmonton.

HEALTH CLINIC AT TOFIELD

A doctor and dentist in the employ of the Alberta government visited Tofield this week and treated quite a number of children. The building used was the waiting room of the curling rink.

The Basket Social and Dance held at the Lakeshore Community Hall on Friday of last week, under the auspices of the C.W.L. with Mrs. Forman acting as chief director, was a decided success. Dancing formed the main program up to 12 o'clock, then the sale of the baskets had the floor and were disposed of at a high and satisfactory figure. Mrs. E. R. Kallal was awarded the prize for having the prettiest basket, which was sold first and also brought the highest price. Of course Ed bought the basket and was doing considerable strutting during the evening over having such a wife. Forman did not seem to be able to get going in his usual style until he sat down to eat supper. The use of the hall was donated to the C.W.L. absolutely free of charge by the executive of the hall.

Fatal Accident at Tofield

TONY YAKABUSKI INSTANTLY KILLED

This morning (Thursday) at 9:43 a.m. a fatal accident occurred in the Tofield railway yards in which Tony Yakabuski, a well known and highly respected young man of Tofield, lost his life.

The unfortunate man was working on the switch train, and a coupling pin not coming out freely, he reached in and in attempting to release the pin, lost his footing and fell, the moving train killing him instantly. An inquest was held at the town hall this afternoon with Coroner Dr. Law presiding and after the evidence of Douglas Hedstrom, a co-worker, and n eye witness of the tragedy and other members of the train crew, returned a verdict of accidental death.

Tony Yakabuski is the son of Mr. and Mrs. abuski of Tofield. Mr. Yakabuski senior has been section foreman at Tofield for years and is held in high esteem by all who knew him. Both Mr. and Mrs. Yakabuski are well known and highly respected and their sad loss is keenly felt by the town and district.

The deceased, who was killed at the age of 24 leaves to mourn his loss, his mother, father and brothers, Jim, Stanley, and Ambrose of Tofield and one brother in Eastern Canada.

The body, so we understand, will be shipped to eastern Canda for burial.

Chrysler Plymouth Cars

MECHANICAL EXCELLENCE THAT GOES FAR BEYOND ACCEPTED STANDARDS

In new and original engineering features, and in its construction all the way through, the new Plymouth goes so far beyond the accepted standards that it is a revelation even to mechanical experts. Chief among the new developments is the latest and greatest product of the Chrysler engineering staff—the new "Silver Dome" high compression engine. Through the perfection of this great motor the advantages of high compression—greater power, greater climbing ability, greater speed and greater acceleration—can be obtained through the use of the ordinary gasolenes.

LOCAL AND PERSONAL

Born.—To Mr. and Mrs. Dan Laubner, on October 29th, a son.

Born.—To Mr. and Mrs. Wm. Kallal, on October 31st, a son.

Miss Annie Bruha and Miss Mabel Thompson visited with Mrs. Carl Blake last Monday.

Mrs. J. W. Robinson and daughters were visitors to the city on Saturday.

Mrs. J. W. Robinson entertained a few lady friends in honor of Mrs. Tofield on October 23rd.

Mrs. J. Weatherill entertained a number of friends to afternoon tea on Wednesday, a splendid social time being enjoyed.

Mr. J. O. Letourneau left for Milwaukee this week, receiving word that his brother was very ill.

Mr. and Mrs. Wm. Thompson and John, motored to Roundhill on Sunday, where they visited with Mr. and Mrs. A. Moorby and family.

The Anglican W. A. will meet at the home of Mrs. Giffen on Wednesday November 7th, at 2:30. Ladies of the congregation are always welcome.

Mr. John Thompson and sister Mabel left on Wednesday morning for Rossland, B.C. where they will visit for a month with their sister, Mrs. Tom Bradbury.

The C.W.L. held a successful whist drive at the W.I. rooms on Friday last. The prize winners were: ladies' 1st, Mrs. D. McIsaac, London, Ont.; 1st gent's, Mr. C. Kallal; consolation, Mrs. Innes; gent's, Frank Bruha.

A wedding of local interest took place at Edmonton on September 26th, when Miss C. Latimer, of Toronto, was united in marriage to Mr. G. A. Richardson of Tofield. Rev. Leversedge of St. Mark's church performed the ceremony.

Holy Trinity Anglican Church will hold services on Sunday, November 4th. Holy Communion at 11:00; Evensong at 7:30. Rev. A. Lloydall Bee, of the Viking district will conduct the services.

The editor took quite an automobile trip on Friday last. Along with Selmer Johnson, who was at the wheel, he left Tofield at 8.15 and arrived back at home at 11.00 p.m., in the meantime going as far as Barrhead, which is 135 miles distant from Tofield.

Mr. and Mrs. Hay visited the city this week.

Mr. A. P. Harold of the station staff visited the city over the week end.

Correspondence

(To the Editor)

May I have space in your valuable columns, to ask a question of the council of R.M.D. 487? To make the question clear, I must go back a number of years, to the spring of 1912. We were at that time still under the Local Improvement District, Cornhill Municipality not coming into being until later the same year.

On the road allowance between N.E. 23-50-20 w4, and N.W. 24, there was a rather nasty slough and the trail up to that time had kept to the east of it, on N.E. 24.

The owner of that quarter wishing to fence, it was necessary to make a road on N.E. 23, which was unsold C.P.R. land.

In these days we did not have much money to spend for roads, and several ratepayers donated the larger part of the work.

This trail was approved by Govt. Road Inspector, Thos. Dahl, in the fall of that year and a call put in for the surveyors. They did not come however until two years later in the fall of 1914 and the trail then became an established road. That would be 14 years ago. The survey stakes are still in place.

This C.P.R. quarter now is sold and when the owner fenced last spring or early summer, he did not follow the stakes closely and in one place the fence, by actual measurement, is 33 feet out in the road allowance. When this was pointed out to him he said he could not find that stake. His informant offered to show him where it was, and he then said it made no difference, as he was going to see that a road was made across the slough, and buy from the council the few acres of land cut off by the deviation. He afterwards told that the council had told him to fix the road first and then they would let him have the land.

He now has a man cutting out the road allowance and is intending to corduroy the slough this winter.

Now for the question.

Does the council intend to build a new road at the expense of the municipality, and do away with a road that has been established for 14 years, sell the bit of land at a nominal price, just to please one ratepayer?

Teddy Roosevelt's slogan of long ago, was a mighty good one "A square deal for all, with special favors to none."

I am sure the editor will give the council space to reply to this, and their answer to the above question, will be of interest to the whole municipality.

Thanking you very much, Mr. Editor, I am,

A RATEPAYER

KETCHAMOOT

Farmers are still busy on the land, working up breaking but the nights have been pretty cold lately so only half day periods are possible. We are thankful for the continued nice weather.

Mrs. Wesley Ingram and Miss Pearl Welch were passengers to the city on Friday, returning home on Sunday.

Mr. and Mrs. Geo. Lawson were pleasantly surprised at their home on Friday evening when twenty-five friends and relatives arrived to celebrate their thirty fifth wedding anniversary. A beautiful wedding cake, three tiers, decorated in pink, white and silver was made by Mrs. Herman Lawson and Miss Mabel. The evening was spent in social conversation with musical selections and singing. Miss Mabel played the organ, Martin the violin, and Mr. Sparby the guitar. Mrs. Flemings and Mr. Sparby favored with several duets. Presentation of gifts accompanied the congratulations.

Nurse Thompson, public health nurse held a physical examination at the school on Thursday, the report was very good but several children will need further examination.

Miss Martha Soma is staying at the John Brown home. Mrs. Brown has been under the doctor's care.

Mr. and Mrs. John Johnson and family who has been visiting friends and relatives for several months, left on Tuesday for Portland, Oregon, motoring through.

Mr. Howard Lee spent a week visiting home folks, on Monday he started for Vancouver where he will try out with a Vancouver hockey team. He make the trip by automobile.

Mr. Albert Sears left Monday, for Fargo, N.D., where he will take a two months course in an auto and aviation school.

Mr. and Mrs. C. Coombe and family and Mrs. A. McMullen motored to Bawlf on Sunday for a visit with their daughter and sister, Mrs. Archie Brown and family.

Mrs. T. D. Ferguson and little son spent the week end with Mrs. Ferguson's parents, Mr. and Mrs. J. H. Ingram.

Mr. and Mrs. Carlisle motored to Edmonton on Tuesday for the day.

Mr. and Mrs. Harold McMullen left for Calgary last week, they having quit the farm. Mrs. McMullen will stay indefinitely with her parents until they find a location to reside.

Mr. and Mrs. Wesley Ingram were favored with an ideal day for their sale on Wednesday. A large crowd was present and everything brought a reasonable price. They have rented their farm and will spend the winter at the coast before deciding their future home.

Mr. and Mrs. Maurice McGinitie, Mr. and Mrs. Henry McGinitie and Mrs. B. Wildman motored to the city on Saturday.

Mrs. Roger Ray and children are staying with Mrs. Ray's father, Mr. Peter Lee in the absence of Mrs. Lee.

Mr. Joe Brown, sr., has been spending two weeks in an Edmonton hospital.

Miss Emma Bruha visited over Sunday at the home of her sister, Mrs. Henry McGinitie.

Where are you going next Friday night, November 9th? To the Thanksgiving "At Home", at the Appleby home of course.

U.F.W.A. NOTES

The members turned out en masse on Thursday afternoon to the whist drive given by the president, Mrs. Ferguson, to celebrate the fourth birthday of the local. Seven tables played and there were a number present who did not play. Mrs. Phillips was fortunate in winning first prize, a lovely salad bowl and Mrs. Barnes got the consolation, a box of mending cotton. After the cards, a delicious lunch was served by Mesdames Dodds, Geo. Francis, Barnes, Ingram and Carlisle, the last named lady baking the birthday cake which was a work of art. We were pleased to have Mrs. Hull, who has been on the sick list for nearly a year and a half with us.

The next meeting will be on Thursday, November 15th, at 2:30 p.m. in the municipal hall. The roll call will be answered with "Things I have to be thankful for. Mrs. Hawley is scheduled for a paper. Visitors always welcome.

LINDBROOK

On Monday afternoon the pupils of Westlake School journeyed down to take part in a "Hobo's Party" with their Lindbrook confreres also to play the return football match the result of which is lost in oblivion. Games were played, quite a few adults were present from both districts and joined in and enjoyed the fun.

Everyone was pleased with the result of this "get together" and hope for more.

The Livestock Pool shipped two cars of cattle from here this week, the shippers being Messrs Spilsted, Paskins and Chas. Lindberg and M. Goubault. Mr. Spilsted's consisted of about a car and a half which is the biggest individual shipment from here for a long while, most of the herds of a few years ago are now non existent and the others sorely depleted.

The report of the public health nurse that inspected Lindbrook School and its pupils was highly satisfactory, so we hear. It is said that she found the children as a whole the healthiest and cleanest of any inspected so far.

Mrs. G. Westlake took her daughter, Miss D. Westlake to Edmonton this week to have her wrist reset. We hope it will be O.K. this time and not necessitate any further attention.

KINGMAN

Mrs. W. Ingram and Pearl Welch spent the week end in Edmonton.

Mr. and Mrs. Chas. Mattson of Pigeon Lake are visiting with Mr. and Mrs. Chas. Lindberg for a couple of weeks.

Mah Hong was a business visitor in Edmonton on Tuesday.

Mrs. S. Severson and children of Clive are visiting with Mrs. Ed Thompson for a few days.

Mrs. B. Molvik and family spent Saturday in Camrose.

Sam Cinnamon relieved the section foreman at Forestburg for two weeks.

John Erickson of Camrose spent the week-end at his home here.

Miss Ada Renville of Wainwright and Lilly Erickson of Edmonton are spending a week with the latter's parents, Mr. and Mrs. E. Erickson.

Mr. and Mrs. W. Hartschen and family were the guests of Mr. and Mrs. Jack Erickson on Sunday.

LAKE SHORE

Dr. J. M. Hawley of Los Angeles, California, arrived at the T. R. Murray home for a visit on Sunday evening. Dr. Hawley is a brother to Mr. Wm. Hawley and uncle to Mrs. Murray.

Mr. and Mrs. John Johnstone and daughters spent Friday and Saturday of last week in Edmonton.

Wm. Seale, Mildred and Herbert Bethel spent Sunday afternoon at the Westlake home.

Mrs. A. S. Booth left on Tuesday morning for Quebec where they will visit friends and relatives for some time.

Mr. Sam Bethel was motored to the C. Baptist home on Sunday, where he spent a pleasant afternoon.

Miss Thompson, public health nurse visited the school on Friday.

Several school children are having tonsils removed at the clinic being held in Tofield this week.

Mrs. Phillips spent Sunday evening with Mrs. Seale.

WORLD HAPPENINGS BRIEFLY TOLD

The radio audience of the United States is 41,453,000, according to a survey made public by the National Broadcasting Company.

An airport for Halifax to be equipped by the government is planned as a result of the visit of Major Tudhope, inspector of air routes for the Department of Civil Aviation.

The small one-room building, formerly used as an office by Luther Burbank, plant wizard, will be taken to Detroit as an exhibit in the Ford historical museum.

A movement is now under way in Turkey to abolish the title of Pasha. Originally a military honor, the title is now granted to persons of high rank.

More than 7,000 pieces of mail have been received at the New York post office for mailing with the Graf Zeppelin on its return flight. The fee is $1 for letters and fifty cents for postcards.

Leong Ying, Chinese awaiting execution at San Quentin prison for the murder of ten of his countrymen in the rice fields near Fairfield, Solano County, was found dead in his cell in condemned row.

There will be no changes in the Ontario liquor control act at the next session of the legislature, Hon. W. H. Price, attorney-general, declared, commenting on reports that the act would be amended.

The first regular through air mail from White Horse to Dawson left White Horse recently. Captain T. G. Stephens hopped off with the Fairchild plane now in the service of the Greenfield and Pickering Royal Mail Line with 650 pounds of first class mail for Dawson.

A Wonderful Chance

Minister: I wish to announce that on Wednesday evening the Ladies' Aid will have a rummage sale. This is a chance for all the ladies of the congregation to get rid of anything that is not worth keeping but is too good to be thrown away. Don't forget to bring your husbands.

Man (just acquitted, to counsel): Thanks very much. What on earth should I have done without you?

Counsel: About five years.

Monaco was an independent principality for 800 years until the reigning prince was dispossessed by the French Revolution.

Canadian Club Activities

Extension Of Speakers' Itineraries Is Planned At Ottawa Meeting

Extension of speakers' itineraries for Canadian clubs, enlargement of the Canadian Club Magazine, radio programmes and organization policy were discussed at Ottawa at the first meeting this autumn of the executive committee of the Association of Canadian Clubs. C. ... ... of Ottawa, was re-elected chairman of the executive.

Miss Katherine Evans, formerly of Winnipeg, was appointed to the permanent staff of the association. She is a daughter of W. Sanford Evans, M.L.A., one of the two founders of the Canadian Club movement.

The executive issued instructions to the national office to arrange 1,000 meetings for the 120 Canadian clubs in the Dominion and discussed the use of the radio for broadcasting Canadian club addresses and concerts. A National Canadian Club Radio committee will be appointed at the next executive meeting to make arrangements for the broadcasting.

London Solves Garage Problem

Cars Are Sunk Into Concrete Pit In Garden

To sink a car underground and make it reappear, when wanted, by pressing a button, is the latest contribution to the garaging problem. Many even of the post-war houses in London, have not sufficient sidespace to erect a garage, and "building-line" regulations prevent structures being put up in the front garden. The new invention overcomes these difficulties. A concrete pit is sunk in the desired position, and machinery is installed for raising or lowering a platform carrying the motor car. A canopy is fitted to the platform so that when it is sunk to the level of the ground it forms a weather-proof shelter for the garage. The device, it is claimed, is both burglar-proof and foolproof, the machinery being operated from inside the house by simple control push buttons.

Marie: "If you could have two wishes, what would they be?"

Viola: "Well, I'd wish for a husband."

Marie: "That's one."

Viola: "And then I'd save the other till I saw how he turned out."

"Daddy, what is dew?" asked Bobby.

"The rent, the note at the bank and the instalment on my car," growled his dad.

Factories On the Prairie

Western Canada Becoming An Attractive Field For Industrial Enterprise

Factories are beginning to dot the prairies of Western Canada. The process of industrialization which has gone on in other lands is noticeable in Manitoba, Saskatchewan, and Alberta. In these provinces, usually regarded as purely agricultural, there are now 2,210 factories, with an invested capital of $234,657,270. The employees number 26,436, the annual wage bill is $46,179,949, and the value of manufactured products $163,752,180.

Manitoba leads the three prairie provinces in the volume of its manufacturing industry, with an annual output of $132,718,488. Alberta follows with $43,420,631, and Saskatchewan is third with $47,108,007.

Flour mills contribute a large share of the total production, with an annual value of $81,113,186. Slaughtering and meat packing follows with $33,083,830. Butter and cheese account for $22,432,270. These industries are the natural outcome of farm production. More remarkable are items like these: Railway rolling stock, $10,206,727; electric light and power, $12,362,160; bags, cotton and jute, $3,077,464; petroleum products, $5,424,424.

With increasing prosperity and increasing farm production, Western Canada, as the figures disclose, is becoming an attractive field for industrial enterprise.

Prove It For Yourself

Write down the number of your living brothers and sisters. Multiply it by two. Add three. Multiply the result by five. Add the number of living sisters. Multiply the result by ten. Add the number of dead brothers and sisters. Substract one hundred and fifty from the result. The right figure will be the number of deaths, the middle figure the number of living sisters, and the left hand figures the number of living brothers.

He: I've come to a conclusion.

She: What is it?

I realized today that I have been a bachelor for 35 years, and—"

"Oh, Jack, this is——"

"And I decided I'd had a jolly good time and that I'd keep it on."

SUNDAY SCHOOL LESSON

NOVEMBER 4

WORLD'S TEMPERANCE SUNDAY

Golden Text: "Love worketh no ill to his neighbor, love therefore is the fulfilment of the law." Romans 13.10.

Lesson: Romans 13.1-14.
Devotional Reading: Psalm 15.

Explanations and Comments

Obedience To Civil Authority a Christian Duty, verses 1-7.—"Is it lawful to give tribute to Caesar or not?" was the burning question which the Pharisees brought to Jesus and you recall how He answered: "Render unto Caesar the things that are Caesar's, and unto God the things that are God's." A great part of the Jews were always questioning the lawfulness of paying taxes and of recognizing the authority of the Roman Government. The Jews of Rome had been especially turbulent, and of this Paul must have heard many accounts from Priscilla and Aquila, who had been forced to leave Rome on account of the trouble. In writing to the Romans, therefore, Paul was naturally led to take up the question of the Christian's relation to the civil authority.

Let every soul be in subjection to the higher powers: there is authority, the civil rulers, he counseled, and then by means of two clauses, one negative and the other positive, he asserted that the fact of the authority being established argues that it was ordained of God.

The Roman Empire maintained law and order, protected life and property, and was on the whole, as Paul believed, a beneficent power. Nero, the reigning emperor, was, it is true, a dissolute young man who often arbitrarily did as he pleased with the lives of his subjects, but at the time Paul was writing, persecution of the Christians had come from other Jews or from popular riots, and not from the Roman Government. At Paphos (Acts 13), Thessalonica (Acts 17), Corinth (Acts 18), and at Ephesus (Acts 19) Paul had found the Roman officials a restraining power to his persecutors. Noteworthy is it, that after Paul had appealed to Rome and had been kept in confinement for some time without trial, he wrote to Timothy, 1 Tim. 2.1, 2: "I exhort therefore first of all, that supplications, prayers, intercessions, thanksgivings, be made for all men; for kings, and for all that are in high places; that we may lead a tranquil and quiet life in all godliness and gravity."

"If our laws are not Christian, then it is our business to make them Christian; if those in authority do not represent Christian ideals, we are not to deny authority, but to secure legislators and governors whose ideals are Christian. We are more fortunate than those to whom the apostle wrote, we have some say about the laws which are to be enacted and the officials who execute them."—Glenn Atkins.

Recipes For This Week

(By Betty Barclay)

SIRLOIN AND BACON SURPRISE

1 cup bread crumbs
½ cup evaporated milk diluted with ½ cup water
1 egg
1 lb. chopped sirloin steak
3 tablespoons lemon juice
1 teaspoon salt
1-3 cup grated cheese
1 tablespoon chopped pimento
2 tablespoons chopped green pepper.
6 green olives
Bacon slices.

Soak bread in diluted milk five minutes. Add slightly beaten egg, then mix all together. Form into balls. Roll each in a slice of bacon and bake in a moderate oven half an hour. Yield, 8 servings.

ROLLED FRUIT WAFERS

½ cup butter.
1 cup sugar.
Grated rind 1 orange.
1 teaspoon soda.
1 tablespoon cold water.
½ cup orange juice.
2 cups flour.

Cream butter, gradually add sugar and orange rind, beating until light; dissolve soda in cold water, add to orange juice, then add, alternately with flour, to first mixture. Spread mixture on well-buttered sheet in the thinnest possible layer and bake in a moderate oven. When baked, cut in squares; quickly roll each square, while hot, over handle of a wooden spoon, and arrange on a doily-covered plate.

Importing Fewer Potatoes

According to statistics from Washington, Canada's importations of American potatoes have declined from 919,783 bushels in 1924 to 479,596 bushels in 1927, owing largely to the increasing production of potatoes in Canada.

Conveys Mail Underground

The railway that runs beneath London, a distance of six and a half miles, and conveys letters and parcels between Whitechapel and Paddington, gives a service of about 350 journeys a day at an average of 30 miles an hour.

CUTICURA

Promotes Loveliness Of Skin And Hair

Daily use of the Soap, assisted by the Ointment when required, keeps the skin fresh and clear and the hair healthy and glossy. They are ideal for the toilet, as is also the smooth, cooling, fragrant Cuticura Talcum.

Cuticura Shaving Stick 25c.

ONE-DISH DINNER

In many families it is a problem to serve up a simple meal on one course. Here is a dish that will please a family of six, besides having the indispensable elements of nourishment.

3 cups cooked macaroni
1 cup cooked carrots (diced)
2 tablespoons grated onion.
2 tablespoons chopped parsley.
2 tablespoons chopped fresh red pepper
1 cup chopped ham
6 tablespoons buttered crumbs.
1 cup Borden's St. Charles Milk.
1 cup water
2 tablespoons butter.
2 tablespoons flour
1 teaspoon salt.
¼ teaspoon paprika.

Cook macaroni in boiling salted water 25 minutes. Make a white sauce of butter, flour, milk, water, salt, paprika. Place a layer of macaroni in a well-greased baking dish. Sprinkle with ham, carrots and seasonings. Repeat until all are used. Pour over all the white sauce. Cover top with bread crumbs and bake in a moderate oven for 40 minutes.

Dog Seals Swimming Record

Swimming 153 miles from Albany to New York, in 44 hours 52 minutes, a German shepherd dog bettered man's record for the swim by about five hours. The dog swam two hours at a stretch and, like other swimmers was coated in grease.

A University of Chicago professor invited to address a club meeting, chose as his subject "The Need of Education." The following day a newspaper headline reported "Professor's Speech Shows Need of Education."

Reason For Butter Shortage

More Milk Made Into Cheese On Account Of High Prices

As the end of the dairying season approaches, there are 8,800,000 pounds less butter in cold storage in Canada than last year. Figures published by the Dominion Bureau of Statistics show 29,120,000 pounds in storage on Oct. 1, as compared with 38,000,000 pounds on the same date in 1927, and 22,175,000 pounds for the five-year average.

A similar depletion of cheese stocks is revealed. There were 27,793,000 pounds in storage on Oct 1, a decrease of 7,977,000 pounds from last year's total of 35,770,000 pounds. The five-year average was 30,246,000 pounds.

The quantity of cheese graded up to the end of September of this year was 1,219,120 boxes, as compared with a total of 1,163,208 boxes for the same period in 1927, or an increase of 55,912 boxes.

The reason ascribed by Department of Agriculture officials for the lower stocks of butter and cheese this year as compared with last year is the higher prices prevailing for cheese in the export markets. More milk was made into cheese and less into butter as a result and both products have been exported quickly to meet the outside demand.

City Nephew (in art gallery): "That Aunt, is the 'Angelus' by Millet."

Rustic Aunt (on summer holiday): "What a shame! The man has actually copied the calendar that's hung in our kitchen for twenty years!"

The shadow of a trouble is usually blacker than the trouble itself.

FIREPROOF Farm Construction

GYPROC Fireproof Wallboard is used in the building of elaborate country homes equally as much as for garages, grain bins, poultry houses and barns. For repairs and alterations — for remodelling — for partitioning off extra rooms—it is the most economical and satisfactory wallboard on the market.

Gyproc protects from cold, heat, fire, sound and vermin—yet costs less than materials which do none of these things. Quick and easy to apply. It can neither crack, warp, bulge or shrink. By filling the joints with Gyproc Joint Filler you get a smooth, flat, air-tight surface through which fire, heat, cold and sound cannot penetrate.

Gyproc comes in broad, light, ceiling-high sheets of gypsum rock. Takes any decoration and is especially suitable for Alabastine. Fuel saved by the insulating qualities of Gyproc will alone pay for the cost within a few seasons.

Clip and fill in coupon for interesting free booklet.

Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, once you learn how quickly this pleasant method acts. Please let it show you—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

CHAPTER IV.—Continued

"Pretty soon get 'im ... Donnie!" cried Andy ... shoulder, send in your right." Andy's hands were shaking with excitement, while Donald was cool and collected.

"Let me go after him, Andy," he begged; "I can whip him at his own game."

"No, no!" admonished Andy. "Keep on as you are. Don't try to swap punches with 'im!"

Garrison's seconds ... over him feverishly ... over the heavily-breathing champion, his evil face sick with apprehension.

"What'd I tell you—" ... "They've stuck a ringer in on us ... you we're both ... sound, for de—" he finished with a savage oath.

At the beginning of the third round Garrison charged his ... adversary like a mad bull. Donald easily side-stepped him and he plunged into the ropes. As he rebounded, Donald landed a left and danced safely away without reprisal.

"You can do pretty footwork," snarled the champion with a look of ... ferocity ...

... them apart. Again the crowd came to their feet to shout in a frenzy of excitement.

...

"Are you strong enough, Donnie?"

Donald's eyes held a dull gleam. "Yes!" he gritted.

Andy patted his arm as the gong rang. "Give 'im 'ell, Donnie!" And then added reverently, "May God give 'im strength."

Donald shot from his corner as though thrown from a catapult to meet Garrison before he was fairly out of his chair. The spectators held their breath. Was this the same who a minute before had walked staggering and beaten to his chair? When the referee pried the fighters apart after a fierce mix-up in the champion's corner a puffed eye and a bloody face showed that Garrison had absorbed severe punishment. Donald was everywhere, dancing in for a fierce rally and out again, always without a return.

The arena fairly rocked to the cheers of the crowd as Donald stood in the centre of the ring and exchanged punches with the champion. Head to head they stood while Donald's arms worked with such ... that the champion's ... were ... And, marvel ... the champion was ... The ... had become ... The tide had turned. With his arms around about his face the champion retreated. As he essayed a lead, Donald's fist smote his face before he could again cover up. Following relentlessly, Donald penetrated his opponent's guard with rights and lefts until the champion's face was a smear ...

A bedlam of sound came from the audience as they stood on their seats and roared their admiration for the challenger's wonderful exhibition. Andy, his face set, his eyes bulging, clung to the corner of the ring.

Garrison drove heavily at his elusive foe and missed. The impetus swung him to one side. For an instant his chin was without the protecting shelter of his shoulder. With a bewilderingly swift move Donald stepped forward, pivoted on his toes, and with the full weight of his powerful young body behind it, he whipped his right to the champion's unprotected jaw. Plop! Garrison fell upon his face and sprawled like a balloon on the floor. Donald walked to his corner, thrust his gloved hands towards Andy, who stood as though paralyzed, and said, "Take them off, Andy." His voice was audible throughout the arena. The referee rushed to Donald's side and raised his arm aloft in token of victory.

With a roar the crowd came to its senses to realize that the fight was over. Pandemonium broke loose. ...

CHAPTER V

With much difficulty Donald and his friends forced their way through the cheering throng to the dressing room. ...

HEALTH AND BEAUTY

A healthy woman is always good to look at, even although she may have no particular claim to beauty. A clear skin, bright eyes, vital hair, and a well-set-up figure cannot fail to attract, and this can be obtained by preserving your health.

Doctors advise the daily drinking of at least six tumblers of water, one first thing in the morning, and one last thing at night. The water helps to cleanse out the system, leaving it thoroughly drained of all impurities.

The best foods to eat are green vegetables, fruit of all kinds, including oranges, lemons, and apples, eggs, milk, butter, fish, and wholemeal bread. In winter the daily diet should include fat in some form or other. Diet experts agree that meat is also a necessity. Fish is a good and sufficient substitute.

Salad, which were composed of flaked. To-day our clothing is much lighter and scantier, and everyone agrees that we are the healthier for it. The best plan is to wear light underclothing and don heavier outer clothing when the weather is cold.

So that the skin can play its part in the right way, it is necessary to wash frequently. If the pores are allowed to get clogged up with dirt or perspiration little pimples will result. To avoid this, wash thoroughly first with warm water, then rinse liberally with cold. It is not enough to take a bath everyday,but hot baths should be taken just before going to bed.

For health literature write to the Red Cross Society, 407 Civic Block, Edmonton, Alta.

"We Cordially Welcome Small Accounts"

At the annual meeting of the Bank of Montreal Sir Frederick Williams-Taylor, General Manager, said:

"I should like to take this opportunity of saying that we cordially welcome small accounts at all our offices"

At the Bank of Montreal no account is too small to receive the undivided attention of its officers

Would You Like Electricity In Your Home?

THE KOHLER Automatic Electric Light and Power Plant will give it to you with the minimum of expense and trouble and the maximum of economy and dependability.

The KOHLER Automatic Electric Light and Power Plant is exceptionally well made in every particular. Has four cylinder vibrationless engine containing all the refinements of a high grade motor. It is radiator cooled; force feed lubrication; vacumn tank; automatic governor (proportions fuel consumption to loud plant is carrying), etc. Dynamo is 1500 watt capacity and is also splendidly made. The plant is purely automatic—that is, when you turn on a light or appliance the plant starts and when the last light or appliance is turned off it stops.

There are thousands in use in the United States and all parts of the world. Both President Coolidges summer homes are lighted by Kohler plants and many other notable installations have been made.

But while the quality is as high as can be procured the price is no higher than the ordinary run of private electric plants.

A 1500 watt plant, which we recommend for most farm installations come at $700.00 f.o.b. Tofield and at that figure is the best electric light plant investment a farmer can make.

There is an 800 watt model at a lower price and 2000, 5000, and 10,000 watt models for larger consumers.

Further information will be gladly given by—

A Little Sub Here
A Little Sub There
Subscriptions, Subscriptions
---Everywhere

Like grain stooks standing in a farmer's field—are subscriptions scattered throughout a rural district. Each are holding a promise as good as gold—yes better than gold—yet they must be collected up before they are of real and practical value. With a team, wagon and pitchfork, the farmer can collect his grain stooks, take them to the threshing machine, from which golden grains emerges which in turn is taken to the elevator, where in exchange, the farmer receives coin of the realm.

The newspaper man cannot do this, he is dependent upon the good will of subscribers—when they come to town to drop in and pay. Fall time is subscription time and we would be delighted to renew your subscription now.

Special Note.—After October 1st the price of the Mercury will be $2.00 per year. We are among the very last of weekly newspapers to raise our price, the great majority having been selling for $2.00 per year for the past seven years.

WEEK ENDING, NOVEMBER 2nd, 1928

GOOD ROADS

WITHOUT DOUBT one of the best assets a town can have is a net work of good roads around it. In these days of rapid travel, when the desire for speed has even reached the farm and the farmer brings his grain to town in trucks at twenty miles per hour, good roads are not only desired but are absolutely necessary. Not that we boost for good roads solely for the motorist. We have always felt that good roads are the absolute right of the farmer. The rest of mankind likes to see the farmer efficient, in fact the rest of mankind finds it hard to get along unless the farmer is efficient, yet there is poor encouragement for a farmer to strive to become efficient on his farm, if, when it comes to the time to haul his produce to market he has to haul it over a road full of hillocks and hollows. Towns and organizations for the advancement of the trade of towns, should never forget that two miles over a good road is, as regards effort, no farther than one mile over a bad one.

The speed at which automobiles now travel makes good roads a necessity for the motorist. Broken springs, burst tires and the general wracking of a car due to poor roads is an aggravation to the car owner. He feels and justly so, that, having paid a substantial license fee, he should have good roads to travel over. The government is doing considerable road work along main highways and is to be commended for this, but there are plenty of roads in districts from which many dollars in license fees have been taken that receive no government attention whatsoever. It is left entirely to the municipality and the municipality receives, so we understand, no share of the automobile license fees. This does not appear to be a just arrangement, and is one that should be remedied. The small town in these days of rapid transit is having sufficient trouble to keep its place in the sun without being actually penalised.

DIM YOUR LIGHTS

THE PUBLISHER took quite a long automobile journey last Friday, the return journey covering a distance of 270 miles. The journey back home was made after dark and he was surprised to find how few automobile drivers dim their lights when passing another car on the road. Altogether we passed about 15 or 20 cars and of these only one had its lights dimmed, with another one which could be classed as doubtful. One car due to glaring headlihts made us gasp, the cars being far too close to be comfortable. The driver of the car in which the publisher was riding, a licensed driver, dimmed his lights on every occasion, with the above mentioned results.

This is nothing short of outrageous. Quite frequently the daily papers have reports of serious accidents and loss of life due to no other reason than the rank carelessness of a driver in not dimming his lights. The failure to do this is criminal and while it is difficult to detect parties guilty of this, when they are detected they should be punished. While we were prepared to have an odd car go by without dimming, we were surprised to find so few mindful of the law in this matter.

THE U.S.A. PRESIDENTIAL ELECTIONS

A CANADIAN must needs be a keen student of politics to become enthused over the forthcoming presidential election which takes place on November 6th. The long drawn out election campaign, to one not intimately connected with it becomes more of a bore, instead of something of keen interest. After a month or two of reading of Hoover's chances and Smith's chances, one would like to see either one or the others chances realized. Apart from the consideration of big issues, such as Smith being the hope of the wets and Hoover being the hope of the drys and both having farm relief promises, the election is interesting because both candidates come from humble parentage, thus proving that in this day and generation, humble beginnings are no handicap to life's success. The following taken from the Youth's Companion, makes interesting reading.

"Humble beginnings are no drawback. If you have a great goal in life they are a positive advantage. A boy raised on a silk pillow finds it hard to understand the aspirations, the needs and the likings of common people. Neither Hoover or Smith has had this difficulty for they came from the common people themselves.

Herbert Hoover was orphaned at seven, worked in truck gardens, became an office boy and put himself through college. To secure a job under a mining engineer, he had to learn stenography in two weeks. Many college graduates of our acquaintance would have flinched from this test of their brains and their earnestness. Hoover accepted the chance.

Alfred E. Smith's father died when the boy was 13, leaving only a few horses and a dray. Alfred was too young to be a truckman. He was not too proud to take the first job that came to him. He checked fish in Fulton market. Later he worked for the jury commission as investigator of men who dodged jury duty. After that he was elected to the New York Assembly, an assembly of men whose names are hardly known."

The Greatest Popularity Contest

THE public has judged motor-car values. It has staged the greatest of popularity contests.

Never has Chevrolet enjoyed such whole-hearted public acceptance—never before has any low-priced car offered such a striking combination of great beauty, thrillin, performance and amazing economy!

To sit behind the wheel is sheer delight.

Come in and see the world's most popular car. Experience for yourself the wonder of its performance. Learn for yourself why it is the greatest success of the year.

In clean, bright Aluminum

A Contribution To Canada

Out of the welter of charge and denial and appeals to racial and religious prejudice which characterized the recent Arm River by-election in Saskatchewan, one newspaper despatch from a special correspondent vividly impressed the writer of this column.

In the course of his journeyings around the constituency reporting the many meetings held, the staff correspondent of the paper in question had occasion to stop at the hotel in one of the smaller villages. The hotel was not of the usual type found in prairie villages. The rotunda he describes as "a bower of floral beauty," a close approach to a greenhouse. The ceiling was beautifully beamed and panelled, the proprietor having laid out five different plans for it before he felt satisfied. The hotel was scrupulously clean, the meals well cooked and nicely served by attractive help.

The correspondent was curious and he entered into conversation with the proprietor, one Kasper Haberlach by name. The secret of the beautiful woodwork was discovered in the fact that in his youth the proprietor had been a cabinet maker and had a love for fine woods and the beauty of fine lines. His love for the beautiful also found expression in his flowers. Relating his story, Kasper Haberlach told how he came to Canada sixteen years ago in his early manhood. Today he is the father of seven daughters and two sons, most of whom were born in Canada.

Proud as Kasper Haberlach is of his attractive hotel, it is his family in which he rejoices. Particularly is he proud of their school attainments. One of the Misses Haberlach led her school for three years in succession. The youngest girl, now aged seven, was sought by Chautauqua promoters a couple of years ago because of her talents as an entertainer. Kasper Haberlach himself speaks six languages fluently, but, says the correspondent, "I think he is probably most proud of the fact that his children speak English indistinguishable from any other Canadian children."

Mr. Haberlach has a praiseworthy method of inculcating thrift in his family. His daughters help in the hotel. "I have always made it a rule," he said, "to pay my children wages daily for their help in the business, just as I would strangers. They are encouraged to save for education or business or whatever they desire."

Now what we find so encouraging in this whole story is that it seems to provide an answer to many good people who are greatly concerned over the subject of immigration. Here is a man from a foreign country whose mother tongue is not English, but who, coming to Canada, brings with him an inborn sense of beauty, skilled craftsmanship, habits of thrift, high ideals of home life and citizenship, and a keen realization of the value of education, a man anxious that his children shall have the best that life can offer and determined that to the full extent of his ability they shall enjoy those privileges.

In this story from real life today we also find a satisfactory answer for those who are inclined to question the efficiency of our schools and educational system, and their ability to perform the task of largely assimilating new comers from other lands into our common Canadian family.

The fact cannot but be realized and accepted that Kasper Haberlach brought with him to Canada something of far greater value to this country than money, and that the contribution he is making to the upbuilding of this Dominion is something more than and far beyond the mere making of money through the management of a well regulated hostelry for the comfort and convenience of the travelling public.

In the evolution and development of the Canadian people we require all the beauty, all the craftsmanship, all the talent, all the thrift, and the full recognition of the real things of life that all the peoples of all the world can contribute. Canada does not desire to be a mere copy of any other nation or people, even though that nation and people be the best in the world today. Our ambition is higher than that. As a Dominion our ambition is to rise still higher and to develop on this northern half of the American continent a type of citizen superior to all that have preceded us,—a citizenship that shall be God-fearing, healthy, industrious and happy, revelling in all that is beautiful in art, music, literature and nature and finding a real joy and contentment in seeing work well done.

And to all who have a contribution to make in working out this pattern of a strong and ideal Canadian citizenship this Dominion should extend a whole-hearted welcome.

Canada's Progress Steady

Growth Not Just a Boom Says Hon. James Malcolm

Canada is progressing steadily. By most every standard that can be applied her economic condition is becoming increasingly satisfactory as time goes on and the people are now at a very high level of national well being.

So says Hon. James Malcolm, minister of trade and commerce in the federal cabinet, in a recent given in England of the conditions now reigning in the Dominion.

There is a sound basis of prosperity in this country, he says. There have been no great booms unfounded on natural development or unjustified in the light of indications. There is an increasing possession of comforts and conveniences of life among the people of Canada—there is a sound credit in their banks. There is prosperity in the air and happiness in the homes of the Dominion.

The amount of construction of new buildings throughout the Dominion in the last year has been phenomenal, as report shows. Yet there has been no undue [illegible] the needs of this rapidly developing commonwealth. The country is not as in the days of the boom period which was climaxed in 1912, building any great railway lines in advance of population. Rather, construction in all lines is proceeding in response to our needs. It is a healthy progress.

A Preventative

For preventing stiffness and further pain from sprains and hurts of any kind use Minard's.

MINARD'S "KING OF PAIN" LINIMENT

Paul—"The doctor has prescribed rest and change for me."

Paula—"Well, why are you so gloomy about it?"

Paul—"He advised me where to get the rest, but he didn't tell me where to get the change."

Corns cripple the feet and make walking a torture, yet sure relief is in the shape of Holloway's Corn Remover is within reach of all.

Unobservant Customer: I suppose you guarantee there's no chickens in these eggs?

Dealer: I certainly do, as they were laid by a duck.

Break Colds with Minard's Liniment.

New Serum For Burns

Recent Discovery Leaves Skin Unblemished Surgeons Are Told

A new method of treating burns, causing quick healing with absence of scars, discolored skin or other blemishes, was described before the convention of the National Association of Police and Fire Surgeons and medical directors of Civil Service Commission.

The method, as detailed by Dr. Stephen R. [illegible] of [illegible], N.Y., and discussed by Dr. John [illegible] of New York, [illegible] "normal horse serum" made from the blood of horses under a lately discovered method. The serum is sprayed with an atomizer on [illegible] skin surfaces and it is said produced astounding results.

TO THE MOTHERS OF ALL PALE GIRLS

If Your Daughter Shows Signs Of Anaemia a Tonic Is Needed

Anaemia is simply a lack of blood. It is one of the most common and at the same time most dangerous troubles from which growing girls suffer. It is common because the blood so often becomes impoverished during development, when girls often overwork and overstudy. It is dangerous because of the stealthiness of its approach and because of its tendency to grow steadily worse. Every growing girl should occasionally take a tonic to ward off this insidious trouble. It is because of their powerful action in rebuilding the blood that Dr. Williams' Pink Pills have made a world-wide reputation. The case of Miss Claire Sullivan, Pincher Creek, Alta., amply proves the value of this medicine. Miss Sullivan says, "During my school days I suffered a great deal from thin and watery blood. I was continually weak and tired, my appetite was poor, my sleep unrefreshing and I was troubled with backaches. To make matters worse I was attacked with acute appendicitis and the operation left me in a very weakened state. My mother learning of the value of Dr. Williams Pink Pills had me take them and after using them for some time I can say the result was simply wonderful, as they completely restored my health, and now when opportunity occurs I always recommend these pills to weak, pale girls suffering as I did."

You can get the pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Giant Guns For Naval Base

Constructed As Experiment During War But Never Used

Three giant guns constructed experimentally during the War have arrived at Singapore from England to form part of the naval base's defence. They are 18-inch weapons nearly sixty feet long, which weigh 150 tons each and fire a 3,323 lb. projectile. These three guns were the only ones of their kind constructed. They were mounted on naval units for use in bombarding German positions, but the war ended before they could be effectively employed.

Many children die from the assaults of worms, and the first care of mothers should be to see that their infants are free from these pests. A vermifuge that can be depended on is Miller's Worm Powders. They will not only expel worms from the system, but act as a health-giving medicine and a remedy for many of the ailments that beset infants, enfeebling them and endangering their lives.

Ship Live Mink To France

E. Swain, of Larsen, a small station on the Sioux Lookout branch of the Canadian National Railway, was in Port Arthur recently delivering to the express office a shipment of ninety live mink for transportation to France, where they will be used to stock a fur farm. Mr. Swain sold the mink f.o.b. Port Arthur, and on delivery drew in payment $7,500 for the 90 animals.

COULD NOT WORK FOR MONTHS

Restored to Health by Lydia E. Pinkham's Vegetable Compound

Port Elgin, N. B.—"For three months, I was nervous and weak with tired feelings and could not do my work. A friend advised me to take Lydia E. Pinkham's Vegetable Compound and I have got good results from it and recommend it to others."—LILA TAYLOR, Port Elgin, N. B.

This dependable medicine is sold by druggists everywhere.

VITAMINS

Everyone needs them to support growth or to protect the body against germ-infection.

Scott's Emulsion

[illegible] Scott's Emulsion builds strength.

[illegible]

[illegible] Is Interesting [illegible]

"City" rats and "country" rats are being raised at Colgate University, Hamilton, N.Y., and the "city" rats are developing nervousness.

The effect of noise on health and activity [illegible] Dr. Donald Laird, head of the [illegible] department of the university, [illegible] to discover. All the rats are free from molestation by cats and the [illegible] nervous strain.

By [illegible] to varying conditions of sound or lack of sound, Dr. Laird hopes to determine definitely the effect of noise on human beings.

Rats are used in the experiments because, Dr. Laird explains, they live 30 times as fast as man and in one year their growth parallels the growth and development of a human being in 30 years. The rats in this experiment are white.

The "country cousins" are kept in a sound-proof room while the "city" rats are housed in a room containing a tuning fork operated by electricity. The tuning fork is made to produce sounds approximately the noise of a busy city.

Food containers and food are the same for both groups so that differences in feeding may not account for any differences which develop in the nature of the two groups. The health of the rats is carefully guarded. Both groups are given an ultra-violet ray bath once a week to prevent rickets.

The rats have been under observation for eight months and Dr. Laird reports that the "city" rats, exposed to noise, have shown signs of nervousness and loss of appetite.

An Oil For All [illegible].—The sailor, the fisherman, the [illegible], the outdoor laborer, and all who are exposed to injury and the elements will find in Dr. Thomas' Eclectric Oil a true and faithful friend. To ease pain, relieve colds, dress wounds, subdue lumbago and overcome rheumatism, it is excellent. Therefore it should have a place in all house medicines and be amongst those taken on a journey.

Manitoba Hydro Extensions

Comprehensive Plan For Extending Electrical Power To Cover Rural Districts

An extensive hydro development programme which would bring electrical power to practically every town in Manitoba and to farmers whereby use of electricity in [illegible] ways the drudgery of rural life could be eliminated, was outlined by Hon. Donald G. McKenzie, newly appointed minister of mines and natural resources, in an address [illegible] Man.

Mr. McKenzie, who will [illegible] charge of the provincial government's hydro development plans, outlined the programme at a [illegible] of the United Farmers of Manitoba, Brandon District.

Mr. McKenzie announced that the government has decided to sponsor legislation providing for the payment of one-half the capital cost of all transmission lines, including a line to Brandon, new lines to all towns in Manitoba, all farm lines and those already constructed.

The legislation will [illegible] provide facilities which will permit of the construction of transmission lines to all parts of Manitoba within some years. Under the plans, very low rates are assured, said Mr. McKenzie, for the rural users of [illegible].

Taking No Chances

The small office boy ran into the manager's office wild with excitement. "Oh, sir," he cried, "a man's fallen through the coal hole."

"All right," replied the boss. "Just put the lid on him while I get a policeman. We'll charge him with stealing our coal in case he sues us for damages."

Irish Priest (addressing damaged invalid): "I'm going to pray that you may forgive Casey for throwing that brick at you."

O'Leary: "Mebbe yer Riv'rence 'ud be saving toime if ye'd just wait till Oi get well, and then pray for Casey."

NEW LEAGUE OF GREAT POWERS NOW PROPOSED

Colorado Springs, Colo.—A new League of Nations composed of great powers only and including the United States, was proposed by Ralph D. Blumenfeld, editor of the London Express and head of the British Journalistic Mission touring this country under the auspices of the Carnegie endowment for international peace.

The present League of Nations, he said, has become hopelessly ineffective and a danger to international relations.

Blumenfeld said the League was hamstrung by its own cumbersome constitution and was now a "germ carrying talking machine, an overgrown bureaucratic debating society which is a fulcrum for every crank idea."

In its place, he proposed a League of Nations which would be the result of spontaneous agreement between Great Britain and the United States, without elaborate treaties. Each of the powers, under his plan, would keep order among the minor states.

"There's no country in the world that wants peace so much and so ardently as Great Britain," said the London publisher. "Great Britain still feels her enormous losses in men, money and material and the disruption of generations of trade connections through the world. She wants a chance to recover from the catastrophe that not only overtook her but the rest of the world."

B.C. Heads Winners

Canadian Egg Laying Contest Just Completed At Ottawa

Ottawa, Ont.—Fourteen hundred hens have just completed 51 weeks' laying in the Canadian and Ontario laying contests at the experimental farm here. Premier honors in the Canadian contest go to a pen of White Leghorns owned by T. H. Haywood, of Langford, B.C., the ten hens laying 2,374 eggs for a total of 2,839.4 points. W. Bradley, owner of the second pen, White Leghorns, also hails from Langford. His birds laid 2,265 eggs and secured 2,220.5 points. Ontario claims third place through another pen of White Leghorns, owned by J. H. Jackson, of Port Dover. This pen laid 2,100 eggs and scored 2,178.8 points.

The 800 birds in the Canadian contest laid 131,900 eggs in the 51 weeks, which now constitutes the contest year.

Arm River Election

Dr. Waugh, Liberal Candidate Wins By Narrow Majority

Regina.—The government candidate, Dr. J. T. Waugh, captured the vacant seat in the Arm River bye-election, having a majority of some fifty odd votes over his opponent, Stewart Adrian. Owing to the favorable weather and the unprecedented interest taken in the campaign, a heavy vote was polled. The total number of voters on the list is in the neighborhood of 6,000, and the total votes polled amounted to 5,517, or 91 per cent. of the possible vote.

Fight With Wolf

Chicoutimi, Que.—A wolf driven from the woods by hunger attacked a 70-year-old farmer, Joseph Girard, a resident of Ste. Rose de Lima, Saguenay district. Ten minutes after he had grappled and fought with the animal, the septuagenarian won the fight and the wolf lay dead. The man's only weapon was a staunch stick.

Earning Living In Circus

Paris.—The newspaper Paris Midi said that Alexander Zubkoff, youthful husband of Princess Victoria Schaumberg-Lippe and a brother-in-law of the former Kaiser, was under contract to play in a cavalry act in the Paris late in the winter.

Decline In Unemployment

Ottawa, Ont.—There was a further small decline in unemployment at the beginning of October, when 6,627 employers had staffs aggregating 998,851 persons as compared with 1,003,891 the preceding month.

Postpones Pacific Flight

Tokio.—Baron Gunther Von Huenfeld, who recently completed a flight here from Germany, said he considered the season too late to attempt a flight across the Pacific. He was undecided how he would return to Germany.

Overcomes Gravity Force

Strange Claim Made In England By Young Scientist

London, Eng.—R. H. Tate, young scientist, claims to have overcome the laws of gravity, according to despatches recently from West Hartlepool to the Daily Express.

The experiment was demonstrated in a secret laboratory test, when a piece of metal absolutely unattached to anything was suspended in mid-air, the despatches said.

Tate placed on the floor the metal which was said to resemble aluminum but was of a composition heretofore unknown, and placed a similar piece of metal above it in the air. The top metal remained suspended not for just a moment, but for as long as Tate left it there.

"I have eliminated the force of gravity," Tate said. "The metal is not insulated and it is thought that the practical possibilities of the discovery are apparent. I have discovered the new force from known forces, by eliminating gravity from the metal. The composition of the metal is known only to myself, but among its possibilities is the controlling of aircraft from the ground."

Experts said that, if true, the discovery would be the greatest in centuries.

Straits Clear Of Ice

No Ice Yet Reported To Be Seen On Hudson Straits

Ottawa, Ont.—No ice is reported in Hudson Straits, according to the latest radio message from the wireless stations there. A few icebergs and growlers have been seen, while there is a film of ice on the lake shore, but in the seaway proper, the ice has not yet appeared. The Canadian government steamer, Montcalm, with the party in charge of Major N. B. McLean, of Ottawa, is at present lying off Button Islands, at the extreme tip of Labrador. Major McLean will remain there until all navigation in the straits has been closed.

The string of wireless stations along the straits and on to Churchill, are in close touch with each other, and with the Federal Department of Marine and Fisheries in Ottawa. Wireless developments have been added to by the establishment of a private station, at Mistake Island, 150 miles north of Port Churchill, by the North American Mining Exploration Company, and another station has appeared at Baker Lake, in from Chesterfield Inlet.

New Elevator Opened

Members Of Prairie Wheat Pools Attend Ceremony At Port Arthur

Port Arthur, Ont.—Pool terminal elevator number seven, the world's largest single unit elevator with a capacity of 7,200,000 bushels of grain, was officially opened in the presence of forty members and directors of the Saskatchewan, Alberta, and Manitoba wheat pools.

A. J. McPhail, president of the Saskatchewan Co-operative Wheat Producers, Ltd., officiated at the opening and with him were C. H. Burnell, president Manitoba Pool and L. D. Nesbitt, representing the Alberta Pool. The elevator is owned and operated by the Saskatchewan Pool Elevators Ltd., with headquarters at Regina. The building is 1,100 feet long, has 225 storage tanks, and 556 inter-space and outer space bins.

The tanks are 125 feet high and the work house is 210. The work was done in the record time of 149 days from the time the first concrete was poured.

Sir Arthur Currie In France

Montreal, Que.—Sir Arthur Currie will not resume his duties as principal of McGill University for about two months, according to a cable received at the office of acting principal, Dr. Charles Martin, Dean of the medical faculty. It is now expected Sir Arthur will return shortly before or during Christmas season. He has fully recovered his health and at present times is continuing his vacation in the south of France.

May Have New Trial

Toronto, Ont.—Hon. W. H. Price, attorney-general for Ontario, announced that the Crown would bend every effort to facilitate any action undertaken by Wm. Haskins, of London, who was recently sentenced to prison for five years on a charge of manslaughter, towards securing a new trial, or securing his release on bail pending a revision of his case.

Chinese Found Guilty

Carlisle, Eng.—Chung Yi Miao, young Chinese law student from New York, was found guilty of the murder of his bride, Wai Sheung Miao, here and was sentenced to death.

Wheat Pool Makes Denial

Are Not Holding Up Wheat Shipments In Order To Raise Prices

Winnipeg, Man.—R. B. Ramsay, secretary of the Manitoba Wheat Pool, has denied charges that the Canadian Wheat Pool is holding up shipments of wheat, and thus increasing the cost of flour and bread in England.

"Nobody in Canada is satisfied with the present level of wheat," declared Mr. Ramsay. "However, we are not retarding shipments, but on the other hand, are not free sellers on the present price levels," he added.

From the point of view of the Canadian farmer, Mr. Ramsay continued, the prices are considered too low at present and "we find that the non-pool members are also of the same opinion." The non-pool members, he added, are storing their grain, awaiting acceptable prices.

World's Record Cow

Saskatchewan Cow Holds World's Championship As Butter Fat Producer

Moose Jaw.—According to official figures received here a Saskatchewan cow now holds the world's championship as a butterfat producer.

She is Canary Korndyke Alcartra, and is owned by Ben H. Thomson, Boharm, who is famed throughout western Canada for his livestock records. During the official test period of 305 days the cow produced 1,080 pounds of butter fat, which is 106 pounds higher than any previous records.

Also during the official test period the champion cow produced 26,306 pounds of milk, which gave an average butter fat test of 4.04. The cows was milked three times a day, and was fed on feed grown on Braeburn Farm, Boharm.

WOULD SHIP MARITIME COAL BY BAY ROUTE

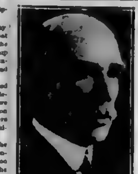
Winnipeg, Man.—Maritime provinces were considering the possibility that Maritime coal could be shipped to western Canadian points through Churchill on the completion of the Hudson's Bay Railway, Hance J. Logan, K.C., of Amherst, N.S., newly appointed director of the Canadian National Railways, stated here.

Mr. Logan said that serious opposition to the Hudson's Bay Railway project had never developed in the Maritimes and there was a feeling which he shared that whatever might be the success of the route for grain shipments the development in mining and colonization which it would encourage, would justify its construction. It had been one of the fortunate aspects of railway construction in Canada that some development had always taken place to justify the work.

Those interested in shipping Maritime coal to Churchill believed that many grain boats would be going back to the Bay which could stop at Sydney, Cape Breton and take on loads of coal.

Mr. Logan said Canadian National officials would confer with the Canadian Pacific Railway with respect to the Peace River Railways as soon as Sir Henry Thornton returned from England. He was convinced, he said, that the Peace River District formed a very important part of Canada and he hoped the "negotiations would be successful." He had been asked about the likelihood of the C.N.R. joining the C.P.R. in the ownership of the Alberta Northern Lines. Sir Henry was expected back during the next two weeks.

COLONIZATION PROBLEMS



COL. J. S. DENNIS, C.M.G.

Chief Commissioner, Department of Colonization and Development, Canadian Pacific Railway, who for over fifty years, has been active in Canadian land settlement. An outstanding authority on Canadian immigration and colonization problems, he has recently concluded important plans with the British Government for the movement of British settlers to Canada.

Planning New Air Routes

Russia Wishes To Supplement Inadequate Railroad Service

Moscow.—More than 3,000 miles of new air lines will be opened in Soviet Russia next spring by the Soviet Air Transportation Company "Dobrolot." The planning work is under way. The lines in every case are being laid out to supplement inadequate railroad service in the east and southeast.

Siberia, for the first time, will be connected with the European network of passenger and mail air routes, which now extend to Moscow. A daily service, 2,000 miles eastward to Irkutsk, near the Mongolian border, will be started in May in co-operation with the German Luft Hansa. With night flying, the distance will be covered in from 36 to 30 hours. It now takes five days by train.

Another air line will connect Alma Ata (where Leon Trotsky is in exile) with Novosibirsk over the route of the uncompleted Turkestan-Siberian railway. Several new lines are planned in the Volga Valley. German Junkers planes will be used upon all the lines.

Federal Assistance Needed

Premier Tolmie Of B.C. Thinks Government Should Aid In Building Roads

Vancouver, B.C.—The Federal government should again initiate the policy in effect between 1919 and 1926 whereby the provinces could earn grants of assistance in building trunk roads, Premier S. F. Tolmie, said in the course of an address to the Vancouver Board of Trade.

The Premier said it was time the Federal government recognized the trend of modern times and give assistance to the provinces in the matter of roads. The Dominion government, he remarked, through the post-office and other departments was one of the biggest users of roads.

Four Killed In 'Plane Crash

Tucson, Ariz.—Four youths are dead here following a crash when a Ryan Brougham monoplane plunged against the side of a mountain while in full flight. The crash occurred when the plane, soaring over the Catalina mountains in search of Bill Hyatt, 16, reported there, hit an air pocket. The ship caught fire after crashing and was demolished. Its occupants were burned to death.

Holding Swine Club Tests

Winning Teams Will Go To Royal Winter Fair

Winnipeg, Man.—Preliminary arrangements have been completed by the Canadian National Railways for the interprovincial boys and girls swine club competition, which will be held on November 21 at the Royal Winter Fair, Toronto. Six provinces will be represented this year and the results of the provincial competitions will decide the teams which are to go to Toronto.

Teams from each province will be the guests of the National system during the week of the Royal Fair and the entertainment of the boys and girls will include a trip to Niagara Falls and a visit to the Donalda Farm, just outside of Toronto.

In the past two years teams from Roland, Manitoba, have won and successfully defended the W. D. Robb Trophy, which is emblematic of interprovincial championship. The cup is held by the winning team for one year. Gold medals are presented to the winning team from each province.

Will Dredge For Gold

Syndicate Will Operate On River Near Medicine Hat

Medicine Hat, Alta.—A syndicate composed of local men, assisted by Vancouver and United States capital, has leased ninety miles of river front below this city and is conducting tests preparatory to dredging the gravel for gold. Some thirty years ago there was considerable activity of this nature along the river, the old hand panning process being followed with returns averaging four dollars a day for experts. George L. Holme, San Francisco engineer, is in charge of the tests.

JOURNALISM OF TODAY IS OF A HIGH STANDARD

New York.—Frank B. Noyes, of the Washington Star, president of the Associated Press, told a group of representative industrialists here that newspapers as a whole were "worthy of the confidence of their readers."

Speaking at the fifth annual conference of major industries held at Columbia University, Mr. Noyes said he thought everyone familiar with journalism in the last fifty years would agree "that in accuracy of statement, in breadth of information, in ethical standards, there had been a steady progress upward."

Mr. Noyes, appearing as the representative of the publishing industry, said that the reports of newspapers and press associations did contain "many inaccuracies" since they were the products of human beings, but he gave assurance that "the intention is to fairly and accurately depict the situation described."

He defended modern journalism against forms of attack and criticism, which he said were unjust and unwarranted.

"As it is I am extremely conscious of the fact that we are doing our level best day in and day out to keep in the middle of the road, having no partiality for any party and church, any economic theory or any cause or man whatever, and on the other hand no hostility to any of them.

"I know that this is true of the Associated Press, and I believe it is also true of the other large press associations.

"There have been venal newspaper men as there have been venal doctors, lawyers, business men and even venal politicians, but God be thanked that the newspaper crooks are few and far between."

REPORT ON WORK AT CHURCHILL FOR THIS SEASON

Ottawa, Ont.—The department of railways and canals soon will issue a statement giving full particulars of the season's work at Fort Churchill. R. W. MacLachlan, chief engineer of the department, has just returned from an inspection tour and the statement will be based upon his report.

It is understood that the construction on the harbor works is proceeding until the entire program for the season was accomplished.

The port will not be ready for shipping as quickly as the railway, but this is said to be unavoidable unless the government spends a large sum of money in overcoming the difficulties in building due to the present inaccessibility of the harbor.

When the railway is completed it will be easier to take in supplies and workmen.

There were no accidents this season and the department is pleased with the progress being made.

Five Thousand Miners Remaining In Canada

Have Until February To Return Under Special Arrangements

Winnipeg, Man.—Of the 8,500 British miners who came to Canada this year to work in the harvest fields under government auspices 3,500 have returned home, according to officials concerned in their handling.

A considerable number still are in Winnipeg waiting for jobs in their various trades, while farm placements for those still in the country have been arranged in many cases.

The special arrangements under which the men were brought over permit their return to the Old Country up to next February, after which official responsibility will cease.

Would Use Submarine To Explore Antarctic

Wilkins Hopes To Have Assistance Of British Government

Montevideo, Uruguay.—Antarctic exploration by submarine is a possibility which is being considered by Sir George Hubert Wilkins. He spoke of this just before he sailed from here on the Whaler Hektoria for Deception Island, where he intends to establish a base for exploration by air of large spaces in the Antarctic.

He indicated that it might be two years before he was ready to undertake the submarine exploration and that he hoped the British Government would then be willing to aid in. The boat would be used to gather data on ocean currents and sea life and chemistry.

Clean Law Administration

British Columbia Will Not Resort To Use Of "Stool Pigeons"

Victoria, B.C.—"Stool pigeons" must not be employed by British Columbia provincial police under a policy announced by Hon. R. H. Pooley, attorney-general.

"The police of this province are going to operate on a clean above-board basis and the use of stool pigeons will never form a part of their methods," Mr. Pooley said, adding, "The police will never use agents to persuade persons to break the law in order to get convictions. Practices of that kind cannot be tolerated."

Want To Find Owners

Philadelphia.—The United States government has joined forces with District Attorney Monaghan, who is directing the grand jury investigation of rum runners and police corruption, in his efforts to identify the mysterious owners of 14 bank accounts totalling nearly $12,000,000. Monaghan believes the money was deposited by bootleggers and the federal government wants to determine whether income taxes were paid on funds.

U.S. Residents Here Can Vote

Toronto, Ont.—United States citizens resident in Canada have the right to exercise their franchise in the approaching presidential election, it was stated at the Toronto consulate here. They will be permitted to vote at the various United States consulates throughout the Dominion.

Ottawa.—An official inquiry into the wreck of the Western Canada Airways plane which took fire following a crash near Calgary, will be instituted by officers of the High River air station, it was announced by the Department of National Defence.

INTERESTED IN HANDLING OF GRAIN CROPS

F. R. Newman, Vice-President Soo Line, together with 50 representatives of the Soo Line, Spokane International, and South Shore Railways watching carloads of grain passing through the vast Canadian Pacific Railway yards at North Transcona, Winnipeg. They saw traditional [illegible] of Canada's greatest crop being handled over the "hump."

HALLOWE'EN AT TOFIELD

Hallowe'en passed off very quietly at Tofield this year, no real damage to property being reported.

Some disgusting tomfoolery was as usual pulled off.

Parties were the order of the evening, the Tofield high school holding theirs in the Variety Theatre. This was well attended and all had a good time. The hall was decorated and the local orchestra kindly supplied the music. Refreshments were served, the party breaking up about midnight.

A party was also held at the home of Mrs. W. C. Swift, a number of small children being invited to have a good time with [illegible]. Games, taffy-pulling, and all kinds of fun was enjoyed by the youngsters.

Mrs. McLaughlin and Donald also entertained a number of youngsters about Donald's age to a Hallowe'en party. Games and fun of all kinds was had, topped off with good eats.

Afternoon Hallowe'en parties were also the vogue at the school. The primary department had a high old time, dressing up as ghosts, and having general revelry.

The junior rooms in the big school also had special Hallowe'en programs, Miss Clement's & Miss Cooper's room in the afternoon and Mr. Lundy's room at night.

Farmer's Store News For This Week

Extra Heavy Hudson Bay Blankets, per pair $9.75
Heavy all wool white blankets, price $6.50 to $8.50

ELEVENTH CROP REPORT

According to reports received by the Department of Agriculture for the eleventh fortnightly crop report of the season the Alberta crops for 1928 is showing a very marked decrease in yield and reduction in grade as compared with estimates made some weeks ago. Official reports to the department by threshermen in all parts of the province show that the wheat crop will average approximately twenty bushels per acre, and they emphasize the fact that the injury to both the yield and quality of the crop from frost is more serious than was apparent from earlier reports. The experience of previous years is that subsequent returns will slightly reduce rather than increase the first figures as these represent a large proportion of grain from summerfallow. From a wheat acreage of 6,707,526 acres as shown by Dominion Government estimate and on the basis of the average yield shown in thresher's returns, Alberta's wheat crop will total some 134,150,520 bushels. It is also apparent that as a result of the reduction in grade a considerable percentage of this year's wheat will be retained for feed rather than shipped to market."

This conclusion as to the probable average yield over the entire province is borne out by information secured on Friday from the regular correspondents of the Department and from other equally reliable sources. Whiel the yield for the present season is somewhat disappointing, showing as it does a drop of some several last year's phenomenal returns, may be pointed out that 1923 yield still two bushels per acre in excess of the average for the past ten years.

The situation with regard to the wheat crop applies to the coarse grains to almost the same extent average from 30 to 35 bushels per barley from 20 to 25 and rye from 15 to 18 bushels.

Apart from this reduction of full 25 per cent from the estimates of the yield made in August, the value of Alberta's 1928 crop is greatly depreciated through the injury to quality resulting from the frost. While some sections have been more fortunate in this regard than others, grain inspectors indicate that not more than 25 per cent of the wheat being marketed is of the contract grades and in many districts a large percentage of wheat is grading No. 6 and feed. This reduction in quality is also very apparent in the case of oats and in many districts some some apprehension is felt as to the seed supply for next year's crop.

In the Peace River country while the yield is lower than anticipated the quality of grain is somewhat better than the average for the province. In the south-eastern section of the province both yield and quality of grain have been less seriously reduced than in other sections, although completion of threshing has been delayed by broken weather. Grain is being marketed rapidly and at a number of country points difficulty is reported in securing elevator accommodation.

Good progress is being made with the sugar beet harvest in the south and a fairly good yield of beets with a high sugar content is reported.

Due to the favorble fall, a larger acreage than usual has been plowed in readiness for the following season crop. This is particularly true in the northern half of the province.

PLUCKY YOUNG HARVESTER WINS HIS WAY IN CANADA

John A. Craig, formerly of Gateacre, near Liverpool, Lancashire, England, was the first harvester to sail for Canada under the scheme which brought out 10,000 British harvesters to Canada this summer. And if the same John Craig, now of 7205 108 street, Edmonton, has his way, he'll be the last to go back. In fact, he won't go back at all if he can help it.

Craig has his return ticket in his pocket, but he doesn't plan to use it. He likes Canada too well and intends to stay.

The story of John Craig's success in a new land far from home and friends, doesn't yet read like that of a Carnegie, but it's interesting enough withal. When the harvesting scheme was announced he rushed from his home at Gateacre where he was a qualified gardener by trade and took the first boat to Canada on August the 10th. Upon arrival he was sent to Viking where he worked for 30 days on the farm of August Forss at harvesting, brush-cutting, etc. When the harvesting work ended and the harvesters were discharged, Craig came to Edmonton where he found employment washing cars with the Perfection Auto Laundry.

A son was born to Craig's wife at Gateacre since the head of the family landed in Canada and the proud father is working tooth and nail to bring his wife and son to Canada. His ambition is to save enough by spring to bring them out.

JOHN JOHNSON

John Johnson, whose appointment to the position of manager of the Chateau Frontenac, Quebec, is announced to be effective November 1st. Mr Johnson joined the staff of the Chateau Frontenac as clerk in 1920 and became assistant manager in 1924. He succeeds B. A. Neale, who is appointed to the Royal York Hotel, Toronto.

B. A. NEALE

B. A. Neale, popular manager of the Chateau Frontenac, whose appointment as manager of the new Royal York Hotel in Toronto is announced to be effective November 1st. The managing of the Royal York is considered the most ambitious hotel position on the continent. Mr Neale has steadily risen in Canadian Pacific service since 1911, when he transferred to the hotel department from the General Superintendent's office in Montreal.

Chrysler Plymouth Cars

MECHANICAL EXCELLENCE THAT GOES FAR BEYOND ACCEPTED STANDARDS

In new and original engineering features, and in its construction all the way through, the new Plymouth goes so far beyond the accepted standards that it is a revelation even to mechanical experts. Chief among the new developments is the latest and greatest product of the Chrysler engineering staff—the new "Silver Dome" high compression engine. Through the perfection of this great motor the advantages of high compression—greater power, greater climbing ability, greater speed and greater acceleration—can be obtained through the use of the ordinary gasolenes.

LOCAL AND PERSONAL

T. Whitmore made a business trip to Calgary last week.

Miss Dorothy Hay is visiting friends in the city.

Mr. and Mrs. Abbot motored to the city on Sunday.

Mr. and Mrs. Hay visited the city on Tuesday.

Mrs. Hall, Allan Hall and W. Clark of Edmonton were in town on Sunday.

Mrs. Ledin of Holden was in town on Wednesday evening, the guest of Mrs. O. Letourneau.

A number of Tofield ladies are attending a curling convention in the city, among whom are Mrs. McCauley and Mrs. Clutterham.

The Cornhill Municipal Council held a regular meeting on Saturday, the minutes of which we hope to publish in an early issue.

Mrs. W. C. Swift entertained a number of lady friends to a pleasant social afternoon at her home on Friday of last week.

Mr. J. Robinson, sr., passed away at his home in Tofield on Wednesday night of this week. He had been ailing for some long time.

Tofield visitors to the city this week included Mrs. Munro, Mr. and Mrs. McLaughlin, Mr. and Mrs. Beirnes, Dr. and Mrs. Law, the Misses Minnie Wood and Clara Abbott.

An error occurred in the correspondence signer "Ratepayer" published in last week's issue. At the end of the second paragraph it should read on "N.W. 24" instead of "N.E. 11."

In last week's report of the unfortunate death of Mr. Tony Yakabuski, we omitted to mention that he has a sister living at Toronto, Ont., Mrs. Ward. The body was shipped east and the funeral was held at Renfrew, Ont., this week.

The Ladies' Aid of the United Church will hold their annual sale of work and bazaar in the Club Rooms (old Methodist church) on Saturday, November 24th. Afternoon tea will also be served and there will be a sale of home cooking.

On Monday night at the regular meeting of the Tofield Young People's Society a debate on an interesting question was held. Owing to demands upon our space being more than we anticipated earlier in the week, we are compelled to carry over the report of the debate until next issue. We will then endeavor to give a brief outline of the various arguments.

PROFESSOR CORBETT COMING

The Tofield Young People's Society announce that they have been fortunate in securing an engagement with the celebrated Professor Corbett, of the University of Alberta, who will give us an illustrated lecture on French Canadian Life. The program will be held in the United Church building and will commence at 7:30 p.m., on Tuesday, November 13th. Admission to meet expenses only will be 25c. and 15c.

NOTICE

All those contemplating delivering cash grain to the pool elevator should first telephone and ascertain if it can be accepted. At present the elevator is about full for cash grain and it might be compulsory for us to temporarily refuse cash grain.

Also please note that elevator will be closed on Monday, November 12th, Thanksgiving Day.

J. H. THOMPSON,
Local Manager.

Nov. 8th, 1928

NOTICE

Tenders will be received by the undersigned up to the 30th day of November, 1928, for the purchase of the South-East Quarter of Section 24, Township 51, Range 19, West of the Fourth Meridian, containing 160 acres more or less. This land is situated three miles from Tofield, and is well improved. The highest or any tender not necessarily accepted. This is the old J. C. Phillips homestead.

A. J. H. McCAULEY,
Tofield, Alta.
Executor Estate J. C. Phillips, deceased.
40c.

AN ENJOYABLE PARTY

A joint birthday party was held on Monday of this week at the curling rink, the large number of young people present being the guests of Mrs. Clutterham and Mrs. McLean, the event being held in celebration of the birthdays of Blake Clutterham and Everett MacLean.

Games and dancing were the main items on the program, and a wonderful lunch was served. The happy gathering broke up about midnight, the youngsters going home with glowing tales of the glorious time they had enjoyed.

W.I. NOTES

The Women's Institute wish to thank all those who contributed to the Wood's orphanage. The sum of $60 was sent and was surely very gratefully received. Winnie Worton received first prize and Margaret McCauley second for selling the most number of tags.

Our regular meeting will be held Tuesday next November 13th in the rooms to which we invite all interested in Institute work. The election of officers for 1929 will take place and we hope for a goodly turnout. The programme is as follows:

Roll call—Christmas Suggestions.
Musical selections on gramophone with stories of author of records.
Violin duet, Mrs. Pincott and Arthur Beirnes.
Election of officers for 1928.
Afternoon tea.

On Saturday, November 10th, we will hold a sale of poppies in honor of the heroes in the Great War. The money for the poppies go toward supplying comfort to the soldiers in hospitals.

MUSICAL ECKARDTS COMING

The Musical Eckhardts, Swiss Bell Ringers and variety entertainers, will appear at the Variety Theatre on Monday evening next. It is several years since this Company last played Tofield but the Eckardts are well known from coast to coast in Canada and the Northern States where they have been before the public for the past 32 years. Since T. Eckardt, founder of the organization, passed away, three years ago, the business has been carried on by his two sons, Gordon and Burnard. They still play the bells, glasses, etc., but have added many new features. The Company's orchestra will furnish music for dancing after the performance.

A Norwegian film classic will be shown at the Variety Theatre on Tuesday night next at 7.30, when the film "The Phantom Elk" will be shown. This is a distinct change from the general run of pictures, being of Norwegian origin. It is taken from the story by the famous Norwegian author, Mikkjel Fonhus, and was filmed in the land of the midnight sun by Norwegians with Norwegian film stars playing the parts. There are English titles. It is an absorbing love story brought to a thrilling climax. There will be a dance after the show.

There will be a meeting of the Ladies' Curling Club in the Curling rink on November 14th at 8.00 p.m. All ladies interested please attend.

Leonard P. Woodhams, optometrist (eye-sight specialist) will be at Tofield on Wednesday, November 14th, from 1:30 until 5 p.m. He will also, weather permitting be at Ryley Hotel on Wednesday morning the 14th, from 9 until 1 p.m.

Those interested in the question of public vs. private ownership of utilities, will be pleased to hear that A. M. Matheson, M.L.A., will address a meeting at the curling rink, Tofield on Saturday night on this subject. Mr. Matheson needs no introduction as a speaker here, and as the subject is very timely, there will no doubt be quite a large number present.

CARD OF THANKS

We wish to thank all those who so kindly gave us assistance during our sad bereavement. Also for the many kind expressions of sympathy.

Mr. and Mrs. P. Yakibuski and Family.

BABY CHICKS— Pure-Bred-to-Lay that Liv-An-Gro from Tested, Trapnested and Inspected Flocks. White Leghorns, Barred Rocks, Rode Wyandottes, White Rocks, Anconas, Minorcas, Orpingtons. Early order discount for orders received now. Write for Free Catalogue. Alex Taylor's Hatchery, 362 Purby St., Winnipeg, Man. 42c.

KETCHAMOOT

The monthly meeting of the M.A.S. will be held next Wednesday afternoon, November 14th, at the home of Mrs. Geo. Lawson. Visitors welcome.

Mrs. J. Monroe and daughter, Mrs. E. Neal and Miss Emma Bruha were visitors at the W. A. Mitchell home last Monday afternoon.

Miss Gertrude Ingram had her tonsils removed at the clinic in Tofield last Wednesday.

Mrs. B. Wildman, Mrs. H. Stine, Jason Henderson and Angus Mitchell motored to Edmonton on Wednesday.

The men holding an interest in the scales at the siding held a meeting at the Geo. Lawson home on Monday evening.

Mr. and Mrs. Frank Shupe entertained a few guests to dinner on Sunday, these were Mrs. Henderson and Jason Mr., and Mrs. B. Wildman and daughter, Mr. and Mrs. Torrie and children and Mr. Glean.

Messrs. A. McMullen, sons Paul and Harold and Chester Coombes left on Tuesday of last week for a hunting trip north of Edson.

Mrs. Peter Lee and grand children returned home last week from near Wainwright where she had been visiting her daughter, Marjorie.

The refreshment committee of the M.A.S. held a meeting at the C. A. Ingram home on Friday evening.

Mr. and Mrs. Roy Flemings and family were guests of Mr. and Mrs. Herman Lawson on Sunday.

Miss Wild and Mr. Wild were Sunday guests of Mr. and Mrs. McCowan and also attended church services in the afternoon at Ketchamoot.

Mr. Geo. Lawson left on Thursday evening on a hunting trip West of Edmonton near Peers.

The Misses P. Napier and L. Ross of Tofield visited Mrs. W. A. Mitchell and family Sunday afternoon and evening.

Masters Lloyd and Neal Whillans underwent operations at the clinic on Wednesday for the removal of tonsils and adenoids.

Lorne and Miss Viola Lee and their hired man motored to Edmonton on Wednesday.

Mrs. Lovel and Alfred are visiting Mrs. Moore at Jarrow.

LAKE SHORE

Miss Fife, teacher of the Westlake school spent the week-end at the Bethel home.

Misses Emily Ferguson and Emma Bruha and Messrs. Lionel Ferguson and Ernest Roberge motored to Edmonton and back on Saturday.

Lynn Phillips, Calvin Phillips, Douglas and Malcolm Murray, Vivian and Nola Shaw and Marvin Seal all had tonsils removed on Wednesday of last week at the public health clinic in Tofield on that day. All are progressing favorably.

Mr. and Mrs. R. C. Phillips spent Sunday at the Stine home of the Lindbrook district, the occasion being little Verna's sixth birthday. Mr. and Mrs. Gill and family of Lindbrook were also guests.

Mrs. T. E. Seale spent Friday of last week visiting Mrs. Appleby west of town.

Mr. and Mrs. H. Rollins and family of Viking visited at the Wood home on Sunday.

Miss Margaret Wolfe who was staying with her sister, Mrs. Roy Phillips returned to her home on Saturday evening.

Mr. and Mrs. Johnston Ferguson and George Abernethy were callers at the T. E. Seale home on Sunday.

Mrs. T. E. Seale spent Tuesday with Mrs. Elmer Googlein.

Bardo Ladies Aid will hold their Annual Sale and Lutefisk dinner on Friday the 16th of November. Dinner will be served from 12 o'clock to 2 o'clock in the basement of the Bardo church. All are welcome.

NOTICE

All elevators, including Mr. Lee's will be closed on Monday, November 12th, Thanksgiving day.

WANTED.—Ten Cows or Heifers to milk on shares from now for any length of time up to April 1st. Any number up to 10 will be cared for. Anyone intending to take a trip will find this a convenient arrangement. Please communicate with Albert Vougtlin, Round Hill, Alberta. 43p.

AMISK CREEK

Mr. E. A. Moen shipped cattle from Shonts to the Pool on Tuesday of last week. Those participating being J. Olson, P. O. Flaaten and several others.

Arthur Patterson was taken very ill and had to be rushed to the city on Monday of last week where he was operated for appendicitis at the Royal Alexandra Hospital the same evening. It was found that his appendix had burst before he left. His parents were up to the city to see him last Thursday and he is getting along as well as can be expected.

The Young People's League held their first program Sunday evening of last week at the home of [illegible]son. Quite a large number gathered and the program was very good. Dr. Lagerstr[illegible] was present and gave a talk about China. Their next meeting will be next Sunday evening at the home of I. Annelsi. The church is under repair and the meetings have to be held at the homes until it is finished. Everybody welcome.

Amisk Creek school had their Hallowe'en program on Friday, the week before last and Solberg school had their program on Wednesday October 31st. All the children report having a good time.

Lillian and Raymond Patterson left on Monday of last week for Vermilion where they are to attend the Agricultural School this winter.

Mr. and Mrs. R. O. Berg, Arnold, Lilly and Lloyd motored to Camrose last Sunday to visit with Ruby who is attending the Camrose Lutheran College.

Hedley McLaughlin is spending a few days in the city this week.

Miss Alice Berg left last Saturday for Viking where she will visit with friends and relatives for a few days.

Mr. and Mrs. E. A. Moen visited at the P. O. Moline's home last Sunday evening.

Mr. and Mrs. P. O. Flaaten and Gunvald visited at the Mr. and Mrs. Archie Brown home near Bawlf last Tuesday.

The Ladies' Aid will meet at the home of Mr. and Mrs. A. Haugen on Wednesday of next week, November 14th.

Our deepest sympathy goes out to the Yakibuski family in their sad bereavement.

KINGMAN

Mr. and Mrs. W. Ingram motored to Edmonton on Tuesday.

Mrs. F. Erickson has been visiting with friends in Edmonton for a week.

Miss Mabel Simonson returned to her home here after spending three weeks in Edmonton.

Mr. and Mrs. W. Ingram and Miss Pearl Welch spent the week end in Ranfurly.

Mrs. P. Rodnitzky spent a few days in Edmonton last week.

Rev. Simpson was a business visitor in Edmonton Friday.

John Erickson of Camrose spent Sunday with Mr. and Mrs. Erickson.

Mr. and Mrs. L. Mitsek and family, Mr. and Mrs. H. Berger of Tofield, and Mrs. C. [illegible] of Water Glen were the guests of Mr. and Mrs. C. R. Blyckert on Sunday.

Mr. and Mrs. [illegible] and family of Camrose spent the week end with Mr. and Mrs. C. R. Blyckert.

Mr. and Mrs. J. Haugen and family of Edmonton spent the week end with Mrs. P. Simons.

The Hall Committee has arranged to have the Swiss Bell Ringers appear in Kingman on Tuesday, Nov. 13th with a dance following the performance. The Company's orchestra will furnish music for the dance.

C. F. Soslund, an old timer of Kingman, moved to Lundemo to take over the post office of the late Mr. Waldum.

A party was held in the Kingman Hall on Saturday November 3rd in honor of Mr. and Mrs. MacIntosh. Speeches for the occasion were given by C. Calder and E. Erickson, and suitably answered by Mr. MacIntosh. The couple were presented with gifts as a token of appreciation from their friends.

WORLD HAPPENINGS BRIEFLY TOLD

Robert Bell, president of the Press Congress of the World, has announced that the next session of the congress will be held at Ottawa, Ont., in July, 1929.

An all-red route around the world is seen as a strong possibility in the near future by J. A. Wilson, controller of civil aviation, who has returned after spending two months in the British Isles and Europe.

C. Lee it is announced will succeed Chow Kwo Yen as consul-general for China in Canada following the request of the latter who desires to return to his native land after four years' residence in the Dominion.

The Rev. Reuben Archer Torrey, evangelist and Congregational minister, who was associated with the late Dwight L. Moody for nearly 20 years, is dead at his home in Asheville, N.C., in his 73rd year.

England's first demonstration of broadcasting pictures took place recently when the British Broadcasting Corporation successfully transmitted a portrait of King George 100 miles from the Daventry experimental station to Manchester.

The honor of having been the first woman private pilot to graduate from the ranks of the flying clubs in Canada went to Winnipeg whose first lady member, Miss Eileen Magill, was passed upon by the civil aviation branch of the Department of National Defence.

Martha Ostenso has been in the sheep ranching country of the Canadian Rockies getting local color for a new novel. Miss Ostenso is planning a trip to Europe this autumn, and will visit among other countries Norway the land from which her parents [illegible]

Using the airplane from which Alfred Loewenstein, the Belgian financier, fell into the English Channel and was killed, last July 4, a party of sportsmen headed by Lt.-Commander Glen Kidston of England for Africa on the first aerial big game hunt. The airplane has been thoroughly overhauled and refitted.

Western Canada Motorized

A recent analysis shows that 34 out of every 100 farmers in Western Canada own a motor car and 18 out of every 100 farms have gasoline tractors.

London claims the largest ice skating rink in the world in Richmond Ice Skating Club that will open this fall. The skating area is said to be 4,300 square feet.

MOTHER OF TWINS HELPED

Restored to Health by Taking Lydia E. Pinkham's Vegetable Compound

Mitchell, Ont.—"I had little twin babies and for quite a while after I was so weak I could not do my work because of pains all the way up my legs at the back. I also had headaches and got very little sleep. I took Lydia E. Pinkham's Vegetable Compound, and soon I was able to get up and do my work. I have taken three bottles and I am fine, do my work without trouble and am gaining in weight and strength. I will gladly recommend the Vegetable Compound to anyone."—Mrs. F. Stapton, Box 229, Mitchell, Ont.

Light Beam Produces Music

Expert Could Stop Sound By Blocking Light With His Hand

A narrow beam of light cast about an assembly room in the Hotel Biltmore at Atlanta, Georgia, was changed into music and held under perfect control at the will of John Bellamy Taylor, consulting engineer of the General Electric Company at Schenectady, N.Y.

The demonstration, given before the American Institute of Electrical Engineers was made possible through a complicated apparatus by which electrical impulse is controlled by the beam of light and represented what Mr. Taylor called "narrow castings."

The equipment used in the demonstration is known as a photo-phone built on old principles. Mr. Taylor said but utilizing the perfected photo-electric tube, electric pick-up and newly developed amplifiers and sound reproducers.

An ordinary phonograph with an intricate electrical attachment was used in producing the music. The electrical energy was sent over a light beam in transforming and reproducing elements mounted on a tripod across the room, and music and sound was the result. When Mr. Taylor would hold up his hand in the path of light the music would stop and as he allowed the light to filter through his fingers the music increased in volume.

THOUSANDS OF MOTHERS USE NO OTHER MEDICINE

Baby's Own Tablets Are the Ideal Remedy For Babies and Young Children

Canadian mothers are noted for the care they give their little ones—the health of the baby is most jealously guarded and the mother is always on the lookout for a remedy which is efficient and at the same time absolutely safe. Thousands of mothers have found such a remedy in Baby's Own Tablets and many of them use nothing else for the ailments of their little ones. Among them is Mrs. Howard King, of Truro, N.S., who says:—"I can strongly recommend Baby's Own Tablets to mothers of young children as I know of nothing to equal them for little ones."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Another Story About Ants

Psychologist Tells How They Extinguish Fire With Formic Acid

Speaking of fire circuses, here is a story about ants who act as firemen supported by no less an authority than the Journal de Psychologie edited by Dr. Pierre Janet, internationally known psychologist, of Paris.

Marguerite Combes, an entomologist of note, introduced a lighted candle into an ant-hill in the forest of Fountainbleau not far from Paris, a hill of brown ants known as "formic rufa." The ants scurried about a bit and then proceeded to extinguish the flame by squirting formic acid upon it.

These ants are definitely of a higher order than other species inhabiting the forest. In other hills, the ants either became panic stricken or died trying to bite the flame. Where they had the intelligence to try to extinguish the fire by acid, they lacked the ability to direct the stream effectively.

Recipes For This Week

(By Betty Barclay)

SCHOOL CHILDREN'S SANDWICHES

Mix thoroughly together one can salmon, ½ pound of cottage cheese and one small can pimento peppers. Season with salt and pepper and add enough thick cream or any good salad dressing to make a smooth paste, thin enough to spread. Butter one thin slice of brown or bran bread, spread filling on thin slice of white bread and put together.

STUFFED HEART

Beef heart.
1 cup cracker crumbs.
½ cup white sauce.
1 cup roasted chestnuts.
Salt and pepper to taste.

Wash the heart thoroughly inside and out. Stuff with dressing made from ingredients given above and sew up opening of the heart. Cover with water and boil ten minutes, then simmer until tender. Remove heart from water one-half hour before serving and sprinkle with cracker crumbs, salt and pepper. Bake until brown.

Once a man has been created a Knight of the Garter, he must wear some part of the insignia day and night. Most of the knights wear the badge of the order—which is made of silver—when sleeping.

Minard's Liniment Heals Cuts and Bruises.

"Will you give me a nickel, sir, for a cup of coffee and a roll?"

"Sure thing, old man, if you'll show me where you get all that for five cents."

The Best Laxative He Ever Tried

Mr. Wm. Towner, New York, writes: "Never have I felt better in my life. Your purely vegetable Laxative Pills keep my bowels active; headaches and indigestion never bother me now. I enjoy my sleep and get up refreshed, with a clear head ready for a day's work." CARTER'S LITTLE LIVER PILLS Sold all druggists 25c and 75c red pkgs.

SUNDAY SCHOOL LESSON

NOVEMBER 11

PEACE AND GOOD WILL AMONG MEN

Golden Text: "Be not overcome of evil, but overcome evil with good."—Romans 12:21.

Lesson: Romans 12:1-21.

Devotional Reading: Philippians 2:5-11.

Explanations and Comments

A Call To Consecration For Service, verses 1 and 2. The meaning of these two long verses has been aptly expressed in these brief words. In view of all that God has done for us, we should [illegible] live for him. [illegible] ary paraphrases the verses thus: God's redeeming love should be answered by the true sacrifice and spiritual, ritual service of a life of purity and self-denial and work for God. Do not follow the fashion and customs of the worldly society around you, but let your ways of thinking be so changed by the Holy Spirit that you look for and recognize God's will and love to do it.

"Present your bodies a living sacrifice, holy, acceptable to God."

"No maimed or crippled thing might be offered to God by the Jewish law. If we would devote ourselves to God, we must see to it that we have a self to devote. Self-consecration is not a negative thing, it is a very positive thing. Even our Lord said in His high priestly prayer, 'For their sakes I consecrate Myself.' Self-consecration is the most effectual way in which we can serve God in our generation. That is the way in which the torch has been handed down by a long succession of runners since the Gospel of Christ came into the world. Ask yourselves how you have been helped by others. You will find, I think, that the occasions have been most trivial, that the words spoken and the things done have been slight and unpremeditated. They have been sidelights upon the person's character, peeps into the inner life of one whose mind is kept in perfect peace because it rests on God, of one who sees God because his heart is pure. It is the sudden sting of self-reproach, the shame of the contrast, the longing to be like such a one, that sends a man to his knees as soon as he is alone. Sometimes when such a man or woman dies we learn for the first time, not without surprise, what he or she has been to many. Such persons have laid up a store of gratitude for being what [illegible] has helped them to be."—R. W. Inge.

Everyone Should Have Vacation

All Work and No Play Not Good For People

The city dweller has been sold pretty thoroughly on the idea of a yearly vacation. It may be to the shore, to the mountains, to the lake or to the farm, but it is a vacation that puts new blood into his veins and brings the tint of roses to the cheeks of wife and children.

Those who dwell in the great open spaces seldom find time for a vacation. Work, to some extent, makes the man of the home forget its loss and unfortunately it makes him also lose sight of that look of longing that comes over the face of his better-half as she reads the lures of vacation lands and sees more fortunate friends and neighbors climbing into the family car for a week or ten days "on the road."

Each man owes to himself and to his family to take a vacation. Death comes in due time, and a forced vacation is taken—often many years before it would be necessary were a little play mixed with each year's work.

We can't take our money into the tomb. We can't get all life holds for us by work alone. Now that the crops are in, take a vacation. Go anywhere. Stay two weeks, ten days, one week, or at least for a few days. Use the train, the steamer or the family car. But do something that will be a change and that will bring smiles to both old and young faces that seem to have forgotten how to smile.

Vacation days pass quickly, but vacation remembrances live for an entire year. Take a vacation.—Richard S. Bond.

Famous Nakimu Caves

Near the summit of the Selkirk range of mountains in British Columbia, is one of the most remarkable series of subterranean passages found on this continent. These passages are the Nakimu Caves, in the Glacier National Park, one of the scenic areas administered by the National Parks of Canada, Department of the Interior.

Canadian Mica

Practically all of the mica produced in Canada is of the amber variety (Phlogopite). Mica is marketed in the rough-cobbed state, as trimmed sheet, splittings, scraps, and ground mica. Trimming and splitting is done by hand.

Marriage was the name of a couple who sought a separation order at North London Police Court.

The only thing some people keep up is appearances.

Master Mason CUT PLUG SMOKING TOBACCO IN PACKAGES AND ½ LB. TINS

Not Confined To Canadians

All Subjects Of King George May Cross Border To Work

Living in Canada and working in the United States is the privilege of all British subjects, no matter where they hail from. So says the supreme court of the United States. The widespread impression that this privilege is limited to Canadian citizens is wrong. The Jay treaty of 1794, on which the decision rests, does not mention Canadians either native-born or foreign-born. It says that "his majesty's subjects" and "citizens of the United States" shall have the right "freely to pass and repass by land or inland navigation into the respective territory and countries of the two parties on the continent to America." This applies to British subjects from Scotland, New Zealand, Honduras and many other quarters as well as Canada.

The little labor marplots, who persuaded immigration headquarters to bar their Canadian neighbors when they dared to work here for a living without using the permission of a union, have done an unwitting service to the cause of international comity and English-speaking friendship.

Mount Robson

The summit of Robson pass is a broad gravel flat extending between Adolphus Lake on the Alberta side and Berg Lake in British Columbia, the two lakes lying about a mile apart. In no other pass in the Rockies does one mountain so dominate the entire landscape as does Mount Robson. Its enormous mass (altitude, 12,972 feet), towers 7,523 feet above the summit of the pass at such close range as to literally overshadow it.

WHOOPING COUGH
No "cure"—but helps to reduce paroxysms of coughing.
VICKS VAPORUB

A Wool Pool

Alberta Government Interested In Getting the Matter Under Way

A wool pool in Alberta is now a possibility. Premier Brownlee met a number of representatives of the industry in the province the other day and the subject was opened up in a preliminary way. It will likely come before the executive council for further consideration in the near future, the Government being interested in all co-operative efforts by way of advising and encouraging.

Check Colds

At the slightest warning of a cold rub your chest and throat with Minard's.

MINARD'S "KING OF PAIN" LINIMENT

"A joint bank account must be nice."

"Yes, it's a lovely arrangement. My husband deposits the money, and I draw it out."

Customer: "How long will this pair of patent leather shoes last?"

Clerk: "Until the patent expires."

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention.

One spoonful of this harmless, tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Keep Foods Deliciously Fresh

Keep your foods—cakes, bread, pies, cut meats, etc.—under a covering of Para-Sani Heavy Waxed Paper. You'll be amazed at the length of time they'll stay *fresh...delicious!* Para-Sani keeps them from staling. Get Para-Sani in the handy, sanitary knife-edged carton. For less exacting uses ask for Appleford's "Centre Pull" Packs in sheet form.

CHAPTER V.—Continued.

"Can I cook?" repeated Andy. "'E asks me can I cook! That's me first name; that's me profession. I've cooked on sailing ships, steamboats, in camps, in the Army, an' I did thirty days in Sydney jail, and blime me if they didn't make me 'ead cook. I was so good they wanted me to sty."

"You're hired, Andy," said Douglas decidedly. "But isn't it going to be pretty tough to quit the boxing game for cooking?"

"Bodie 'ad you 'ave asked me I'll say that it's a blinkin' sight better than quittin' it for tiddledy-winks!"

Douglas came to his feet. "I want you to meet Dad, Donald, and we'll find out when we are to start."

Andy patted his stomach contemplatively. "Well, with this 'ere champagne under me belt, I think I'll start in 'ere and 'ave a drink and a fight in every bar from 'ere to Cordova Street. About meetin' you Donnie," he added scratching his head reflectively, "the way I feel right now I think by tomorrow morning you'll find me in the bridal-chamber of the Vancouver Hotel." Saying which, with straightened shoulders, his head set at a characteristic angle, he swaggered down the street and with a wave of his hand disappeared within the swinging doors of the first saloon. In his present mood Andy envied no millionaire.

"You'll like Dad," said Douglas, as they ran up the steps of the big office building. "He's rather severe looking and pretty straight-laced, but the face he wears in the office isn't the face he wears at home." He finished with a laugh.

Robert Rennie was the sole owner of the Rennie Construction and Logging Company, one of the largest organizations of its kind on the Coast. He now rose from his chair and came around the desk, all the while studying Donald's face, which bore unmistakable traces of the afternoon's fight.

"Dad, this is Donald McLean, whom I told you about last night. I don't want to take up much of your time; just wanted you to meet Donald and find out when we can start on the trip to the mountains."

"Now that Gillis is here to go with you, you can go any time; the sooner the better, as we expect to have the railroad to the summit in a few weeks," responded his father, his eyes still on Donald.

"Thanks, Dad," said Douglas. "We can be ready tomorrow and leave the next day."

"Douglas, will you please go to Bowser's office and get some papers he promised to have ready today?" asked Robert Rennie.

Donald moved toward the door with Douglas.

"Sit down, Mr. McLean, and wait until Douglas comes back," invited Robert Rennie politely, as he pushed a chair toward Donald. He then closed the door of the outer office where a girl sat pounding a typewriter.

When the older man turned his face was set in a broad smile and he crossed the room to seize the hand of his astonished visitor in a hearty grip. "Man! man!" he exclaimed, as he pumped Donald's hand vigorously, "that was a great fight today! When you got Garrison with your left in the second round and that d—— gong rang, I—I—heavens, but I was excited!" He was gazing at Donald with admiration glowing in his eyes.

"You—you were there!" gasped Donald.

Robert Rennie chuckled. "Top row—nigger heaven! When that brute fouled you I think I could have shot him!"

"Mr. Rennie, I'm not a professional fighter, I—I——"

"Tut! tut!" interrupted the enthusiastic fan. "I can see that. By gad! that last round was a whirlwind. That right you landed on his jaw—I got so excited that I fell down between the seats and skinned my shins." He rubbed his leg ruefully. "I never saw such speed as you showed in that last [illegible]"

Here footsteps sounded outside. Robert Rennie moved quickly to his chair, adjusted his glasses and assumed a serious expression. "Not a word to Doug," he whispered.

"Bowser says that he told you he'd have the papers tomorrow," informed Doug'as.

"Very well," answered his father.

Donald turned as he was leaving the room and saw Robert Rennie close one eye in a wise wink.

CHAPTER VI.

At the breakfast table next morning Douglas was talking happily of their departure for Summit Lake.

"You'll [illegible] timber cruising," his father admonished. "There won't be any time for play, as we expect to have the road finished in a few weeks."

"Don't worry, Dad. This is my first real job, and I am going to make good," declared Douglas stoutly.

"I hope so, Douglas. As you know I want you to work your way up on your own merits. I'm not going to show any favouritism. We are going to put in a larger mill at Cheakamus and one at Summit Lake so there will be good opportunities for advancement for you and McLean if you show the right spirit."

"Is Mr. McLean going with you?" interposed Janet in a casual tone.

"Yes."

"How can he leave his business for so long?"

"He's not actively engaged in business just at present," explained Douglas glibly.

"You might ask him out to dinner tonight. I am having a few friends in for the evening."

"You bet I will."

Donald accepted Janet's invitation with alacrity. Living within four walls of a room and eating in restaurants had long since palled on his taste.

"Formal or informal?" he asked.

Douglas made a deprecatory gesture. "Formal, very formal. You don't know Janet or you wouldn't ask that question. My sister is a stickler for ceremony. How are you off for 'soup and fish'?"

"I have the necessaries," smiled Donald.

Donald spent more than the usual time in dressing. He stood before the small mirror and surveyed himself with a critical eye. "Pretty soft for you," he apostrophized himself, "eating in ten-cent restaurants one day and dining in a millionaire's home the next, and on the invitation of the most beautiful girl you have ever met."

Douglas called for him with his car and whisked him to the palatial Rennie residence on Shaughnessy Heights. The imposing evidence of wealth was written in bold headlines on the whole street of beautiful homes.

Mrs. Rennie met them at the door and greeted Donald warmly. He could not repress a start as he noted her likeness to Janet, and when she spoke her voice held the same deep tone as her daughter's. She led him to a large room flanked by two enormous bays that looked out on the Avenue. There was a spaciousness in all the rooms, a rare combination of beauty and good taste in the furnishings, that were luxurious without being ornate. Robert Rennie came forward and gave him a cheery welcome. Donald heard Janet's voice behind him and turned to gaze on a vision of loveliness.

Janet had dressed for the occasion with unusual care. A dark red evening gown of a filmy material showed to advantage the delicate contour of her form and the graceful curve of her snow-white shoulders and neck. Her lovely hair was wound in shining coils and held with a comb that sparkled with small but brilliant diamonds. Her long dark lashes drooped, and she flushed slightly as she met Donald's look of undisguised admiration.

Mrs. Rennie was an excellent hostess. Her cultured and charming personality put Donald quite at ease. It seemed ages since he had worn a dress-suit and been entertained in a home of luxury and refinement. After the coarse fare of noisy restaurants which had been his, the excellent food, the rich linen, the home-like atmosphere and the subdued voices now gave him a pleasant thrill.

The conversation during dinner was on various subjects. At times it swung perilously near to matters pertaining to Donald's personal affairs. On such occasions Douglas adroitly shifted it to other channels.

Janet studied Donald covertly. His perfect poise, his air of refinement and his evident lack of self-consciousness impressed her. "He is cultured and well-bred," she thought as she noted his well-shaped head, his powerful shoulders and his clean-cut profile.

Near the finish of dinner, while waiting for coffee to be served, there came a lull in the conversation which was finally broken by Janet. "Doug tells me that you are engaged in the glove business, Mr. McLean," she stated.

Donald shot a quick glance at Douglas, but his friend's face was hidden in his handkerchief to smother a sudden attack of coughing. In spite of Donald's great effort at self-control, he felt a warm flush rise in his cheeks. What had Douglas divulged? Did his sister know of his participation in a boxing-match? He looked at Douglas appealingly. It was evident that he would receive no aid from that quarter, as that young man's assistance was a prolonged coughing that effectually drowned immediate conversation, but would have to stop sooner or later for lack of breath.

At this crucial moment Robert Rennie came to his assistance. "I would like Mr. McLean to witness a sunset from our roof," he said as he rose from the table. "Let us have our coffee served there. The light will be gone if we wait longer."

As they ascended the stairs Donald gave his host a grateful look which Mr. Rennie returned understandingly. That moment cemented an instant friendship in Donald's heart for this broad-minded Western millionaire.

From the eminence of the tiny roof garden the City, sliced with streets lay at their feet. To the north the mountains were invested with a mystic blue haze, through which towered the snow-clad peaks. To the west lay the curving white sands of English Bay, and beyond, in the clear air of the long British Columbia twilight they could see the strong mountainous profile of Vancouver Island.

"The topography of our City" explained Robert Rennie, "lying between Burrard Inlet and False Creek, is very much like that of New York on Manhattan Island. The Narrows are deep enough for the largest ship afloat, and the Inlet—a veritable inland sea—has unlimited room for docks."

"The name 'Narrows' seems a feeble word for such a magnificent spot," observed Donald.

"Quite true," admitted Robert Rennie. "It was only yesterday that one of our public-spirited citizens suggested the name 'Lions' Gate.'"

"Oh, Dad, that would be lovely!" exclaimed Janet, her eyes shining. "The 'Lions' Gate,' with the two watchful Lions looking down on all who enter. The name is most fitting."

"Yes," concurred Douglas, "Canada being one of the Lion's whelps, what more appropriate name than 'Lions' Gate,' the western gateway to the British Empire?"

"The Creator was wonderfully kind to us in His allotment of mountains," said Janet's father; "mountains that are not only valuable for their scenic beauty, but for their mineral-filled rocks and forest-clad sides. Our bays, inlets and streams are filled with fish, and our climate is so mild on the Coast that man can live in comfort amid congenial surroundings the year round.

"Here we have the last of the Great West," continued Mr. Rennie. "With nearly four hundred thousand miles of territory, a coast line seven thousand miles in length, our population for the entire Province is less than one of the Coast cities to the south of us. Here in this vast untouched hinterland," swinging his arm to the north and east, "lies a potential wealth that will support millions, a wealth that is awaiting the magic touch of capital and settlers—capital to provide railways, farmers to till the rich valley, miners to unlock the vast hoards of gold and copper; and loggers to fell the virgin forests. Some day—and that day is not far distant—all this will come to pass, and you young folks will see a railroad from Vancouver to the Behring Sea." The speaker's face was flushed and his eyes were glowing. "Who knows," he finished dreamily, "but what the railroad I am building will be a link in the Alaskan road of the future?"

"Here is a family," thought Donald, "all native born, who have a deep and abiding faith in the destiny of the land of their birth."

Addressing Mr. Rennie, he said: "If the love that you and yours have for this Province is typical of the average citizen, I see no need to fear for the future of your country."

(To Be Continued.)

Canada's Gypsum Deposits

Gypsum is mined or quarried in Nova Scotia, New Brunswick, Ontario, Manitoba, and British Columbia, and in each of these provinces there are other properties capable of furnishing high-grade material when market conditions warrant their exploitation.

DEMAND

ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. *But it's just as important to know that there is only one genuine Aspirin.* The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it is not! Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any drugstore—with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. [illegible]

ECZEMA ITCHED AND BURNED

On Arms and Legs Six Years. Cuticura Heals.

"When I was a small boy eczema broke out on my arms and legs in small pimples. As I grew older the eczema became wet and turned very red, and my clothing aggravated it. It itched and burned so that many a night I could not sleep. The trouble continued for six years.

"A friend advised Cuticura Soap and Ointment so I sent for a free sample. I found great relief after using it so purchased a cake of Cuticura Soap and a box of Cuticura Ointment which healed me." (Signed) Louis W. Plenz, 7138 Jasper Ave., Edmonton, Alta.

Use Cuticura Soap, Ointment and Talcum for daily toilet purposes.

British Industries Fair

Increasing Interest Is Evidenced In Exhibit To Be Held In London and Birmingham

The British Government announces that the fifteenth British Industries Fair will be held simultaneously in London and Birmingham from the 18th February to the 1st March, 1929, inclusive.

The ever increasing growth of the Fair has necessitated the acquisition of further buildings at the White City to accommodate the immense and varied display of exhibits. At Birmingham new buildings of lasting strength have been constructed to meet the insistent demands for space. In this section alone over 400,000 square feet of space is available for the display of manufactured products.

In the fifteen years of its existence the Fair has developed to such an extent that it is now classed as one of the great trade fairs of the world.

At the White City the main lines shown include toys and games, leather and leather goods, pottery and glassware, wireless apparatus and accessories, clothing and textiles, foodstuffs, scientific, photographic and optical goods; stationery, jewellery, chemicals and druggists sundries, fancy goods and sports goods.

The Birmingham exhibit comprises hardware lines of all kinds, household appliances, electrical goods and machinery, including such varieties as concrete mixers, elevators and trucks, welding machines, heavy battery discharge testers, forges and blowers and many other types of industrial machinery.

In order to facilitate the rapid transaction of practical business the most thorough and modern system of organization has been adopted. In London the general public will be excluded from admission to the Fair during business hours. A special club for the sole use of buyers will offer many comforts and amenities and the free service of a corps of interpreters will render business relations easier between exhibitor and buyer.

Full particulars relating to the Fair can be obtained from the British Trade Commissioner 703 Royal Bank Building, Winnipeg, who will be glad to issue invitations on behalf of the British Government to business men who contemplate making the trip.

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

THE SALIVA

You will recall how you came in hungry and saw mother's cooking on the table, so tempting. And you said, "It makes my mouth water."

Now, as a matter of fact, it probably did, for the mere sight or smell of savory food is sufficient to stimulate the salivary glands to function.

The role played by the saliva among the defensive agencies in tooth decay is a very important one.

We have, first, the mechanical cleansing of the teeth and mouth structures by the saliva; how important it is then, that the food be palatable to stimulate the salivary flow and that mastication be thorough to the same end. For it is a matter of common observation, that in the quickly crumble away through decay cases of "dry mouth," the teeth

Now try this:

Chew for a few moments, some starchy food, a piece of white bread or potato. Notice presently, how sweet it tastes. What causes this?

In the saliva there is a content known as ptyalin, which has the power of converting starch into sugar and which action takes place during the process of mastication, as the first step in the digestion of the starch element. But the ptyalin content performs the still further function of freeing the tooth surfaces of clinging pasty particles by dissolving the starch.

Then, too, you have observed how sticky or ropy is the saliva at times. This is due to still another salivary content the mucus. The function of this substance is largely the mechanical one of binding the food particles together and at the same time of lubricating and making slippery, the surfaces of the teeth and mouth tissues, thus assisting in the act of swallowing.

Lastly, the presence of saliva with its constant renewal, tends to overcome through its neutralizing effect, the harmful action of fermentation of carbohydrate matter in the mouth. Hence it is important for this reason too, that the supply be liberal.

Therefore, it is worthy of observation here, that great emotions, such as anger or fear, or the unpleasant feelings of worry and vexation tend to greatly check the normal salivary flow and for this reason if for no other during the process of mastication, the mind should be swept clean of all such disturbing tendencies.

Little Helps For This Week

"I have learned in whatsoever state I am, therewith to be content.—Philippians iv. 11

But those that are contented
However things do fall
Much anguish is prevented
And they soon freed from all.
They finish all their labors
With much felicity,
Their joy in trouble savors
Of perfect piety.

—Anne Collins

The fountain of content must spring up in the mind; and she who has so little knowledge of human nature as to seek happiness by changing anything but her own disposition, will waste her life in fruitless efforts, and multiply the griefs which she proposes to remove.

—Ben Jonson.

Table Removed From Abbey

After remaining in the Jerusalem Chamber of Westminster Abbey for 50 years the trestle-table which had been placed there for the use of the revisers of the Bible has been removed by the authorities. The work of the revisers was completed in 1881 but the table with its red baize remained until order was recently given.

The British custom of serving 4-o'clock tea in business offices is fast "taking on" in Canada. Many Canadian, as well as British-born, executives now order Red Rose Tea for their office staffs, because it is the same quality as the finest English teas. Sold by all grocers, in bright, clean aluminum.

WEEK ENDING, NOVEMBER 3rd, 1928

PUBLIC VS. COMPANY OWNERSHIP

DUE NO doubt to the inroads the large utility corporations are making in Alberta, there is a growing interest in the question of public vs. private ownership of utilities.

The U.F.A., the official organ of the United Farmers of Alberta, in its November 1st issue attacks the utility corporations vigorously, claiming that through "canned editorials" they have debauched the press or at least part of the weekly press of the United States. We are acquainted with canned editorials, but do not use them.

Public vs. company ownership of public utilities is a question upon which there will always be a difference of opinion. This difference of opinion will be based upon individual experiences, the way one or the other effects the pocket book of the individual, or according to what other connections the individual may have. For instance it is only natural for the U.F.A. to champion the cause of public ownership inasmuch as it is the official organ of a large number of the Alberta public, and that they are opposed to "big interests" on general principles.

There is just cause for the interest being taken in the question in Alberta at the present time. Not so long ago despite the vehement protests of the Vegreville Observer, the electric plant in that town was sold to a big Utilities corporation. Since that time a number of Alberta town plants, including Red Deer, Mundare, Wainwright, Hardisty, and others have been sold, and it would appear as if the utilities corporation are prepared to buy any worth while town electric and power plant in Alberta. Offers have been made for the City of Edmonton light and power plant, in fact nothing seems to be too large or too small for them. One can readily see the significance of this. In a few years almost all the electric light and power plants in Alberta will be controlled by one large financial organization, and by any system of book-keeping they wish to adopt can make electric current appear to cost anything. In the province of Alberta at least, at the rate that existing plants are being sold, there will be no basis of comparison. And what it costs to produce will be the basis upon which the selling price is quoted. This can be done of course, but we very much doubt if it will be. The modern trend of the utility business is to sell utilities as cheaply as possible to as many people as possible; making volume take the place of price increase.

In theory, there is no question that public ownership of public utilities is better than control being placed in the hands of large corporations. In actual practice, however, if fifty cities and towns were taken and conditions there analysed, it would likely be found that as far as direct advantage to the utility consumer was concerned, there would be about an even break. Some having public ownership, would be found with loose management and obsolete plants, others with good plants, good management, but due to parties in power currying favor, inadequate rates. All down the line there would be a fresh set of conditions to consider with consequent favoring, first public ownership and then private ownership.

Investigating some company owned plants, it would likely be found that rates in vogue when current was not as cheaply manufactured as now, had been kept in vogue because the public knew no difference and were accustomed to paying any given rate; lack of development due to sluggish business methods; and interrupted service lightly considered by the company. In many of these cases a change over to public ownership would be beneficial to the consumer.

Assuming that maximum efficiency is attained [illegible] and mechanically, we favor publicly owned utilities. But we do not favor them to the extent of inefficient management because Councillor [illegible] wants one thing and Councillor Brown another. After all, the service to the consumer is what counts. [illegible] if the utility corporation do make [illegible], if they can deliver light and power to the consumer better and cheaper than a local governing body, we are inclined to let them go to it. It is not what the company makes that matters so much as what the consumers save. This of course is dependent upon the company treating their employees justly and paying them fair salaries.

While no doubt there are many people who hold pronounced views as regards private and public ownership of utilities, we are inclined to favor judging each case as it arises.

Writing of power, reminds us that power transmission lines are being run out of the larger cities to the neighboring towns. This is true of Southern Alberta, though we have yet to hear of any development along these lines out of Edmonton. We believe a deal whereby Edmonton will sell some of its surplus power to another company is either under way or consumated. The company will run lines to neighboring towns and supply them with light and power.

As far as Tofield is concerned, this would be a very good thing for the users of power, but the majority of businesses now have gas lights, which appear to be quite satisfactory, and few would be inclined to change.

To the farmers on the main route, who no doubt would be able to procure current, this would be very handy.

IN THE DISTRICT COURT OF THE DISTRICT OF EDMONTON

In the estate of John Carter Phillips, late of Tofield, in the Province of Alberta, farmer, deceased.

NOTICE is hereby given that all persons having claims upon the Estate of the above named John Carter Phillips, who died on the 11th day of August, A.D. 1928, are required to file with the undersigned by the 17th day of December, A.D. 1928, a full statement duly verified of their claims and of any securities held by them, and that after that date the Executor will distribute the assets of the Deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or which has been brought to his knowledge.

DATED at Tofield, Alberta, this 23rd day of October, A.D. 1928.

A. J. H. McCAULEY,
Executor, Tofield, Alberta.

HON. J. MALCOLM TALKS TO BRITAIN OVER TELEPHONE

Ottawa, Ont. Ten thousand people who thronged the grounds of the Cardiff Empire Exhibition, in Wales, and many thousands more throughout the British Isles, heard Hon. James Malcolm, minister of trade and commerce, speak to them from Ottawa over the trans-Atlantic telephone.

"Simply marvellous reception," the word came back from Cardiff, as soon as the minister had finished his eight minute address. "The best yet."

Mr. Malcolm's office in the parliament buildings was the Ottawa "call station."

Mr. [redacted] introduced his brief address by expressing the regards of the Canadian people to the people of Wales. [illegible] that the ideal of empire [illegible] which the exhibition stands was finding strong and patriotic support in this country. The minister voiced a word of praise for the empire marketing board. Trade, he said, was only a medium through which the people of the empire become acquainted and through which were learned the difficulties and viewpoints of the various units. To know one's self was essential, to know one's country was a patriotic duty, to know the empire was a great and profitable advantage.

The minister made passing reference to the arrival in Canada of the prime minister from his lengthy sojourn abroad, and expressed Mr. Mackenzie King's thanks for the reception tendered him in Great Britain.

"The question of inter-imperial migration has been much to the fore in recent months," said Mr. Malcolm. "While calling your attention to the speech delivered by our prime minister recently, in London, in the course of which he declared that Canada welcomed British emigrants, may I say that British North America has in recent years been receiving as many British emigrants as are going to all other empire countries.

The return movement is relatively small, indicating that the great bulk of those who come to us are satisfied with their welcome and with the opportunities which Canada affords - opportunities which have never been greater than today. In the year 1922 we received and welcomed 637 Welsh emigrants; this year we are receiving over 500 every month. If an inter-empire problem exists on the question of migration, may I say for the government and the people of Canada that none are more welcome in this Dominion than the sons and daughters of the British Isles."

The minister concluded with a reference to the Prince of Wales, whom Canada claimed as "a landed proprietor and taxpayer of this Dominion." His Royal Highness was the great ambassador of the empire, representative of all our common traditions, common history and common ideals for a United Empire. The Prince of Wales was a joint possession.

Mr. Malcolm closed with a wish that the Cardiff Empire Exhibition might meet with unprecedented success.

Eliminating Crow Pest

Campaign In Saskatchewan This Year Was Mighty Successful

Regina.—The crow and magpie population of the province has been decreased by more than 1,000,000 as a result of the activities of 4,320 contestants for the 1,500 prizes offered by the Provincial Department of Railways, Labor and Industries in the 1928 crow campaign, according to the report in the Public Service monthly issued for last month.

"The success of the competition may be gauged by the results which show that 465,963 legs, and 631,718 eggs were collected. Actually, therefore, the enemy suffered a total loss of 914,092 before hostilities closed September 1."

Cities May Have Own Aerodrome

London, Eng.—An aerodrome in every city in Britain is the program put forward by the air ministry. Realization of the program depends on the city councils finding the money and therefore it will not be immediate. Manchester and Nottingham have already purchased land for aerodromes and Leeds, Hull and Liverpool are expected soon to follow their example.

Viscount Allenby Honored

New York.—Field Marshal Viscount Allenby, of Great Britain, received the honorary degree of Doctor of Laws from New York University.

Famine Stalks In China

Babies Being Killed On Account Of Lack Of Food

Shanghai, China.—The China international famine relief is being flooded with appeals from the stricken districts, particularly in Shansi, where, it is declared, "babies are being killed because there is nothing to feed them with and children are being sold for a mere song."

Thousands of persons are said to be living on the bark and leaves of trees. In addition to Shansi the famine includes districts in Kwangsi, Suiyan, Hupeh, Hunan and Honan.

A magistrate of Yang Hsien in a letter estimates that there are 200,000 famine sufferers, owing to the drought and the devastations of the "Red Spears" a guerilla organization. The situation in Shansi, the magistrate declares, is unprecedented, children being sold openly in the market by parents eager for cash. In Hunan thousands are on the verge of starvation, due to the banditry, communist uprisings, the Red Spears and drought.

Serious Famine In Russia

Mobs In Moscow Are Openly Denouncing the Government

London, Eng.—Soviet Russia is in the throes of a famine which is reaching serious proportions, according to reports from Helsingfors and Riga, received by the Exchange Telegraph Company here.

Mounted police are patrolling Moscow and dispersing near-violent mobs whose leaders openly denounce the government, the Helsingfors report stated.

Foreign legations in Moscow are perturbed over the seriousness of the situation, although some, it is said, are disposed to welcome it because it affords them a legitimate reason for leaving.

In Leningrad similar scenes were enacted, according to the Riga report. There 750 women and children, after waiting in a bread line all night, were given apples. Angered, they used the apples to bombard the windows of food stores and threatened to lynch the food distributors. A large number were arrested and later released.

Brilliant Meteoric Display Predicted

Shooting Stars Will Be Seen From November 10 To 17

Montreal.—Meteoric displays of striking brightness are predicted to occur for a period lasting from Nov. 10 to 17 inclusive, according to an announcement from Harvard College University, received at McGill, by Prof. A. Vibert Douglas, lecturer in physics and secretary of the Montreal centre of the Royal Astronomical Society of Canada.

These displays, commonly known as shooting stars, will be seen in the northern sky south of the constellation of the Great Bear, better known as the Dipper. The shooting stars will be best observed after midnight until four o.clock in the morning and will be seen as bright flashes across the sky.

Remain In Canada

5,000 British Harvesters Still Remaining in Canada

Ottawa.—With harvesting operations completed in the west and with 5,000 British harvesters still remaining in Canada, it is probable that the majority will become permanently established, department of immigration officials stated today. Reports from steamship companies to the department indicate that approximately 2,500 have returned to the British Isles.

From the fact that very few of the harvesters have applied at government employment bureau officials of the labor department believe that in the majority of cases they have found permanent work on western farms.

Receives Prize For Research

London, Eng.—F. C. Banting, in receiving the Cameron prize for research at Edinburgh University, told how he discovered insulin. He was in London, Ont., when he read an article which so affected him he could not sleep that night and at two o'clock in the morning he was able to crystallize his ideas which led to his successful experiments.

Spanish Royalty In London

London, Eng.—Queen Victoria of Spain, and her daughters, the Infantas Beatrix and Maria Christina, arrived here and were met at Victoria station by the King and Queen. The royal party will be the guests of Queen Victoria's mother, the Princess Beatrice, widow of Prince Henry of Battenberg.

Alberta Sheep Breeders

Officers Are Elected At Annual Meeting Held In Calgary

Calgary. Officers elected at the annual meeting of the Alberta Sheep Breeders' Association, held in Calgary, were:

President, John Wilson; vice-president, William Hudson, of Kathryn; second vice-president, Alex. S. McDougall, Champion, directors, W. L. Carlyle, Calgary, M. McK. Andrews, Dewinton, John Ramsay, Simon's Valley, Richard Knights, Calgary; John Wilson, Jr., Innisfail; E. J. Reid, Cremona, A. M. Olson, Airdrie; R. Hogarth, Cochrane, Peter Massie, Midnapore, and R. H. A. McDonald, Champion.

Meetings of the directors of the Alberta Horse Breeders' Association and the Alberta Cattle Breeders' Association were also held.

GRAF ZEPPELIN LANDS SAFELY IN HOME PORT

Friedrichshafen, Germany. — Completing the first round-trip commercial trans-Atlantic flight, the Graf Zeppelin landed at the aerodrome here with passengers and mail from America.

The airship, coming from Lakehurst, N.J., made the fastest crossing of the Atlantic by a lighter-than-air machine covering a distance of 4,000 miles.

Since leaving Friedrichshafen on the morning of October 11, the Graf Zeppelin had flown approximately 16,000 miles. Going by the southern route on the westward flight, she flew 6,000 miles in 111 hours and 38 minutes.

The Graf Zeppelin arrived over her home port just 63 hours and 36 minutes from the start of her flight.

The airship thus established a new record for eastward flight by a dirigible across the Atlantic. The British dirigible R-34 in 1919, made the only previous eastward flight from Roosevelt Field to England in 75 hours.

It was revealed that the Zeppelin encountered heavy storms while flying over central France forcing Dr. Eckener to alter his course considerably, missing Paris. The speed also was reduced to less than 50 miles an hour.

With the approach of the dirigible the population of the town, swelled many times its normal size, was aroused by volleys of saluting shots. The people rushed pell-mell to the aerodrome, where the crews of the Zeppelin works were already assembled at the hangar. It was raining but there was no wind.

The airship, after allowing the cheering thousands a brief glimpse of her great form, rapidly passed out of sight and then reappeared a little later over Lake Constance. Throughout the town the church bells were ringing frantically and a cannonade of saluting shots was being fired constantly. Numerous searchlights played upon the silvery sides of the dirigible as it passed over the town.

IMPORTANT ANNOUNCEMENT

Dr. Henry Marshall Tory president of the national research council of Canada, who forecasts that at a gathering of bacteriologists in Ottawa, in the early winter an important announcement will be made concerning mankind's age-long fight against tuberculosis in animals, one of the deadliest scourges known and one generally conceded the cause of a great deal of tuberculosis in human beings.

Newfoundland Elections

Latest Returns Show That Government Has Been Defeated

St. John's, Nfd.—The opposition party of Sir Richard Squires overthrew the government of Hon. F. C. Alderdice in the general elections it became known when the results from twenty-nine of the thirty-seven districts had been received.

The election of the opposition candidates in St. John's City West and one opposition member in Burin West was conceded in the latest returns, while two seats in St. John's City East, and one in Burin East, were conceded to the government.

The opposition party has now secured twenty-three of a total of forty seats and nine government supporters have been returned.

Both Sir Richard Squires and Hon. F. C. Alderdice were elected. Sir Richard ran in Humber while Premier Alderdice contested St. John's City East.

Contractors Supply Stilts For Workmen

Innovation Of Toronto Firm To Eliminate Costly Scaffolding

Toronto. As an innovation in the building trade, a firm of Toronto contractors provided six-foot stilts for their workmen. The plan was to do away with costly scaffolding.

Surprised and indignant at the plan, two workmen refused to don the stilts and reported to officials of the United Brotherhood of Carpenters and Joiners that they lost their jobs as a result.

William Varley, secretary of the Building Trades Council, is investigating to discover whether the use of stilts would be a contravention of city or provincial statutes.

A CASTLE IN IRELAND

Princess Mary and Lord Lascelles are shown above at the doorway of their Portumna castle, in Ireland, where they were accorded a royal welcome upon their recent visit. Shortly before their arrival the stables of the castle were set afire, apparently by a fanatic, but Lord Lascelles requested that no punishment be meted out to the culprit.

Saskatchewan Leads In Grain Shipments

Peak Of Movement Passed In First Three Months Of Crop Year

Winnipeg.—"Fully 65 per cent. of the crop has been marketed since estimates have run around 530,000,000 bushels and the railways have received [illegible]" is the report of J. G. Sutherland, superintendent of transportation for the Canadian Pacific.

"Saskatchewan is in the lead with 94,376,165 bushels dumped into elevator lines on Canadian Pacific lines, 79,073,723 bushels being wheat.

Manitoba has 35,144,223 bushels of all grains, including 19,530,015 bushels of [illegible].

Alberta's marketings to date are 56,958,3[illegible] bushels all grains, 53,192,509 of which are wheat.

With such figures as proof, Mr. Sutherland holds the opinion that the peak of the movement has been passed in these first three months of the crop year.

Stricken With Bovine Disease

Trouble Common In Cattle Now Attacks Human Beings

Chatham, Ont. That a Dover Township man had been infected with baccillus abortus, a disease common in cattle but previously unknown to human beings, was made known at a meeting of the Kent County Medical Association here.

The case was discovered by Dr. James Moriarity of this city. His patient was a young man of 23, who went to him in August for treatment. He had all the symptoms of typhoid fever but various blood tests were negative.

During September and the early part of October, the man's temperature varied from 99 to 103. He grew emaciated and suffered loss of appetite, headaches, pains in the joints and frequent nose-bleeds. Finally a blood test revealed the disease.

WILL GIVE AID TO SETTLERS FROM THE BRITISH ISLES

Ottawa. — Important announcements in regard to an increase in British assisted immigration are almost certain to follow the tour of Hon. Robert Forke, Minister of Immigration, through the western provinces.

Mr. Forke has just returned and in the course of this trip interviewed the Premiers of Manitoba, Saskatchewan, Alberta and British Columbia in their respective capitals. He went thoroughly into the various policies now being advanced by his department singly and in co-operation with the British Government, and, wherever possible, invited their active assistance.

The kind of assistance which the provinces may give is various. They may assist the Federal department in checking up the bona fides of persons within their boundaries who apply to Ottawa for aid in bringing their families out from Britain, or they may enter actively into a scheme of settlement and bear a part of the financial burden.

Mr. Forke had little to say of his trip, except that all the Premiers had been much interested in immigration problems and had promised to give the most careful consideration to the many suggestions which he had made.

There is ample time for such consideration since all the settlement work is done in the spring and early summer months, and, provided the Federal Department knows how much assistance it may expect from a province by the new year, the task of arranging for the movement of the settlers can be performed.

It would appear that the provinces were more interested in boy settlement than in the policies for older persons, and it is in this field that important announcements may be made.

Mr. Forke it is understood, put forward a proposal whereby all boys brought out and placed on provincial training farms should be assisted to start up as farmers, provided they could save $500 out of their earnings. In this event the British and Canadian governments would put up $2,250, and would ask the provinces to advance $250 which, coupled with the boys' savings, would make a fund of $3,000 which is considered to be ample to begin farming.

It is probable that the response of the provinces to this scheme will be enthusiastic and that a very big movement of boys will be inaugurated next year.

BRITISH LABOR MAKES GAINS IN CIVIC ELECTIONS

London, Eng.—Labor leaders are elated over gains made in the municipal elections in the cities and towns throughout England. Incomplete returns indicate that Labor candidates have made a net gain of 101 seats on municipal councils outside of London while their principal opponents registered a loss of 71, and independents a loss of 21.

Results of the elections created exceptional interest this year, some leaders professing to believe that the vote would indicate in some degree what could be expected at the general elections throughout the country next year.

Labor gains, partial returns indicated, were made largely at the expense of Conservatives. At Twickenham the Labor party gained three seats from Conservatives. Twickenham is the parliamentary constituency of Right Hon. William Joynson-Hicks, home secretary.

A feature of the elections in London was the candidature of 450 women as compared with 343 who stood for office in 1925.

The 1925 elections resulted in the return of 140 of the women candidates. While returns from the elections are far from complete it is known that a number of the women headed the polls in their districts. Seven women have been elected to the municipal council of the borough of Poplar. The 21-year-old daughter of the mayor of Fulham was elected.

Unemployed men ran for office in a number of the boroughs and this type of candidate fared worst at Southwark and Shoreditch. Three Communist candidates at Deptford were badly beaten. The mayor of Bermondsey was defeated in his own division.

Armistice Day Letters

Two Million Letters Sent To America From France

La Havre, France.—Two million letters, the largest mailing ever sent from France, have started to America on the French steamer Rochambeau. They are timed for delivery to American women about Armistice Day.

These letters, although advertising matter, have been turned to propaganda uses. They have been addressed by hand by French war widows and are sealed. The idea is that American women getting a letter from France on Armistice Day will think of the country where many sent their sons or husbands to war.

Held Lucky Ticket

Quebec Bank Clerk Wins $33,000 On Handicap

Quebec.—Fred G. Moore, 18, a clerk in the employ of the Imperial Bank here, won the first prize of the Army and Navy Veterans' pool on the Cambridgeshire Handicap. His prize will amount to about $33,000. He drew Palais Royal II., winner of the race.

Fred Graham, Pontypool, Ont., who drew Baytown in the pool, will receive about $11,000 as second prize.

E. A. McLatchey, New Glasgow, N.S., holds the ticket on Insight II., placing third. McLatchey will get $6,000, the amount of the third prize.

Receives Death Sentence

William Hugh Megill To Be Hanged For the Murder Of Anna Goff

Shaunavon, Sask. William Hugh Megill will be hanged on February 1 for the murder of Anna Goff. A King's Bench court jury found Megill guilty of slaying the 10-year-old orphan girl. The crime took place last June, in the Eastend District where Megill worked as a farm hand. No hope of mercy for the condemned man was held out by Mr. Justice H. V. Bigelow.

Militia Officers Committed

Hamilton, Ont. Three officers of the Third Canadian Machine Gun Battalion, one of whom is alleged to have drawn his sword on a police officer, were committed for trial by Magistrate Jelfs on charges of assaulting two police officers who arrested them at the Thistle Club.

Heavy Mail By Zeppelin

Washington. The Graf Zeppelin carried 101,683 pieces of mail back to Germany, for which the German postal administration will be credited with $73,713 by the United States postal service. The mail, weighing about one ton, consisted of 49,745 letters and 51,938 postcards.

TOFIELD MEN'S CURLING CLUB HOLD ANNUAL MEETING

The annual meeting of the Tofield Men's Curling Club was held on Wednesday night, there being a large and enthusiastic number rod curlers present.

The meeting was called to order by President Clatterbow who occupied the chair throughout the evening.

The Secretary, W. Chapman, read the minutes of the last annual meeting.

The choosing of skips then occupied the attention of the meeting the following being nominated and elected.

C. Hobson, W. Chapman, F. Ball, John Lee, J. B. Warner, Geo. McLaughlin, Dr. McClurg, Mr. Corp, M. C. Hammond, A. A. Beirnes, J. G. Lobb, A. J. H. McCauley, Dr. McClurg, Mr. Craig, Dr. Morrison, W. C. Swift, J. G. Letourneau, J. Carver.

The meeting then discussed at some length the question of housekeeping players, but when it was put to the vote it was derided by by a vote of 13—10 not to use the housekeeping system.

A communication was read from the ladies curling club requesting a amount to be paid by them and it was decided to set the rate at $2.00 per member. A cupboard will also be built in the kitchen.

The annual banquet dates were set for January 23—24—25.

The officers of the association are as follows

Hon. President, C. Gallenger; Pres. A. B. Clatterbuck; 1st Vice-Pres., Dr. Law 2nd Vice-Pres., H. T. Ward; Sec., W. Chapman.

Ice Committee H. C. Hammond, John Chapman.

Draw Committee:: John Lee and W. Chapman.

Chrysler Plymouth Cars
MECHANICAL EXCELLENCE THAT GOES FAR BEYOND ACCEPTED STANDARDS

In new and original engineering features, and in its construction all the way through, the new Plymouth goes so far beyond the accepted standards that it is a revelation even to mechanical experts. Chief among the new developments is the latest and greatest product of the Chrysler engineering staff —the new "Silver Dome" high compression engine. Through the perfection of this great motor the advantages of high compression—greater power, greater climbing ability, greater speed and greater acceleration—can be obtained through the use of the ordinary gasolenie.

The latest in millinery creations can be seen and procured at Lucille's Beauty Parlor. Gold lace hats, and a number of nice felts are on display Prices are reasonable.

INTERESTING DEBATE

At the Tofield Young People's meeting of Tuesday of last week, a debate on the following question was conducted. Resolved: That Canada owes more to cooperation with United States in the development and construction of the Great Lakes—St. Lawrence ship canal.

For the affirmative there were: Mr Sandy and Mr. Hill.

For the negative there were: Bert Swift and Jack Cushman.

The judges were Mrs. McCauley Rev. Gordon and W. Worton.

Mr. Lloyd Sandy commenced the debate by emphasizing the importance of water routes for the carrying of the Canadian merchandise. He cited examples after example whereby the water routes of the world had made cities and even nations prosperous. It was vitally essential, he claimed, for the west to be brought closer to water transport. There was a great saving all round as between water transport and land transport. Responsible engineers had declared the scheme feasible and practical, and the bringing of ocean going vessels to the head of the Great Lakes would prove of such benefit to every farmer in Western Canada. He cited figures to show that the difference in freight rates was considerable He spoke with fervor and received much applause.

Bert Swift for the negative, in a quiet, but nevertheless convincing manner proceeded to knock down the previous speakers arguments one by one. The war time was too great. It was to the advantage of the United States rather than to the advantage of Canada that this Canal be constructed. While they of course, paid a share of the cost, they would receive a greater share of the benefit. Moreover, in this northern climate the canal would only be open half the year and the uncertainty of boats being caught half way was too great to call it a practical venture. There were alternative plans, less expensive and of equal benefit to Canada, and now the western farmer was not content so much with the eastern route as with the western one

Mr. Hill attacked the argument of the negative that it was too costly by claiming the revenue derived from the sale of electric power would pay the cost of construction, stating that at least one offer to pay for the canal had been made providing complete control. This view rewarded the party making the offer

Jack Cushman laid special emphasis on the fact that the United States would benefit, not Canada, claiming at least two alternative routes to the sea were available There was the Hudson's Bay route and one other suggested canal. He attacked the previous speaker, saying that the electric power generated in the east now was ample for the needs of the people for many years to come.

All speakers put up good arguments, spoke for 20 minutes and received hearty applause.

The judges awarded the decision to the affirmative.

COMMUNICATION

Dear Sir:

I should esteem it a favor if you would allow me a little of your space to state a few facts regarding the straightening of road diversions.

You published a letter last week from "A Ratepayer" dealing with one particular instance of this nature, and the tone of the letter would indicate that the particular diversion had been straightened for one person's particular benefit. One would also assume that it was an unusual mishap for the council to approve of the straightening of a diversion.

I would like to point out that it is quite a customary thing for the council to approve of those things when it is considered to be in the interests of the people living in that portion of the community where the road diversion happens to be. Within the past two or three years diversions occurring on the following lines have been brought before the council and the straightening approved:—

Between Sections 23 and 24, Township 51, Range 19, Dlv. 5.
Between Sections 34 and 35, Township 51, Range 19, Div. 5.
Between Sections Road 2, Township 52, Range 19, Div. 5.
Between Sections Road 3, Township 51, Range 19, Div. 5.
Through Section 5, S. E. 1, Township 51, Range 20, Div. 5.
On S. W. 5, Township 51, Range 19, Div. 5.
Through N. W. 8, Township 51, Range 19, Div. 5.
Between Sections 9 and 10, Township 49, Range 21, Div. 5.
Between Sections 11 and 14, Township 49, Range 21, Div. 5.

In addition to the above the government road engineer approved recently of the straightening of a diversion on the west side of 20-49-20-4.

This letter is written as the writer considers that a proper understanding of these matters is of public interest to the ratepayers of the rural municipality, and is designed to show that such matters that are complained of by "A Ratepayer", are of fairly common occurrence, and no doubt before, are approved of by the council if it is considered to be in the interests of the community

Thanking you for your valuable space.

Yours truly,
A. J. Williams

On Monday night of the week, the Musical Eckarts staged a performance here. The company has been travelling the last few years to many points, and there are few western towns, at some time or other, that have not seen them. Their Swiss bell ringing is as popular as ever, though there is in the small end of the performance. The Dorcen sisters gave some good exhibitions of step and fancy dancing, while one of the Eckart boys rendered some good comedy work as well as playing on half a dozen musical instruments. Altogether, the show was well liked and was well remunerated upon

On Tuesday, at the Tofield Young People's Meeting, Professor Corbett, of the University of Alberta, delivered a lecture on French Canadian life and literature. There was a fair crowd present, and the lecture was very much enjoyed. Lantern slides were shown.

LAKESHORE

Mr. Hubert Bethel has been ill with an attack of the flu, but is improving at time of writing.

Mr and Mrs. H. Eaton are driving a new Whippet car. They, together with Mr and Mrs. Owen Eaton and R. Campbell motored to Lamont on Sunday.

Ben Phillips left last week for a moose hunt in the north country. He was accompanied by Dr. McCord of Edmonton.

Mrs. Warner attended the house at the Appleby home on Friday afternoon of last week.

Mr. T. E. Soule shipped several head of cattle on Tuesday.

Among the teachers home for Thanksgiving were Mrs. A. Roberge, Mildred Booth and Myrtle Bethel.

Miss Mildred Anderson left for her home at Delia on Tuesday morning after spending the summer with Mrs. John Wood.

The program committee of the U. F. A. met at the home of T. E. Murray on Friday evening of last week. The committee is composed of T. E. Murray, T. E. Soule and Johnson Ferguson. The members were accompanied by their wives and a pleasant social evening was enjoyed by the ladies while the men arranged the U. F. A. program for the winter months.

Mrs. Murray served a tempting lunch at the close of the evening.

Mrs. John Wood and daughter spent Thanksgiving at the Bethel home.

Mrs. T. E. Soule entertained a number of young people at court whist on Saturday evening. We understand that W. E. Soule and Ellen Walker won first prizes and Mildred Booth and E. Roberge the consolations. A delicious lunch was served after the cards.

Friends of Chris Moss will be sorry to hear that his health is not improved and he is entering a hospital in Edmonton the week for an operation.

KINGMAN

Mrs. G. Welch, Mrs. T. Grahn and Mrs. W. Marchen visited with Mrs. McIntosh on Wednesday afternoon.

C. Calder and O. Bray were business visitors in Camrose on Wednesday.

Mr. Mah Hing is spending a couple of weeks in Edmonton.

Mr. and Mrs. C. R. Rychert spent a few days with relatives in Buchanan last week.

C. Calder is spending a few days in Calgary

P. Rodmersky was a business visitor in Bawtf on Friday

Miss Alice Stevenson who teaches school in Hillcrest spent the week-end with her mother, Mrs. P. Simonson

Mrs. D Scrimstead and daughter Dorothy, of Edmonton visited with Mr. Ray McIvish on Friday

T. J. Rogness and P. Paulson spent the week end in Edmonton.

Miss Ada Renville of Wainwright visited with Mr. and Mrs. F. Erickson over the week end.

Mr. and Mrs. P. Scrimstead and family of Camrose were the guests of Mr. and Mrs. Ray McIvish on Sunday.

Mr. and Mrs. O Olafson, Mr. P. Krogness and Victor Paulson of Bawtf spent Sunday with Mr. and Mrs. E. Erickson.

John Erickson of Camrose spent Thanksgiving at his home here.

Miss Lillian Lundberg visited in Edmonton for a few days.

Mrs. G. Welch and daughter Evelyn had some optometrist work done in Edmonton on Friday

Mrs. F. Erickson, Mrs. P. Simonson, Mabel and Henry motored to Tofield on Friday

CARD OF THANKS

The wife and family of the late John Robinson wish to Thank their many friends for their help and kindness during the illness of a loving husband and father, as well as for their kindly assistance and thoughtful expressions of sympathy extended during their recent and bereavement. Also for the beautiful flowers.

Mrs. Elizabeth Robinson and family

RETURNABOUT

The weather remains favorable and fall work is still in progress

Mr. A. McMullen, sons Paul and Harold and daughter Lorraine returned on Tuesday from their hunting trip, they had very good luck, bringing home four moose and two deers.

Mrs. McCowan and Miss Mabel Lawson attended the teachers' convention held at Camrose on Thursday and Friday of last week.

Mr. and Mrs. W. A. Mitchell and family spent Monday evening of last week at the Scullin home

Miss Mamie Lee spent the Thanksgiving holidays at the home of her parents, Mr. and Mrs. Peter Lee

Mr. and Mrs. James and son Fred, were passengers to Edson a week ago to visit Mr. Williams' brother, who is keeping the hotel at that place. Mr. Williams returned home on Saturday, Fred remained to work for his uncle

Mr. and Mrs. A. McMullen, Miss Fawcett, Messrs. A. Shultz and Harold McMullen were guests of Mr and Mrs. G. W. Sproule on Monday evening

Mr. and Mrs. C. Nachman and baby were guests of Mr. and Mrs. W. A. Mitchell on Sunday evening.

Mr. W. E. Mitchell is installing a furnace in his home. Milton Ray has been helping with the work

Miss Lillian Carlisle, and brothers Earl and Glen visited their friend, Miss Edith Riley at her home on Sunday evening.

Mr and Mrs. Beatrice and the Kendall family visited at the Frank Hull home on Sunday

Mr. Jim McIlwrit, who is manager of a coal mine two hundred miles from Edmonton, came down on Saturday evening on a business trip, returning Monday evening.

Mrs. Ross of Edmonton is visiting her daughter, Mrs. Campbell, who resides on the Hamma farm.

Mrs. Milton Ray and children spent Friday at the home of Mrs. Ray's parents, Mr. and Mrs. W. E. Mitchell.

Mr and Mrs. Herman Lawson motored to the city on Tuesday, returning home in the evening

Miss Annie Bruha spent the week end at the home of her sister, Mrs Henry McGinnis

The Thanksgiving "At Home" by the ladies of the U. F. A. at the home of Mr. and Mrs. Appleby on Friday night was a huge success both socially and financially. A large crowd was present both afternoon and evening. A social time was had in the evening in playing music and song contest Mr. H. Francis and Harold McMullen each took prize. We appreciated the vocal selections by Mr Gordon Mc. Mrs. Wood and Mrs. Jones and Mrs. Farrow accompanied by Mr McCauley at the Piano and wish to thank Mr. Hall for support on making the evening a success, also we wish to thank the people for their part of the program and especially wish to thank Mr and Mrs Appleby for their kind hospitality and for the use of the home and all others for their donations. $14.60 was added to the church fund.

THE RED CROSS NEED

It is the proud boast of the Red Cross Society that it is a purely voluntary organization without any political, racial or religious motive to influence. Its members are men, women, children of every village, city and countryside who have one grand creed to which they give their loyal allegiance

This is the world-wide belief that wherever suffering and illhealth be found, from no matter whatever there is the burden duty of Red Cross collectively or individually to alleviate it

The sympathetic tribute fails to not always appear in a world that harrows us, to proceed with its own selfish ends frequently passes by on the other side and leaves the sufferer to his misery

Not so the Red Cross Society. There's is the order of the kind deed the pledge of the friendly hand Not enough to stop and see, the Red Cross of today, like the Good Samaritan of old, has work to do where suffering is concerned. The axe is the immortal tale of the way to Jer-

Cuticura Treatment For Dandruff

Let the Ointment remain on for some time, over night if convenient. Then shampoo with a suds of Cuticura Soap and warm water. (Do not rub Soap on the hair.) Rinse thoroughly. A light application of Cuticura Ointment to the scalp between shampoos is often beneficial.

Cuticura Shaving Stick 25c.

WORLD HAPPENINGS BRIEFLY TOLD

China has invited the Royal Netherlands Indies air lines to organize a flight to Java and China. The flight is expected to take place early in 1929.

The Dairy Federal Department of Agriculture reports that for the eight months ending August 31, Canada exported milk and milk products to the value of $16,462,518.

A chair and couch, once the property of Sir John A. Macdonald, Canada's confederation premier, were sold for $3.50 each in a Toronto auction room.

The British Columbia government exhibit for the Royal Winter Fair, consisting of fruits, vegetables, grains, grass seeds and other farm products weighed nearly 14 tons.

Lord Byng, as executor, gets £1,000 under the will of Lady Byng's uncle, Pandeli Ralli, while Lady Byng herself gets the bulk of the fortune of £557,000.

As another step towards augmenting its new western service, the Western Canada Airway Ltd. have placed two monoplanes in operation on its prairie passenger and express line.

The Japanese war office has asked for an appropriation of $2,750,000, spread over a three-year period, for use in perfecting air defenses at Kyoto, Osaka and Northern Kyushu.

The post of American ambassador to England may be offered to Myron T. Herrick, present United States ambassador to France, according to an unconfirmed report circulated in Paris.

The treasury board and cabinet council having approved the absorption of the Standard Bank of Canada by the Canadian Bank of Commerce, on recommendation of the minister of finance, the Standard Bank has gone out of existence.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother Graves' Worm Exterminator.

Furnished Some News

"Look, Tita; something about me in the paper."

"Really? What does it say?"

"It says, 'In the month of July the trolley company carried 15,736,536 passengers'—well, I was one of them, wasn't I?"

Professor A (in high-powered car careering madly round a bend)—"We've got it at last."

Professor B—"G-g-got w-w-what?"

Professor A—"Perpetual motion. I c-can't stop this car."

Only One Chance in Thirty-Six Billion

Farmer in Manitoba Loads Wheat Twice in Same Car

There is one chance in thirty-six billion of it happening again.

At the town of Argue, Manitoba, on September 20 a farmer named C. R. Sommerville loaded part of his crop of Number 3 Durum into Canadian National Car No. 423071. The car went to the head of the lakes, was emptied and started west again. On October 1, eleven days later, it left the same station, Argue, loaded with grain from the fields of the same farmer, C. R. Somerville. This time the wheat was Number 4 Durum, but the car was the same and the farmer was the same.

T. P. White, Canadian National Railways' superintendent of car service, thinks the incident is a reflection on the smoothness with which the great machine of grain transportation, handling millions of bushels, is running. But he realizes that it will never happen again in his lifetime.

From statistics as to the number of box cars and shipping stations in the west, and taking an average of 75 farmers who might possibly load at a point like Argue, it has been calculated that there is one chance in thirty-six billion of a car going back to the same shipper at the same point.

CHAPTER VI.—Continued.

"Thank you," the older man replied gravely. "Our population is made up of people from all parts of the world as our native-born are few. A cosmopolite is more or less indifferent to the future of the country in which he resides. 'Get the money' is unfortunately the slogan of many of our business men, who make no attempt to build for the future. Until such time as there is ingrained in the hearts of our citizens a true love for our Province, until such time as our cities and towns forget petty bickerings and jealousies and work together and harmoniously, then—and only then—will British Columbia become what Nature intended, the crowning jewel of the British Empire."

Janet's guests arrived in groups of two and three until about twenty of Vancouver's younger set were scattered about the large rooms. In introducing Donald to her friends Janet felt a warm glow of satisfaction as she saw the many glances of keen interest directed toward her stranger guest.

A slender girl with elaborately coiffed golden hair, looking like a white butterfly, fluttered to Janet's side and shook a reproving finger in her face. "Fess up now, Janet," she pouted; "how long have you been hiding this handsome man? Who is this Prince Charming?"

"Curiosity killed the cat," was Janet's evasive reply.

Donald had no penchant for social functions, but this lively party was a grateful respite from a whole winter of lonely evenings, and he entered into the spirit of the occasion...

...of the sea. "All join in," she called merrily over her shoulder.

After Janet's other guests had departed Donald, Douglas and Janet sat for an hour chatting by the large fireplace.

"May I go with you as far as Squamish tomorrow?" asked Janet.

"Certainly, Sis."

"And when the railroad is through I will visit you," she added.

Douglas looked at her curiously. Janet abhorred roughing it. Riding around Stanely Park and an occasional game of tennis comprised the extent of her outdoor activities. Douglas glanced at the clock and came quickly to his feet. "I'd better hustle you home, Donald," he said, "as we have to be up early."

The tinted shade of the hall light lent a soft radiance to the dark beauty of Janet's face and gave to her eyes a deep and languorous glow.

"I have enjoyed every moment. Thank you so much," Donald said earnestly.

"I'm glad," she answered in a quiet voice.

He took her hand and held it in a strong pressure. "I'll see you in the morning?"

"Yes," she murmured softly.

The door closed gently and Janet heard him run down the steps to the whirring motor. She stood immovable until the sound of the car died in the distance, then walked meditatively to the fireplace, sank in a big chair and stared dreamily into the dying embers. Idly she reached for the evening paper and spread it on her knees.

"Such dignity and poise! He is wonderful!" she whispered aloud. "I must ask Douglas more about him."

She lowered her eyes to the paper, then came slowly to her feet, a look of blank amazement on her face. Smiling up at her was the face of the man of whom she had been dreaming.

"CANADIAN CHAMPION"

ARMISTICE DAY

NEVER IN all the world's history has the anniversary of the closing date of a war been commemorated as that of the Great War. Heretofore, celebrations were joyous, yes boisterous. Bursting with pride and swaggering with arrogance, victorious nations in the past have celebrated victories with great aplomb and much ado. Martial bands, playing patriotic airs; huge processions afire with patriotism and revelries extending far into the night was the popular way of celebrating victories.

Armistice day carries with it a tone of sober, almost sombre thought. The greatest thing connected with it, is not the exultant cry of multitudes, but the reverent two minutes of silence; a silence so profound that among tens of thousands in the heart of the empire, writers say, "it seemed as if the heart of the world had stopped beating.

Armistice day is not a day for the glorification of war but a day for the condemnation of it. The unknown soldiers lying in the capitals of the world symbolic of nations, speak to the hearts of men as great heroes never spoke, causing men, everywhere, to remember the cost and discount the gain. All honor to those who fought and fell! all honor to those who fought and survived! But if the world learned anything from the years of war, it is that in war, glory sacrifice and suffering are inseparable and oftimes the glory falls away short of being a recompense for the suffering and sacrifice.

The following, in a recent essay on war by Emil Ludwig, makes interesting reading:

"Since physics usurps the role of the "human instrument of destiny"; since chemistry occupies the place of an attack, and statistics that of a call to arms, since the tension of high-voltage wires has replaced moral energy, and rigid discipline the spirit of voluntary sacrifice; since war, which was first a duel, then a knightly game, and then a profession, has become the fate of whole peoples, bringing destruction to millions remote from the battle area through bombs, gas or hunger; since all this has happened, the idea of heroic death has become a lie and every exhortation to win martial laurels a crime."

POWER

MR. MATHESON has appeared before different audiences in his constituency numerous times; probably just at the conclusion of a campaign he thinks innumerable times. But at Tofield at least, he has never appeared to better advantage than he did on Saturday night last when he spoke to a small gathering on power, the school question and the enlarging of municipalities. Particularly with the subject of power was he lucid, plain spoken and if you like, courageous. There has been quite a lot of reading matter appearing in the press of late regarding the development of hydro power. And perhaps unconsciously, quite a large number of people have come to believe that it is only a matter of a short time before there will be a net work of wires over which current will be served to at least as many as now have telephones. Whether this is practical or feasible, the average man does not know and rarely ever stops to find out. The advantages of electricity around the home and farm buildings are so obvious that if it can be supplied from an outside source and had by the mere turning of a button, the average man, and woman too, is ready to shout hurrah whenever it is mentioned. The Alberta government have been requested by different people to develop this source of power and that source of power and it seems to us that if a member or candidate wished to "kid" his constituents along, here was a splendid subject to work with. Vague promises on top of popular desires and conception, would have, without doubt brought much applause, and the speaker would have sold himself as a real good fellow handsomely. Instead, Mr Matheson told the naked truth. That as far as the big majority of Alberta farms were concerned, hydro electric power was still afar off. A few favored places situated along main highways might be able to procure electric light and power during the next few years but for the rank and file of Alberta farmers, as far as can be seen at present, electric power from outside sources is a remote possibility. At present, apart from the actual power station costs, the capital and maintenance costs for rural lines, with the number of users that can be expected per mile, makes the cost of electric current to the farmer prohibitive.

WONDEP WEATHER

IT IS rarely that we get such a long uninterrupted spell of fine weather as we have been enjoying for some time now. Almost from the beginning of harvest has the weather kept fine and it is many a year since such a lot of fall work was done.

Reports from England during the summer commented upon the exceptionally fine weather they were having and as the summer came to an end, writers gave it the name of "the wonder summer."

We are surely entitled to call the fall of 1928 the wonder fall. Moreover, Alberta having had exceptionally fine falls before, it would be interesting to know if they in anywafy co-incided with good summers in England. If they did, an English summer might be used as a gauge of the fall and winter to come in Alberta.

WANTED Ten Cows or Heifers to milk on shares from now for any length of time up to April 1st. Any number up to 10 will be cared for. Anyone intending to take a trip will find this a convenient arrangement. Please communicate with Albert Voegtlin, Round Hill, Alberta. 43p.

BABY CHICKS— Pure-Bred-to-Lay that Lay-An-Gro from Tested, Trapnested and Inspected Flocks. White Leghorns, Barred Rocks, Reds Wyandottes, White Rocks, Anconas, Minorcas, Orpingtons. PARLIAMENT OF BRITAIN OPENED WITH CEREMONY

London, Eng. — Parliament was formally opened by the king with all the colorful ceremony surrounding the occasion. The session is the last before the next general election. In the speech from the throne, His Majesty expressed gratification at the signing of the anti-war pact, outlined a scheme for relieving agriculture, industry and railways of local taxes, a scheme for enabling railways to reduce charges on basic traffic and a plan to alleviate mining area unemployment by training 30,000 miners a year for agricultural pursuits in the Dominion.

The subsequent debate on the address in reply to the speech was featured by the attack of Rt. Hon. Ramsay MacDonald, Labor leader, on the Anglo-French proposals for further naval limitation. He termed it an "agreement not to limit armaments" and pressed Premier Baldwin for a full government statement on the present status of the agreement. The premier, however, pointed out the Labor party was to move an amendment censuring the government on account of the pact and therefore any government statement should be reserved for the debate on this amendment.

In the course of his speech, Mr. MacDonald mentioned the movement of miners to the Canadian harvest fields last August, saying he hoped future migration schemes would indicate more forethought than this one, whose workings he had personally seen in Canada.

"You didn't say that when you were over there," a Conservative member remarked.

Smith Will Retire From Public Life

Says Quarter Century Of It Has Been Enough

New York.—Governor Smith announces that he never again expected to run for public office as he had more than a quarter of a century in public life and that was enough.

The defeated Democratic presidential nominee expressed this view at a conference with press correspondents.

"I certainly do not expect to run for public office," he said, in reply to a question. "I have been in public life for a quarter of a century and I have had all I can stand of it. As far as running for office again, that is finished."

The governor said he had no regrets and nothing but pleasant memories over his unsuccessful campaign.

"The American people have rendered their decision," he said. "I am a Democrat and I firmly believe in the rule of the majority."

Storm Sweeps Alaska City

Thirty Thousand Dollar Property Damage Reported At Cordova

Cordova, Alaska.—Property damage estimated at $30,000 was counted following the worst storm in the history of the city. The greater part of the damage was to the new school building. The roof was blown off, and torrential rains poured into the unprotected building, ruining every room. Flying wreckage from the building broke hundreds of windows.

The wind tore telephone poles from the ground and took the front off a hotel building.

Loose Valuable Horses

Toronto.—Three champion hunters and five young horses which were about to be trained for the saddle, were suffocated when a fire broke out in a stable here. Five of the horses belonged to D. McGregor, well-known Toronto horseman. The champions were Fairplay, Aristocrat, and Slipper. The animals were valued at approximately $10,000.

Air Mail Service Profitable

Montreal. Justification for airmail passenger service between Montreal and New York via Albany, is found [illegible] the month 25 passengers, 10,8?? pounds of mail, representing 34,200 pieces, were carried, and a total of 31,877 miles flown. The gross receipts approximated $17,000.

Will Receive Reward

Montreal.—To anyone who furnished information aiding the police to arrest and convict a hit-and-run motorist, the province of Quebec will pay a reward of $100.

N. W. U. 1750

Make Arrangements For Important Conference

Agricultural Leaders and Canadian Chamber Of Commerce To Meet In Toronto

Montreal.—The conference which agriculture leaders with the Canadian Chamber of Commerce is arranging for November 27, in Toronto, promises to be an event of economic significance and a forward move in the effort which the chamber is making toward the co-ordination of agriculture and the other business interests of Canada, said Dr. John W. Ross, chairman of the executive of the Canadian Chamber, here.

The invitations which have been issued to each of the heads of the provincial departments of agriculture and to the department of agriculture of Ottawa to participate in the round-table conference have in each case been accepted, said Dr. Ross.

Although no set speeches or papers were to be prepared, the agenda would include a frank and friendly discussion at the conference itself on such subjects as the service which could be rendered the agriculturist through showing him the value of reducing production costs, more efficient farm management, better marketing methods, wider markets and reforestation, and a setting-up of a national agricultural committee of the chamber to advance agriculture in a business-like way.

Navigation Through Hudson Straits Closed

Dispatch From Fort Churchill Indicates Harbor Is Frozen Over

Ottawa.—Navigation through the Hudson Straits is closed for the winter, it was learned at the Department of Marine by wireless dispatch from Fort Churchill, which indicates that the harbor is frozen over and there is ice as far as the eye can reach. As a result the ice breaker Montcalm has been ordered to return to Quebec City from Port Burwell.

For several months the Montcalm has been carrying on ice observations in the North and is the last ship to leave Hudson's Bay.

There is no ice in the straits themselves, it was stated. With the closing up of the harbor at Churchill, however, the work of the Montcalm is completed.

Several men are remaining at the various radio stations throughout the straits and will continue sending reports on ice and fog conditions.

Prosperous Canada

Hon. Peter Heenan Sees Evidence Of Prosperity Everywhere

Toronto.—With evidence of prosperity everywhere apparent Canada is just coming into her own, declared Hon. Peter Heenan, minister of labor, at a meeting here.

Mr. Heenan discussed briefly the question of immigration and old age pensions. The former subject he stressed two considerations as of vital importance in any policy which might be framed, namely to give preference to Britishers and to give only truthful information to those intending to settle here.

The country could have no worse advertisement than to have immigrants write back "home" and say that conditions have been misrepresented to them, he said.

The minister was high in the praise of old age pensions legislation and declared his intention of speaking "up and down the country" until it had been adopted by every province.

Prevention Of Tuberculosis

Changes Are Foreshadowed In Methods Used To Curb Disease

Toronto. — Various changes of sweeping character in the methods employed to curb tuberculosis throughout Canada are foreshadowed as a result of the study of European methods made by 32 Canadian doctors, including Dr. J. H. Elliott and Dr. Dobbie of Toronto.

One of the possibly outstanding changes will be the development of a Dominion department to have control of tuberculosis prevention work [illegible] ...tably will be legislation providing for substantial grants for the carrying on of the work.

Entire Family Die In Fire

Bridgewater, N.S.—An entire family of five persons was wiped out in a fire at South Conquerall near here. The dead: Albert Nash, his wife, two children, Annie, 14, and Viola, 11, and Eli Nash, brother of Albert. The tragedy was discovered when a neighbor saw smoke arising from the Nash farm.

HERBERT HOOVER IS ELECTED NEW U. S. PRESIDENT

New York. — Republicans have swept the country from coast to coast. They have enveloped the states bordering on the old solid South. They have driven a wedge into the South itself.

Herbert Hoover has been elected to the presidency in one of the most sweeping landslides ever recorded.

By one of those extraordinary ironies of politics, it was Governor Smith's own state of New York which first wrote his doom. On four occasions New York had given Smith the highest office in its gift. To capture New York state and its 45 electoral college votes the Democrats fought bitterly and strenuously.

Hoover might have lost New York state and still won the presidency; Smith had to win New York state if he was to be the next president of the U.S. New York was to be the nucleus of a Democratic raid into the states of New England and the Atlantic seaboard.

New York City gave its plurality to Governor Smith but the upstate Republican vote rolled over it. With 273 districts missing out of 8,367, Hoover was 90,000 ahead.

Democrats, however, found some bright spots in the New York state returns. Franklin D. Roosevelt, who nominated Smith, at Houston, was elected to the governorship over Albert Ottinger by a margin that showed him running well ahead of the Democratic National ticket.

Washington, D.C.—President Coolidge sent congratulations to President-elect Hoover and Vice-president-elect Charles Curtis. His message to Hoover read:

"The success of our party with your election to the presidency and the endorsement of the administration are a great satisfaction to me. With this endorsement I can now retire from office in contentment. I send you my most cordial congratulation on your victory, and to yourself and Mrs. Hoover my best wishes, in which Mrs. Coolidge joins."

Find Oil Shale In North

New Discoveries Are Reported Near Hudson's Bay Junction

The Pas.—Mining men in The Pas district are much interested in reports from Hudson's Bay Junction, Sask., indicating new finds of oil shale 25 miles southeast of that village.

The discoveries have been made in the old Porcupine Hills forest reserve and are close to the Manitoba boundary. Geologists representing a Toronto engineering company have been on the field for some weeks.

Oil shales found in the new area are reported to have a greater potential value than the discoveries made in recent years in The Pas hills north of the junction. Tests made of oil shales west of The Pas have been interesting, but no effort has been made to produce oil in that area.

Many Labor Candidates

London, Eng.—Right Hon. Ramsay MacDonald, leader of the Labor party, has announced that the party had decided to fight every seat where it had local party organizations prepared to run a candidate at the forthcoming general elections. He estimated that the party would have 600 candidates in the field.

FAVORS NORTHERN AERIAL ROUTE

Vilhjalmar Stefansson, the explorer, now touring Canada, who predicts that Canada will be the crossroad of the air between Europe and the United States. He says that if trans-Atlantic fliers desire to avail themselves of the shortest course between Europe and the United States, they must fly across Canada. This, he said, would entail flying over Arctic ice and he declared that the northern route was much to be preferred.

Russia Needs Wheat

Will Soon Be Placing Orders With Canada Is Report

London, Eng.—A possibility of further orders for the Canadian Wheat Pool from the Union of Soviet Republics has been reported by The Morning Post, which says this is the impression of grain brokers on the Baltic Exchange.

According to the newspaper, information secured by brokers in Britain from travellers and sea captains leads them to believe that the situation in Russia is far worse than generally reported and that the Soviet will resume buying wheat from abroad as speedily as possible before ports become frozen.

In this connection it is recalled that Russia bought 200,000 tons of wheat early this year, following which order there came a lull. The object of this buying is now attributed to a desire to force the hands of the rich peasants, who were withholding stocks. In the present case, however, a serious shortage is believed to exist. How far the convictions of these brokers are justified, it is impossible to tell, and so far there has been no definite indication that Russia is going to resume buying. Nevertheless, The Morning Post is apparently convinced.

Manitoba Wheat Pool Meeting

Brandon, Man. — Three hundred delegates together with a large number of visitors attended the fifth annual meeting of the Manitoba Wheat Pool held here under the chairmanship of Colin H. Burnell, president of the Pool. The directors' report was favorable though it was pointed out that the crop had been somewhat poor both in grades and quantity obtained, particularly in the oats.

Would Safeguard Lake Shipping

Ottawa — Representations have been made to the various steamship companies operating in the Great Lakes and to others interested suggesting that "in the interests of safety" the period of navigation in these waters should close either on December 5, or December 7, declares Alex. Johnston, deputy minister of marine and fisheries, here.

PLENTY OF ROOM IN CANADA

For the wives and families back in the homeland it is often a story of patient waiting while the husbands and fathers win a new start in the Canadian west. But the re-union is happy and the future bright when they are once more joined in the new home. Here is a group comprising two families of Swedish colonists, Mrs. Erikksen with her family of ten children and Mrs. Siden with five children, who have just been sent forward by the Canadian National Railways' Colonization Department and the Swedish-American line, to their husbands at Junkins, Alberta, one of whom settled here in 1923 and the other last summer. The statement is made that many more Swedish families of this fine type are expected to follow.

Experimental Coal Shipments

Unable To Give Definite Figures On Transportation Costs Until Next March

Ottawa. — Actual transportation costs of the experimental shipments of Alberta and maritime coal to central Canada came before the board of railway commissioners here. The hearing was adjourned sine die on representations of the Canadian Pacific and Canadian National Railways that definite figures on the cost of these trial movements would not be available until March next.

The sitting was in conformity with orders-in-council passed by the Dominion government last spring authorizing reimbursement from the federal exchequer to the railway companies for any losses entailed in the $6.75 per ton rate from Alberta to Ontario and the one-fifth of a cent per ton mile reduction in the westward haul of maritime coal. The trial movement authorized covers a period of three years.

Alberta Looks Westward

Hope Of People Lies In Development Of Pacific Says Premier

Vancouver.—"Today the face of Alberta is turned Westward instead of Eastward; prior to 1922, Alberta looked down the narrow strip of steel rails that led to Fort William and other Eastern centres. Today Alberta is looking to the Pacific and the hope of the people lies in the development of the Pacific and lies there almost entirely."

This was the statement of Premier J. E. Brownlee, of Alberta, in an address before the Vancouver Canadian Club in which he reviewed the progress of his province in the last twenty years and expressed its aspirations for the future.

Chief Of Staff To Retire

Major-General Thacker Will Retire On Pension At End Of Year

Ottawa. — Major-General H. C. Thacker, chief of the general staff, department of national defence, will retire on pension on January 1, next. The retirement of Major-General Thacker follows completion of thirty-five years in the permanent force. Official announcement to this effect was made by Hon. J. L. Ralston, minister of national defence.

Major-General Thacker will be succeeded as chief of the general staff by Brigadier-General A. G. L. McNaughton, at present district officer commanding military district No. 11 at Victoria, B.C.

Has Indian Ancestors

Next Vice-President Of United States Is Part Indian

New York.—Charles Curtis, next vice-president of the United States, has, through his mother, both French-Canadian and Indian blood.

His mother, Helene Pappan, was the youngest daughter of Louis Pappan, a French-Canadian fur trader who settled among the Indians of the Kansas tribe, and Julie Gonville, who was one-half Indian and a direct descendant of two famous chiefs, White Plume, chief of the Kansas tribe, and Pawhuska, chief of the Osage tribe.

Mr. Curtis is therefore one-eighth Indian.

Labor Meets Reverses

Party Failed To Gain Much Success In Scottish Municipal Elections

Edinburgh. — Labor after widespread victories in the English municipal elections staged a keen fight in the Scottish municipal elections, but failed to gain much success.

In Glasgow Labor made a net gain of one seat. Elections in Edinburgh, Aberdeen, Dundee and Greenock resulted in gains of three seats by the moderates who have majorities in a large number of places.

The moderates also captured four seats, two each from Labor and Communists at Lochgelly in the heart of the Fife coal fields.

Calgary District Income Tax

Ottawa. In the last fiscal year, [illegible] poses, the total payments according to detailed figures just published were $667,086. The salaried classes paid $25?,719, and farmers paid $42,200.

Abandons Irish Channel Swim

Donaghadee, Ireland. — Mercedes Gleitz, London swimmer, failed in her attempt to swim the Irish Channel on account of the rough sea. When forced to abandoned her attempt she had covered 10 of the 22 miles in three and one half hours.

FARMERS MAY DECIDE TO ENTER MILLING BUSINESS

Saskatoon, Sask.—"I think the present grading system is plain, unvarnished robbery," was the answer of George H. Williams, vice-president of the United Farmers of Canada, Saskatchewan section, when asked for his opinion regarding the grading problem.

In the course of the interview Mr. Williams foresaw the day when the farmers, co-operatively could mill their own wheat and thus gain complete control of their produce.

"The grades now current in the country to the farmer are to my mind a fitting climax to that short-sighted campaign which was carried on by certain newspapers during the summer months enlarging upon our crop prospects and sending out crop reports seemingly limited only by imagination, which undoubtedly went a long way toward producing a bearish market," Mr. Williams said.

"The present low grades are just putting a finishing touch to it," he continued, "they are taking out of Western Canada millions of dollars which rightfully should remain with the people of Western Canada."

"Do you think the elimination of mixing at the private terminals will solve the problem?" Mr. Williams was asked.

"That brings us to the question of the commission which has just been appointed," was the answer. "It is a pleasure to notice that both our federal and provincial governments are deeply concerned as to the grade of wheat that the British miller is getting under the present mixing system; and to note also that the Saskatchewan government has appointed a commission to investigate the marketing of wheat, the personnel of which ought to satisfy the farmers of Saskatchewan.

"You have asked me, do I think the elimination of mixing will cure all the grading problems. Very frankly, I do not, and I hardly think anyone expects it to. It will, however, remove one of the outstanding evils of the grading system. But to find a cure we must go considerably further.

"Taking the name of the newly appointed commission as an indication of its scope, I would imagine that its investigation would go considerably further than the mixing of wheat in the terminals. Personally, I am of the opinion that the average farmer is worried far more at present over the grade he is getting for his wheat than he is over the British miller's grade.

"The elimination of mixing would undoubtedly give the miller a fairer standard to purchase by and to a certain extent it would relieve undergrading in that the present mixing system tends to tempt elevator companies to purchase wheat at a low grade in order to make large mixing profits. It certainly will not, however, do away with undergrading completely.

"No system of grading based on the appearance of wheat can result in anything but injustice under certain crop conditions. I find myself this fall in company with thousands of other farmers in just this position. Wheat which yielded well over 30 bushels per acre, weighing over 60 pounds to the bushel, containing some green kernels and a slight amount of frost, grading as number 5—a very low grade and at a very low price.

"Yet, I am convinced from the results of tests made by Dr. Burchard, that the flour milled from this wheat will be sold to the consumers, including myself, as grade one flour. It must be apparent to all that wheat graded on appearance only, is not going to solve the problem confronting the wheat grower of the west even if mixing were eliminated."

Asked what then was his solution of the problem, Mr. Williams replied: "I must confess in my opinion the solution of the grading problem lies in placing the farmer in the position where he can dispense with it entirely. In other words place the farmer in a position where he can control his wheat from the time he harvests it until it reaches the consumer in the form of flour."

"Do you think the pool should go into the milling business," the reporter asked Mr. Williams.

"Eventually I think the pool will have to go into the milling business," he replied.

Keep Highways Open

Montreal. Premier Taschereau has announced the provincial government will make an effort to keep the highways of the province open for automobile traffic throughout the winter.

Chrysler Plymouth Cars

MECHANICAL EXCELLENCE THAT GOES FAR BEYOND ACCEPTED STANDARDS

In new and original engineering features, and in its construction all the way through, the new Plymouth goes so far beyond the accepted standards that it is a revelation even to mechanical experts. Chief among the new developments is the latest and greatest product of the Chrysler engineering staff —the new "Silver Dome" high compression engine. Through this perfection of this great motor the advantages of high compression—greater power, greater climbing ability, greater speed and greater acceleration—can be obtained through the use of the ordinary gasolenes.

Big Purchase Of Lambs

4,000 Wether Lambs Disposed Of By the Knight Sugar Co., Of Raymond

A deal involving $25,000 was put through the other day when the Swift Canadian Co. purchased 4,000 wether lambs from the Knight Sugar Co., at Raymond, Alta. The lambs comprised a choice lot right off the range where feed is excellent—better than ever before. It is generally admitted that livestock will go into winter quarters in much better shape this season than in any previous year.

LAXATIVE FOR BABY THAT "STAYS DOWN"

Baby's tiny system rebels against castor oil and strong purgatives; but here is a medicine that just suits him. And it does the work quickly and so gently that Baby doesn't feel it. Fletcher's Castoria is soothing cross, fretful babies and children to sleep and making the feverish, constipated, upset ones well and happy in millions of homes today. Castoria is purely vegetable, harmless and endorsed by the medical profession. Avoid imitations. The Chas. H. Fletcher signature marks genuine Castoria.

Mulch Paper For Plants

Found Highly Efficient In Increasing Production Of Farm Products

Remarkable success has attended the utilization of mulch paper, recently developed by the International Paper Company which has greatly increased the production of varied farm products, in some cases as high as five hundred per cent. Mulch paper is laid on the ground between the plants, or alternatively, the plants are placed in the soil through the holes made in the paper. It has proven highly efficient in stifling weed growth and preventing rapid evaporation of soil moisture. The dark colour of mulch paper attracts solar heat and increases the temperature of the soil.

BABY'S OWN TABLETS ALWAYS IN THE HOME

Once a mother has used Baby's Own Tablets for her little ones she always keeps a supply on hand, for the first trial convinces her there is nothing to equal them in keeping children well. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach, thus driving out constipation and indigestion, colds and simple fevers and making teething easier. Concerning them, Mrs. Salusti Pelletier, St. Dumas, Que., writes:—"I have used Baby's Own Tablets for the past six years and am never without them in the house. They have always given the greatest satisfaction and I can gladly recommend them to all mothers of little ones." The Tablets are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Recipes For This Week

(By Betty Barclay)

GEORGIA SWEET 'TATERS

- 6 medium sized sweet potatoes.
- ½ cup nectar raisins.
- 3 tablespoons butter.
- Salt and pepper.
- Cream.

Plump and drain the raisins. Select smooth potatoes of uniform size, preferably ones that are not too elongated. Wash, using a vegetable brush and place in a baking pan. Bake in a hot oven 25 to 30 minutes, or until soft. Remove potatoes from oven, cut in halves lengthwise, and scoop out the inside. Mash, add butter, salt and pepper to taste and a little cream to [illegible]

[illegible]

- 1½ cups of prepared cake flour, sifted.
- 2 teaspoons of baking powder.
- ¼ teaspoon of salt.
- ½ teaspoon of cinnamon.
- 2 eggs well beaten.
- 1 cup of sugar.
- 3 tablespoons of shortening, melted.
- [illegible]
- ¾ cup of milk.

Gradually beat the sugar into the eggs, add the melted shortening and chocolate and alternately the milk and flour sifted, measured, and sifted again with the baking powder, salt and cinnamon. Bake in a pan 7 x 11 inches, about 45 or 50 minutes, in an oven at 350 degrees Fahrenheit.

When the cake is cool cover it with this frosting:

- 1½ cup of confectioner's sugar [illegible]
- 2 tablespoons of cocoa.
- ¼ cup of milk.
- A scant half teaspoon of vanilla.

Mix the sugar and cocoa together, then stir in the two liquids, mixing it all thoroughly.

It has been found that the smoke of a cigarette will aid in keeping wasps at bay.

Troubled With Painful Eruptions Cuticura Healed

"I was troubled with itchy, sore eruptions on my head for over a year. They were very embarrassing in company as I wanted to be scratching all the time, and if I did scratch them a watery fluid came from them. They were very painful, and my hair came out in patches.

"I tried many remedies during that time but without success. I read an advertisement for Cuticura Soap and Ointment and purchased some. The irritation stopped after one week's treatment, and after using three cakes of Cuticura Soap and three boxes of Cuticura Ointment I was completely healed." (Signed) Miss D. Rendall, 300 Kensington St., St. James, Man., Sept. 7, 1927.

Cuticura Soap, Ointment and Talcum are all you need for all toilet uses. Soap to cleanse, Ointment to soothe, Talcum to powder.

Sample Each Free by Mail. ... Cuticura Shaving Stick 35c.

THE PRAYERS OF PAUL

Golden Text. "Rejoice always; pray without ceasing; in everything give thanks."—1 Thessalonians 5.16-18.

Lesson: Acts 20.36-38; Romans 1.8-10; Ephesians 1.15-23; 3.14-21; 1 Thessalonians 1.2-3.

Devotional Reading: Psalm 34.1-8.

Explanations and Comments

Paul Prays With the Ephesian Elders, Acts 20.36-38.—Here we return to the scene on the shore of Miletus, our lesson three weeks ago. When Paul ended his talk with the elders who had come from Ephesus to meet him, he knelt on the shore and prayed with them. No doubt Paul was accustomed to deepen and consecrate his friendship with his co-workers by praying with them.

More things are wrought by prayer
Than this world dreams of. Wherefore let thy voice
Rise like a fountain for me night and day.
For what are men better than sheep and goats
[illegible]
If knowing God, they lift not hands of prayer
Both for themselves and those who [illegible]?
For so the whole round earth is every way
Bound by gold chains about the feet of God."—Tennyson.

Paul's Thanksgiving and Prayer, Ephesians 1.15, 16.—"The Epistles of Paul generally begin with thanksgiving, the subject of which is the work of God already accomplished in those to whom he writes, and this thanksgiving is followed by a prayer in which the apostle asks that the gracious work may go on in their souls. After this, he passes to the subject he proposes to treat. In the Epistle to the Ephesians he commences with thanksgiving and prayer; and, if I may so speak, he never gets beyond this, and all that he has to impart to his readers is included in the outpouring of gratitude and desire which runs through the whole of the first three chapters. All that follows from the beginning of Chapter IV. is only the practical application of this true apprehension of the divine work."—F. Godet.

Hence, as I have heard of your faith in the Lord Jesus and your love for the saints, wrote Paul, I mention you in my prayers (Moffatt's translation). Paul was in prison in Rome when he wrote these words, but the prison and its chains could not keep him from caring for his flock by bringing them in prayer to God.

"Paul in his prayers made mention of persons and groups of persons. Are our prayers as personal and specific as they ought to be? The very heathen rebuke us in this matter. On an old scrap of papyrus was written in Egypt, in 172 B.C., a letter from a sister to her brother, saying, 'I continue praying to the gods for your welfare, continually making mention of you. When I got your letter immediately I thanked the gods for your welfare.' Which of us is not rebuked by the figure of the affectionate heathen girl turning from her letter to a grateful prayer. Perhaps the whole trouble lies in our neglect of thanksgiving."—G. A. Johnston Ross.

Simple and Sure.—Dr. Thomas' Eclectric Oil is so simple in application that a child can understand the instructions. Used as a liniment the only direction is to rub, and when used as a dressing to apply. The directions are so plain and unmistakable that they are readily understood by young or old.

Fox Ranching Profitable

Prince Edward Island Still Leading District In Canada

Fox ranchers claim that it is a profitable pursuit, and evidently there is something in it when the applications for registration continue to rise rapidly year after year. Applications received at Ottawa for inspection to Oct. 1 this year ran over 56,500, and more have come in since that time. Prince Edward Island is still the great fox-raising Province. Over 23,000 of the 56,500 applications come from the Garden of the Gulf. New Brunswick is second with nearly 9,500, and Ontario third, with 8,210, is the Province which is making the greatest proportionate increase.

As a vermicide an excellent preparation is Mother Graves' Worm Exterminator. It has saved the lives of countless children.

Fond Mother—Oh, professor, don't you think my dear little Reggie will ever learn to draw?

Eminent Artist—No; that is, not unless you harness him to a cart.

Toral Found Guilty

Verdict Of Guilty For Both Toral and the Nun Concepcion

The jury returned a verdict of guilty for both Jose de Leon Toral and the nun Concepcion, at the conclusion of their trial here. The jury was only out one hour and forty minutes.

Toral and Concepcion have been on trial for the past week on charges of murder growing out of Toral's assassination of President-elect Alvaro Obregon, on July 17. It was the defence contention that the crime was of a political nature and as such, under Mexican law, could not draw the death penalty. The prosecution asked only life imprisonment for the nun Concepcion, who was charged as "the intellectual author" of the crime.

The judge pronounced a sentence of death for Toral and of twenty years' imprisonment for the nun Concepcion. The defence announced that it expected to appeal to the Mexican supreme court.

The remains of a lost civilization are being searched for in Soviet territory. They don't say who lost the civilization, but we can guess.

Robots In the Air

New Device May Simplify Duties Of Airplane Pilot

A new gyroscopic device for steering airplanes, successfully demonstrated in Germany, indicates that one of the problems of safer flying which has occupied the attention of aeronautical engineers has been solved. In a test flight from Berlin to Breslau, in which three trans-Atlantic aviators participated, it was only necessary for the pilot to handle the controls during the take-off and landing. Once in the air, the plane was guided by an "iron man" and followed the exact course, set by the inventor, to its destination. Many stabilizing devices have been developed for air-craft, but this appears to mark the most advanced step toward lightening the duties of the pilot and giving him more time for navigational details and other tasks.

France is below Japan, Ireland and Hawaii as a user of telephones, according to recent statistics.

CHAPTER VII.—Continued.

For a short interval the noble animal held his majestic pose, then, swaying awkwardly, he disappeared from view. At the sharp crack of the rifle the man by Donald's side winced as though the bullet had seared his own flesh. Brushing the sleeve of his coarse mackinaw shirt hastily across his eyes, he muttered a curse, then turned and ran with stumbling steps to his waiting team, mounted the seat and clucked gently to his four horses. The big animals strained against their collars. The huge load moved slowly at first, then gathering momentum, rolled swiftly up the road.

Gillie brought five cayuses to the rear of the station and in a few minutes his practised hands loaded two of them with their luggage.

The small cavalcade moved up the dusty road in a single file, with Douglas in the lead. They overtook and met numbers of freight wagons going in and out, the drivers shouting greetings to each other in foreign tongues. They passed the track-laying machine, which was throwing the heavy rails about as if they were matches in giant hands. Guards stopped them without the zone of flying debris while giant blasts rent the air as if some titanic monster had torn the earth asunder. Huge rocks soared above the trees, then crashed to the ground with sickening thuds, while small pebbles spattered about them.

Through the trees they saw a cloud of steam and smoke. The air was shrill with incessant quick steam-whistles as a huge steam-shovel growled and tore like a ravenous monster at the gravelled hillside. Four men bearing a stretcher came slowly down the trail. A man on horseback, wearing riding breeches and leather leggings, rode in their wake.

"How are you, Doctor Paul?" greeted Douglas. "Is it a serious accident?"

"Tree fell on him. Broke both legs, and he is hurt internally—won't live," answered the doctor in a low voice.

Donald glimpsed the face of the sufferer showing ashen through a stubby beard. Bloody bandages framed two crimson-stained lips, from which issued the gurgling groans of agony. They moved on in silence for a few moments.

"When people ride in trains," observed Gillie, "there ain't one in a thousand that knows what it costs in sufferin' and lives to make it so's they can ride in comfort."

By mid-afternoon they came to the vanguard of the army of workers, the men who were clearing the right-of-way. At intervals they could hear the long-drawn cry of the choppers as the top of a giant tree shivered and then with a great rending crash fell to earth with a resounding roar. Here they came to the end of the new road, and with a feeling of relief they plunged into the cool shadow of the virgin woods. After the great clamour, the forest, through which the trail wandered deviously, seemed steeped in primal calm. The roar of the blasts no longer came in definite crashes, but was smothered by the distance to a muffled rumble.

A rider jogging down the trail reined in his horse and shouted a cheery greeting in true Western style. He was a clean-limbed, alert young man, with a frank smile, and seemed elastic with the sword-keen health of outdoors. He swung easily from the saddle and introduced himself.

"My name is Wilkinson. I am the District Ranger. It's getting a bit dry in spots, so I want you to be careful about your fires."

When Douglas told him the object of their trip to Summit Lake the Ranger smiled apologetically.

"My warning was unnecessary, then. I took you for a party of campers. I'm following the construction work, so will probably see you again before long."

He mounted his cayuse, waved his hand in farewell, then galloped down the trail.

The narrow path wound around the boles of enormous trees towering high above them, some of the tallest being nearly two hundred feet in height. Gillie appraised them with a critical eye. He was thinking of them as logs, calculated in terms of board feet, but over Donald their beauty and nobility cast a strange spell. How long had these monarchs [illegible] the [illegible] so soon to be broken by puny man? [illegible] of them were good-sized trees when Columbus discovered America.

The solemnity of the forest was at times broken by the sharp "ka-a-a-a-h" of startled deer as they caught their scent, or the sudden burr of wings as big blue-grouse shot up from their path. Once the horses pricked up their ears and snorted in fear as a bear crashed his way through the deep woods.

As daylight abandoned the forest and twilight made eerie shadows on the dusky trail, they swung to an open space on the banks of the roaring Cheakamus River, and made camp for the night.

At daybreak they began the upward climb, and by noon felt the buoyancy of the air in the higher altitude. They crossed rushing streams and skirted the shores of small lakes on whose waters rested flocks of ducks in gregarious raft-like formations. The cayuses with their enormous packs showed signs of fatigue, and Gillie called frequent halts as the trail gradually grew steeper.

"We are nearly there," cried Douglas eagerly.

A few minutes later they topped a heavily-wooded hill and swung in to a narrow path on their right. There was no need to guide the horses, as they knew that here were rest and food for them.

There was a sudden quickening along the line. Donald's horse broke into a run, with Andy's close behind, the latter holding to the rear of his saddle and making a wry face.

"I wish I knew 'ow to keep this 'ere blinkin' saddle from comin' up and hittin' me in the seat," said Andy querulously.

Donald reined in his eager horse as they emerged from the woods and an enchanting scene burst on his view.

"This blinkin' 'ere is. . ." Andy stopped as his gaze followed Donald's. Both sat spell-bound, and the others joined them quietly.

The panorama spread before them was singularly wild and impressive. Below them stretched a lake of emerald hue, rippled here and there by occasional cat's-paws, but for the most part, placid enough to reflect the shores with mirror-like clearness. To their right lay an open valley through which ran a crystal clear mountain stream, its banks fringed with willow, alder and blooming labrador tea. A rustic bridge of logs crossed the rushing stream to a cluster of well-built log cabins that were fenced in by a palisade of cedar posts. Inside the enclosure a patch of freshly ploughed soil stood out rich and dark against the carpet of green.

Under the azure sky, dotted with fleecy clouds, a brilliantly white skyline of ice-covered mountains, whose peaks flashed in the setting sun, circled this beautiful mountain valley.

From below were wafted the odours of an awakening earth. The sweet perfume of the newly-opened and sticky buds of the balm-of-gilead, the delicious aroma of the spruce and pine, the heavy, sweet smell of the water plants and the white orchis, all this fragrance was borne on the crisp, sparkling mountain air. Involuntarily the travellers filled their lungs with this life-giving atmosphere.

A beautiful gold-eye drake and his drab-coloured mate swam along the shore in search of a safe place to nest. From the centre of the lake a loon sent out its weird cry, echoing and re-echoing from the wooded hills like wild demoniacal laughter. A quick rush of wings overhead, then a mallard duck struck the water with a loud splash and immediately set up a sustaining quacking until answered by a more gentle note from the reeds, whence emerged a hen-mallard. The two met amid a great bobbing of heads. Gabbling in an undertone they swam down the lake together.

The elusive hooting of male blue-grouse came from the tree tops of the rocky [illegible]. A willow-grouse moved from a clump of bushes with a haughty step to show her finery by ruffling the feathers of her neck and spreading her fan-like tail. There was a sharp "plop" as a rainbow trout curved gracefully on the surface to leave a widening circle of ripples on the calm water. All through this sun-washed valley was the soft murmur of a land at peace—at peace because unspoiled by man.

Donald drew a long breath.

"Strike me pink!" breathed Andy in an awed tone.

"Holy mackerel! but ain't she a pretty spot?" came excitedly from Gillie.

As they rumbled across the bridge a man came to the door of the log cabin, ran swiftly to the fence and swung the gate open. With a hand held to his brow to shade his eyes from the slanting rays of the setting sun, he peered up at the horsemen. His eyes lighted up as he recognized Douglas.

"Hello, o' timer!" he shouted cheerily.

John Hillier filled the dual role of trapper and road-house keeper. His fantastic dress of deer-skin, the six-shooter slung at his hip, and the big sombrero that topped his shaggy grey head gave him almost a sinister appearance.

Old John's face was savage and wild, but his bristly moustache hid a mouth as tender as a woman's. Great shaggy brows beetling out over his grey mountaineer eyes could not conceal the softness that crept into them so often. His gentle eyes seemed out of place in that homely, battle-scarred face. It was like finding a touch of romance in a treatise on trigonometry.

(To Be Continued.)

Little Helps For This Week

"Therefore will not we fear."—Psalm xlvi. 2.

I see the germ to the sunlight reach,
And the nestlings know the old bird's speech;
I see the [illegible]
[illegible]
I do not [illegible]
[illegible]
All [illegible]
O God! [illegible]
soul.—[illegible]

The providence of God, that cares for the universe as a whole, that takes it at the beginning and holds it to the consummation, that we cannot see or know, that we can only dimly grasp,—this same mighty, all-grasping order of God's providence considers my affairs: not simply nations, not simply cities, not simply families, but you and me, the bird on the tree, the bird that sings on the bough, the flower that springs out of the sod.—M. J. Savage.

—take it! It's Safe

The nurse tells you to take Aspirin because she knows that it is safe. Doctors have told her so. It has no effect on the heart, so take it to stop a headache or check a cold. For almost instant relief of neuralgia, neuritis, rheumatism; even lumbago. But be sure it's Bayer—the genuine Aspirin. At druggists, with proven directions for its many uses.

TARTAR

You are faithful in your mouth [illegible] brushing your teeth [illegible] daily but you still find deposits forming back of your lower teeth, to which the tongue continually goes because of their roughness, and which you cannot remove by brushing, try as you will.

Now, what is this?

"Tartar," so called, is salivary calculus and as it's name implies, it enters the mouth through the saliva.

The fresh deposit is soft and can be washed or brushed away when first it settles. This brushing must be done, however, within from five to twelve hours of its appearance, since remaining longer it begins to "set."

The calculus increases in bulk through more or less repeated accumulations until often large and thick masses of it are formed, these, pressing upon the soft gum tissues, cause them to become inflamed, which inflammation progressing may lead to the ultimate loss of the teeth.

Now, three "words" more:

These deposits do not appear in every mouth, nor where calculus does occur, is it found constantly.

"Tartar" is found generally on the "inside" of the lower incisors and cuspids and on the "outside" of the upper first and second molar teeth, the reason for this being that these localities are opposite the mouths of the salivary ducts.

Lastly—once calculus has formed, its removal can be accomplished only through the medium of special instruments in the hands of the dentist.

But if you are subject to tartar, a faithful brushing following each meal especially of these areas, will do much towards keeping the deposits down to the minimum.

Remote Control

"Have you ever driven a car?" the lady applicant for a license was asked. "One hundred and twenty thousand miles," put in her husband, who was standing near by, "and never had her hand on the wheel."

"Are yez an American citizen, Pat?"

"Faith Oi am that. Oi was born in Tipperary, but on the Fourth av July."

Financial Aid Limited

Government Not Contributing To Development Of Harbors and Seaplane Stations

George G. Wakeman, of Ottawa, inspector of the air services of Canada, in an address at the Dominion aviation conference on the development of harbors and seaplane stations, declared that the government does not intend to make any financial contribution to such works. He forecast, however, government action on the installation and maintenance of illumination apparatus necessary, not only in airports, but along airways.

NOTICE

Tenders will be received by the undersigned up to the 30th day of November, 1928, for the purchase of the South-East Quarter of Section 24, Township 51, Range 19, West of the Fourth Meridian, containing 160 acres more or less. This land is situated three miles from Tofield, and is well improved. The highest or any tender not necessarily accepted. This is the old J. C. Phillips homestead.

A. J. H. McCAULEY,
Tofield, Alta.
Executor Estate J. C. Phillips, deceased.

[illegible] There are no records to show the difference in gains under the two methods, but the difference in appearance would seem to indicate that the cost of the tank heater, together with the fuel to operate it, would be just [illegible] many times over.

Here and There

(183)

The Western Canada ski championships of combined skiing events will be held in Banff again this season in conjunction with the Banff winter carnival due to take place next February, it has been decided upon. Such famous skiers will probably be in attendance as Nelson of Revelstoke, Trifson of Vancouver, last year's western representative at the Olympic games, and Nordnoe of Camrose.

"Once upon a time there were sixty foxes who didn't wear panties and didn't wear coats but they all went travelling in nice big boxes."

A parody on A. A. Milne's famous nursery rhyme is inspired by a shipment of sixty black and silver foxes who passed through the Windsor Street Station recently en route to Switzerland from Calgary. They were under the wing of the Canadian Pacific Express who saw that the animals got their diet of raw meat regularly.

The case of a motorist being [illegible]

The building of more than 400 miles of new branch lines, with 71 new stations and shipping points sums up in brief the construction programme of the Canadian Pacific Railway in Western Canada during the past summer, according to D. C. Coleman, Vice-President, Western Lines. By this means hundreds of farmers had been brought much closer to transportation facilities and thousands of acres of rich agricultural land had been made much more attractive from the settlers' viewpoint.

"I can say, without any hesitation, that Canada is the best country in the world for farming at the present time. It has greater possibilities and there are indications that there is greater stability and prosperity than can be found in any other country," said Dr. E. S. Archibald, director in charge of the Dominion Experimental Farms [illegible]

Mediaeval Mystery Play Revived

The Empress Hotel, Victoria, the beautiful grounds of which will be brilliant with holly berries during the season of revelry, being arranged as an old English Christmas festival.

Imagine Christmas in England in 1328, 600 years ago. The dawn of the Reformation was all but breaking, but the Church still held place of power in state as in religion, and had been for centuries the fount of all learning. A primitive age—rough and relentless, and its people were primitive to a degree hardly conceivable in this age. Rough, hard living was lightened by rough hard play and such church festivals as Christmas were celebrated in carousing and high revels by those as could command the means for such employment. Religious teaching came to the mass of the people only by word of mouth, and as a means of making the New Testament stories living and understandable, incidents of the Bible story were presented in simple plays as primitive as the understandings of their audiences. They were called Mystery Plays and one of the first of them, and, therefore, perhaps, the first of all plays to be performed in England was the story of the adoration of the shepherds and the Magi, written by Randall Higden, a monk of Chester Abbey and first performed at Christmas in the year 1328, just six hundred years ago.

From that day to this is a long time, but there has been a revival of interest in the beautiful things of mediaeval days, and a few years ago the Chester Mysteries were brought to Canada and presented for the first time in America at Hart House Theatre, Toronto University. There they met with instantaneous success, and for several Christmases were a feature of Toronto's holiday celebration. Later they were presented as part of a Christmas service in the chancel of the church of St. Mary Magdalene, Toronto. It will next be seen at Victoria, B.C., as part of the old English Christmas celebration that is being arranged to take place at the Empress Hotel there this year.

It will be the central feature of a notable revival of the Christmas customs of England dating from the middle ages down to the time of Dickens and Mr. Pickwick. In the costumes of that periods, singers, actors and musicians will, between Christmas and Twelfth Night lead the revels and the entire celebration will wind up with a costume ball. Victoria is already famous as a winter resort. Its mild, pleasant weather permitting golf and motoring practically every day and its wonderful salt-water swimming baths have made the most English city in North America an ideal place in which to spend the winter, and with the programme of Christmas revels it is likely that the number of visitors to that city from the prairies and from some of the western states will be unusually large.

WHEAT GRADING

ONE OF the greatest problems the wheat producer is faced with to-day is the grading of his product. Unfortunately there appears to be no real standard, (in the sense that a yard stick or a pound weight is a standard), to go by. The quality of wheat varies from season to season and the difference between No. 1 and No. 2 or No. 2 and No. 3 is sometimes almost imperceptable. As a matter of fact it has occurred that two experienced grain men have judged the same sample differently, also two different samples have been taken out of the same bin and graded differently. This year climatic conditions have made the task of the grain grader no easy one. The early frosts, nipping some kernels and missing others, have made in all too many cases a No. 3 or 4 of what would otherwise have been a No.1 or 2. To further complicate matters, after grain has been graded at the local elevator, it is again graded at Winnipeg or at the terminals; at anyrate a check is kept on the local graders work, with the result that when faced with a doubtful sample here, he plays safe and grades it low instead of high. One must not blame him for this. Most farmers in the same position would do likewise. However, grain graders are human and are prone to err—sometimes in favor of the farmer. Receiving notification from headquarters that he has graded too high, how can he rectify it? It is quite obvious the only way his season's record can be balanced up, is by grading some other farmer low. Consequently some hardworking settler loses several cents a bushel on his season's output. This means that some long looked for improvement to the farm or buildings must wait over for another year or money borrowed must remain unpaid with the inevitable interest.

While no doubt there are numerous cases of undergrading with consequent loss to the producer, this is not an offence with which any firm or individual can be rightfully charged. It is the result of a system. Buying huge quantities of grain, large elevator companies must be protected against over grading. The trouble is, they are generally protected too much. With the grading of wheat of such a doubtful nature that conscientious and experienced grain men differ as to grade, one can readily see the need for some standard less variable.

There is a demand from a good many people that wheat be bought on its milling value. Whether a suitable test can be made at local points and whether this is a practical and feasible plan, we do not know; but something further will be written regarding this at a later date.

To a certain extent the same problem presented itself to the cream sellers a few years ago. Even through the Babcock centrifugal test was made, there were complaints regarding tests and grades. A cream patron would receive a certain price one day and a few days later a different one. Mostly it was the cause of some condition at the patron's farm, but occasionally the result of a test without proper care or perhaps the cream buyer, wishing to make himself "solid" with the patron.

Just before the present system came into vogue, there was considerable competition for the purchase of cream, and the publisher has personally heard patrons tell of taking a portion of a can to one buyer and another portion of the same can to another buyer and receiving identically the same test and grade.

Since the branches were abolished and government graders instituted, one hears few complaints re test and grade. We do not think the government graders, while no doubt efficient, are more efficient than the private graders were, but the cream patron knows that no matter what the grade or test, it makes no difference to the grader. He is working on a salary and is moved around from creamery to creamery.

Whether a plan similar to this would work in connection with the grading of wheat, we do not know. Under present conditions it would quite likely cause the elevator companies to run quite a risk; but under some scientific and exact grading system, we see no reason why it should not solve the problem.

FUR FARMING

Milady of Paris, London and New York and her millions of sisters everywhere, having decided quite a few years ago that fur added to charm and attractiveness of person, there came a demand for more and more fur of a kind suitable for the adornment of ladies apparel. The wild fur bearing animals were hunted and trapped as they had never been before. At this time there were "fur farms", but these mostly consisted of the fox farms of Prince Edward Island. As the demand for the furs of the smaller animals increased it occurred to someone to start a "rat farm" and to-day this is becoming quite common. The muskrat fur is valuable, is suitable for many uses, and according to some authorities, the "raising" of muskrats is a profitable undertaking. One of its greatest advantages is that it makes profitable use of land and water that otherwise would be valueless. It is a little early yet to say how profitable rat farming really is, most of those venturing on this sea of hope, not yet being in a position to cash in on their labor and investment, but this time should not now be long delayed. Unlike wheat or beef, fur can hardly be termed a staple commodity. There will always be some demand for it of course, but milady of Paris, London and New York and her millions of sisters everywhere, have a habit of rapidly changing from one style to another and should fur ever go out of fashion as an adornment of ladies apparel, a supply keyed up to present demands will be superabundant with a corresponding drop in price. The fur farming business appears to us just now as something in which the early bird will catch the worm.

SEED WHEAT FOR SALE.—[illegible] grown from seed purchased from government last spring. Very early maturing. Price $1.10 bushel. —Apply R. W. Pinrott, Tofield. 40c.

LOST.—An Orange and green robe, on Saturday night last, somewhere near the municipal office, going west. Finder please communicate with Roy Lee, Tofield, or leave it at the Mercury Office. 39c

Canada On Easy Street

[illegible] Robb Dominion Minister of Finance is credited with the terse comment "Canada is on easy street," when making announcement last month that even before due date, the Treasury had paid off $22,000,000 of the $52,000,000 short term bonds falling due on October 15, last, and that the balance would be paid on due date out of cash on hand in the Treasury. Even so said Mr. Robb there would be "some left over" and he had [illegible] to hope, "if Providence continues kind to us and gives us good crops, and business keeps just as good as it is now, without even getting any better," to take care of further maturities coming along from now till 1933.

In other words out of current revenues and without having to resort to the issue of refunding loans, Canada was able to pay off $52,000,000 of its public debt this year. And this does not represent the full amount of the de[illegible] been effected this year, with a consequent lowering c[illegible].

In the short period of six years the public debt has been reduced to an extent that means a lessening of the burden of interest annually in an amount of almost $15,000,000. And if Mr. Robb's expectations for the next five years are realized an equally large, or even larger, amount will be lopped off by 1933.

The most gratifying feature, however, is that this substantial reduction in debt and in annual interest charges has been achieved, not as a result of increased taxation, but concurrent with a general decrease in taxation, including lowering of tariff schedules, a lighter tax on business profits, reductions in the sales tax, smaller income taxes, reduced postage rates, smaller stamp levies on cheques, and the abolition of stamp duties on receipts. In a word, the removal of restrictions on the business of the country has been helpful in the development of business, and, as a direct consequence, larger revenues to the Government.

Another important factor has been the really phenomenal improvement in the management and finances of the Canadian National Railways as a result of which the Dominion Treasury is no longer called upon to pay out huge sums to cover operating deficits and in interest to the public on account of railway bonds and debentures. On the contrary, the C.N.R. now accumulates an ever increasing surplus to apply on its past obligations to the Government.

The year now drawing to a close will, it is confidently expected, disclose a record year in the history of the Canadian National Railways, while President Beatty is authority for the statement that 1928 will, in all probability, prove to be the banner year in the history of the Canadian Pacific.

A perusal of the press of Canada, and particularly of all financial journals in which are recorded the annual reports of the banks, trust, loan, mortgage and insurance companies, and all the large manufacturing and industrial concerns of the Dominion, discloses the fact that one and all are enjoying great prosperity, enormously increased business and substantial profits.

No one circumstance can be credited with the whole responsibility for this magnificent showing although it is safe to say that the great grain production of the West, coupled with the betterment in the life stock industry, the increase in dairying, and other branches of agricultural expansion, form the background, and is largely responsible for the general speeding up in the whole business of the country, and is occasioning the transfer of other lines of industry from the East to various centres in the West.

The general betterment is the result, as Mr. Robb frankly recognizes, of a beneficient Providence without whose aid all man's efforts must come to naught. It is due, also, to the courage, industry and enterprise of the Canadian people, and to some extent to the steady improvement in world economic conditions, inasmuch as Canada is dependent so largely upon its export trade.

Present conditions are therefore good and sound, and future prospects are very bright. It remains for the people of Canada to take full advantage of the situation, not to rest on their oars, but to plan and work in order that our rosy expectations for the coming years may be fully realized. Every reduction in the public debt, every dollar saved in interest charges, every item of taxation lowered or wiped out, means further relief to all people and a further incentive to still larger development and growth. It is, therefore, to everybody's advantage and gain to work together in national co-operation.

West Coast Fisheries

The pilchard reduction industry on the west coast of Vancouver Island records an advance of 50 per cent. in production this year as compared with last, with an output of 16,000 tons of meal, and 2,500,000 gallons of [illegible]. Within the past three years the number of plants have increased from five to 22.

Women of Scotland are wearing hats trimmed with flowers made from beech nuts.

At least 150 people sleep every night in Hyde Park, London - public [illegible].

Harvesters Find Employment

The placing of British harvesters in winter employment is making good progress in Southern Alberta. Secretaries of the C.P.R.'s colonization boards report that farmers are responding very well and that a number of deals, satisfactory to both farmer and helper, have been arranged.

The Scotsman - Are you the man who cut my hair last time?

The Barber - I don't think so, sir. I've only been here six months.

On the stage of life the leading lady is usually the cook.

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

A Delicate Operation

Eye Is Successfully Grafted On Person Who Regains Sight

One of the most delicate operations known to medical science proved at least partially successful when Bert Ferguson, of New York City, once blind, looked dimly at the world through another man's eye.

Ferguson's one eye failed him several weeks ago and doctors, in an effort to restore his sight, decided to transplant the cornea from another eye.

Charles Greenblatt, whose eye was removed because of a tumor, allowed it to the surgeons and the cornea, still alive, was removed and grafted to Ferguson's member.

The medical world awaited the result anxiously and there was great interest today when the bandages were removed.

Ferguson was able to distinguish objects ten feet away. Surgeons said the development of sight and the permanent success of the operation would depend upon the ability of Ferguson's optic tissue to nourish the cells of the grafted cornea.

WHEN YOUNG GIRLS GROW PALE AND THIN

Dr. Williams' Pink Pills Should Be Taken To Enrich the Blood

When girls grow weak, pale and thin, parents should not neglect these symptoms, to do so means danger. The girl in her teens cannot develop into robust womanhood without an abundant supply of rich, red blood in her veins. It is the lack of this that is the great trouble with nine girls out of ten. Dr. Williams' Pink Pills have achieved world-wide fame for their remarkable blood-making properties. In these pills there is vigorous health, with glowing cheeks and sparkling eyes for every weak, pale girl. The value of the pills in cases of this kind is shown by the statement of Mrs. Winnifred Rutty, Barton street west, Hamilton, Ont., who says: "About two years ago my eldest girl got into very bad health. I took her to a doctor who advised having her tonsils removed, saying this was the seat of the trouble. We had them removed, but it did not help her, and she seemed to have absorbed so much poison from the trouble that she did not pick up at all. She could neither eat nor sleep, and what food she did take did not digest. Then she developed a cough that kept her awake at night, and went down in weight to 86 pounds. A neighbor said to me, 'You have tried so many things why not try Dr. Williams' Pink Pills?' I got some and before she finished the second box she began to show improvement. She continued the use of the pills for some time and is now in the pink of condition, able to work and play, and eat and sleep with all her old-time vigor. These statements can be verified by neighbors who watched her restored from ill health to perfect health."

If your medicine dealer does not keep these pills you can get them by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Tourists Like Victoria

Tourists to the capital of British Columbia this year numbered 870,000 according to the Victoria Publicity Bureau. Tourist travel from Canadian points and from the west coast of the United States to Vancouver Island and Victoria, via the C.P.R. and the coastal steamship service, shows an increase over last year.

Miller's Worm Powders work so effectively that no traces of worms can be found. The pests pass away in the stools without being perceptible. They make an entire and clean sweep of the intestines, and nothing in the shape of a worm can find lodgement there when these powders are in operation. Nothing could be more thorough or desirable than their action.

Greater Vancouver

The population of Greater Vancouver has increased by more than 100,000 persons, or approximately 44 per cent. in the last four years, according to statistics contained in the local directory. The population is given at 344,160 against 217,155 in 1927. [illegible]

Break Colds with Minard's Liniment.

Servant: Mrs. Green is out.

Visitor: Good. When I entered the yard and saw Mrs. Green looking out of the window I was afraid she'd be in.

Cheapest Of All Oils. Considering the qualities of Dr. Thomas' Eclectric Oil it is the cheapest of all preparations offered to the public. It is to be found in every drug store in Canada from coast to coast and all country merchants keep it for sale. So, being easily procurable and extremely moderate in price, no one should be without a bottle of it.

College boys are believed to be strongly in favor of the air mail having found out this year that it enables them to get money from home just twenty-four hours quicker.

Minard's Liniment Heals Cuts and Bruises.

Ask your grocer for

ROYAL YEAST CAKES

STANDARD OF QUALITY FOR OVER 50 YEARS

British Market Is Large

Canada Might Send Greater Supplies Of Farm Produce

The Farmers' Sun says: "Great Britain imported dressed poultry to the value of £1,204,702 during January to August, 1928. Towards that amount Canada contributed poultry to the value of £11,975. During the same period Great Britain imported eggs (in shell) to the value of £10,999,205. Canada supplied £24,922 worth. Canada's contribution in each instance is infinitesimal and could be greatly extended. As regards butter the comparison is even more striking, as for the period January to August, 1928, the total imports were valued at £37,411,496, towards which Canada sent butter valued at £12,630. Agricultural produce in large quantities is being supplied to Great Britain by foreign countries, including the United States of America, which shipped dead poultry to the value of £211,929 during the eight months mentioned.

Could Not Sleep Heart Would Start Pumping and Pounding

Mrs. Fred. P. Averill, 126-12th Ave., Calgary, Alta., writes: "I was bothered so much with my heart I could not sleep. I would waken up in the night screaming, and my heart would start pumping and pounding. A neighbor lady told me to try

MILBURN'S HEART AND NERVE PILLS

so I started taking them and I can truthfully say I am a different woman. Altogether I only took two boxes."

Price 50c a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Edmonton Land Office Busy

85 Homesteads Taken Out In One Week In October

During the week of October 9th to 15th inclusive, 85 homesteads were taken out at the Edmonton Land Office. This compares very favorably with the records throughout the summer, and is very much in excess of the number filed upon during the same period of 1927, when 16 homesteads and one soldier's grant were taken out.

Minard's Liniment Invaluable Everywhere.

"My mother will be surprised when she gets my letter." August, she used to say "you are so stupid that you will never get a job" and in the last month I have had six!"

The bride is given in marriage, sometimes the groom is sold.

Her Secret Beautifier Envy of Her Friends

Miss C. Delano, Washington, writes: —"About two years ago I was bothered a great deal with a muddy, sallow and pimply skin. I found I could cover the blemishes with cosmetics, but that was only a temporary relief. "My druggist recommended your purely vegetable laxative, and suggested my trouble might be constipation. After taking a short while I noticed a wonderful difference. My complexion has improved, also headaches, indigestion and biliousness never bothered me any more."

CARTER'S LITTLE LIVER PILLS Sold all druggists 25c and 75c red pkgs.

Will Spend Winter In North

Major Burwash To Carry On Investigations In Arctic Regions

In the bleak and frozen reaches of Canada's Arctic regions an intrepid and experienced explorer of the department of interior will labor during the long winter months, collecting valuable data and otherwise add to the knowledge of conditions among the wards of the Dominion, the Eskimo. The investigator is Major L. T. Burwash, of the Northwest Territories and Yukon branch who early in June of this year left Ottawa on his distant mission.

Following a long trip to Aklavik in the delta of the Mackenzie River the explorer conducted a preliminary survey of that country before proceeding into the Arctic proper.

According to wireless reports received from a government station in the North, Major Burwash now has established his winter base on Boothia peninsula, from where he will carry out his investigations around King [illegible] mainland.

A survey of a proposed tractor route between Cockburn and Wager Bays will also be made. This project is being investigated with a view to ascertaining the possibilities of bringing in supplies for posts on the Arctic coast by way of the Hudson Bay and overland by tractor, rather than by the present long and hazardous route through the Behring Sea and the Northern coast of Alaska.

In May, 1929, Major Burwash will sail northward on the government auxiliary schooner Ptarmigan to investigate navigation conditions in the Franklin Strait and Peel Sound. He plans to join the annual Canadian Arctic expedition in the summer of 1929 with which he will return to civilization.

Your Asthma, Too. The efficacy of Dr. J. D. Kellogg's Asthma Remedy is not something that is merely to be hoped for, it is to be expected. It seldom fails to bring relief, and in your own individual case it will do the same. So universal has been the success of this far-famed remedy that every one afflicted with this disease owes it to himself to try it.

Chicken Hatcheries For Alberta

Company plans To Establish Hatcheries At Several Points In the Province

A chicken hatchery on a large scale is to be established in Alberta, according to L. M. Gaetz, a member of the firm of Canadian Hatcheries, Limited, of Vancouver, and a recent visitor to Edmonton. He stated that the plan of the company was to establish, eventually, hatcheries at several points in the province, where there is unlimited scope for baby chicks of high quality strain; also for eggs and poultry.

No matter how deep-rooted the corn may be, it must yield to Holloway's Corn Remover if used as directed.

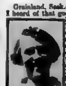
Hotel To Have Big Organ

The Royal York Hotel, Toronto, is to be equipped with one of the finest instrumental organs ever built, being the only one in Canada to have five manuals. This organ is being turned out by Casavant Freres of St. Hyacinthe, P.Q. When completed it will weigh 50 tons and will require four freight cars for its transport.

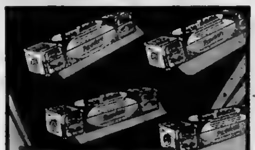
Your work would not be so humdrum if you put more hum into it.

WOMAN SO SICK COULD NOT WORK

Helped by Taking Lydia E. Pinkham's Vegetable Compound



Grainland, Sask.—"I am glad that I heard of that good Lydia E. Pinkham's medicine and I will not be without it again. I was so sick that I could not work at all and could not sew on the machine. My aunt told me of Lydia E. Pinkham's Vegetable Compound and now I am telling all of my friends how good it is and I will answer all letters I get from women." —Mrs. Mary Schultz, Grainland, Sask.



Don't Let Foods Stale

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Waxed Paper.

Your grocer, druggist or stationer has Para-Sani in the handy, sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's Centre Pull Packs.

DIRIGIBLE BEST POSSIBILITY FOR OCEAN FLIGHTS

Ottawa, Ont.—On the success of the projected flight of the dirigible R-100 from England to Canada next spring will largely depend the future of inter-empire air communication, Air Marshal Sir John Salmond, K.C.B., stated in an interview here.

The distinguished British air official spent the day in Ottawa on his way home from Australia and called upon Hon. J. L. Ralston, minister of national defence.

"The dirigible appears to offer the best possibility for ocean flights at present," he said. "The future will probably see multi-motored aeroplanes capable of making such flights with safety, but for the next ten years the lighter-than-air machine seems best."

Australia was anxiously awaiting the result of the projected flight to Canada, he continued. A flight would later be made from England to the Antipodes via Egypt.

Proposed Wool Pool

Alberta Wool Growers May Organize On Co-Operative Marketing Plan

Edmonton.—Wool growers of Alberta who are proposing to organize a co-operative marketing pool on lines similar to those of the Wheat Pool, moved one step nearer that end at a conference with Premier Brownlee at which advice was sought and given on the question of procedure. The meeting, which was a continuation of one held some weeks ago, was attended by representatives of five co-operative selling organizations among the wool growers in different parts of the province.

If and when a wool pool is formed, it will be on a contract basis, like that of the wheat pool, instead of the voluntary basis on which the Alberta growers are now marketing through the Canadian Co-operative Wool Growers' Association. Details of the proposed new plan were discussed, including especially the contract terms and Mr. Brownlee addressed the wool men as to how an effective organization might be built up. It is likely that definite action will be taken in the near future.

New Air Company Formed

Charter Has Been Granted To Trans-Canada Airways Limited, Winnipeg

Winnipeg, Man. — Another company, the Trans-Canada Airways Ltd., has entered the commercial aviation field. Granting of a provincial charter to it was announced at the legislative building.

The provisional directors include R. Myers, barrister; J. R. Adams, agent and A. M. Campbell and J. C. Berg, barristers. Headquarters will be in Winnipeg and the provincial capitalization is $20,000.

Victim Of Invention

East Orange, N. J. — Doctor Sabin Von Sochocky died here, a victim of the luminous paint which he invented for the painting of watch dials in the plant of a radium corporation formerly located in Orange. Deaths of a half-dozen women, who [illegible] the assimilation of radio-active substances.

Hudson's Strait Expedition

Quebec.—The Hudson's Strait expedition which started from Halifax in July 1927, with the object of establishing aids to navigation and securing scientific data on ice, wind and weather conditions in the Strait the year round, has concluded with the return a few days ago of the C.G.S. Montcalm, in command of Captain John Hearn to Quebec.

Radio Phones For Planes

Chicago. — Radio telephony for aeroplanes to keep in touch with air ports during flight is being installed on the New York-Chicago aerial route it was announced here. Engineers have succeeded in perfecting plane-to-ground and ground-to-plane radio telephony, it was said, enabling pilots to keep in communication with [illegible] while in flight.

Death Of Russian Admiral

Helsingfors, Finland. Admiral Oscar Starak, who commanded the Russian navy in the defense of Port Arthur against the Japanese attack in 1904, is dead. He was 82 years old.

Prospect For Further Reduction In Taxes

Increase In Revenue Makes Cut Next Year Probable

Ottawa. — Prospects for further substantial tax reductions next year are said to be improving with the increasing receipt of revenue collected by the customs department. In September the customs receipts showed an increase of over two million dollars over September, 1927. In October the customs receipts are said to be up by over three and half millions.

The seven months collections from customs are up by over seventeen and a quarter million dollars. Despite tariff reductions in the last budget. A percentage of the increase is due to the bigger percentage of collections of money due and a curbing of customs dodging.

The October excise collections will when published show an increase of over three-quarters of a million over October, 1927.

The excise taxes are down about fifty thousand but this is credited to the substantial reductions in the tax itself which this year amounted to 20 per cent. The net increase for the seven months, however, is nearly three and three quarters millions.

All government departments are said to have been instructed to prepare their estimates carefully, and this is now being done so that with an increase in the revenue even under reduced taxation and a decrease in the expenditure further tax reductions will be included in the "1929 Budget."

New Zealand Elections

Government Forces Under Premier Coates Receive Setback

Wellington, N.Z.—Prohibition was defeated by a majority of around 100,000 votes and the government forces under J. G. Coates, prime minister, suffered a severe setback in the election.

Prohibition was on the ballot in the form of a referendum as to whether a licensing system should be adopted. The vote was overwhelmingly against continuance of prohibition.

A new united party under the leadership of Sir Joseph Ward made its debut by gaining seats from Premier Coates' party all over the Dominion.

The final standing by parties was: Government, 28; United party, 26; Labor, 20; Independents, 6.

Most of the Independents are opposed to the government. The premier's party failed to gain a single seat. It held 53 of the 80 seats in the last parliament.

The new united party combines Liberals, Nationalists and others opposed to the reform and Labor parties.

Three ministers lost their seats—A. D. McLeod, minister of lands; O. J. Hawken, minister of agriculture, and J. F. Ralleston, minister of justice.

Grain Inquiry Commission

Royal Commission in Saskatchewan To Probe Methods Of Grain Mixing and Grading

Regina.—Definite announcement of the appointment and powers of the Royal Grain Inquiry Commission directed by the Saskatchewan Government to investigate the present method and system of grading, mixing, handling and marketing of grain [illegible] ister of agriculture.

The commission consists of Chief Justice J. T. Brown, of the Court of King's Bench, of Saskatchewan, who is named as chairman, John A. Stoneman, Saskatoon, president of the United Farmers of Canada, Saskatchewan section, and Dean W. J. Rutherford, head of the College of Agriculture at the University of Saskatchewan.

Public sittings of the Royal Grain Inquiry Commission will open at country points in Saskatchewan during the first week in December and will be continued as long as is necessary to enable farmers to present their cases.

Farmer Kills Large Wolf

Montreal.—A wolf weighing 100 pounds and measuring six feet from nose to tail was caught in a trap and killed by a farmer at St. Scholastique, about 30 miles from Montreal. The animal was responsible for the deaths of 20 sheep.

New C.N.R. Hotel

Vancouver. — The civic building committee has given authority for the issuing of a permit for the construction of the 12-storey Canadian National Railways hotel to be erected here at a cost of approximately $4,000,000.

Lava Flow Diminishing

Natives In Mount Etna Region Meeting Changed Conditions

Giarre, Sicily. With the lava flow from Mount Etna diminishing hourly in intensity, natives of the stricken region are gradually reorganizing their economic life to meet the new conditions that nature has forced upon them.

There was some talk of tunnelling through the lava which has spread over the road as soon as the molten stream cooled and its flow subsided. This would restore the severed railway to normal service. One of the most radiant over the diminution of the lava flow was Leonardo Putano, whose age is 108, and who is known as the "Grandpa of Nunziata." This intrepid centenarian steadfastly refused to budge from the threatened village. He proclaimed to all and sundry that he would be the last to leave. Now he is exhibiting a broad and toothless grin, saying "I told you so" in Sicilian dialect to all visitors.

Wheat Crop Estimated At Half a Billion

Figures Given For Canada's Production This Year

Ottawa.—Canada's wheat crop for 1928 is placed at 500,613,000 bushels in the crop report issued by the Dominion Bureau of statistics. Last year's total was 440,024,700 bushels.

The crop of fall wheat this year is given as 18,966,000 bushels as compared with 22,726,000 bushels last year. Spring wheat total for this year is 481,647,000 bushels as against 417,734,000 bushels the year before.

PLACE FOR THIS DOMINION IN EMPIRE AFFAIRS

Montreal.—A willingness to share the responsibilities which in the earlier stages of Imperial development Britain bore alone is the obligation which Canada and other Dominions should be ready to meet for their development in the British Commonwealth of Nations.

This is the message which Sir Austen Chamberlain, secretary of foreign affairs in the British government, left with the people of Canada before he left Montreal for Quebec, en route to England.

"There is room in our Commonwealth," said Sir Austen, "for the fullest development of Canadian nationality.

"We welcome your co-operation in all fields, and not least in the field of foreign affairs; but now that you claim, and rightly claim, a place in the field of foreign affairs, you must study them. You must take an interest which will make your papers afford you all the information necessary to enable you to form a judgment and you must be willing to share the responsibilities which in the earlier stages of imperial development we have had to bear alone.

"We shall welcome your assistance and even your criticism. But let it not be criticism only after the event, but a real partnership in forming the decisions."

PREMIER OF NEWFOUNDLAND

Sir Richard Squires, leader of the opposition party in Newfoundland who was recently elected premier

Search For Small Continues

May Use Steam Shovel To Dig For Remains Of Missing Millionaire

Toronto, Ont.—Patrick Sullivan, special agent for the Misses Small, sisters of Ambrose J. Small, missing millionaire, may secure, it is said, a steam shovel outfit from Bolton, Ont., to excavate the Rosedale dump where both Sullivan and Dr. Langner, criminologist, believe the remains can be found.

Sullivan anticipates that the work of excavating the dump will cost in the neighborhood of $5,000.

Despite previous assurances that he had abandoned his enquiry into the disappearance of Small, Langner will return to Toronto from Montreal for further work upon the world-famous mystery, it is learned here.

"I have been in touch with Langner and he tells me that he will be back here at work on the case before the middle of next week, perhaps before," Sullivan said.

Cyclone Does Heavy Damage In Argentine

Many Killed and Over Million Property Loss Estimated

Buenos Aires, Argentina.—Heavy loss of life and damage are reported from the region of Villa Maria, railway centre, which was struck by a cyclone. Eighteen persons are known to be dead in Villa Maria, with the number of dead and injured in neighboring towns undetermined.

Villa Maria was partly in ruins, while nine other nearby towns had suffered much damage.

Property loss was estimated at $1,500,000.

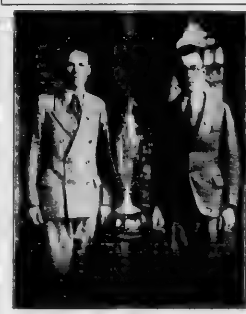
Increase In Wheat Crop

Sydney, Australia.—The government statistical department announced today the estimate for the Australia wheat crop of 1928 was 154,000,000 bushels, an increase of 40,000,000 bushels in two years.

Expect Large Sales

Regina.—About 100 carloads of dressed poultry are expected to be sold in various parts of Canada and the United States by the central selling agency of the Saskatchewan and Manitoba poultry pools.

WINNERS OF PIG CLUB COMPETITIONS



Lawrence Wilkinson and Stewart Bruce, Tanfield, Sask., winners of the Pig Club Competition on Canadian Pacific Railway lines in that Province, will be guests of the company at the Royal Winter Show, Toronto.

May Move Weather Bureau

Headquarters Of Department Likely To Be at Ottawa

Ottawa.—With the retirement of Sir Frederick Stupart, director of the meteorological service of Canada, on January 1 next, it is expected that the headquarters of his department will be removed from Toronto to Ottawa. The growing service of the bureau to navigation, forest fire fighting, the work done by the Department of Marine and Fisheries and, more recently the aeroplane traffic, together with the fact that all the other important branches of the weather service are located here, are given as the reason for the change.

TRAGIC STORY OF SINKING OF LINER VESTRIS

New York.—Two shiploads of survivors of the Lamport and Holt liner "Vestris" arrived here, unfold details of one of the most horrible of marine disasters.

An official inquiry has been ordered, based upon their almost unanimous charges of inefficiency, indecision and delay against Captain William J. Carey and his crew.

Interspersed in narratives of heroism and of brutality—of narrow escape and long-suffering invariably appeared assertions that if proper steps had been taken by the ship's executives and crew, most, if not all, of the 108 now dead would be alive.

Even with the S.O.S. call too long delayed, efficient handling of the Vestris life-saving equipment by those responsible would have brought most of the 108 out of danger, declared survivors.

Those are charges which United States Attorney Tuttle announced he will begin to investigate.

But Captain Carey probably had his reasons—yet he will never tell them. For forty years he had sailed in Lamport and Holt steamers. He "came up" through the "fo'castle," as the sailors say, starting as a deck boy, advancing to ordinary seaman, then an able seaman, and finally "winning his ticket" and putting on the gold braid of an officer of the line.

When he took the Vestris out of port he was the ranking master of the Lamport and Holt fleet.

Two days later he stood on the bridge and knew his ship was gone. For the first time in his forty years at sea, Captain Carey gave the order to abandon ship. He never had lost a boat before. He stood at the rail and directed the mates as they had the boats lowered away.

He saw two boats loaded with "women and children first"—the first two boats to be put over-side. He saw them capsized and crumpled in the smoking seas.

He saw other boats get away safely with men from the passenger list and members of the crew aboard them.

He saw Lionel Licorish, a gigantic negro from the Barbados, leap into the water and save 16 people by pulling them to the sides of waiting lifeboats. He saw Archibald Bannister dive overside and climb into an empty boat which had gone adrift and then coax and drag into it a full load of 22 persons. He heard women [illegible] He saw human life fade out around him.

And all the time the first ship he had ever lost was settling deeper and deeper into the sea.

At last all were gone. One boat remained by the ship's side, a place in it for Captain Carey and another for Mike O'Loughlin, his chief radio officer.

But those were never taken.

Carey probably was the last man who saw O'Loughlin alive. That gallant officer was last seen still at his key near the master's bridge and the hiss of the radio's spark was still mingling with the hiss of the seas which lapped upon the settling decks. O'Loughlin probably leaped into the sea and was sucked down by the ship.

But this to Carey, 40 years with one line and this his first disaster—was the end.

Bent beneath his tremendous burden, he stood at the rail, the survivors said, as the water reached up for him and his ship.

There were lifebelts and lifebuoys all around him—the things might have saved his life.

But Carey chose the course which many another true deep water sailor had chosen. He leaped into the sea and as the vessel went under water Captain Carey went with it— a dead ship going down with a dead skipper still in command.

SUPERB COURAGE OF RADIO MAN BEYOND PRAISE

New York, N.Y.—The work of Mike O'Loughlin, radio operator of the ill-fated steamer Vestris, places him among the immortal heroes of sea disasters, in the opinion of veteran seamen and radio men.

O'Loughlin, a young Irishman under 30 and little known here was according to survivors of the tragedy off the Carolina coast, one of the last to jump from the liner but he undoubtedly was lost.

Lieut. Elbert C. Rogers communication officer of the naval operating base at Old Point Comfort has this to say of the Vestris operator:

"His courage and his coolness to my mind were superb and beyond any precedent. Had he been less courageous than he was doubtless more than the unfortunate number of lives lost would have been recorded. It is for all of us to revere his memory. I know the navy salutes him."

Chief Radio Man B. N. Harris of the naval radio station at Hampton Roads, a veteran of 16 years said this:

"Only a man who has been in trouble at sea can understand just what O'Loughlin accomplished. There was not a radio operator anywhere who did not realize long before the Vestris went down, just what a magnificent stand this fellow was making. He worked under the worst conditions and came pretty close to accomplishing the miraculous.

"God, how cool and level-headed he was with everything against him. I don't know of anything like him in my experience."

Time elements vary in the stations here as to when O'Loughlin first sent out the SOS signal and when he closed up, but a fairly accurate estimate is that he started a few minutes after 10 o'clock Monday morning and stuck up to his key until water began to pour into the radio room, about 1.20 that afternoon. At no time, say the local operators, was the Vestris man excited or frantic. An indication of this was found in the last message he sent as recorded by the navy, at the naval operating base. Some reports had him making a somewhat heroic finale, but the text shows nothing in the words themselves. The last O'Loughlin message read:

"Abandoning ship. V. A."

In radio shorthand "V. A." means simply "I have nothing more for you."

The name of O'Loughlin will be inscribed on the monument in Battery Park, erected to the memory of wireless men, as one who kept the unwritten law of the sea by sticking to his ship until the end. His will be the fifteenth name on roll of honor. One of the first is Jack Phillips, the radio operator of the Titanic.

United Grain Growers

Next Annual Meeting Will Be Held In Regina

Calgary.—Next year's annual meeting of the United Grain Growers Ltd., will be held in Regina, it was decided at the closing session of the 1928 annual meeting. The vote to hold the meeting in Regina was practically unanimous.

Two delegates from Regina, Murdo Cameron and [illegible] Williamson presented a request from the Regina shareholders that the next annual gathering should be held there. This request was supported by a telegram of invitation from the mayor of Regina and the board of trade of that city.

Next year will be the first occasion upon which the annual meeting of the U.G.G. has been held anywhere else but Winnipeg or Calgary, between which two cities the meetings have alternated for many years.

Cordial votes of thanks to the directors and employees of the company were passed. Expressions of satisfaction were also adopted with regard to the successful results of the past year's business and the present financial condition of the company.

Catherwood Station

Winnipeg. "Catherwood" will be the name of one of the new stations on the recently constructed Rosetown-Perdue branch of the Canadian Pacific Railway, in Saskatchewan. The station is named after Miss Catherwood, of Saskatoon, who brought fame to Canada by her accomplishments at the Olympic games held in Amsterdam this year.

Judge Felix Hebert, French-Canadian, will be first of his race to sit in United States senate. He is Rhode Island's choice.

UNITED CHURCH HARVEST HOME AND THANKSGIVING SERVICES

Harvest Home and Thanksgiving services conducted by the Rev. Dr. Clive Jackson, M.A., B.D., Ph. D., Professor of New Testament Literature and [illegible] St. Stephen's College [illegible] Sunday, November 25th [illegible] at Ketchamoot [illegible] at [illegible] is being held at 12 [illegible] Sunday for the [illegible] other people and those [illegible] distance.

There will be [illegible] music at all services [illegible] the children special [illegible] and a special thank offering. Make special effort. "Come Ye Thankful People, Come!"

J. Thom Gordon, B.A.,
Minister of the [illegible] Church of Canada, Tofield, Alta.

(continued from front page) could make a respectable living. I realize this is not the kind of reading we like to see in print but these conditions must be faced and rectified in order to make this a more prosperous country. It is a country hard to beat and we are justly proud of it, the great trouble is there are so few, a mere handful, to bear the burdens of building up such a vast country, therefore it is all the more reason that conditions should encourage the young folk to stay on the farm rather than migrating to the States or crowding our cities. Also bringing in real farmers whom it is a pleasure to meet instead of the hordes crowding our streets making trouble amongst themselves and filling our police courts the whole country through. Everyone admits that the prosperity of the farmer affects the business system in a very marked degree and it might be a good idea to appropriate the Point [illegible] slogan "Save the farmer and [illegible] save all."

Yours for a progressive west,
F. W. WILDE.
R. R. 2, Tofield.

WANTED.—Ten Cows or Heifers to milk on shares from now for any length of time up to April 1st. Any number up to 10 will be cared for. Anyone intending to take a trip will find this a convenient arrangement. Please communicate with Albert Vougtha, Round Hill, Alberta. 43p.

Chrysler Plymouth Cars

MECHANICAL EXCELLENCE THAT GOES FAR BEYOND ACCEPTED STANDARDS

In new and original engineering features, and in its construction all the way through, the new Plymouth goes so far beyond the accepted standards that it is a revelation even to mechanical experts. Chief among the new developments is the latest and greatest product of the Chrysler engineering staff—the new "Silver Dome" high compression engine. Through the perfection of this great motor the advantages of high compression—greater power, greater climbing ability, greater speed and greater acceleration—can be obtained through the use of the ordinary gasolenes.

LOCAL AND PERSONAL

Born.—To Mr. and Mrs. C. Campbell on November 25th, a son.

An illustrated lecture on "Lutheran Missions" will be given on Sunday evening at 7:30 in the Lakeview Community Hall. Admission is free and you are cordially invited. The Rev. C. Thiem of Edmonton will be the speaker of the evening.

Miss Rita Burnett left on Sunday evening for Vancouver where she will stay with friends and attend school.

Mrs. McInary leaves on Friday for Rumsey, Alta., where she will join Mr. McInary.

The ladies of the local branch of the Eastern Star entertained at bridge, the members of the local Masonic lodge and their wives, on Wednesday evening.

Mr. and Mrs. Ross and family motored to New Sarepta this week.

Mrs. Wood and baby of Toronto, visited at the Beirnes home last week enroute to Calgary to join her husband.

Mrs. Lee spent Tuesday and Wednesday in the city.

Come in and look over our new hats which have just arrived from the East—Lucille's Millinery.

Mrs. Noland, Mr. and Mrs. Stillman and Miss T. Noland spent Tuesday in the city.

Mr. McLaggan, brother of Mrs. Kendall, visited at the Kendal home last week. Mrs. Kendall had not seen her brother for the past 37 years. For the past 30 years Mr. McLaggan has been residing in the Yukon.

AIR MAIL BETWEEN EDMONTON AND WINNIPEG TO COMMENCE DECEMBER 10th

A new mail service between Edmonton, Saskatoon, Regina and Winnipeg will commence on the morning of December 10th and run until late in December as a trial period.

Tofielders using this service may post a letter up to six p.m. at night and it will be in Winnipeg at 4:30 the following day. The letter will be taken to the city by train and from there to Winnipeg the following day. Ordinarily a letter for Winnipeg from Tofield can be mailed up to about 9.30 a.m. in the morning. A letter thus mailed reaches Winnipeg in about 30 hours.

By mailing the letter at night instead of the morning, about 22 hours time is saved on delivery in Winnipeg.

The charges for a letter that would ordinarily cost two cents is five cents. Thus for an extra three cents one gets much faster service.

RED CROSS HAS SUCCESSFUL TAG DAY

On a recent Saturday, the local branch of the Canadian Red Cross Society held a successful tag day.

The girls of the Tofield Canadian Girls in Training, senior group very kindly did the collecting and they were able to collect $63.91 for the Red Cross organization. This was sent in to the Red Cross by Mr. Carey, of the Bank of Montreal, and we understand he received a letter in which the thanks of the Red Cross are sincerely tendered to the girls for their valued services.

LARGE NUMBER ATTEND BOXING BOUT

On Thursday of last week at the Variety Theatre, a boxing bout was staged that proved to be of much interest.

The principals, Kid Mikota and Mel Woods were both well known to local fight fans. Kid Mikota hails from Mundare and Tofielders know Mel as a local product.

Prior to the main bout, some preliminaries gave the crowd an appetite for the more serious stuff that was to come.

A great deal of fun was created by the bout between Sledgehammer Jack and Cast Iron Bill.

The main bout, a six round encounter was a real battle, both men being in the ring to obtain the decision.

The referee, C. Hobson was a busy man, and at one time, Constable Carr warned the contestants to adhere to the rules of exhibition boxing.

Mel Wood had an edge over his opponent, seeming the huskier of the two and was declared winner by the referee.

KINGMAN

The Ladies Aid will have their annual sale in the Lutheran Church on Thursday, Dec. 6th. At 8 p. m. lunch will be served.

Mrs. E. Erickson and Mr. and Mrs. W. Jardie motored to Camrose Wed.

Mrs. Gust Bard is taking treatments for diabetes in Camrose.

Mr. and Mrs. G. Tollefson and son moved to Cold Lake on Thursday, where they will make their home. Their farm has been rented out to Edwin Tollefson.

O. Bray and C. Calder were business visitors in Edmonton on Wednesday.

A new cement shed is being built by the Manning Sutherland Lumber Co. at the local yard. The work is being done by Ray Melvik and U. Syvrud.

Mr. and Mrs. W. Wildman, Mr. and Mrs. I. Wildman and W. Jardie motored to Edmonton on Thursday.

Mr. and Mrs. T. Grahn also visited in Edmonton on Thursday.

Mrs. O. Bray and Mrs. E. Erickson visited with Mrs. W. McIntosh on Thursday afternoon.

Mr. and Mrs. E. Erickson and Mr. and Mrs. A. Haleeth were the guests of Mr. and Mrs. John Anderson on Sunday.

Mr. and Mrs. O. Thompson and Mrs. G. Welsh motored to Clyde on Thursday.

The Holroyd Orchestra from Camrose is giving a novelty dance in the Kingman Hall on Friday, Nov. 30th.

Mr. C. A. Calder is a Calgary visitor this week.

Mrs. Kelley of Calgary is spending a few days with her sister Mrs. Asp.

F. E. Linder of Chicago will hold a Bible Lecture in the Kingman Hall on Sunday December 2nd at 3 o'clock.

LAKE SHORE

Mr. and Mrs. H. Eaton were Sunday visitors at the Rowe Phillips home.

On Tuesday afternoon of last week Mrs. Murray entertained a number of ladies from Tofield at bridge. Four tables played and Mrs. Hammond was successful in winning the first prize while Mrs. Pincott got the consolation.

In the evening she was hostess to a number of friends and neighbors from the country. Again their was four tables played and Mrs. Walker and Mr. T. E. Seale won first prizes while Mrs. Secord and R. C. Phillips took the consolations. Mrs. Murray served a dainty lunch on both occasions and a most enjoyable time was had by all.

Mr. and Mrs. R. C. Phillips moved to their new residence on Monday and Tuesday of this week.

Little Malcolm Murray was taken quite ill with bronchitis on Thursday night of last week but is much improved at present.

Mr. S. Bethel and son Hubert visited at the Wood home on Sunday.

Mr. and Mrs. J. H. Johnson spent Thursday evening visiting at the Wood home.

Mildred Bethel spent a day or two last week with her sister Mrs. John Wood.

LOCAL AND PERSONAL

A farewell party was held at the home of Mrs. C. Hobson on Saturday night last in honor of Miss Rita Burnett who was leaving for Vancouver the following evening. There were a number of young people present who played games and enjoyed themselves with music. During the evening the guest of honor was presented with a signet ring by her young friends, who while regretting her departure, wished her every success in her new home.

The ladies aid of the United church held a very successful bazaar and sale of home cooking on Saturday afternoon last. There was a good attendance, and the ladies wish to thank the public for their loyal support.

TO RENT.—Dwelling, 5 rooms, natural gas fixtures; west of Mr. Johnson's residence.—Apply to A. J. H. McCauley. tf

KETCHAMOOT

A large congregation was present on Sunday to hear Dr. Jackson of Edmonton. Special music was furnished by Martin Lawson on the violin. Mrs. John Brown sang a solo. The school house was decorated with many beautiful roses, the art of Miss Lillian Carlisle.

Mr. and Mrs. Harold McMullen have rented the Owen home from Jason Henderson, where they will reside this winter.

Mr. and Mrs. John Brown were in Edmonton last week, bringing home a six week old baby girl to live at their home. She will answer to the name of Conne Agusta.

Mr. and Mrs. Marshall Mitchell and family were Sunday guests of Mr. and Mrs. Chester Coombes.

Misses Mildred Lawson and Viola Lev, Messrs Roy, Lorne and Hew and Lee motored to Edmonton on Wednesday returning home the same evening.

Mrs. Henderson, daughters, Mrs. W. A. Mitchell and Mrs. B. Wildman and son Jason motored to Camrose to visit Mr. Wildman.

A government poultry inspector, has been busy inspecting different flocks through our district the last of the week and the first of this week.

Mr. and Mrs. C. A. Ingram, Mr. and Mrs. G. W. Sears and sons Stanley and Charley were guests of Mr. and Mrs. Chas. Whillans for dinner Sunday evening.

Mr. B. Wildman is a patient in the Camrose hospital. He underwent an operation last week.

Mr. and Mrs. Jesse McMullen and Emily, Paul and Harold McMullen and Desmond Gladwin were Sunday guests of Mr. and Mrs. A. McMullen.

Mrs. Geo. Lawson spent a few days in Edmonton last week.

Mrs. Frank Hull is taking medical treatments in Edmonton. Miss Hannah Jensen is caring for her.

Mr. A. F. Schultz loaded a car of wheat on Tuesday.

Mr. and Mrs. J. H. Ingram, Mr. and Mrs. Hansen motored to Camrose Tuesday of last week.

Mrs. Chas. Whillans entertained her Sunday School Class of boys [illegible] Thursday evening. The evening was spent playing games, boxing etc. With a delicious lunch the boys all reported a good time. The boys in the class who were present were [illegible] and Oliver Schultz, Jimmie Ingram, Charley Sears, Stewart Hart, Donald and Eugene [illegible]. Visitors were Ivan F[illegible], Lafe Foshaug, Stanley Sears and Mr. and Mrs. Carlisle.

LINDBROOK

A surprise party was sprung on Miss [illegible] Lundgren by her friends on the occasion of her birthday last [illegible] evening. Several autos drawing up and soon the younger set were [illegible] The others played cards until the skaters returned. [illegible] was served. [illegible] determined [illegible] the [illegible] of help from the fair sex. Amongst the [illegible] was a birthday cake with the requisite number of candles denoting the lady's age (but we [illegible] that [illegible] form). Then whilst some [illegible] the others danced to the strains of the violin played by Mr. Frank Kortuman. Everyone enjoyed [illegible] and wish Viola many [illegible] as jolly [illegible]

[illegible] that the Hastings Lake [illegible] party sponsored by Beville School [illegible] aid of their Junior Red Cross Christmas funds was a "peach" both socially and financially.

[illegible] announce that the infant son of Mr. and Mrs. W. Fontaine (nee Miss Grace Lepine) is doing well and we hope will soon be A1 again.

Mr. J. Bailey has purchased the Pons and Sherlock place and will shortly move onto same.

Mr. P. M. Holland is at present visiting friends in Edmonton. We have no news from the city police as yet so evidently he is behaving himself with his usual decorum.

Westlake School is giving a box social on December 7th, so keep that date open everyone.

SOME OTHER PEOPLE

The turn of the Chinese policeman's lip seems to indicate that he could snarl out a very nasty "Where'd you think you're going?" if he thought you would understand him, but passengers of the Canadian Pacific World Cruise last year found him very courteous.

Some time before the globe-trotters met the man with the pudding-basin head gear they were greeted at the entrance of the famous Stadium at Athens by the fiery-mustachio'd guard who looks like Harry Lauder in a combination of the worst features of the Highland the [illegible] and the [illegible] advertisement national costumes.

But the Japanese practising at the saxophone [illegible] takes the cake when it comes to strange head gear. A put [illegible] about "sweater" and "wicked-looking" but not that [illegible] The [illegible] representative of the fair sex evidently believes [illegible] and economy! She has made her "robe de style" serve for her young son too, and her head dress! Permanent waves have probably been amongst the old family secrets handed down from mother to daughter for centuries in her country.

Taking them altogether they are a fair sample of strange sights to be viewed on a trip round the world.

The Canadian Pacific has organized six winter cruises this year: Round the World by the "Empress of Australia", South America, Africa by the new 20,000 ton "Duchess of Atholl", Mediterranean by the "Empress of Scotland" and three cruises to the once happy hunting grounds of the buccaneer—the West Indies.

Modern Aleddin's Lamps

The average man and woman realises that the world is making progress at an ever accelerated pace; that in the space of a few brief years greater improvements and more wonderful inventions are made to add to the comfort and pleasure of life than were recorded in many centuries of the past. There was a time when people received news of any great innovation with extreme scepticism, and ridiculed the idea of such things being possible. Today the world is prepared to accept almost anything as possible.

However, it is the occurrence of some anniversary which actually forces upon us a realization of just how great and how rapid is the progress being made by the human race. Such an anniversary came last October when recognition was paid to Thomas A. Edison, in commemoration of the golden jubilee of what is generally accepted as being the greatest of his many great inventions, the incandescent electric lamp.

The tale of Aladdin and his wonderful lamp has delighted readers, youthful and adult, for many generations, but the accomplishments of man in the world of electricity following Edison's invention of his marvellous lamp, and the series of amazing inventions since then, and all more or less directly connected with Edison's discovery, in many respects surpass the most vivid imaginings of the Arabian Nights tale.

In this age of electricity, with our streets, homes and places of business lighted by the invisible current, our machinery operated by it, our homes heated by it, with every conceivable household device dependent upon it, with it as the agent to flash our news and messages around the world, and because of which we are enabled to talk under the oceans and through the air, it becomes well nigh impossible to imagine a world lighted by the old kerosene lamp and tallow candle. Yet it is only fifty years since the world so laboured in comparative darkness.

Had Edison, the wizard of Menlo Park, not succeeded in his effort to produce the incandescent lamp, would the world today enjoy all the pleasure and profit of the radio, which depends upon the use of the vacuum tube? Would the health giving rays of the quartz lamp be conferring benefits upon a stricken humanity? No. To Thomas A. Edison the world is forever debtor for his great contribution to humanity's welfare and the world's wealth.

Fifty years! Not equal to the average span of a man's life. Yet Edison within that space of time has given us not only the incandescent lamp and all that has followed that initial invention, but to him belongs the credit of capturing the human voice upon a cylinder of wax, thus giving us the gramaphone. It is thanks to Edison that we are able to produce pictures in which people move as they do in actual life, an invention that is profoundly affecting the life and thought of the world. And now we have the talking movies, the result of a combination of two of Edison's original inventions.

Within an even shorter space of time the automobile has not only been brought to its present state of efficiency and power, but it has been adopted all over the world, completely revolutionizing our manner of living and our mode of travel, and enormously broadening our knowledge of the world in which we live. Within the short space of a decade we have witnessed the aeroplane take its place as an accepted instrument in our modern life and, even on these Western prairies it is now a daily commonplace to witness these new messengers winging their speedy way from city to city carrying passengers, mail and express.

Science and invention is thus conferring upon this generation new wonders and new facilities of power, greater opportunities for pleasure and profit or ill-used greater possibilities for catastrophe. With all the powers now being placed so rapidly under his control man must continue to mount higher in intelligence and in all those moral attributes which alone will make him fully capable of rightly using the great possessions entrusted to him, and the number and variety of which increases almost hourly. For it must be remembered that in the final analysis the use or abuse, the deriving of good or the suffering of evil arising out of these wonderful scientific achievements depends upon man himself and the attitude he takes towards life and all its realities and possibilities.

Woollen Mill For B.C.

British interests have recently established a plant for the manufacture of worsteds at Victoria, British Columbia. This plant has 6,400 spindles and promises to prove an important industry for the capital of British Columbia.

Milk For Dairy Factories

The approximate amount of milk required to supply dairy factories in Canada during 1926, based on the quantity of milk delivered and the equivalent in milk of the butter fat content of the cream delivered, was 7,119,940,782 pounds.

In England 2,500 automobiles are being delivered to new owners every week.

Seven coal mines in Ireland are being abandoned.

The Only Alternative

After walking out with Jean for some months Sandy ventured to propose to her, and was accepted. Questioned by his prospective mother-in-law whether he was in a position to keep a wife, Sandy confidently replied in the affirmative, placing the matter beyond all doubt by volunteering this information: "There's hardly a mornin' but what I leave some o' ma parritch; in fact, if I dinna get a wife sune I maun get anither pig."

Aviation In Canada

Aviation is in a healthier condition in Canada than at any previous time in its history. Development has not been rapid nor has it been forced into uneconomical channels. Every effort has been made to keep it on sound lines, as far as possible self-sustaining and of direct value to the country as a whole.

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour.

Alkali kills acid instantly. The best form is Phillips Milk of Magnesia, because one harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save a great many disagreeable hours.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

In Memory Of Colonel McCrae

Oak Tree From Georgia Planted On McGill College Campus

During Armistice Day a two-year old oak tree was planted on the McGill campus, at Montreal, in memory of Col. John McCrae, author of "In Flanders' Fields." The tree was sent by the State Teachers College, of the University of Georgia, on whose campus a similar planting took place at the same hour. It is noteworthy that the best known and most beautiful poem inspired by the Great War should have been written by a Canadian, and the action of the Georgia College is also a friendly gesture which will be much appreciated on this side of the border.

RHEUMATIC VICTIMS

Can Find Relief Through Building Up the Blood

Pain is the symptom of rheumatism that every victim recognizes and he generally attributes the trouble to cold, damp or changeable weather. But doctors know that thin blood is a marked characteristic of the trouble. Trying to cure rheumatism while the blood remains thin and poor, is an impossible task because there is nothing to build on. A tonic like Dr. Williams' Pink Pills that enriches the blood and frees it from poisonous impurities soon banishes rheumatism from the system. So long as the blood is maintained in a healthy condition the trouble will not return. This is not theory. It has been proved in hundreds of cases, here is one:—Mr. J. W. Rose, R.R. 2, Albany, P.E.I., says:—"For some years I was a great sufferer from rheumatism and although I tried a great many remedies, I did not get any permanent relief until after I took Dr. Williams' Pink Pills. The trouble was located mostly in my shoulders, and at times was so bad that my right arm was almost useless. Of course I suffered much pain and great inconvenience. My attention was directed to Dr. Williams Pink Pills through an advertisement in our newspaper, and I decided to try them. I took the pills according to directions with the result that the rheumatism has left me, and I have never had a twinge of it since. If this meets the eye of any rheumatic sufferer my advice is try Dr. Williams Pink Pills at once."

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Our Great Agricultural Wealth

Canada the Best Country In the World For Farming

"I can say without any hesitation, that Canada is the best country in the world for farming at the present time. It has greater possibilities, and there are indications that there is greater stability and prosperity than can be found in any other country," said Dr. E. S. Archibald, director in charge of the Dominion Experimental Farm at Ottawa, addressing the Young Men's Canadian Club at Montreal. Dr. Archibald said the crops in Canada are worth $1,167,000,000, which alone was equal to the fisheries mines and forests all put together, dairy produce reached $300,000,000 which was equal to the total of the fisheries and mines; wheat exports $422,000,000, or a third of the country's total exports and that there were over 235,000,000 acres capable of producing, but not occupied. He estimated the Dominion's agricultural wealth at $7,820,000,000, and that at least $3,800,000,000 of capital was invested in agriculture.

Aerial Photography

Work Of Government Fliers Practically Completed For This Season

Aerial photography for map making purposes by Government fliers has been practically completed for the year according to Wing Commander J. L. Gordon, R.C.A.F. Eight detachments of two planes each have been operating throughout the Dominion for several months. Three machines operating at St. Donat, Quebec, have already returned to Ottawa, while the remainder are expected within the next few weeks. Aerial surveys have been made throughout the Maritimes, in Northern Ontario and as far north as Fort Smith in the Northwest Territories. Preliminary maps of the various localities covered will be completed with data gathered this year.

Gypsum Products

Probably the most important developments in the gypsum industry in Canada have taken place in the products manufactured from gypsum. A number of years ago a small proportion of the gypsum mined in Canada was calcined in this country. In 1927 approximately 192,000 tons were calcined and made into wall plaster, gypsum wall board, gypsum blocks, and insulating material.

More than 1,000,000 bags of coffee will be raised in Venezuela this year.

Minard's Liniment for Grippe.

THE EASY WAY

Thousands need cod-liver oil to increase vitality and build up resistance.

Scott's Emulsion

is the easy and pleasant way to exact the most out of cod-liver oil to reinforce your body with strength to build resistance.

Scott & Bowne, Toronto, Ont.

Effect Of Sunlight On Dairy Products

Particularly Detrimental On Milk, Cream and Butter, Says Authority

Dr. E. G. Good, Chief of the Division of Dairy Research, of the Federal Department of Agriculture, states that it is a well established scientific fact that direct sunlight has a detrimental effect on the flavor of practically all dairy products and especially on milk, cream and butter.

This statement was given by Dr. Hood, when questioned regarding the practice of housewives using window-sills as refrigerators during the autumn season when they have stopped taking ice. From the standpoint of keeping the products cool, the window-sill answers the purpose, but if the window is located where direct sunlight can reach it, dairy products should never be kept there.

Milk, cream and butter when exposed to direct sunlight quickly develop abnormal flavors which are generally of a metallic or tallowy nature. This tallowy flavor is caused by the action of sunlight on butter-fat and has been known to develop to a very noticeable degree after an hour or so. In the case of butter, the fat turns to a very light or white color, and the same change takes place in the fat in milk or cream whether it is homogenized or not.

Dr. Hood states that if consumers find that milk or cream has become tallowy in flavor after keeping it for twenty-four hours, they should not blame the dairy by whom they are supplied, if these dairy products have been kept in a window exposed to the sun. This flavor can be prevented if milk and cream is protected from direct sunlight by wrapping the bottles in a piece of heavy brown paper or by placing them in a wooden box made for the purpose, when it is necessary to keep them outside. But a cool shaded corner in the cold storage of the cellar is always a safe place to keep dairy products at this time of the year, when outside temperatures are generally lower than those obtained in the average household refrigerator.

Recipes For This Week

(By Betty Barclay)

WILD WEST RELISH

- 3 dozen sweet cucumber pickles sliced.
- 1 pound puffed raisins.
- 1 teaspoon whole allspice.
- ½ ounce stick cinnamon.
- 2 cups brown sugar.
- ½ ounce celery seed.
- Vinegar to cover.

Place all ingredients, except celery seed, in a porcelain lined kettle, cover with vinegar and cook one-half hour over a moderate flame. When cold remove cinnamon, add celery seed, put in sterilized jars and seal as for canned fruit. This will make 2 quarts or more of relish, depending upon size of pickles used.

RED BEANS AND RICE

(A Famous Creole Combination)

- 1 pound of red beans.
- 1 teaspoon salt.
- 1 teaspoon butter.
- 1 small onion, minced.
- ¼ red pepper.
- Boiled rice.

Soak the beans over night, or for at least six hours. Then simmer for four hours or more in 2 full quarts of water. The beans will then be quite soft. Add the salt, butter, onion, red pepper, and continue the simmering process for two hours longer. Serve with boiled rice and the combination is not only good but particularly well balanced. A pound of salt meat scalded, is often substituted for the above seasoning, excluding the onion. The minced onion entirely disappears in the simmering and makes a delicious seasoning.

Need Standard Grain Crop

Hon. W. R. Motherwell, Minister of Agriculture, addressing the Canadian Club of Fort William, stressed the need of western farmers raising the standard of grain which they produce, and reducing the varieties of wheat from 30 or 40 now grown to three or four kinds, which should be regarded as standard and be the only kinds admitted to No. 1 grade.

South Africa Buying Certified Seed Potatoes

Varieties Sent From Canada Last Year Gave Good Results

Trade with South Africa in certified seed potatoes from Canada is being promoted, another tribute to the excellence of our spuds.

Last spring small quantities of Irish Cobbler, Green Mountain and Dooley varieties were shipped to South Africa from Eastern Canada. They arrived in Capetown in excellent condition and gave good results there.

The South African growers preferred Dooley as more suitable to their special requirements. This season they are testing, at their own request, other varieties—small sized seed, of two to three ounces, from certified crops.

The British Columbia inspector is obtaining for this purpose quantities of two to three ounce seed of the following varieties:—Up-to-date, Sir Walter Raleigh, Burbank and Epicure. As there was no crop of certified Epicure in British Columbia this season Wisconsin Pride and Bliss Triumph were substituted for that variety. Results in South Africa from this British Columbia certified seed will be closely watched and may lead to the development of a worth-while trade.

Long Standing Asthma. Many have suffered so long from asthma and have tried so many so-called remedies they think that there is no real help for them. They should read the letters received by the manufacturers of Dr. J. D. Kellogg's Asthma Remedy from hundreds of cases once as desperate as their own. Even in long-neglected cases this famous preparation brings prompt help.

Model Town For Alberta

New One To Be Laid Out Near Lethbridge

The first new model town in Alberta that Horace Seymour, the provincial town planning expert, will have to lay out will be Wallace, near Lethbridge. His advice in a plan for the town has already been requisitioned.

Wallace is a brand new town that is to be built in connection with a coal mining development in the Lethbridge northern irrigation district. Premier Brownlee is advised that the Mortimer Davis coal interests of Montreal have begun a large development there with plans so far advanced that definite steps are about to be taken for laying out and building a town. Mr. Seymour will take up the case as soon as possible.

Canadian Gold Production

If gold production in the United States continues to decline in the fairly steady way it has done since 1915, Canada with its yearly increasing production will in a very few years be the second largest gold producing country in the world.

"How is it that gas kills so many people every year?"
"Because they step on it."

Teacher: "What is an asset?"
Little Muriel: "A little donkey."

RUG YARN

$1.12 per pound up. Twenty-one samples free.—Stocking & Yarn Mills, Dept. 17, Orillia, Ont.

All-Red Air Route

Important Developments In Inter-Empire Communications Expected Soon

An all-red air route around the world is seen as a strong possibility in the near future by J. A. Wilson, controller of civil aviation, who recently returned from a sojourn of two months in the British Isles and Europe. "Enormous developments in inter-Empire communication may be expected within the next few years," Mr. Wilson said. "While efforts so far have been to some extent concentrated on flights to India and Africa, the eyes of British flyers are turning towards Canada." The R-100 and R-101 will shortly be ready for their trial trips, and in the early spring would be ready for trans-Atlantic trips to Montreal. Mr. Wilson viewed both of the enormous dirigibles and discussed the contemplated flights with air officials in England.

Certain morbid conditions must exist in the stomach and intestines to encourage worms, and they will exist as long as these morbid conditions permit them to. To be rid of them and spare the child suffering, use Miller's Worm Powders. They will correct the digestive irregularities by destroying the worms, conditions favorable to worms will disappear, and the child will have no more suffering from that cause.

Hemp Growing In Manitoba

Hemp growing is gradually assuming promising proportions in Western Canada. Double the acreage of 1927 has been devoted to hemp growing at Portage la Prairie, and the yield is very good. The Manitoba Cordage Company Limited reports an increasing demand for its products.

Minard's Liniment for Chapped Hands.

Trees Used In Making Paper

Spruce, balsam, hemlock, and poplar together made up over 87 per cent. of the total wood used by the pulp and paper industry in Canada in 1926.

ASPIRIN

To break a cold harmlessly *and in a hurry* try an Aspirin tablet. And for headache. The action of Aspirin is very efficient, too, in cases of neuralgia, neuritis, even rheumatism and lumbago! And there's no after effect; doctors give Aspirin to children—often infants. Whenever there's pain, think of Aspirin. The genuine Aspirin has Bayer on the box and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

THE MERCURY, TOFIELD, ALBERTA

WORLD HAPPENINGS BRIEFLY TOLD

Plans are being made for construction next spring of an airport at Chicoutimi, Que., for land and seaplanes.

The financial collapse of Russia is imminent, according to a ministerial statement in the British House of Commons.

A tri-city air service between Seattle, Victoria and Vancouver and a service between Seattle and Alaska will be started next April by the Union Air Lines.

By the end of this year it is expected that the British Columbia government will have prepared for Lord Lovat a settler scheme, Premier Tolmie says.

The Graf Zeppelin will make no second trip to America this year. The Zeppelin works in announcing this, said that the necessary supply of gas was not available.

Major Yochio Inouye, counsellor at the Japanese embassy at Buenos Aires, who was drowned in the sinking of the Vestris, has been posthumously promoted to lieutenant-colonel.

The Canadian Memorial Chapel, a sanctuary in memory and in honor of the seventy thousand Canadians killed in the war, and erected in Vancouver through the efforts of Lieut.-Colonel the Rev. G. O. Fallis, B.D., C.B.E., has been opened there.

It Will Relieve a Cold.—Colds are the commonest ailments of mankind and if neglected may lead to serious conditions. Dr. Thomas' Eclectric Oil will relieve the bronchial passage of inflammation speedily and thoroughly and will strengthen them against subsequent attack. And as it eases the inflammation it will usually stop the cough because it allays the irritation in the throat. Try it and prove it.

Consolidated Wheat Pools

Have Marketed Huge Amount Of Grain During First Five Year Record

During the first five-year period the consolidated pools of the three western provinces have marketed approximately 750,000,000 bushels of grain, coarse grains included, with a total turnover in money exceeding $1,100,000,000. During that time the three pools have accumulated through elevator deductions and commercial reserves, which belong to the grower, over $20,000,000.

Check Colds with Minard's Liniment.

British scientist says he has discovered that what goes up need not necessarily come down. Old stuff. Did he never hear of the cost of living?

It's just as important to know your way out as to know your way in.

Short of Breath Smothering Feelings Choking Sensation

Mrs. H. Day, Dartmouth, N.S., writes:—"For over a year I was troubled with smothering spells and shortness of breath, and it was impossible for me to walk, even a short distance, because of the choking sensation which followed.

After trying many treatments, in vain, I at last decided to try

and in a surprisingly short time they did me much good."

Price 50c per box at all druggists or dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Dairy Industry Flourishing

Outlook Never Appeared Brighter Than At the Present Time

"The outlook of the dairy industry in Canada never appeared brighter," says Dr. J. A. Ruddick, commissioner of the dairy and cold storage branch of the Department of Agriculture. "The value of our dairy production this year will be around $285,000,000. We have approximately 3,900,000 milch cows in Canada. They are in every province although Ontario and Quebec have the most. While the cheese production is not a record one this year, it is very high. About 100,000 boxes more will be exported in 1928 than in 1927. Canada produced the most milk in its history this year.

WHEN YOUR BABY CATCHES A COLD

In spite of all precautions little ones will take colds—especially during the changeable days of our Fall season. When the first symptoms appear—sneezing, redness of the eyes, running nose—Baby's Own Tablets should be given at once. They will rapidly break up the cold and prevent more serious complications.

Mothers who keep a box of Baby's Own Tablets in the home always feel safe. In fact they are like having a doctor in the house. They are a gentle but thorough laxative that act on the stomach and regulate the bowels, thus driving out constipation and indigestion and relieving the baby of the many childhood ailments which are the direct result of a clogged condition of the bowels or sour stomach. They are absolutely safe—being guaranteed to contain no drug at all harmful to even the youngest babe. They cannot possibly do harm—they always do good.

Baby's Own Tablets are sold by all medicine dealers or will be sent by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Typically Parisian

A smart model of printed sheer velvet with ecru lace used for surplice closing vestee. A clever plait arrangement in three-piece wrap-around skirt, forming cascading drape, contributes to the animation of line, while jabot revers falling from shoulders, add charmingly to the effect. Silk crepe, plain velvet, velveteen, crepe satin, canton-faille crepe and sheer woolen are chic for Style No. 156. Pattern can be had in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. The 36-inch size requires 3⅞ yards of 40-inch material with ¼ yard of 27-inch material for separate vestee. Price 25 cents, in stamps or coin (coin preferred). Wrap coin carefully.

DISTINGUISHED VISITORS TO CANADA

Sir Austen Chamberlain, British secretary of foreign affairs, who recently made a tour of Canada with members of his family. Sir Austen and Lady Chamberlain were decorated together by his majesty the king for their services in the completion of the Locarno peace pact. Recently Sir Austen's health has been the cause of considerable anxiety and this journey apparently had its effect as the foreign secretary reported that he felt "quite well." These two pictures were taken in Toronto. (1) Miss Diane Chamberlain; (2) Sir Austen.

Windolite

Improved Glass Substitute Is Now Available In Canada

"WINDOLITE"—the English unbreakable improved glass substitute, which is now so popular in the British Isles, is being marketed in Canada by John A. Chantler & Co., Limited, 49 Wellington St. West, Toronto, Ontario.

Severest tests carried out in England, showed that "Windolite" is remarkable, not only for it's unbreakable qualities and ultraviolet ray penetration, but it was found that "Windolite" will stand up under usage that would wreck many other glass substitutes.

The fact that "Windolite" is translucent and allows 100 per cent. sunlight with the life-giving ultra-violet ray to enter, opens a wide scope of practical uses, the importance of which will at once suggest themselves.

Windolite consists of transparent solution, reinforced with fine specially galvanized wire mesh, which results in a substance that is completely waterproof, airtight, and dustproof. It is flexible and unbreakable, and may be readily cut with the ordinary pair of scissors, to any required size. It therefore, forms a practical substitute for glass, and where transmission of ultra-violet radiation is required to promote health and growth, it is ideal. These beneficial rays are vital to young chicks, laying hens, dairy herds, and live stock, and also is economical for sunrooms, nurseries, verandahs, hospitals, schools, and for hot beds and plant coverings. It is light but strong.

Quoting from some British authorities, they have the following to say of "Windolite"—A well-known poultry breeder, member of P.B.A., N.U.P.B., and National Farmers' Union, whose farm is a Certified Breeding Station, under the Ministry of Agriculture and Fisheries, says of Windolite: "I have proved to my satisfaction the benefits obtained from the use of Windolite in my brooder house. I replaced the ordinary glass on one side only with your substitute, and although it has been in use only a matter of a week or ten days, the results are very marked. The chicks on this side are doing very much better than those of the other. I have kept both sides indoors for the purpose of noting the results."

"British Medical Journal," April, 1923.—"Windolite has been used by poultry keepers and market gardeners as a substitute for glass, but it is now suggested that as it allows ultra-violet rays to pass much more freely than ordinary glass, it may be of use in medicine. It has been examined for us and it is found that as claimed, it lets the ultra-violet rays through freely."

Bishop's Castle, Shropshire:—"I shall be pleased if you will send me as quickly as possible—I have had a frame in use for nearly three years, and it has proved very satisfactory." (Signed) C.W.D.

This effective glass substitute will no doubt become very popular with stock breeders, dairy men and poultry breeders. It should also be a boon to mining camps and prospectors who cannot pack glass successfully over rough trails without breakage. It will stand up under rough treatment, and has the added advantage of being flexible.

Cuts and Bruises Disappear.—When suffering from cuts, scratches, bruises, sprains, sore throat or chest and any similar ailment, use Dr. Thomas' Eclectric Oil. Its healing power is well-known in every section of the community. A bottle of Dr. Thomas' Eclectric Oil should be in every medicine chest ready for the emergencies that may always be anticipated.

Volcanic Dust

Volcanic dust found in Saskatchewan and British Columbia is used for purposes similar to ground pumice, particularly in the manufacture of cleansers and scouring powders, and in some instances as a substitute for fuller's earth in the refining of hard oils and fats.

"This is Mrs. Warrior's third husband, isn't it?"
"Yes. She's two down and one to go."

Minard's Liniment for Asthma.

Press Best Medium For Reaching Public

Sir Charles Higham Extols Benefits Of Newspaper Advertising

Sir Charles Frederick Higham, author and publicist, speaking on "Scientific Distribution," said there was no advertising medium so useful as the press, and none that was responded to with such speed and profit. Newspaper advertising paid better today than it ever did. Most of the goods now consumed by the public were sold under a branded name, and the most economical method of distributing these was by press advertising, properly done. The dealer would always stock an article which was nationally advertised in the daily press, because he was convinced, first that the article must be good or it would not be advertised at all, and, secondly, that the public would respond to it because they knew that they were getting good value for their money.

The Government had found newspaper advertising extremely valuable in increasing the sales of British goods through the Empire Marketing Board, Sir Charles said.

Milk For Dairy Factories

The approximate amount of milk required to supply dairy factories in Canada during 1926, based on the quantity of milk delivered and the equivalent in milk of the butter fat content of the cream delivered, was 7,119,940,782 pounds.

Corns disappear when treated with Holloway's Corn Remover without leaving a scar.

Mail handled one day in Chicago totalled 6,800,000 pieces.

Don't eat fast, if you are thin. Don't eat. Fast if you are plump.

SUNDAY SCHOOL LESSON

PAUL BEFORE HIS JUDGES

Golden Text: "I was not disobedient unto the heavenly vision."—Acts 26. 19.

Lesson: Acts 24.1-26.32.
Devotional Reading: Psalm 26.1-6.

Explanations and Comments

Paul Before Felix and Drusilla, 24. 24-26. Some days later, Felix sent for Paul that he and Drusilla might hear him in regard to his faith in Jesus Christ. Drusilla was a Jewess, the daughter of Herod Agrippa I (whose death is narrated in Acts 12. 20-23).

Paul talked about matters pertinent to the conduct of Felix: righteousness—"Felix supposed he might perpetrate with impunity any kind of villainy," said Tacitus; self-control—Felix had induced Drusilla to leave her husband and live with him; and the judgment to come—Felix had murdered Jonathan, the high priest and had committed many other sins. Paul talked so effectively that Felix trembled. Compare John the Baptist's talk with Herod, Mark 6.14-29.

"Fear is not faith, but it may lead to faith, or it may lead to hardening."—Alexander Maclaren.

Although Felix trembled, his only answer to Paul was, "Go thy way for this time; and when I have a convenient season I will call thee unto me." "Felix doesn't think that he is deciding the question that Paul has raised. He thinks that he has postponed the decision, but he hasn't. For indecisive procrastination is one of the most conclusive methods of decision that mankind knows. Life's processes do not call a halt simply because we have not made up our minds. If you have a garden-plot you may suppose that you have three choices, either to have flowers, or to have weeds, or to be hesitant, uncertain, undecisive. But in fact you have only two choices. If you choose flowers you may have them; but if you decide to be indecisive, nature will decide for you—you will have weeds. The processes of God's eternal universe do not stop to wait for us to make up our minds. To make flowers grow means positive decision. And to become a Christian requires positive decision. You must make up your mind to it. And if any Felix endeavors to be indecisive, he is not really indecisive. His life processes still go on without Christ because he has not positively decided for Christ."—H. E. Fosdick.

New Source Of Electricity

River Mud Is Attracting Attention Of Scientists In Europe

Scientists of Europe are taking an interest in reports that mud is to be the source of electrical supply at a power station being erected at Karnap, Germany. The mud will be extracted from the River Ems. It is said to contain a combustible material that by a new method will be extracted, dried and then used for fuel for the works. The heat value is declared to be equal to that of lignite. Investigators declare that the new process is of international importance because there are many rivers in coal districts throughout the world, the mud of which could be treated in the same manner.

Canada ranks third in importance as a source of metals of the platinum group, after Russia and Colombia.

Are You Ready

When your Children Cry for It

Baby has little upsets at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—what most physicians would tell you to do—give a few drops of plain Castoria. No sooner done than Baby is soothed; relief is just a matter of moments. Yet you have eased your child without use of a single doubtful drug; Castoria is vegetable. So it's safe to use as often as an infant has any little pain you cannot pat away. And it's always ready for the cruelier pangs of colic, or constipation, or diarrhea; effective, too, for older children. Twenty-five million bottles were bought last year.

Branch Line Construction

More Than 330 Miles Of New Lines and 71 New Stations Built By C.P.R. In Past Season

The building of more than 330 miles of new branch lines, with 71 new stations and shipping points sums up in brief the construction programme of the Canadian Pacific Railway in Western Canada during the past summer, according to D. C. Coleman, Vice-President, Western Lines. By this means hundreds of farmers had been brought much closer to transportation facilities, and thousands of acres of rich agricultural land had been made much more attractive from the settlers viewpoint. The construction programme has gone forward rapidly, and as a consequence a considerable amount of this year's crop is being marketed over the new trackage, Mr. Coleman pointed out. A feature of the branch line construction was found in the rapidity with which settlement followed the laying of the steel. Country elevators to the number of approximately 300 were already built or in the course of construction, while in many cases towns were beginning to spring up around the newly erected station buildings.

To avoid the run-down feeling approach crossings carefully.

WINDOLITE

The Improved Glass Substitute

MADE IN ENGLAND

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold, will not crack or chip, cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 125 to 170 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer, Nature's universal disinfectant and germ destroyer as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass that it freely admits the Ultra-Violet rays and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, ... the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

Use WINDOLITE and let

PROPOSED EDUCATIONAL CHANGES

THE HON. Perrin Baker, Minister of Education has publicly announced his intention to suggest certain changes in the Rural School Act at the next session of the Alberta legislature. His suggestions in brief as outlined by the Vegreville Observer, following a meeting at that point, are as follows. :

1. The retention of the present rural school board, but it is to be shorn of practically all its powers so far as the teaching part is concerned.

2. Setting up large Divisions over which a Divisional Board will exercise jurisdiction, engaging teachers, paying salaries, apportioning taxation and having a general supervision over all schools within its territory

3. As an alternative; the creation of still another Board, to be known as the General Board, providing that the whole of the province is brought under what may be called a "Blanket Educational Tax." In this event, the General Board will assume some of the authority of the Divisional Boards, particularly as regards taxation.

After reading the Minister's proposed changes, the thought naturally arises, are they necessary?, and if so, could not the same benefits be obtained in a more simple manner. The suggestions give the idea of size and multiplicity rather than effectiveness and simplicity. The rural school subject is an important one without doubt, and the minister is to be complimented for making proposals to benefit it. Yet when things are running smoothly at any rural school, for sheer indifference of public opinion, it is hard to find a better example. For proof of this, note the attendance at the average school board's annual meeting.

The proposed changes are obviously going to benefit the rural school in the poorer and more sparsely settled districts. The older and well settled districts are able or should be able to take care of all educational requirements of their children up to grade eight. The school in the sparsely settled community is to be kept open for the full term, the teacher's salary guaranteed and the teacher chosen by a Board having control of about one hundred and fifty schools. To us this appears as if the proposed changes were jumping from something too small to something too large. The Minister proposes to keep on the rural school boards, but take away most of their powers. Like the Vegreville Observer, we are in favor of dropping the rural school boards and having a rural municipal school board elected. The average municipal district is composed of nine townships and has within its borders any number up to 25 rural schools. This appears to us to be a large enough unit for convenient handling of the various problems that may arise.

The appointing of a number of supervisors, as is suggested by the Minister is a good thing. These men will augment the already existing inspector staff. An inspector, is strictly speaking, exactly what the name implies, but a supervisor would be more of a help to the teacher in the furtherance of his or her work, rather than a mere recorder of what he or her had done.

Of course at the present time, the Minister is more or less "feeling out" public opinion, and the actual changes suggested on the floor of the house may not be exactly as outlined prior to the opening of the legislature.

CHAPTER VII.—Continued.

He was known under several sobriquets: "Trapper" John, "Coffee" John, and "Mahogany" John. "Coffee" John for the excellence of his brew of that beverage, and of which he drank enormous quantities. His call to meals: "Come and throw your feet under the mahogany," supplied the reason for the cognomen of "Mahogany" John.

With the assistance of their host they unsaddled the tired horses and turned them in the pasture, where they rolled luxuriously on their backs for a moment, and then started feeding hungrily on the rich clover.

A wind shook the tree-tops and turned the surface of the lake dark with ripples. High in air, streaming dark clouds scudded swiftly by.

"Got here jest in time," said the old trapper, as he looked up at the sky. "It's a goin' to rain. Come inside."

John had served as cook in a cowboy camp in Texas. He never overlooked an opportunity to make ostentatious display of his skill in the culinary art.

"Jest set my bread this mornin'," he explained, "so I'll hev' ter make a bannock."

Taking a tin pan from the shelf, he threw it the full length of the room to the table. He tossed the cooking utensils about like a practised juggler. Soon the bannock swelled to the rim of the frying-pan, the edges showing brown and crisp. He lifted the heavy dish from the stove, and with a dexterous twist of his wrist threw the bannock to the ceiling and caught it nearly in the centre of the pan as it came down. He dipped a half dozen trout in the yolk of eggs, rolled them in flour, then tossed them with apparent carelessness, but with deadly aim, one at a time, to the sizzling pan. From a shelf he took two glass jars and turned their contents into an earthenware dish on the stove. Immediately the room was filled with an aroma that caused the newcomers to sniff hungrily.

"Mr. Hillier," began Andy, "what . . . ."

"Mr. Hillier! Hell! My name's John," exploded the trapper.

"I was goin' to ask you what kind of meat that is that smells so good," grinned Andy.

"Muskrat."

"What?"

"Muskrat," repeated their host, turning to the astonished Australian. "Did ye ever eat any?"

"No," returned Andy weakly, "I don't care much for meat anyway."

"They're darn good eatin'," affirmed the trapper. "Reason folks won't try 'em is because they think that they are a rat. Their right name is musquash, and they live on vegetable food only. Did any of you fellers ever see 'Diamond Back Terrapin' on a bill-of-fare in restaurants?"

"I have, many times," answered Donald.

"Well, 'bout half the time when the waiter hands ye what ye think is turtle he's givin' you musquash," stated the trapper as he speared a cube of butter with a long fork and shot it accurately to the debated dish.

Andy laughed outright. "Strike me fair, John, you've got anythin' I ever see beat a block for slingin' grub."

John was pleased. "Oh, I'm fair to middlin' good," he admitted.

John served the dinner in the pots and pans in which the food had been cooked, and piled the table with enough grub to serve a dozen men. "Like to see lots of grub in sight," smiled the old trapper. He placed a big steaming coffee-pot in the centre of the table, and then sent out his original dinner-call. "Throw your feet under the mahogany," he roared.

The party needed no second call. The mountain air had given them wolfish appetites and they made huge inroads on the trapper's well-cooked dinner. With the exception of Andy, they ate and enjoyed musquash; the meat being fine-grained and tender. John was visibly disappointed by Andy's refusal to try this delicacy.

"Try it, ol' timer," he insisted, as he pushed the steaming pan across the table.

Andy made a wry face. "Don't feel jest hungry tonight," he mumbled.

Dinner finished, Donald pushed back his chair and lighted a cigarette. "John, that was a dandy meal, and your coffee sure is a nectar fit for the gods."

The trapper was justly proud of his cooking. Donald's praise brought a deeper tinge of colour to his bronzed face. He refilled the tin cups and they sat quietly smoking and sipping the fragrant coffee.

After the day in the open and the excellent meal it was pleasant to sit in the genial warmth of the cabin while the storm which had been gathering broke overhead and the incessant patter of rain sounded on the roof.

Between Andy and John there sprang up a comradeship based on the peculiar brotherhood which often exists between small men. Each found in the other traits that amused him.

"Comical little duck," was John's opinion of Andy.

"Strike me pink! He's the funniest old geezer that I ever saw in me life," Andy confided to Donald.

Together they washed the dishes and tidied up the room. When they had finished Andy dragged in his duffle-bag, rummaged through the contents, and produced a flask of rum. The trapper's face brightened.

"I brought this for medicinal purposes," stated Andy. "How are you feelin', John?"

The mirth wrinkles around the trapper's eyes deepened. "My misery is purty bad to-night, ol' timer."

Andy poured liberally into a tin cup. The pungent odour of rum filled the room. Old John sniffed the contents. "Whuff!" he yowled, "good licker!"

The old trapper, standing in the centre of the room, presented a figure wild and strange. His coat of buckskin was open at the throat to expose a hairy chest. His mane-like mass of wiry hair stood straight out and shook with every movement of his body. A veritable wild man of the woods he looked as he grasped the cup and held it up to his admiring gaze.

The storm had reached the height of its fury. The wind roared and moaned like a famished wild thing denied its kill. Occasionally a venturesome gust would find its way down the chimney to send thin puffs of smoke to linger in the air and fill the cabin with the sweet perfume of the burning alder.

"Give us a toast, John," begged Andy.

The trapper raised his cup on high.

"I'm the trapper of the mount'n top.
A ring-tail-snorter an' a dead-sure shot.
I'm wild, I'm woolly an' full o' fleas,
I've never bin' curried below the knees,
I live on the fruit o' the prickly pear,
An' I play in the brush with the grizzly bear."

"Here's hopin' ye'll never see the back o' yer neck," he added. Then placing the cup to his lips he drained the contents with one great gulp. John's jaws were well-nigh toothless, and as the fiery liquor scorched his throat his leathery cheeks folded and unfolded like the pleats of an accordion.

"Wow!" he yelped, "she's sure got a kick."

The humorous toast and the trapper's facial contortions sent Andy into paroxysms of laughter.

"Strike me blind!" he gasped, as he held his sides. "I never——" His eyes rested again on the trapper's convulsed features. Speech failed him and he sank writhing to a chair.

When finally they climbed the ladder to their bunks the rain had ceased and a brilliant moon flooded the valley with a white light.

Donald awakened as the first grey streaks of dawn brightened the dusty windows of the loft. The air suddenly filled with the sweet song of birds. Wild-fowl quacked and splashed in the waters of the lake. The aroma of coffee and frying bacon and the pungent odour of wood smoke was wafted strongly from below.

Suddenly the trapper's shaggy head protruded through the opening at the top of the ladder. "Get out o' the hay an' let the sun shine on ye!" he bawled.

"Now, let's get busy," said Gillis, when breakfast was over. "The first thing to do is to find a good spot to pitch our tent."

"You'll find a deserted cabin at t'other end o' the lake that'll be a whole lot more comfortable nor a tent," informed the trapper.

The cabin of cedar logs proved to be in good repair and the location excellent.

"A couple of days' work," observed Gillis, "an' I can fix her up so's we'll be as snug as a bug in a rug."

John had spent the forenoon in baking. Cakes, pies, doughnuts and cookies were placed at regular intervals on the shelves in platters and tins tipped at an angle to make the display more effective. It was an exhibit of pastry that any housewife might envy. The unstinted praise of his guests was like music to the trapper's ears.

For dessert they had a savoury mince-pie, steaming hot from the oven. Andy waxed most eloquent in his praise of this culinary delight.

"Have another piece, ol' timer," insisted John, as he transferred a big slice to his plate.

"Like it, do ye?" asked John.

"U-m-m," mumbled Andy as he devoured the last crumb and settled back with a sigh of content.

John's wrinkled old face spread into a wide grin. From his lips came a cackling laugh.

"What's the joke?" queried Andy.

"I thought I'd get that muskrat into ye somehow," chortled the trapper.

"Well, it's not so durned bad, after all," philosophized Andy.

On the third day after their arrival they moved to the cabin at the head of the lake. There followed days of arduous toil, days spent in "blazing" lines through almost impassable swales, up steep hillsides and through canyons. Days of strenuous exercise in the stimulating air, when the bright sunshine tanned their faces to a deep brown, brought the glow of perfect health to their eyes, and gave to their muscles the resiliency and strength of steel springs.

(To Be Continued.)

"PINKHAM'S COMPOUND IS WONDERFUL"

Read This Letter from a Grateful Woman

Vanessa, Ont.—"I think Lydia E. Pinkham's Vegetable Compound is wonderful. I have had six children of which four are living and my youngest is a bonnie baby boy now eight months old who weighs 23 pounds. I have taken your medicine before each of them was born and have certainly received great benefit from it. I urge my friends to take it as I am sure they will receive the same help I did."—Mrs. MILTON McMULLEN, Vanessa, Ontario.

Six Thousand Years Old

Fish Found In Sweden Belongs To Later Ice Age

An interesting discovery has just been made in the North of Sweden where some workmen when digging at a distance of 24 feet from the surface came across a curious object embedded in the river mud. It was found to be the remains of a fish belonging to the later Ice Age, and according to geologists, is about 6,000 years old.

Would Stand Repeating

An old maid went to confession and told the priest that she had been ardently kissed.

"When did that happen?" said the priest gently.

"Twenty years ago," the old maid told him.

"Have you ever confessed this before?"

"Many times, father," sighed the penitent, "but I just love to talk about it!"

Winter Sports

Winter sportsmen find Minard's ideal for taking the soreness out of bruised muscles. Try a bottle.

MINARD'S "KING OF PAIN" LINIMENT

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

TOOTH BUILDING FOODS

You decide to build, so you approach an architect who draws up plans and specifications; then the contractor walks in and supplies the materials called for, and your house goes up according to plan and without a hitch.

Now your tooth. Here's a piece of masonry: Nature the architect, you are the contractor.

The element of chief importance in the development of teeth and bones is the calcium content, such as is supplied in the lime of milk, in eggs, in cereals, in fresh fruits, vegetables, such as carrots, asparagus, cabbage, brussels sprouts and many others.

First the foundation must be well and truly laid so the diet of the expectant mother should contain liberal amounts of these foods.

Now, as perhaps you may be aware, the teeth have been forming since before birth and their development continues throughout the early periods of childhood, until they erupt almost fully formed. So the diet of the child up to the fifteenth and sixteenth years should receive special care.

Also (it is also important to note), in the period from the third to the sixth year, there is present in the growing jaws the greatest number of teeth that they will ever contain. There are in eruption at this time twenty temporary teeth and in addition, the developing germs of twenty-eight permanent teeth, making a total of forty-eight fully or partially formed. Hence at this age and onward, the demand for lime phosphorus and other inorganic salts, apart from the needs for these materials for the developing of bones, is unusually high.

Then this: Calcium is necessary in the clotting of blood and in the digestion of fats, so that if there is an inadequate supply of this element in the diet, the most available source to meet this starvation is in the lime of the teeth and bones, and in consequence, when called upon to meet these requirements for vital purposes, the teeth are structurally weakened and are left more prone to disease. Then your structure fails—and whose fault?

When Work Was Work

Story Of the Days Before the Advent Of the Eight Hour System

That old story about the city man who yearned to surprise the farmer with whom he had engaged to work through a harvest might be applied with force to those pioneer days in Canada, when a good farmhand was judged by the amount of sweat he could shed for $1.50 a day. This city chap set his alarm clock for three and sallied forth shortly after that hour in black darkness, sanguine that he would delight his employer. On turning a corner of the barn he met the farmer, who had a brimming pail of milk in either hand and held the bail of a lantern in his teeth. Placing the pails upon the ground and removing the lantern the farmer, with a withering glance, remarked, "Where have you been th' bull day?"

But that was before the eight-hour day became general and some farmers were satisfied with their lot, while not a few, because of its independence, declared farming the ideal occupation for the man who loved nature in all her aspects.—Free Press.

Letters Raced Around World

Winner Made Entire Trip In Seventy-Eight Days

People are growing so accustomed now to flyers going east and west, men and women crossing continents and oceans, that nothing which touches on flying can surprise one very greatly. But it is interesting to know that lately two letters have been racing round the world by established air, water and rail mail routes.

The letter which won, the first letter to go all the way round the world in the open mails, finished at Seattle, United States, in 78 days, 1 hour, and 30 minutes.

So much of a charity fund goes to pay overhead expenses; why not give the office jobs to those who need charity

Teacher: What is the highest form of animal life?

Little Peter (quickly)—The giraffe!

Sacred White Elephant

Fine Specimen Is Reported To Have Been Captured In Siam

A sacred white elephant—which in Siam is of great religious and political significance has been found in Changvad Khukhand, according to advices from the royal family from that province.

The holder of a special elephant catching permit in Changvad Khukhand informed officials here that he had captured the elephant in one of the regular "round ups" and that it had been inspected by authorities there and declared a true white elephant. The ministry of interior immediately dispatched an expert to the district to conduct a formal investigation and the country awaits his report with great excitement.

The local elephant catcher was sorting over a herd which had been driven into a trap when he discovered the unusual beast. It was described as a five foot tall male with 15 inch tusks. It is a particularly fine specimen and—if it proves to be a real white elephant—will be installed with elaborate ceremonies at the capital

Characteristic Of Japan

Everything About Country and People Is Small But Not Weak

Perhaps the first impression on landing in Japan is the littleness of everything. The little flimsy houses, the little flimsy shops, the small men, the toy-like women, the tiny children, as numerous and like unto each other as the sands on the shore—these are everywhere. But although very small of stature the Japanese men are often very powerfully built, and many of them suggest great strength.

Littleness—with which is associated the most delicate detail and elaborate finish—is the mark also of the modern Japanese art. In the curiosity shops whatever was massive or largely simple was Chinese. Even the Royal Palaces at Kyoto are small, the rooms, exquisite as they are, with perfect joinery and ancient paintings, being seldom more than a few feet square with very low ceilings

Provincial Highways Are Through Streets

Motorists Approaching From Side Roads Should Remember This

Motorists who know that Provincial Highways are through streets depend upon others obeying the law, and when they note a car approaching from a side street they naturally expect that car to come to a stop, and so they act accordingly. When the car doesn't stop accidents are sometimes narrowly averted, and in other instances they actually occur

It is well to remember that all provincial highways are through streets. The person who enters such a highway does so at his own risk, and if an accident is caused, that person is entirely to blame. The only safe way to approach a Provincial Highway is to come to a full stop to be sure that there is a reasonable opportunity to enter without causing danger to traffic. Moreover, this is the law, and it must be obeyed.

"Marlatt's Treatment"

AT this season of the year when intestinal "flu" is prevalent and in this age when so many are worried by high blood pressure and "nerves", too much care cannot be taken to keep the system entirely free from poisons and impurities. Marlatt's has for many years been found most valuable in toning up the liver, in keeping the intestines functioning normally and in preventing bile stagnation. Try this highly recommended treatment now

Little Helps For This Week

"According to the eternal purpose." Ephesians iii. 11.

One small life in God's great plan,
How futile it seems as the ages roll!
Do what it may, or strive how it can,
To alter the sweep of the infinite whole
A single stitch in an endless web,
A drop in the ocean's flow and ebb.
But the pattern is rent where the stitch is lost,
Or marred where the tangled threads have crossed,
And each life that fails of its true intent
Mars the perfect plan that its Master meant

—Susan Coolidge.

Remember that you are an actor of just such a part as is assigned you by the poet of the play; of a short part, if the part be short; of a long part, if the part be long. Should he wish you to act the part of a beggar, take care to act it naturally and nobly; and the same if it be the part of a lame man or a ruler. For this is in your power, to act well the part assigned to you; but to choose that part is the function of another.

—Epictetus

Northern Alberta Fish

During the quarter year ending September 30th, American firms purchased 1,665,222 pounds of northern Alberta fish, valued at $193,916, as compared with 1,506,324 pounds during the same period of 1927

Peevish, pale, restless, and sickly children owe their condition to worms. Mother Graves' Worm Exterminator will relieve them and restore health.

Barbara—My auntie has been to France, Italy and America. And now she's gone to Heaven.

Muriel—My word! She does get about, doesn't she?

WEEKLY NEWSPAPER REPORT

The Alberta Wheat Pool handled a total of 217,816,641 bushels of wheat during the first five year contract period with a gross turnover of $276,350,411, according to the report of R. D. Purdy, manager, presented to the annual delegate meeting being held in Calgary this week.

It was further stated that second series contracts covering 4,074,771 acres had been signed at October 1st, 1928 which acreage is 2,226 greater than the sign up [illegible] first series contracts.

The average acreage per contract under the Second Series is 116 as compared to [illegible] acres for the First Series.

During the [illegible] months over 1200 contracts have been recorded which is [illegible] far [illegible] number than during a [illegible] period of the operation of the Wheat Pool.

During the [illegible] 27-28 the Alberta Pool handled [illegible] 16,180 bushels of which [illegible] bushels or 67 per cent were shipped [illegible] the Pacific coast and the [illegible] east.

Administration [illegible] the Alberta Pool during the [illegible] year were approximately [illegible] of a cent a bushel.

The elevator and [illegible] reserve fund [illegible] total $3,400,000.

The records [illegible] are handled by the [illegible] Department and [illegible] work 3[illegible] 000 accounts [illegible] are involved.

During the [illegible] 500,000 pieces of mail [illegible], being an average of 1650 pieces for each working day.

"CENTRAL'S" REPORT

A comprehensive report submitted to the delegates of the Alberta Wheat Pool by the Central Selling Agency was read at the annual meeting held in Calgary this week. In spite of great [illegible] and a badly damaged crop Central successfully marketed [illegible] bushels during the year. Taking into consideration a world production of 4,507,000,000 bushels which was approximately 318 million bushels greater than the 1923 crop, and 38 million greater than the 1926 crop, the sales prices obtained were satisfactory. This can better be realized when it is understood that the average protein content for the 1927 crop was only 11.5 per cent as compared to the usual 12.8 per cent.

During the year the Pool maintained a policy of keeping well sold up and as a result went into the new crop year with no carryover. This finally disposes of the false report which was spread during last August attributing drop in prices at that time to the carryover of the Canadian Wheat Pool.

Direct exports for the year totalled approximately 115 million bushels.

The Pool's best customer was the United Kingdom which took over 36 million bushels, then came Holland which purchased 16 million bushels, and Italy which purchased 1[illegible],730,000 bushels.

The gross turnover for the Central Selling Organization for the year amounted to $323,847,282.41. Satisfactory relations have been maintained during the year with the Canadian banks and the Pool has at all times been able to obtain adequate finance to meet requirements.

Considerable expansion has been made by Central particularly in the way of starting research department and developing a statistical service. An insurance subsidiary has also been organized to attend to that important branch of the Pool's operations. Concluding the report of the manager, E. B. Ramsay states "The Canadian farmer to-day is in an excellent position to meet the competition of other wheat exporting countries. The development of a handling system operated at cost materially assists in the solution of the problem. Higher production per acre of quality products together with low cost of production and marketing rather than increased acreage will be important factors in the success of the Western farmer, particularly in the years of bountiful yields. A review of the four years operations of the Central Selling Agency leaves your directors with a feeling that while giant steps have been made in developing a marketing organization, the fringe of the entire agricultural problem has only been touched."

Double Auto Fatality

TWO DISTRICT CITIZENS LOSE LIVES

An accident occurred on Saturday last, which came as a shock to the entire community, when Arthur McMullen and his youngest son Harold, were instantly killed when the car in which they were driving left the road and turned over in the ditch.

The accident occurred near the McClymont farm on the Tofield—Camrose highway. Harvey McClymont was the first on the scene, which was within four or five minutes of the accident, and found the unfortunate men under the car and life apparently extinct then. Evidence at the coroner's inquest held on Monday showed that death was due to suffocation and was instantaneous. The cause of the accident was apparently a defective steering gear.

Interment took place at the Tofield cemetery on Monday afternoon at two o'clock, following a service in the United Church conducted by the Rev. J. T. Gordon. The pall bearers were local Oddfellows and Veterans, the older man having been a charter member of Tofield Lodge No. 43, I.O.O.F., and a veteran of the great war.

The late Arthur McMullen was born on April 29th, 1867 at Adel, Iowa, U.S.A. He went west as a young man and worked on cattle ranches in Colorado. He later went to California, and in the year 1890 he was married to Ruth F. Harris at Chico, California. They moved to Wallawa County, Oregon and resided there a number of years.

In the year 1905, with their four children, they started for Alberta, using horses and wagons as their means of transportation. The family wintered in Montana, and in the spring of 1906 arrived in Strathcona.

Mr. McMullen then came to the Tofield district, taking up a homestead nearby so that the children might have the advantages of the town school.

From 1912 until the time of his enlistment in the 211th battalion of the American Legion in the C.E.F., he held the position of town constable. Those who knew him in those days are aware of how he filled this position in a worthy manner, performing his duty with fairness and impartiality.

In 1916 when almost fifty years of age, he joined the C.E.F. and later saw service in France with the 8th Canadian Railway Batta. He was later attached to a Military hospital at Etaples as assitant in X Ray work. Following the armistice he returned to Tofield in the late days of 1918, and in the spring of the following year he purchased a farm in the Bardo district where he resided until his death.

Mr. McMullen's wife predeceased him in 1920. In 1924 he married Mrs. Emma Coombes of the Tofield district. He leaves besides his wife, a daughter Mrs. C. W. Graves of Calgary, and two sons, Jesse and Paul of Tofield. He also leaves six step-children, namely, Mrs. Archie Brown of Bawlf, Mrs. J. Johnson and Mrs. William Russell of Portland Oregon, Mrs. Lloyd Rix, of Orillia, Ont., Chester of Tofield and Leslie of Red Deer.

He is also survived by a sister and brother, Mrs. W. S. Van Fossen of Adel, Iowa, and F. J. McMullen of Los Angeles, California.

Mr. McMullen will be greatly missed in the community where he was respected and liked by all who knew him.

Harold Arthur McMullen, was born August 29th, 1901 at Powatka, Oregon, and came to Alberta with his parents when five years of age. He attended the Tofield public and high schools. When his father commenced farming in the Bardo district following the war, Harold went with him and worked with him for several years.

He later went to Calgary where he worked in the retail grocery trade with his brother-in-law Mr. C. Graves. Here he met his future wife, and in April 1927, he married Miss Rosie Proctor of the southern city. While in Calgary, he was a member of the well known choir of Knox United Church. Since his marriage and until his untimely death he farmed in the Tofield district.

Harold was well liked and highly regarded in the community, and the sympathy of the community goes out to his bereaved wife, sister and brothers in their great loss.

LOCAL AND PERSONAL

Born—To Mr. and Mrs. Roy Odlorne on December 2nd, a son.

Born—To Mr. and Mrs. Cap Lee, in Edmonton, a son.

Miss Nettie Neal spent the week end with her sister, Mrs. Calvert.

Mr. A. B. Evenson spent the week end at the Jobb home.

Mrs. Jobb and daughter Thelma, visited the city this week.

Mrs. C. Hobson visited the city this week.

Mrs. John Lee is spending a few days in the city.

Mrs. Hanlan of Holden was a visitor to town on Wednesday.

Miss Maggie Wood and Miss Hilda Nomeland visited Edmonton this week.

Fancy work for Christmas? You can see a splendid selection at Lucille's Beauty Parlor.

J. D. Hannan and son Bud returned from a business trip to Stettler on Monday.

Mr. and Mrs. Napier and baby visited at the Hammond home over the week end.

The C.G.I.T. girls are holding a tea on Saturday, December 8th, at the W.I. rooms.

Rev. Adams, who has many times taken services at this point in the Anglican church, visited Tofield last week for a day on business.

The boxing bout between Battling Moote and O. C. Paulson of Dinant has been postponed until further notice. This was to have been held on December 13th.

Mr. John Thompson and Miss Mabel Thompson arrived home last Saturday after a month's holiday in Rossland, B.C., where they visited with their sister. On their return to Edmonton they spent a day at the T. Veren home.

The W.A. of the Anglican Church held a very successful bazaar and sale of home cooking on Saturday, December 1st. There was a good attendance and the ladies wish to thank the public for their loyal support. Special mention is due the ladies of Lindbrook and Bathgate for their generous donations.

The Whitmore Studio, located over Brace's store is now open for business. Your photograph sent to your friends at Christmas is always welcome. Early sittings for Christmas work is advisable. Good work. Prices reasonable.

W. I. NOTES

We would like to have a full attendance of all Institute members at our last meeting of the year, next Tuesday afternoon, December 11th. Each member will bring a Christmas gift and we will all have a free grab. We also expect to have a very interesting talk from one of our members. Let us all turn out to the last meeting and have an enjoyable time. A dainty lunch will be served.

KETCHAMOOT

A pall of gloom was cast over our neighborhood when word was received of the tragic death of two of our highly respected men, Mr. A. McMullen and son Harold. We wish to extend our sincere sympathy to all the family.

Mrs. Harold McMullen, Mrs. Graves, Mrs. Proctor and son, all of Calgary, Mr. and Mrs. Reed of Unity, Sask., niece of Mr. McMullen, Mrs. Archie Brown of Bawlf, and Leslie Coombes of Red Deer, came to attend the McMullen funeral.

There was no school on Monday in respect to the late Mr. McMullen who was secretary and treasurer of the school district.

The monthly meetings of the M.A.S. was postponed one week, and will be held at the home of Mrs. Leslie McGinitie on Wednesday, December 19th.

Mr. and Mrs. T. D. Ferguson and little son, Miss Mildred and Will Ingram motored to Edmonton last Wednesday, returning the same day.

Three of our former young men have joined the ranks of the benedicts during the past month. Earl Owens married a Vilna girl, Ed Ingram, a Saskatchewan girl and Joe Olsted a Wetaskiwin girl.

Mr. Percy Owen motored over from Holden on Sunday.

Mr. and Mrs. Wesley Ingram and Miss Pearl Welch left on Tuesday evening for a stay of several months duration at the coast.

Mrs. O. Hanson, who has been in ill health for some time was taken to the Camrose hospital on Tuesday.

Mr. and Mrs. W. A. Mitchell and little son visited Mr. and Mrs. Sherlock at their home last Tuesday.

Mrs. Jack Munroe entertained a few relatives and friends at her home on Saturday, those present were, Mrs. Henderson, Mrs. W. A. Mitchell, Mrs. B. Wildman, Mrs. Elgin Seale, Mrs. Bert Calvert, Mrs. Carl Blake and Nettie Neal.

The young folk of the neighborhood held a skating party and wiener roast on the J. H. Ingram slough on Friday night.

AMISK CREEK

The Ladies' Aid have decided to hold a chicken and lutefisk dinner and sale of fancy work at the church next Wednesday, December the 12th. Serving of dinner will start at 12 o'clock sharp. The sale will commence right after dinner is over. Everybody welcome. Remember the date, December 12th.

The church is now finished. A good sized basement has been put in and a nice hall and many otehr improvements.

The young people held their meeting in the church last Sunday evening. The attendance was not as good as at the previous meetings on account of the cold night. We hope for better next time.

The Ladies' Aid held their monthly meeting at Mrs. I. C. Olson's on Wednesday of last week. Most of the members and several visitors were present. The next meeting will be held in January.

Mrs. A. Patterson and Conrad, motored to Edmonton last Sunday to visit with Arthur, who is at the hospital there. He is improving very slowly, but we hope he will be with us at Christmas. Mrs. Patterson and Conrad also visited with Mr. and Mrs. Lagergreen at the same time. They returned home the same evening.

Mr. Annebo motored to Camrose last Saturday to visit with his daughter, who is attending high school there.

Alice and Robert Berg motored to Daysland the Sunday before last and visited with Mr. and Mrs. T. Horte who lived in Kingman until last fall, when they moved to Daysland where Mr. Horte is operating a Pool elevator.

Mr. and Mrs. Foshaug, Iven, Mable, George and Tobart were guests at the P. O. Flaaten home last Sunday.

Our deepest sympathy is extended to the McMullen family in their sad and sorrowful bereavement.

Mr. E. A. Moen is shipping cattle and hogs from Ryley and Shopts to the Pool to-day, Tuesday.

Arthur Haugen visited in Camrose last Sunday.

KINGMAN

Mrs. Shalin of Creston, B.C., is visiting friends and relatives near Kingman for some time.

Mr. and Mrs. O. Simonson were Edmonton visitors for a few days.

Martin Bjorgum motored to Edmonton on Tuesday with a load of hogs.

Andrew Johnson is staying in Edmonton for a couple of weeks.

Mr. and Mrs. C. R. Blyckert visited with Mr. and Mrs. Joe Munson of Camrose over the week end.

A number of Kingmanites were Camrose visitors on Saturday.

Mr. N. Dettwiler made a business trip to Edmonton on Friday.

O. Bray and C. A. Calder were Edmonton visitors over the week-end.

Edwin Tollefson is a two weeks trip to Cold Lake.

E. Comfoot left for Denmark on Monday, after a four months stay in Canada.

Mr. and Mrs. C. Simonson attended the Baptiste conference in Camrose.

LAKE SHORE

Mr. and Mrs. H. Eaton motored to Edmonton on Wednesday of last week.

On Tuesday evening of last week Mr. and Mrs. Seale entertained at bridge. Five tables played and most enjoyable evening was spent. Mrs. Bethel and Mrs. Secord were successful in winning the first prizes while Mrs. Phillips and Mr. Booth secured the consolations.

Mrs. Seale served a dainty lunch at midnight in her usual hospitable style.

John Warner jr. has been ill for the past week with an attack of jaundice which seems to be quite prevalent this winter. He is reported somewhat improved at present.

Melville Wood and Hubert Bethel attended the dance in the new hall at Deville on Friday night. They report a splendid time.

The sympathy of this entire district goes out to the various members of the McMullen family in their sad bereavement.

A very enjoyable whist drive was held at the T. W. Ferguson home on Friday evening.

Herman Teideman, who has been looking at land near Cold Lake returned on Wednesday.

U. F. A. NOTES

The regular meeting was held on Thursday November 22nd. As Mrs. McNaughton of Banfurly our district director was present the business part of the meeting was disposed of as speedily as possible and Mrs. McNaughton gave a splendid talk which was enjoyed by all present which included nearly all the members of the roll and a number of visitors as well as several members of the Bardo local. After the meeting a delicious lunch was served by Mrs. T. E. Seale, Mrs. Gray, Mrs. Myrtle Seale, Mrs. Bearss and Mrs. Abernethy.

The members of the W. I. very kindly donated the use of their rooms free of charge for the meeting for which we wish to thank them.

Our next meeting will be on Dec. 13th in the Municipal Hall at 2:30 p. m. This is the annual meeting and election of officers, auditors reports, etc., will be the programme, so kindly attend if possible. Each member is asked to bring a small gift not exceeding 25 cents in value. These will be drawn for in some manner which will be decided at the meeting.

CURLING COMMENCES FRIDAY NOVEMBER 7th

The Tofield Curling Club hope to open the season on Friday December 7th, with a double header in the form of a President (A. B. Clutterham) vs. Vice-President (Dr. Law) competition for the Hammond Cup. This cup to be held for the season by the winners.

President Clutterham's side: Letourneau, McCluny, Ball, Warner, Hammond, John Lee, Carver, Jobb.

Vice-President Law's side—McLaughlin, Morrison, O'Craig, Hobson, Beirnes, Chapman, Cary, McCauley.

Letters received from thousands state that it gives a restful sleep with the nights no more fear of death that here is a real remedy Get it today from your dealer

Tree Grown Around Telephone Block

Ranger Shows It Was Attached Thirty Years Ago

Before a modern tree was shown near New Denver B.C. recently it was found to contain a wire bound a telephone line block the piece of wood in which the glass insulator for the wire is attached. The tree had grown completely around the telephone block, which was in perfect preservation. Circling of the line rings does not tell that it had been attached to the tree thirty years ago.

This fact was borne out by G Williams a manager of the telephone company who recalls when the lodgepole was placed there. It was the only convenient block between Fraser and New Denver during the road-building boom days.

Taylor "There's nothing like fish as a appropriate setting in there."

Taylor: I suppose that's why the fish is a hotel hobby are always

At the first sneeze inhale Minard's. Prevents colds. Also good for bruises and sprains.

MINARD'S "KING OF PAIN" LINIMENT

Canadian National Railways Design New Type Locomotive

Represents Revolutionary Advance In Motive Power Equipment and May Supersede Steam Engine

A new locomotive which represents a revolutionary departure from all previous standards and practices in railroad motive power has become a reality, so far as the "drawing board" stage is concerned, and has been placed in service by the Canadian National Railways. Representing a tremendous advance in the use of the oil-electric type of locomotive in forms a distinctive offering on the part of Canadian engineers towards the solution of the transportation problems of this continent. As the National System was the pioneer, three years ago in planning to serve the first oil-electric car of 250 horse power rating, its engineers have maintained leadership by the introduction of this locomotive unit in character and design for fast passenger and freight service.

When the first oil-electric car was put into service by the Canadian National Railways, it established two world's records in rail transportation by a continuous run from Montreal to Vancouver of some 3,700 miles, and by a continuous run of 1,000 miles. During that period, the longest non-stop run in rail history. This new oil-electric locomotive is considered to be capable of even greater performance.

The new locomotive is the further practical application of the principle of fuel oil as railway transportation in which an oil engine is used to drive a generator for supplying electrical energy to the motors. Canadian Power and speed are obtained at reasonable cost by means of coal fired steam driven locomotives.

Type Is Queerie

In appearance it resembles the electric type. The engineer occupies the cab from which he operates the propulsion by means of a control-stand similar to that used on an electrically driven transcar. The locomotive has an airbrake valve give the driver complete control of the train brakes. For his guidance, a series of meters and gauges furnish engineer information regarding voltage oil supply, and air pressure. The electrical characteristics of two units which may be operated together as a multiple unit, as required, and it is one unit which is now in service. When the season unit is completed and ready for service, the two will be coupled and will proceed to various cities on their transcontinental journey, inspecting this new product of the enterprise of the Canadian National Railways.

The locomotive carries 600-gallon tanks which will hold 6,000 pounds of which are carried on the driving wheels. Each unit consists essentially of an oil engine generator set mounted on the locomotive frame, boiler equipment for the steam heating of passenger cars, and four traction motors for propelling the locomotive through the usual auxiliary equipment.

The power developed by the oil engine is converted into electrical energy by the generator, which is direct to the traction motors geared to the driving wheels. Each unit consists of developing traction effort and speed. With the present gearing the unit was laid out for high speed passenger service the locomotive will develop a tractive effort of 100,000 pounds during the accelerating period and 60,000 pounds developed by the largest steam locomotive now in use on the lines of Canadian National Western Canada.

Lambs Hash Hid

Each unit carries approximately 6,000 pounds of fuel oil, 1,000 pounds of boiler water, 3,000 pounds of engine jacket cooling water, 1,000 pounds of engine lubricating oil and 1,000 pounds of sand. The supply of oil will be sufficient for operation of the oil engine and the oil-fired boiler for the first thirty years ago.

This fact was borne out by G Williams a manager of the telephone company who recalls when the lodgepole was placed there. It was the only convenient block between Fraser and New Denver during the road-building boom days.

Two Steps Too Many

Recently a short sight a second old lad in a town near him and was late in the afternoon, after a long search that the man arrived in a town 12 miles from the borrow.

The commanding officer hailed the battalion in the square and said:—

Man: I would like to speak to my headquarters, but will only take those that volunteer." Who wish to stay here for tonight, two steps backward march." All moved except one. "Well, Private Smith, I am proud to think that you are still willing for another 12 miles," said the C. O. "Twelve miles?" replied the soldier, "I cannot talk" two steps back."

Calf-Feeding Competition

Thousand Calves To Be Distributed To Boys and Girls In Central Saskatchewan

A Manasoth Calf-feeding Competition has been organized by the Saskatchewan Exhibition, the Board of Trade and Provincial organizations with the co-operation of the Federal and Provincial Government and Agricultural Services. A thousand calves have been purchased from the famous Rose Ranch in Alberta, to be distributed to boys and girls in Central Saskatchewan on lots of three. Persons and organizations totalling $5,000 will be distributed at the end of a six months feeding contest; (a) for the greatest gain per head per day, (b) for quality and finish irrespective of gain; (c) for the best record of feeding. The show and auction sale will be held in Rosetown, the competition is already interesting buyers from all the larger markets in the United States and Canada.

Fame Spreads To Mexico

Record Of B.C. Has Attracts Attention Of Premier Calles

Even Mexico has heard the echo of Hon No. 6, the world famous engine of the Canadian Pacific Railway Company.

Now that Senor Calles is retiring from the presidency he will devote all his time to his farming interests and his farm will be a sort of exhibition ground on which to show farmers of Mexico will receive the benefit of the latest methods and very thankful for anything." George Hodges.

Demand For Record Wheat

Orders For Early Shipping Variety Are Greater Than Can Be Filled

Inquiries for Reward wheat, one of the most early maturing varieties which has been evolved by the cereal division of the experimental farms in the past few years, are pouring in Ottawa, and already are greater than can be filled. Logerot Agricultural have been circulated that 25,000 bushels of Reward will be available for distribution. This is not true. The cereal division will have 10,000 bushels for distribution and the others will be purchased by grain growers who have already agreed to grow Reward will have a total of 25,000 bushels, maining 15,000 bushels all told.

Sixteen submarine cables, linking up all parts of the world, are joined to the Azores, where they all meet, it was announced the "Clearing House of the Atlantic."

A baby kangaroo is not much bigger than a man's thumb.

LONG SLEEP MAKES BABY HAPPY AGAIN

"One baby kept waking on several times a night, until we started giving him a little Dr. Thomas' Eclectric Oil before retiring," says an Iowa mother. "Since then he sleeps the first night and a much less loud and feel twelve better." Baby Specialized Remedy Fletcher's Castoria, and millions of mothers know how this purely vegetable, harmless preparation relieves colic and diarrhoea, with sour constipation, sour stomach, etc. The Fletcher signature is always on the wrapper of genuine Castoria. Avoid substitutes.

DECEMBER 9

PAUL GOES TO ROME

Golden Text: "I am not ashamed of the gospel for it is the power of God unto salvation to everyone that believeth."—Romans 1:16.

Lesson Acts 27 1-38,28; Romans 1:8-15, Philemon 1:19-14.

Devotional Reading Psalm 91:9-16.

Explanations and Comments

The End Of the Journey To Rome, verses 11,15,. There months after the shipwreck of the island of Melita, which the ancients began in the early spring, Paul and the rest of the company set out in a ship from Alexandria called "The Twin Brothers" from the sign painted on its prow. They stopped for three days at Syracuse, on the island of Sicily, and for a day at Rhegium, on the Italian coast. Finally the ports were reached at Italy, on the Bay of Naples was the destination of the ship. There a week was spent. News of Paul's coming to Rome reached the Christians there, and two companies journeyed over the Appian Way to meet him, one coming as far as the Market of Appius, forty-three miles from Rome, and the other to the Three Taverns an inn ten miles from Rome. Their coming greatly rejoiced and encouraged Paul: he thanked God, and took courage.

"It was midway between a shipwreck and a prison. Paul has been in peril of his life, and he was going on to greater peril. He had bravely accepted the storm to fall into the hands of the Romans. In the end it was little group of Christians brethren in Rome, bearing food that they had received, went out to meet him; and his heart filled with gratitude. Then he saw them he thanked God and took courage. There is a lesson in this who have lost, almost everything, went up the path of God which we remain and are surprised to find them encouraging us. They appreciate then the more highly for the loss they have suffered. Paul's courage in thanksgiving to God may indeed very thankful for anything." George Hodges.

Counterfeit Money

Attempt Is Made in Winnipeg To Pass Spurious Bills

A "managing city gang offers are attempting to locate what is believed to be an organized gang which is flooding the city with spurious money, mostly United States bills of $20 denomination.

Business men, merchants, banks, commercial firms and citizens are warned to scan money passing through their hands closely, as the counterfeit is almost perfect resemblance to the genuine article.

One $20 counterfeit bill is now in the hands of the police, while efforts are being made to procure others of the same type which are said to have been brought into the city in large numbers. The bills bear a picture of former Cleveland, former United States president, and a spurious Treasury seal. Signatures, Blaine, secretary of the United States treasury

Outstanding Wheat Crops

Some Big Yields Are Reported From Alberta

One of the outstanding wheat crops of the season is reported from Old Wives Lake district, Alberta. The crop graded No 1 Northern. Another good crop is reported from the Farmers Transfer Company farm, northeast of Lethbridge, where a 160 acre field of Garnet field of 45 bushels per acre was recorded.

Our Neighboring Planet

Investigations Reveal Fact That Mars Has Many Points Of Resemblance To the Earth

Recent investigation seems to have put beyond doubt the fact that Mars, notwithstanding important differences in volume, mass and distance from the sun, possesses many points of resemblance to the earth. Its day is but forty minutes longer than ours; its axis is inclined to the plane of its orbit by very nearly the same amount as that it enjoys the same succession of seasons as our world does. The Martian atmosphere, though rarer than ours, may not be so diminished as at one time seemed likely, for it contains aqueous and water-vapor, and the temperature is not very much lower than the temperature of our own world. Thus there is vegetation on Mars is indisputable; and it is not beyond the bounds of possibility that animal life has culminated in a race of intelligent beings who are, as Lowell believed, "in advance of and not behind us in the race of life."—R. A. Hector Macpherson, F.R.A.S., in the Contemporary Review.

Santa Claus On the Wing

Will Use Aeroplane To Do Some Of the Work This Year

Even Santa Claus has at last yielded to the demands of modernity and is going to use aeroplane to do some of his work this year Whether the jolly old gentleman has adopted the revolving demands made on him, is still a matter of great question. The Pas or the aeroplane has evidently caught his fancy and he is going to do a good deal of his work in Western Canada this year on the wing, so to speak. The Canadian Post Office Department announces that an air mail service will commence on December 15th, and continue until December 30th, between Winnipeg, Regina, Calgary, Edmonton and Saskatoon.

It is expected that thousands of Christmas letters will be carried by this new air mail service, which is being introduced at a time when the facilities of the post office are taxed to the utmost and the popular demand is for more speed in the conveyance of mail.

Aviator a Mermaid

A man is not entirely a machine. At some given moment, for no explainable reason, the human element in him is usually. It is a thing that happens to all of us. The difference is that in the case of a man engaged on ordinary work, the consequences may have only the slightest occurrence. With an engine-driver, a signalman, or some other railway servant, the consequences may be terrible.

Prize All-Metal Plane

The Air Ministry has decided that in future all Royal Air Force planes will be built of metal instead of wood. A new revolutionary method of constructing plated wings has been discovered as the result of experiments with a monster 150-foot wing spread monoplane "indestible" at Croydon airdrome, it has been learned. The plane will carry ten tons of bombs.

Saskatchewan Wheat Pool

The Saskatchewan Wheat Pool Country Grain elevators to the number of 940 in the province handled up to November 13, 1928, since the opening of the crop season, 66,262,000 bushels of grain, a figure only 3,231,000 bushels last year, an increase of 34,871,000 bushels.

CHAPTER VIII.

One calm Sunday morning Donald paddled across the lake to try the fit of the mounds of the bear he had followed past the trapper's cabin. The bear trail was a mere track at times and the trout refused to be here from the depths. After casting steadily for fifteen minutes without a rise he sat down to enjoy a smoke. Soundless as the grave was the stillness that seen through the quiet air. Only was splitting wood outside the cabin door, and the sound of his axe and the words of his song brought a measure of comfort to the lonely man. Behind, wild ducks of many varieties shifted their positions with a whir, like rush of wind. Now and then a "honk-honk" of a flock of chickadees sounded from one of the trees on the creek bank. The warmth of the morning gave promise of a hot day even for the middle of November. A breath of cool air rippled the lake's surface and from the hills a faint rumble of a waterfall high up the mountain-side. Donald paddled to the shore, crossed the rustic bridge to where the trapper was working in the garden, and sat down on a convenient stump.

"Good-morning, John."

"Mornin', sir," replied the trapper.

"John, is there a waterfall on the range over?"

"Yes, I've heard 'em, an' I've seen 'em from the ridge, but I hain't ever his close to 'em."

"Do you think there would be any fish at the foot of the falls?"

"Couldn't say of 'timer. It ain't never bin fished."

The fire-tongue of Isaac Walton the expression "never been fished" brings an incomparable thrill. To cast a fly on virgin waters is the acme of bliss to an angler. Donald unjointed his rod, put the basket over a shoulder and started towards the trail.

"Ye better let me fix ye up a lunch to take along," the trapper shouted after him.

"Good suggestion," admitted Donald as he returned his steps.

Fried eggs placed between slices of sauer-crake bread, fresh dough nuts, cake and cheese were quickly prepared by the deft hands of the old trapper, and Donald was again on his way.

He tried to follow the stream, but the skies were so precipitous that he was forced to climb to the ridge or "hog-back." Here he found the trail he had expected, and the way was over brush and the ground was covered with a soft moss.

At intervals through the park-like pine he caught the glint of running

MEDICINE FOR YOUNG GIRLS

Mothers Endorse Lydia E. Pinkham's Vegetable Compound

Sydney, N. S. "My seventeen year old daughter took Lydia E. Pinkham's Vegetable Compound for weakness and pains. She could not go about much with the other girls as she was not strong enough. We got six bottles and it did her a great deal of good. She is now out in snow and walks three miles every morning and back in the evening."—Mrs. M. LANE, 64 Langan Road, Sydney, N. S.

Fitzwood, Ont.—"I constantly had pains in my back and head and most two days in the month I was confined to my bed. I took Lydia E. Pinkham's Vegetable Compound Tablets. They have done me good and I always have them in the house. I have recommended your good medicine to several friends and have given it to my 17 year-old girl."—Mrs. ALFRED OUELETTE, Fitzwood, Ontario.

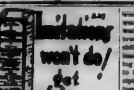
Heart Palpitated Nerves Bothered Her Sleep Was Broken

Mrs. Fred A. Pugsley, West Hampton, N.B., writes:—"I was bothered very much with my heart palpitation of the heart, and my sleep was broken at night.

I decided to try



and after I had taken six boxes I found that they had done me so much good I will gladly recommend them to all those who are troubled with sleeplessness caused by their heart and nerves."

Price 50c. per box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

a moment he was in a dress. As though in a dream he felt something brush his face and he struck his hand. An instant later the tip of a cedar twigs fell fairly on his face. He flushed and quickly with hand to struggle a fly. A larger branch fell with a gentle scrub to land on his nose. This time he opened his eyes and plucked the branch from his face, muttering as he did so that it was freshly broken. "Odd," he thought, and lay with eyes half-closed to detect the cause of this singular occurrence.

Near the top of the four small cedars under which he lay there seemed to be a most-like tiredness There was a movement in the tops of the trees, and Donald's amazed eyes saw a little brown head clad forth holding a cedar tip. Then a small chipmunk form appeared, surrounded by a mass of lovely golden hair The face was one of sheer, unadulterated beauty, marked by a pair of wide, roguish blue eyes, as true as pennies, a small pensive mouth, a perfect nose, a rounded chin and an impudent little nose dotten with green freckles. As the slender head bowed the branch, Donald's astonished eyes looked up directly into the face of a girl who was the acme of mischief There was a startled look in her blue eyes as she disappeared and a great swaying of branches Donald rose slowly to his feet, rubbing his eyes. Was this a fantastic dream, or had he actually seen a fairy? There was no sound at the branches on the ground, and again his eyes sought the tree-tops. He had now got about enough of the fay rest was built within the tops of the cedars.

"Hello," he ventured.

A slight movement of the branches followed, but no answer

"Hello, wood-nymph!"

"I'm No Dummies!"

A LAUGHING BABY IS A GREAT JOY

What one give more joy in the home than a laughing, happy baby. Such babies are rare, but they can be had with his tuneful gurgle and bright, merry eyes. If you have the sickly baby who is not a laughing baby, for him Baby's Own Tablets are a happy when well

Mothers, if your baby is cross. If he cries a great deal and no amount of attention seems to make him happy, give him a dose of Baby's Own Tablets and he will soon be well and ready to radiate that happiness through his home again.

Baby's Own Tablets are a mild but thorough laxative. They regulate the bowels, sweeten the stomach and thus banish constipation, indigestion and colds. Simple and simple proven and correct those troubles which accompany the cutting of teeth and in doing these Tablets relieve baby of them troubles. Baby happy and keep him happy. Baby's Own Tablets may be had from dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Speedy Ship Performer Which Catches U-Boats in Net

Submarines have always been a great deal of trouble in time of war They have the habit of sinking ships at the very time when they are the most necessary to the success of the war. Convinced of the necessity of some method of dealing with these 30 miles an hour and equipped with the white thread which submarine "just as we catch fish."

Does Farming Pay?

Alberta Farmer Produced Five Times the Value of Land He Farms From Five Crop

It is not often that a piece of Alberta land will produce five times as much in the first year as it cost, but that is what happened to a farmer in the Westerham District this year. In 1927 he bought a quarter section of land for $1,400, on time payments. He summer-fallowed 105 acres and put spring in between 45 acres more. His 150 acre field of wheat yielded 7 100 bushels more than $7,000

Head Strange Hobby

Miss M. L. Edgerton, a Neenah, Wis., recluse, died and among the antiques she left were 160 sewing machines. They sold for sixteen cents each at an auction. She owns a hobby of sewing machines and organs. A few of the latter sold for as little as seventy-five cents.

Minard's Liniment for Chapped Hands.

Gun Aggressive

The meek little man was walking back from the funeral of his big and masterful wife. Suddenly a disdainful state whirled down and landed with a resounding crack on his head.

"Gosh," he murmured, looking up, "Sarah must have reached heaven already."

"The Lord shall give thee rest."—Isaiah xiv. 3.

The human tide goes rushing down to death!

Turn thou a moment from the current bound

And listen.—What is this the silence saith,

O Soul? "Be still, and know that I am God."

The mighty God! Have shalt thou find thy rest,

O weary one! There's nought else to know

Naught else to seek.—here thou mayst cease thy quest;

Give thyself up. He lends where thou shouldst go.

—Julia Thaxter.

O God! Thou has made us for Thyself, our souls are unsatisfied, and not empted in us; there is emptiness in! Then dost communicate Thyself. Help us to return unto Thee. Self-denial, self-surrender, devotion are Thy injunctions upon us, not for Thy sake, but that we, who are empty, shallow, insufficient, may go out of ourselves, and find in Thee fullness, satisfaction, and abundance.

—Benjamin Whichcote.

WEEKLY NEWS BULLETIN

Issued by Publicity Commissioner, Government of Alberta, Edmonton, December 1st, 1928

Province Has Good Surplus for 1927

A surplus of $279,763 for the fiscal year ending March 31, 1928, is shown in the statement issued during the past week by Hon. R. G. Reid Provincial Treasurer. The revenue of the province for the fiscal period of fifteen months covered in this report was $16,149,895 while expenditures were $15,870,132. Substantial gains were made during the year in the volume of business handled by several departments of the government. Notable among these are increased revenues from automobile licenses and the gasoline tax. An estimate of the surplus for this period had been placed at $46,000 and the figures actually reached have therefore been well in excess of expectations.

Legislature to Meet January 24th

The Alberta Legislature will be called to meet for the forthcoming session on January 24th, 1929, it is announced by Premier Brownlee. Opening of the House at this date is subject to any unforseen developments in connection with the sale of the government railroads and other questions which will be included in the programme of legislation for the session.

Northern Alberta Lines to be Jointly Operated

It is announced from Montreal that an agreement has been reached whereby the railway lines in Northern Alberta recently purchased from the Alberta Government, will be taken over and operated jointly by the Canadian Pacific and Canadian National Railways. General satisfaction is expressed by officials of the Alberta Government with this proposed arrangement and with the service which can thus be given to the territory served by the northern lines.

Town Planning Act Proclaimed

The Town Planning and Preservation of Natural Beauty Act passed at the last session of the legislature has been proclaimed, to become operative DeDecember 1st. This is part 1 of the Town Planning Legislation, the second part to follow at the coming session. The Act now going into force will be under the administration of the Municipal Affairs Department.

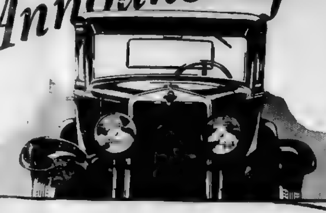
Alberta Cattle at Vancouver Show

In the livestock classes in the recent Vancouver Exhibition, cattle shown by MacKenzie Bros., of Lacombe were successful in carrying off a grand championship as well as three first prizes, six seconds, three thirds, six fourths, one fifth, one sixth and one eighth.

... is completely new with a wide range of attractive colors and fine car appointments formerly found only on the more expensive makes.

Despite the score of advanced features, prices remain practically the same.

Announcing—



The Outstanding Chevrolet of Chevrolet History

—a Six in the price range of the four!

THE Chevrolet Motor Company of Canada, Limited, announces The Outstanding Chevrolet of Chevrolet History . . . a Six in the price range of the four!

Spectacular as Chevrolet's achievements have been in the past . . . notable as its engineering triumphs have proved themselves to be—this remarkable new car dwarfs every previous Chevrolet accomplishment. Not only does it introduce into the low-priced field an entirely new measure of performance, comfort, beauty and style—but it is sold at prices so low as to alter every previous conception of motor car value.

The new six-cylinder valve-in-head engine—developed from more than a hundred motors designed especially for this sensational car—stands out as an engineering masterpiece. With a power increase of approximately 32% over the previous Chevrolet motor, with sensationally greater speed and faster acceleration—it offers a type of performance that is literally astounding . . even to those who have been driving cars costing hundreds of dollars more.

Throughout the entire speed range, it performs with a smoothness and quietness of operation that have never before been approached in a low-priced automobile. At the slower speeds of city traffic it idles along with wonderful silence and ease. On boulevards and country roads it responds with an eagerness that is a constant delight. It takes the longest and steepest hills with an abundant reserve of power that is a [illegible] guide to the driver.

And its economy of operation averages better than 20 miles to the gallon of gasoline!

The Roadster	$665
The Phaeton	$665

McLaughlin Hardware Company

TOFIELD, ALBERTA

PRODUCT OF GENERAL MOTORS OF CANADA, LIMITED

$2.00 Per Year

For several years the great majority of weekly newspapers in Canada have been $2.00 per year. This includes Eastern Canada as well as Western Canada. Some years ago the publisher of the Mercury had in mind to charge $2.00 instead of $1.50 but at that time the hard winter with its consequent feed shortage came upon us and we then carried on until this year at the $1.50 rate.

Printed matter is about the cheapest thing there is in the world today when very large numbers are required, and it is somewhat of a problem sometimes for the small office catering to a few hundred subscribers to compete with the product of the large cities.

But now, as before, the Mercury is distinctively a local paper. Edited and printed in the town in which you do business, carrying every day news about people whom you know, it has a particular and definite appeal to the residents of Tofield and district.

We are gratified that those who have paid the $2.00 rate up to the present have done so with a smile, which is the best possible encouragement to us to turn out a better paper.

THE CHRISTMAS TRADE

THERE ARE two things that stand out prominently in connection with Christmas—the giving of gifts and Christmas trade. Naturally enough one is directly related to the other. One must purchase gifts in order to be able to give them. Many months before Christmas, when the summer sun is shining, thousands of people scattered all over the world are working hard, busily producing articles of beauty and usefulness, so that myriads of people on the morning of December 25th may be made happy. Furthermore, long before Christmas day dawns—or even Christmas Eve—merchants and storekeepers, large and small, have purchased Christmas goods, to sell of course at a profit, but nevertheless, playing their part in adding to and increasing the sum total of happiness on the morning of December 25th. The vast populace of this and other countries, which is generally termed "the public" take this much as a matter of course. Children growing up accept it as a part of creation; middle aged people accept it as something that "always was so," and the unanimous opinion seems to be that of Tiny Tim in "Dicken's Christmas Carols," viz: "God Bless Christmas." But with all its glory, happiness and joy, Christmas does not come without effort. Mother must prepare the good things to eat, father the money must find for the many extras and gifts, and the rest of the family must provide time and effort in choosing this and making that present for numerous relatives and friends.

There is a tendancy and there are few of us but who are guilty, of leaving the buying of Christmas gifts until the last moment. We seem to take it for granted that inasmuch as the Creator has furnished us with Christmas, the trimmings, viz: presents, etc., will be available for our purchase exactly when we think of them and want them, and most of us generally think of them and want them a day or two before the 25th.

The Christmas trade is particularly a trade of service as well as a trade of profit. All good merchants desire to have on hand, especially at Christmas time, the goods their customers desire, at the price they wish to pay for them. The forethought that they have utilised, in buying goods to sell to you, is made doubly worthwhile, if by you buying early and leisurely you get the goods you really desire after careful selection. There is nothing to be gained in last minute purchasing and everything to lose.

The week prior to Christmas is a busy week for most merchants and try as they will they are unable to give the care and attention to sales that they would like to give. Certainly "doing your Christmas shopping early" benefits the storekeeper, but it also benefits, in just as large a degree, the Christmas shopper. Volumes have been written about last minute Christmas shopping. The salespeople, especially the salesgirl has been depicted as being so harrassed and worn from incessant serving during Christmas week, that by the time Christmas morn actually arrives, she is too much worn out in body and spirit to fully enjoy Christmas. This of course applies to cities. On that score this paper cannot add much to the mass of writings which have preceded it.

In addition to "doing your Christmas Shopping Early," it is wise to do your Christmas mailing early. Fully realizing that the object of Christmas mailing is to have the mail arrive on Christmas morning, yet when one considers the almost superhuman task one imposes on the postal staff during the few days immediately preceding Christmas, it is nothing short of marvelous that most of the mail do arrive on time. The piles of mail at Christmas time become mountainous, and even with a greatly increased staff, postal workers are greatly rushed. As far as expressing the Christmas spirit rightly—ten days before Christmas should be as good as two.

ABOUT FIRE

THE PUBLISHER was recently reading an account of a meeting of a village council situated in England, in which some firm was trying to sell the council a fire engine for $500. The offer was turned down, one councillor remarking "we have not had a fire for the past 20 years."

Compared to old world standards the fire losses in Canada are appalling. All readers of daily papers are now aware of the epidemic of large fires Edmonton has just experienced, the details of one at least being heart rending to read. Due to the material used in the construction of our buildings, combined with our rigorous climate, we always more or less run the risk of fire. The price of safety is eternal vigilance. Now at this season of the year, when plenty of heat is necessary within the home, every care possible should be given to prevent a serious outbreak. Stove pipes should be tested, chimneys looked to, all woodwork near stoves protected, proper protection afforded where stove pipes pass through partitions, and the dozen and one things that tend to safety from fire attended to. With devastating fires as with most of the evils of life, an ounce of prevention is worth a pound of cure. In addition, we would say, when you have taken all the necessary precautions, then insure. Fire is a good servant but a bad master.

Incomes In the West

Within recent months numerous articles have appeared in print dealing with the progress and prosperity of the western provinces of Canada in which the wonderful fertility and productive capacity of the agricultural lands of the West, yielding hundreds of millions of new wealth annually, has been referred to, and the fact noted that in per capita wealth of the people these newer provinces of the West have outstripped the older provinces of the East.

A correspondent of a western farm journal, having read these articles, asks: "Why, with such tremendous accomplishments to our credit, have not western farm men and women acquired a per capita income that would permit us to maintain comfortable, nicely decorated, well equipped, modern homes with some time to play as well as to work?"

The question is a pertinent one, but, at the same time is not its general effect to create a false impression of actual conditions of farm life in the West? Nevertheless, it is deserving of an answer.

In the first place, it is well to consider that in no part of Canada, and probably in no place in the world, is the wealth of the country so evenly distributed among all the people as is the case in Western Canada. In Eastern Canada, and to an even greater extent in the United States and the older countries of the world great accumulations of wealth are possessed by a few individuals, families and corporations, while living in the same communities are hundreds of people, some in dire poverty, and others living from hand to mouth day by day, and denied the real comforts and joys of life. On the other hand take Saskatchewan as an example,—the third most populous province of Canada, with now close to one million people, but which alone among the provinces is not credited with even one millionaire.

This is not to say there are no poor in Western Canada. Unfortunately there are. But the further fact is to be remembered that this West is a new country, the newest in the civilized world, and that tens of thousands of its people have only resided here a comparatively few years, most of whom came to better their condition and get a start in life which was denied to them in the lands from which they came. The fact that the per capita wealth of the West is high in comparison with the East while the available per capita income to provide the niceties and pleasures of play time is alleged to be small, is accounted for because the per capita income has been invested in breaking new land, establishing new homes, securing the necessary equipment wherewith to develop farm holdings, make improvements, and, generally, building for the future. These investments represent per capita wealth, which is consequently high and steadily rising.

The true test to apply to Western Canada is: Are our farm homes becoming more comfortable, better equipped, more modern, as the years pass? Are the people who have come to this country decidedly better off, more comfortable and happy than they were in the lands from which they came? Are they making real progress? Unquestionably, taking the country as a whole, such questions must be answered in the affirmative.

Finally, is it true that the per capita income of the Western farmer does not permit him and his family to enjoy the conveniences of, and pleasures of modern life? The telephone is one of the conveniences of modern life and Western Canada ranks high among the countries of the world in the number of telephones in rural homes. The radio is another such convenience, a source of instruction and pleasure, and western farm homes are filled with them.

Or consider the automobile. Next to the United States with its many great cities, Canada surpasses the world in motor cars per capita, and these Western Provinces, mainly a rural people, possess as many cars in proportion to population as do the older provinces.

The rapidly increasing number of farm homes surrounded by trees and gardens testify to the fact that, as the pioneer days pass, incomes are sufficient to provide for the beautification of the home outside, and the same process is going on inside countless rural homes.

Nor would it appear from the ever increasing number of rural residents who visit the southern states, Eastern Canada, and the Pacific coast during the winter months, that the net income from farm operations is totally inadequate to provide some play time.

Nor must the fact be ignored that the provision of good roads, good schools, community halls, churches, and other conveniences of life, are, in the final analysis, provided,—either through taxation or voluntary contribution,—out of the per capita income. It has been sufficient to provide and maintain these things in this new country on a scale, and in a short space of time, unsurpassed anywhere.

Canadian Apples In Britain

Canada's apples are becoming more popular in the British Isles. Exports so far this season, according to figures published by the fruit branch of the Department of Agriculture amount to 153,062 barrels and 215,322 boxes. This is a substantial increase over the totals of 143,012 barrels and 211,942 boxes for 1927, and 160,144 barrels and 401,025 boxes for 1926.

Be sure you're right, then check your figures.

More Potatoes Grown This Year

Canada's potato crop will amount to 54,585,000 hundredweight this year, according to a preliminary estimate of the Dominion Bureau of Statistics. This is an increase of 8,127,000 hundredweight as compared with last year's crop of 46,458,000 hundredweight, an increase of 3,577,000 hundredweight over the five-year average.

Britain claims to be the world's workshop for aircraft, ships and locomotives.

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been overstimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient, and harmless. It has remained the standard with physicians in the 50 years since its invention.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Gasoline From Shale

Find New and Important Reserve Sources Of Motor Fuel

Pressure-cracking tests on Canadian crude shale oil and on bitumen from bituminous sands show that these raw materials are important reserve sources of motor fuel. Gasolene yields of 18 to 30 Imperial gallons per ton of shale reported, and about 40 per cent. by volume of the dehydrated bitumen are reported. Other products from these oil and bitumen raw materials are appreciable quantities of good value coke and uncondensed gas of high calorific value. The quality of the gasolene from the shale oil may be considered good and that from the bitumen exceptionally good.

NEGLECTED ANAEMIA

Often Leads To a Decline—Enrich the Blood By Taking Dr. Williams' Pink Pills

In their early teens it is quite common for girls to outgrow their strength, and mothers should carefully watch the health of their daughters at this time, for it is when strength is sapped by rapid growth that anaemia develops. The first signs may be noticed by peevishness, languor and headaches. The face grows pale, breathlessness and palpitation follow, with low spirits.

At the first symptom of anaemia mothers should act at once. Neglected anaemia often leads to decline, but if you see that your daughter's blood is enriched there need be no cause for anxiety. The finest blood enricher ever discovered is Dr. Williams' Pink Pills. The pure, red blood created by these pills will quickly banish all signs of anaemia. They will build up your girl's health and ensure her a robust girlhood. Give your daughter a course of Dr. Williams' Pink Pills now. Make her strong like thousands of girls who have been rescued from the clutches of anaemia by Dr. Williams' Pink Pills. Here is a bit of proof. Miss Mary Venditti, Catamount, N.B., says:—"Three years ago while attending a convent, I studied very hard to graduate. The result was I became very nervous and got so thin and pale my teachers thought they would have to send me home. I took different kinds of medicine which my parents sent me but my condition remained unchanged. At last one of my teachers gave me a box of Dr. Williams' Pink Pills, and I had hardly finished it when I could feel an improvement in my condition. I continued the use of the pills for some time longer, and I can hardly tell all the good they did me. I gained in strength and weight, and the color returned to my cheeks, and at the end of the term I graduated. I never fail to recommend Dr. Williams' Pink Pills to my friends and acquaintances when a tonic is needed."

You can get these pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Anglo-Japanese Alliance

Will not Be Revived, Says the British Foreign Office

The British foreign office, after the appearance of press despatches in London newspapers from Japan discussing a possible Anglo-Japanese alliance and the position of the powers in China, let it be known that there is no question whatever of revival of the alliance, which was ended in consequence of the Washington conference.

As regards China, it was authoritatively stated that Britain, like the other powers, is pledged to consultation and co-operation.

Always Ready and Reliable.—Practically all pains arising from inflammation can be removed with Dr. Thomas' Eclectric Oil. Simply rub it on the sore spot and it is quickly absorbed by the skin. Its healing power is conveyed to the inflamed tissue which is quickly soothed. This fine old remedy is also a specific for all manner of cuts, scratches, bruises and sprains. Keep a bottle handy always.

To Make Trial Flight

If Successful, British Dirigible Will Come To America

The first trial flight of the R-100, Britain's new giant dirigible, will be made to Cardington, Bedfordshire, it was announced. If the trip is successful the airship will proceed shortly to the United States.

It is believed that developments will follow which will revolutionize air transportation. Preparations for the flight have been kept secret but it is believed that they point toward the elimination of the use of petrol for driving the dirigible.

There are 300,000 more men than women in Canada, 100,000 more men than women in Australia, and 26,000 more men than women in New Zealand, while in England there are over two million more women than men.

Alberta Hail Insurance

Companies Ask For 48 Hour Time Limit In Accepting Policies

Relief in the form of amendments to the hail section of the Insurance Act is being asked by the hail insurance companies in Alberta, the amendments to be enacted at the next session of the Legislature, according to Henry Bruce, Superintendent of Insurance in the Provincial Government.

There are operating in the Province at present more than 30 companies handling hail insurance and their request for relief has been occasioned by the losses caused by hail during the last summer amounting in Alberta to approximately 130 per cent. of premiums. In Saskatchewan conditions were little better, losses amounting to 92 per cent. of the premiums.

The main feature of the requested and suggested amendments is the time limit of acceptance or rejection of a policy be extended from 24 to 48 hours.

At present a farmer can wire or phone his desire for coverage to the insurance company and the coverage commences at that time. The companies want to have 48 hours elapse between the time of filing notification for coverage and the time at which the coverage will be either accepted or rejected. By this means it is hoped to overcome any suggestion of delaying the placing of insurance until the last possible moment.

The present the law provides that it is optional with the companies whether they accept applications by wire or telephone and it is understood that they have decided to refuse any applications made by this method.

Speaking in respect to the amendments, Mr. Bruce said that it was his opinion that farmers must play the game with the companies if they desired them to remain in the field and that business should not be confined to a six weeks' period in the middle of the summer, but should be spread over the entire growing season.

Recipes For This Week

(By Betty Barclay)

MARSHMALLOW SURPRISE

1 package chocolate junket.
1 pint milk.
¼ pound marshmallows.
1 cup confectioners' sugar.
¼ cup boiling water.

Prepare chocolate junket according to directions on package. Cut marshmallows in pieces and melt in double boiler. Dissolve sugar in boiling water add to marshmallows, and stir until thoroughly blended. Turn into a bowl and cool before serving on top ice cold chocolate junket.

PENNSYLVANIA COLE SLAW

Put two pounds of firm, crisp cabbage through the slicer. Add a dressing made from:

2 eggs beaten light.
1 cup cider vinegar.
1 cup water.
6 scant teaspoons sugar.
Salt to season.
Butter size of walnut.

Cook slowly for few minutes until thoroughly mixed. Stir tablespoonful flour thinned in water into mixture and cook for five minutes over slow fire. Cool, thin with cream, then pour over sliced cabbage and mix thoroughly. Finely-chopped cabbage may be used instead of sliced.

Wise mothers who know the virtues of Mother Graves' Worm Exterminator, always have it at hand, because it proves its value.

Nickel ore from the deposits near Sudbury, Ontario, is now being raised and smelted at the rate of 1½ million tons per year and the ore reserves are placed at over 150,000,000 tons.

The majority of the people in the world will be speaking English in 50 years' time, according to one expert.

Meat Production In Canada

Increasing Number Of Live Stock Now Slaughtered Under Inspection

Meat production in Canada is making a steady growth. According to the report of the Veterinary Director General for the past fiscal year there were slaughtered under the supervision of the Meat Inspection Division 1,147,255 cattle, 666,808 sheep, and 2,596,138 hogs. This is an increase of 3.46 per cent. of cattle, 9.71 per cent. of sheep, and almost 2 per cent. increase of hogs. The Province of Ontario is well in advance of any of the other provinces in the production of these meat producing animals. Of cattle Ontario supplied 36.74 per cent., of sheep 48.87 per cent., and of swine, 47.09 per cent. Quebec came second with 26.34 per cent. of the cattle, 36.21 per cent of the sheep, and 15.87 per cent. of swine. Manitoba occupied third position in providing 17.48 per cent. of the cattle, 7.20 per cent. of sheep, and 15.03 per cent. of the swine. Manitoba was followed in order by Alberta, British Columbia, Saskatchewan, New Brunswick, Prince [illegible] Island [illegible] Nova Scotia.

[illegible] figures do not cover a con[illegible]ble number of live stock of the different kinds slaughtered by butchers and others for local trade.

British Youths For Saskatchewan

One Hundred Boys Will Arrive From Britain In the Early Spring

Saskatchewan has now entered into a plan initiated by Lord Lovat, Under-Secretary of State for Dominion Affairs and Chairman of the Overseas Settlement Committee in Great Britain, by which one hundred boys will arrive in the early spring of 1929, all chosen by the Empire Settlement Committee. They will be 16 and 17 years old and the Boy Scout type. At a hostel at the University of Saskatchewan, they will be received, instructed, supervised, and given after care, the Imperial Government paying one-half the cost, and the Federal and Provincial Governments paying one quarter each.

The Oil For the Athlete.—In rubbing down, the Athlete will find Dr. Thomas' Eclectric Oil an excellent article. It renders the muscles and sinews pliable, takes the soreness out of them and strengthens them for strains that may be put upon them. It stands pre-eminent for this purpose, and athletes who for years have been using it can testify to its value as a lubricant.

Geodetic Surveys

The principal function of the Geodetic Survey of Canada, which is a subdivision of the Surveys Bureau of the Department of the Interior, is to furnish latitude, longitude, and elevation data for all surveying and mapping operations in the Dominion.

Minard's Liniment for Grippe.

Young Lady (to old salt) — Have you ever seen the sea serpent?

Old Salt—No, Miss, I'm a teetotaler.

ECZEMA BROKE OUT IN RASH

Child Very Cross and Fretful. Cuticura Heals.

"When my little sister was four months old eczema broke out in a red rash which later formed blisters. It itched and burned causing her to scratch. She was very cross and fretful, and used to lay awake half the night. The trouble lasted six months.

"A friend recommended Cuticura Soap and Ointment so my mother purchased some and after using five boxes of Cuticura Ointment and three cakes of Cuticura Soap all signs of the trouble disappeared. She was healed." (Signed) Mrs. Thomas Canning, Clarkville, N. S.

Use Cuticura Soap, Ointment and Talcum for daily toilet purposes.

Civic Land Department

City Of Calgary Sells Land To Value Of $85,000 In Month Of October

Land sales totalling in the neighborhood of $85,000 were negotiated by the civic land department of the City of Calgary during the month of October, representing the greatest total of new sales ever recorded since the department was opened in 1922. The total sales of the department for the year are expected to grow into an enormous figure and, with millions of dollars worth of land still available for sale, this department has become a permanent part of the city service.

Miller's Worm Powders will not only expel worms from the system but will induce healthful conditions of the system under which worms can no longer thrive. Worms keep a child in a continual state of restlessness and pain, and there can be no comfort for the little one until the cause of suffering be removed, which can be easily done by the use of these powders, which are very effective.

Soldier Settlement Board

Over Million Acres Of Vacant Crown Land Taken Up In Alberta During 1928

According to a report compiled by the District Superintendent of the Soldier Settlement Board, 1,106,400 acres of vacant crown land were settled in central and northern Alberta during 1928. Of this acreage 4,121 quarter sections were filed on in the Peace River country, and 1,056 homesteads and 78 soldiers' grants were taken out in the Edmonton District.

HUDSON BAY ROUTE TO BE BIG TRADE FACTOR

Prince Albert.—Savings running into millions of dollars annually will be made possible to the general public and producers of Saskatchewan as result of the opening of the Hudson Bay Railway, according to members of the Saskatchewan Traffic Council who, in an all-day session here, discussed the effects of the Churchill route from a variety of aspects.

Making their deductions from experimental and tentative tariff schedules the different speakers who contributed to the discussion forecast great stimulation and development of production in the province and foresaw tremendous savings in shipments of grain and live stock and of the produce of the packing houses, dairies and other industries.

In addition to discussing the effects of the opening of the Hudson Bay route, the council dealt with the position of the express rates case now before the Board of Railway Commissioners and also considered the rates on general merchandise from Eastern Canada to Melville and to Prince Albert.

Representatives were present from the member Boards of Trade of Regina, Moose Jaw, Saskatoon, Swift Current, Yorkton, North Battleford, Weyburn, Estevan and Prince Albert, while two delegates were in attendance from Melville who, on behalf of the Board of Trade of that town made application for and were accepted into the membership of the council. Geo. H. Smith, traffic manager and rates' expert who represented the Provincial Government, summarized the general situation and the favorable effect of the route on the rate structure.

Saved Children From Drowning

Three Rescued From Water By Seventeen-Year-Old Boy

Ottawa, Ont.—Irvin McNeely, 17, saved three small children from drowning in Browns Inlet here after diving, fully clothed, through a thin coating of ice into the frigid water.

The children, none of them over five years of age, were playing with their sleighs when the ice gave way. Mr. Neely was driving past the inlet when he noticed the children. He immediately leaped from his seat and dived into the pond.

He managed to save all three of the children and finally made his way to shore. Others attracted to the scene by this time lifted the young hero out of the water. He was near exhaustion.

Would Hold Navy Parley In Canada

Might Help Solve Problems Says [illegible]

Washington.—Chairman Britten, of the House Naval Affairs Committee, thinks he has a plan that would help the United States and Great Britain to arrive at an understanding on the equality of sea power and naval problems generally.

He has put forward his ideas in a cablegram to Right Hon. Stanley Baldwin, Prime Minister of Great Britain. He suggested that members of the House Naval Affairs Committee and a committee from the British Parliament hold a joint meeting in Canada after March 4.

Chamberlain Welcomed

London, Eng.—Cheers greeted the reappearance after his illness of Sir Austen Chamberlain in the House of Commons. Sir Austen Chamberlain expressed the desire to work in harmony with the United States and Japan in China, and denied any preferential treatment was being given Japan.

Death Of Mrs. Calder

Winnipeg, Man.—Mrs. Johanna Calder, mother of Senator J. A. Calder, of Regina, and widow of the late James Calder, died here Nov. 29. Mrs. Calder was 91 years old, and had been a resident of this city for 46 years, coming here with her husband from Oxford county, Ont.

Favors Naval Equality

London, Eng.—Viscount Cecil, of Chelmwood, favored absolute mathematical equality in both tonnage and guns between the British and United States navies, in an address which he made before the parliamentary committee of the League of Nations Union.

United Grain Growers Ltd.

Organization Shows a Very Substantial Year's Business

Copies have been received of the balance sheet and the annual report presented at the twenty-second annual meeting of United Grain Growers Limited, held in Calgary last week, and these show that Company to be in a highly satisfactory position.

The profit and loss account for the fiscal year ending August 31st, 1928, showed gross earnings of $3,547,215.00 against expenses of $2,141,068.00. Interest on bonds, mortgages and debentures amounted to $198,141.00, depreciation to $296,273.00, leaving the net profit, subject to government taxes at $714,831.00.

The surplus carried forward from the previous year amounted to $556,782.81, and the addition of the year's profit made a total of $1,271,613.00. From this deductions were made for shareholders' dividend at 8 per cent. per annum, $343,156.00; for patronage dividends, $114,736.00; the general reserve $185,011.00, and the depreciation reserve $326,315.00, leaving to be carried forward $302,373.81. Current assets, amounting to $5,873,105.00, were more than double current liabilities of $2,928,124.00. Capital assets total $9,115,243.00, against which there is provided a depreciation reserve of $2,300,000.00, while the capital liabilities amount to $4,063,554.00. Paid up capital stock amounts to $3,096,690.00, while shareholders' capital and surplus amounts to $5,399,068.00.

The annual report showed that the Company, besides completing new terminal elevator at Port Arthur, the capacity of which is 5,500,000 bushels, and which was under construction at the time of the last annual meeting, had made considerable progress in the development of its country elevator system. Between September 1st, 1927, and August 31st, 1928, 70 country elevators were built and purchased, with a number of others placed under construction since that date. At 11 points elevators were torn down and replaced with modern houses, while 27 elevators were sold during the year. Elevators are now operated at 412 points in the three prairie provinces.

Winnipeg representatives returning from the annual meeting, report it to have been one of the most successful and satisfactory in the history of the Company. Not only is the Company in a better financial position now than it has ever been, but, judging from expressions of opinion on the part of delegates, it has never stood higher in the general regard of western farmers. The delegates showed their satisfaction and confidence by prompt acceptance of the reports presented to them and by re-election on the first ballot of the four retiring Directors. The whole meeting indicated complete confidence and satisfaction in the conduct of the business by the Management and the Board of Directors.

Soviets Elect Woman Mayor

Factory Worker Now Head Of Large City In Republic

Gomel, White Russia, U.S.S.R.—A woman factory worker, Tatiana Prusakova, has just become mayor of Gomel, one of the largest cities in the White Russian Soviet Republic.

Since childhood Prusakova worked in the local match factory. After the Revolution she became active in the Soviets, and now she has been elected President of the Gomel Soviet, a position corresponding to mayor or burgomaster.

Deadly Level Crossing

Mortlach, Sask.—Two farmers of the Secretan district, Elwin Gunderson and A. J. Toner, bachelors, lost their lives at Bucknell's Crossing, two miles east of here, when the Chevrolet sedan Gunderson was driving, was struck by an eastbound C.P.R. freight train. Gunderson was killed outright, and Toner lived about two hours, dying on passenger train No. 2, as he was being rushed to Moose Jaw Hospital.

Million In Royalties

Trenton, N.J.—Two thirds of the royalties from the reproduction of Enrico Caruso's voice on phonograph records were awarded to Miss Gloria Caruso, young daughter of the famous singer. The royalties are estimated to amount to about $1,000,000. Gloria was also awarded half the New Jersey estate.

Famine In China

London, Eng.—The Daily Express Peking correspondent says that an urgent famine situation has arisen. With 20,000,000 destitute and starving people in seven provinces of Northwestern China, governors of the provinces fear uprisings unless [illegible]

Gathering Data Of Industries In West

Plan To Divide Prairies Into Sections For Investigation

Winnipeg, Man.—Acting on the suggestion of the Manitoba Industrial Development Board, the Natural Resources Intelligence Service, at Ottawa, has prepared a plan for gathering data relative to the logical industrial progress of the prairie provinces that will be submitted to boards of trade and other interested bodies.

The Ottawa suggestion is that the West be separated into five leading manufacturing centres for the purposes of the investigation and procedure on co-related lines, the first group consisting of Winnipeg, the second of Moose Jaw and Regina, the third of Prince Albert and Saskatoon, the fourth of Calgary, Lethbridge and Medicine Hat, and the fifth of Edmonton.

Ottawa suggests that the following circumstances in each of the groups be investigated: Manufacturing facilities, development of related industries, natural resources adjacent to the centres, duplication of production, suitable new industries, transportation and reference to the effect of the Panama Canal route to the Western market, new marketing methods, branch plants, and industries chiefly affected by transportation.

BRITISH NAVAL ACCORD WITH U.S. MAY BE REACHED

London, Eng.—Viscount Cecil, of Chelwood, in a speech before the League of Nations parliamentary committee of the House of Commons, said that he believed a naval agreement with the United States might be reached.

"The fundamental difficulty encountered in every disarmament discussion rests on the fact that the problem is treated too little as a matter of large politics and too much as a matter for experts with whom the whole discussion is based and on assumption of war and attack," he said.

On this basis, no progress is possible.

Lord Cecil said the first step in any general disarmament agreement must be an accord between the United States and Great Britain.

"It is manifestly to our interest to accept without reserve the United States absolute parley," he asserted. "I favor absolute and complete mathematical equality both in tons and guns. I believe on this basis a full agreement can be reached." He then turned to the development of such an accord into a world-wide agreement.

Lieut.-Commander Joseph M. Kenworthy, Labor member, will ask Prime Minister Stanley Baldwin in the House of Commons what reply he is sending to the suggestion of Fred. A. Britten, for an Anglo-American parley in Canada on the cruiser problem.

Manitoba Resources

Ottawa.—The first public hearing in connection with the return of the natural resources to the province of Manitoba, will be held in Ottawa on February 10, 1929.

FRENCH MINISTER TO CANADA

M. Jean Knight, new French minister to Canada, who has arrived in Ottawa and has presented his credentials to the governor-general.

Alberta's Resources Up For Discussion

Conference In Ottawa For December 12 Has Been Arranged

Edmonton.—Natural resources and Alberta's chances for getting them will be up for consideration again on December 12, in Ottawa. Premier Brownlee has received advice from Hon. Mackenzie King that that date will be most suitable from his point of view and he has replied accepting it as satisfactory also to the Alberta side of the case. Hon. R. G. Reid, provincial treasurer, will accompany the premier to Ottawa for the conference.

That something definite and perhaps final will result from the round table discussion of the question, after a year's rest, is Mr. Brownlee's hope.

The idea, he takes it, is to canvass the situation thoroughly and arrange the basis upon which a settlement can most advantageously be effected. From the province's standpoint it is thought some help toward such a settlement has been given by the disposition that has been made of the Manitoba case.

Say Complaint Justified

Better Accommodation Needed For Horses At Winter Fair

Toronto.—Exhibitors and management at the Royal Winter Fair are unanimous in the opinion that the complaint of Professor W. L. Carlyle, manager of the "EP," ranch, who refuses to show any of the Prince of Wales' horses at the fair until new accommodation is provided is justified, according to The Toronto Telegram. While the fair management are aware of the poor housing, they say they have no alternative accommodation to offer, but it is hoped, with the aid of the Federal and Provincial governments, that something will be done in the immediate future to alleviate the situation.

Will Lose Franchise

Toronto.—Any person whose name is included in the list of tardy city income tax payers in Toronto will not be able to vote in the municipal elections on New Years Day unless he can produce his tax receipt, according to a ruling by City Clerk Somers. There are more than 20,000 persons who have not yet paid their tax.

An Empress on Holiday

Here the Canadian Pacific Empress of Australia, having completed her last trip of the season to Quebec, is seen in the floating dry dock at Southampton where she is receiving a first coat of paint prior to setting out on a cruise of the world. Some idea of the great size of the Empress may be gained through comparing her with the two men in the small boat tied to the dock in the foreground.

Buys Own Exhibit

Herman Trelle Pays Stiff Price For Half Bushel Of Wheat

Toronto.—Four hundred dollars represents a stiff price for a half bushel of wheat but that is what Herman Trelle, the wheat and oats king from Wembley, Alta., paid at the Royal Winter Fair for his own sample prize-winning half bushel during the auction sale for the grain samples which scored the ribbons.

In his capacity as oat king, Mr. Trelle also paid $100 for his second prize oat sample, and the same for a half bushel of red-ribbon chancellor peas.

Under the conditions of entry prize exhibits must be sold, but there is nothing to prevent a prize winner from bidding on his own exhibits. The money from the sale is given to the exhibitor, less a commission taken by the Winter Fair.

Ask For Protection

National Dairy Council Wants Protection For Dairy Industry

Toronto.—The National Dairy Council, of Canada, at the concluding session of the annual meeting here, passed a resolution reaffirming the council's stand in asking adequate protection for the Canadian dairy industry. J. A. Caulder, Regina, president, declared that the dairy industry of Canada should be given a fair chance against all competitors and he contended that the industry was not being fairly treated at the present time.

A resolution favorable to the compulsory pasteurization of milk in cities, towns and villages was unanimously adopted while a policy for selected registration of dairy cattle and milk recording also was endorsed.

PROGRESS MADE IN PAYING OFF NATIONAL DEBT

Vancouver.—Hon. James A. Robb, minister of finance, dealt with the progress of Canada in paying off her national debt during the course of an address before the Canadian Club here. Mr. Robb said that during the five-year period ending March 31, this year, Canada had reduced her debt by $136,000,000 or at the rate of more than $85,000 per day.

In October of this year, Mr. Robb continued, $53,000,000 indebtedness had been retired from current revenue. Next year he hoped to retire $60,000,000 by the same method.

"We want to make a further tax reduction, but I am not going to say anything more about that just now," the minister remarked.

The demand for money for roads and other expenditures, added the minister, had led to some duplication in taxation between provinces and the Dominion. This was particularly true in British Columbia. Reduction of taxation in order to clear these fields was desirable.

In reference to foreign trade, Mr. Robb said Canadians should endeavor to get their products into the markets of the world and that the facilities for doing this were greater in Canada than in the United States. The United States had not as good a transportation system from its interior to its world ports as had Canada.

As for British Columbia there were few ports, he stated, that were as well situated for world trade as those of this province. Canada last year had traded with 114 nations and the port of Vancouver with 51 nations, an enviable record.

The minister added that most important to the expansion of the Dominion's foreign trade was the development of world friendships. Although foreign trade was desirable, trade within the empire was even more important. Inter-empire trade could not be developed by singing "Tipperary" and the British ships could not be kept on the seas by "Rule Britannia." Something more practical must be done, the speaker declared.

"Canada need have no forebodings about her future," Mr. Robb said. "It is true that we have a big debt. But we must remember that Canada was in the war from the drop of the hat. We have asked no favors from anybody. There were difficult times for my predecessors during the war and during the period immediately following it, but in 1924 we turned the corner.

"We might well unite on a policy of saying all the good things we can about our country. The days of sailing ships are gone and we must remember that what we say today will be read by the world tomorrow."

URGE CHEAPER OCEAN RATES TO AID MIGRATION

Ottawa, Ont.—Negotiations for a cheaper ocean rate for British immigrants to Canada are still being carried on in London, and a decision is expected within a few days, officials stated here. While it was admitted that the discussions were taking longer than was expected, it was denied that any deadlock had been reached.

A ten-pound third class rate is being urged on the steamship companies by representatives of the British and Canadian governments. This would apply to all those who cannot qualify for the two-pound rate for household and farm workers under the empire settlement scheme.

The negotiations have drawn attention to the fact, immigration officials point out, that since the war rates to Australia have doubled, while fares to Canada have advanced more than three times. The present rate to Australia is £36 as compared with £18 before the war. In the same period, the rate to Canada has increased from £6 to £18, 15s. It was pointed out that the present rate to Australia is 1.6 cents per ocean mile, while the fare to Canada is 3.3 cents. It was explained that neither government has control over rates and the negotiations are merely in the way of persuading the transportation companies to consent to a reduction in order to stimulate migration.

Assistance Asked For British Miners

Nearly Three Hundred Thousand Are Out Of Employment

London, Eng.—The plight of unemployed miners in Britain has reached such a serious stage that all political parties are viewing the matter with the utmost concern and the Miners' Federation has issued an appeal for assistance. Nearly 300,000 mine workers are out of employment and of these 200,000 to 250,000 constitute a permanent unemployed surplus.

With their wives and children, it means that over a million face hunger unless help is speedily forthcoming.

The Miners' Federation, in its appeal says "the mining population is faced with a cataclysm comparable to the destruction wrought by some great earthquake or other giant disturbance of nature. Some of the miners have exhausted their unemployment benefit and are being supported by grants from the poor law, which naturally are small, and the courts are filled with stories of hungry miners tramping the countryside in search of work."

Will Develop Produce Markets

Victoria, B.C.—Development of a marketing branch of the department of agriculture which will aim to develop new and existing markets and give farmers accurate information of existing markets was the announcement of Premier S. F. Tolmie, who declared that the first work of this department would be to begin a complete survey of all markets available and the choosing of the best men for [illegible]

Increase In Immigration

Ottawa.—Immigration to Canada for the seven months of the present fiscal year ended October 31, amounted to 131,734, compared with 118,158, for the same period a year ago. This represents an increase of 11 per cent. Many Canadians during the same period returned from the United States to take up permanent residence in the Dominion.

Leaves For Battle Creek

Winnipeg, Man.—Premier John Bracken has left for Battle Creek, Mich., and will recuperate at the sanatorium there. It is not expected that he will return to the city until about Christmas. He has been in poor health for a considerable period. Hon. W. R. Clubb, minister of public works, will be acting premier in Mr. Bracken's absence.

Air Mail Service Speedy

Winnipeg, Man.—The air mail service to be inaugurated in the prairie west, December 10, will make it possible for correspondence to be delivered at Regina, Saskatoon, Calgary and Edmonton the same day as it is written. As well, despatches for those cities will contain mail for adjacent or connecting points to be forwarded by next mail.

Your work would not be so humdrum if you put more hum into it.

HOLY TRINITY CHURCH
(Anglican)

Sunday, December 9th
Holy Communion, 11:00 a.m.
Evensong, 7.30 p.m.
Rev. P. C. Cornish will conduct both services.

WEATHER NOTES

During the past week the weather has been the same as usual. There was no great threat for a snow [illegible]. A little whiteness did actually sift down but it turned to a rain which froze into ice. The storm then petered out for good and the old sun came back again. Official temperatures, we understand, report this as the warmest November in history.

We beg to submit the following minimums for the week:

November 21st, 17 degrees
November 22nd, 20 degrees
November 23rd, 17 degrees
November 24th, 9 degrees
November 25th, 12 degrees
November 26th, 10 degrees
November 27th, 12 degrees

BABY CHICKS—Canada's Bred-to-Lay White Leghorns, Barred Rocks, Anconas, Minorcas, Orpingtons. [illegible] tested, trapnested and inspected flocks. Big discount for orders received by January 1st. Write for free catalogue. Alex Taylor's Hatchery, 362 Furby St., Winnipeg, Man.

CARD OF THANKS

The relatives of the late Arthur McMullen and the late Harold Arthur McMullen, take this means of expressing their heartfelt appreciation of the kindly sympathy extended to them in their recent bereavement and to give their deepest thanks to all those who, with flowers and in many other ways, came to their assistance in the time of their great sorrow.

$15.00 REWARD

A reward of fifteen dollars will be paid to the party or parties who can furnish the necessary information that will convict the party or parties, who did wilfully cut and destroy my fence on diversion on N.E. qr. of section 28, Tp. 50, Rg. 20, W4, on or about November 13th, 1928.

THE TOFIELD MERCURY

Vol. X., No. 44 | Week Ending December 15th, 1928 | $2.00 Per Year. To U.S. $2.50

LOCAL AND PERSONAL

Born.—To Mr. and Mrs. Peter Boitz, on December 7th, a daughter.

Miss Lorret Ross spent the week-end in the city.

Mr. and Mrs. Imler spent Monday in Edmonton.

Mrs. Cap Lee and young son arrived home on Monday.

Mr. and Mrs. Innes and Mrs. Roger's motored to the city this week.

Mrs. M. Ingram visited the city last week.

Mrs. McLaughlin and Mrs. Calvert visited the city for a few days this week.

You can see and purchase some splendid fancy work at Lucille's Beauty Parlor. These articles make splendid Christmas gifts.

Mr. and Mrs. Ross, Mr. and Mrs. Lovell attended the Oddfellows whist party at Ryley on Wednesday evening.

Mr. A. B. Evenson is visiting at the Jobb home during the closing down of part of the University of Alberta.

Arnold and John Swift, Arnold Hedstrom and Leonard and Charlie Worton accompanied their parents to Edmonton on Saturday and shook hands and spoke to Santa Claus.

Mr Fred McHaffey and Mr. Murray McHaffey went to Edmonton on Saturday. Murray had had a bad night and was going to the Edmonton hospital for examination and treatment. Fred was accompanying him.

Mr. P. M. Hangen, who has been spending the past five weeks in the Grand Prairie district, returned home this week. He was detained by the ferry being taken off the river and having to wait until it froze sufficiently to drive a car over.

The first air mails leaving Edmonton, Regina, Saskatoon and Winnipeg carried mail for Tofield patrons. Mr. A. P. Harold received as many as 40 letters from different points. Blake Clutterham also received several as also did Reg. Beariste.
also did Reg. McCarthy.

Many a family will eat Tofield turkey for Christmas, there being a large number shipped out. The Pool has shipped a large number and a good many, four tons in fact, have gone to the coast to P. F. Ingram. Other shippers have also shipped out much poultry this year including the Tofield Creamery.

BACK OF THE HOG
(By A.B.C.)

The competition for the Hammond Cup, between the sides headed by the President and Vice-President respectively, opened up play on December 4th, the game resulting in a win for the President's side by 2 points.

The battle was resumed by different players but representing the two above mentioned sides, this time for the McCauley cup, on Friday, Dec. 7. This time the Vice-President's side won by two points.

Everybody's guessing on the final outcome—and playing hard to bring it their way.

The regular schedule opened on Tuesday, December 11th and will run until Christmas.

The railroad boys do their stuff in the mornings. It is worth your while to watch these boys go.

The heavy rinks are getting their bumps at present, but claim they have not got going as yet.

FIRE AT TOFIELD

On Thursday afternoon a bad fire scare was given in town, when by some means or other, the building used as an engine room at the rear of the Variety Theatre became ignited. The fire apparently started in the loft or ceiling, and had a good hold, smoke coming out of the roof and sides of the building.

The alarm was turned in by Harold Hicks, whom Mr. Prinski has to thank for having the building today. Harold climbed up into the loft and through out a bunch of old blankets, scenery, etc., which were burning good. This coupled with the dousing of the loft with a few pails of water savedthe building. The engine room stands close to the theatre proper and not far from the gas station.

TOFIELD W.I. NOTES

The Tofield Institute had a very successful meeting on Tuesday afternoon in their rooms. A large attendance added very much to the interest shown. The work of getting officers proved to be no hard task after a short talk from our president Mrs. Abbott and Mrs. Baptist. They pointed out to us very clearly how necessary it was that the Institute should be kept going. Many reasons were put forth—the good it has done and the good that can be done. Our rooms are a credit to any small town, and if we didn't keep going, where could we gather together for all our social meetings.? The library is a big drawing card in our institute work and we want it to be still open to all who enjoy the books we have.

After three short talks from our members we got our officers. Right here we must not forget the work our president of 1928 did. Mrs. Abbot has worked hard for us and was one of the main workers in getting our school ground in shape as it is to-day. We are very safe in stating the work would not have been done if it had not been so carefully engineered by Mrs. Abbot. We must not forget all who have helped us and we thank you one and all for without co-operation, nothing can be successfully carried out.

Our officers for 1929 are:
Hon. Pres., Mrs. Abbott.
Pres., Mrs. O. Letourneau.
Vice-Pres., Mrs. Plum.
Sec., Mrs. Imler
Treas., Mrs. Ward.
Executive: Mrs. Hill, Mrs. Baptist, Mrs. McClung, Mrs. Firth, Mrs. Beirnes.
Library Committee: Mrs. Calvert, Mrs. Abbott, Mrs. Bissett, Mrs. Carr.

On Monday evening, December 17, we are planning our banquet. This has always been enjoyed and will be on Monday next. We extend a hearty invitation to all Institute members and all who intend to be members for 1929. We begin at 6:30. Come and enjoy the eats and have a good time.

BARDO

The Grand Forks School is holding its Christmas School concert on Friday, December 21st at 8 p.m. Admission, adults 25c., children under 15 years free.

CELLAR FORCING OF RHUBARB

To successfully force rhubarb in the cellar during winter months is one of the easiest and simplest of undertakings. Strong, healthy roots that are at least two years old from seed, or old crowns will give very satisfactory results. These should be dug up late in the autumn or just before the ground freezes up for winter. Allow as much earth to adhere to the roots as possible, allowing them to remain on the surface of the ground until the soil and roots have been frozen through. Freezing is essential to good forcing as it has been found by experiment that roots that were not frozen before being placed in the cellar did not do as well as those that had been frozen.

A dark cellar where the temperature can be maintained around 55 degrees to 65 degrees will be quite satisfactory. The frozen roots and soil should be brought in and placed on the cellar floor adjacent to the furnace. Sand, earth or cinders should be piled around the roots to maintain an even moisture supply. At intervals of a week or ten days, it may be found necessary to apply water to the soil mulch. It is unnecessary to apply fertilizer of any kind since the fleshy root-stalks have sufficient plant food stored up in them to produce at least four good pullings.

Under proper conditions, the first pullings should be ready in about four weeks from the time that the roots have been placed in the cellar. To maintain the supply throughout the winter, a second lot of roots should be brought in when the first pulling has been removed from the previous roots. Five roots properly handled should produce about sixty pounds of a marketable product.

When the fourth pulling has been removed, it is a good plan to place the roots out-of-doors again and allow them to freeze. These roots can be planted out in the spring in good soil to recuperate.

KINGMAN

A. Bratness spent a few days in Edmonton last week.

Mrs. W. McIntosh visited in Edmonton on Friday.

Mr. C. A. Calder is spending a week in Calgary.

Mr. Thor Horte, Gladys and Evelyn of Daysland and Mr and Mrs. John Anderson visited with Mr. and Mrs. E. Erickson on Sunday.

Mr and Mrs. Ed Tollefson visited with Mr and Mrs. L. O. Pederson on Sunday

Mr. and Mrs. W. Hartshen and family were dinner guests of Mr. and Mrs. O. Bray on Saturday.

Mr. and Mrs. Swanson of Round Hill visited with Mr. and Mrs C. R. Slychert on Sunday.

Harold Johnson and S. Haugland of Grand Prairie are visiting friends and relatives here for some time.

Mrs. O. Bray spent Tuesday in Edmonton.

A. Bratness returned from Edmonton on Tuesday after having an operation on his right eye.

Mr and Mrs. Henry Bray were Edmonton visitors on Sunday.

LINDBROOK

Mr P. Holland, correspondent of several years standing to the Tofield Mercury, is ill this week and unable to send in the usual notes. The editor and staff sincerely hope that Pete's illness will be of short duration and that in a few days he will be as perky as ever.

The annual Christmas tree and concert will be held at the Lindbrook school on Thursday, December 20th. Everyone welcome. There will be no admission, ladies please bring cakes. Program commences at 8 p.m.

LAKESHORE

On Friday evening of last week Mr. and Mrs. Secord entertained a number of friends at bridge. The following were present: Mr. and Mrs. Elmer Gegelein, Mr and Mrs. Guy Walker, Mr and Mrs. Wm. Roberge, Mr. and Mrs J. B. Warner, Mr. and Mrs T. R. Murray, Mr. and Mrs. R. C. Phillips, Mr and Mrs. T. E. Seale, Mr and Mrs Johnston Ferguson, Mrs. M. Seale and Mr Booth. Mrs. T. E. Seale won the prize for ladies, a pair of lovely china vases. Mr. Ferguson won first prize for gentlemen, an ash tray, while Mrs M. Seale and E. Gegelein won the consolations. After the cards Mrs Secord served a dainty lunch after which the guests departed after spending a most enjoyable evening.

The Eaton families motored to Lamont on Sunday to visit Mrs. Glen Eaton's mother, who is in the hospital there.

The announcements of the marriage of Mildred Bethel and William Seale, on Wednesday, December 5th, at Edmonton, are out. Their many friends in this district wish them a long and happy wedded life together.

Donald Phillips has been ill for the past week with the prevalent grippe or flu.

Mr Carty of Deville visited for a few days at the Everett Noland home.

KETCHAMOOT

The past week truly has been turkey week many hundreds of pounds were shipped through the pool and out to the coast. The McMullen and McGinnis families hold the record they each having over one hundred. We are very thankful to have such ideal weather, as it was the first time known when it was warm enough out doors for all picking operations even to washing the feet and heads.

Some fifteen neighbors of Mrs. McMullen held a picking "bee" at her home on Thursday. Eighty-seven turkeys were dressed and taken into town the same day.

Miss F Fawcett is spending a few days in the city visiting friends.

Earl and Glenn Carlisle has purchased the half section of land from Mr. Odiorne, better known as the Trackwell farm.

Ralph Barnes has bought a quarter section from his grandfather, Mr Hull.

Mrs. Archie Brown returned to her home near Bawlf on Friday. Messrs Chester Coombes and Paul McMullen motored over returning home the same day.

Sour Stomach

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective, yet harmless. It has been the standard antacid for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet, the pain departs. You are happy again in five minutes.

Don't depend on crude methods. Employ the best way yet evolved in all the years of searching. That is Phillips Milk of Magnesia.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

What Is Prosperity?

In a recent address before a large gathering of merchants, Mr. Edward A. Filene, a leading merchant of Boston, discussed the rapid development and success of the "chain store," the problems now confronting wholesalers and retailers, and the policies which merchants in general must adopt if they are to survive in the new merchandising era upon which the world has entered. In the course of this address the question appearing at the head of this article arose. Said Mr. Filene:

"General business can be permanently prosperous only when millions of people,—that is the masses,—have buying power. Their purchases add to the prosperity of merchants, and the larger orders of merchants make the manufacturers prosperous, and factories running at higher capacity enable more workers to earn more money. It is a happy cycle in which prosperity begets prosperity. It is 'companionate prosperity' based on the buying power of the masses, because for any one of us to enjoy the greatest possible permanent prosperity, the masses of our citizens must have buying power.

"Prosperity" continued Mr. Filene, "is not wealth but buying power and this buying power must be enjoyed, not by a relatively few wealthy persons but by millions of consumers. If we merchants had the chance to distribute a billion dollars to the residents of our trade area, we would not use that power to create a thousand millionaires; we would rather divide it up among 100,000 buyers, giving each one $10,000, or we might decide to give $5,000 to 200,000 buyers. But however we divided this wealth we would not use our opportunity to make a few millionaires because the ordinary merchant cannot depend on the trade of the wealthy for his sales and profits.

"The business successes of the future are going to be made by those who produce and distribute commodities in terms of millions. But this can be done only if industry creates consumers as well as products. Prosperity is not concentrated wealth but distributed buying power."

How, then, is the average merchant to compete with the "chain stores" and the huge departmental stores, which are rapidly developing into chains of huge departmental stores? These latter buy in enormous quantities and at the lowest possible prices. Their turnover is prodigious, and because of that fact, an extremely small profit on each item means enormous profits in the aggregate.

In a word, future successful merchandising must be based on mass production, at low production costs, and low profits per article. Therefore waste cannot be tolerated in any form, including distribution. The "chain store" and the large departmental stores have been created in recognition of these facts.

The independent merchant must likewise realize and face the situation with which he is confronted but in Mr. Filene's opinion, "independent merchants can not only meet the chain competition but beat it through co-operative associations organized on the principles that have made the chain stores so successful. Then, with the personal management of the owner, they can out-do the chain stores because the invaluable element of personal management cannot be wholly secured from hired managers."

This is to say, independent merchants must join forces through the organization of co-operative associations for the purchase of goods and thereby buy more cheaply and enormously reduce distribution costs. But they must go farther than that, in Mr. Filene's opinion. They must individually and co-operatively wage warfare on all waste. "Merchandising," he says, "is not a war between the independents and the chains, but a war against waste. Retailers must reduce costs if they hope to survive, for we are entering a period of competition in which a terrific fight is being waged for the consumer's dollar. Now food and rent take a large share of it; there is not much left for those of us who are selling other things. Our security lies in making the consumer's dollar bigger by eliminating waste—not only waste in distribution but wastes of every kind. Therefore, as merchants, we must take an interest in things not ordinarily thought to be any of our business,—in fighting graft and special privilege, in improving health and housing conditions. They take toll from the consumer's dollar, and the more they take the less there is for us."

Here in Western Canada merchants should be in the forefront in endeavoring to reduce the fire loss, in combatting noxious weeds which take their toll of tens of millions of dollars annually and in actively co-operating with the farmer in all those things which will make agriculture a more paying proposition.

23 Universities In Canada

The latest tabulation of registrations at the 23 universities of Canada shows a total of 42,546 students, 26,569 men and 15,977 women. The highest registration is at the University of Montreal with 9,749, followed by Laval at Quebec, with 5,444, McGill, at Montreal, 2,732, Toronto, 2,629, and Queen's at Kingston, Ontario, 3,442.

Drivers should always slow up at grade crossings because one can never tell just where that train will smite you.

It's pretty hard for some men to keep their wants down to their incomes.

World's Most Accurate Clocks

Probably the most accurate clocks in the world are two at Greenwich Observatory. Each is checked every 30 seconds by a pendulum made of an alloy of steel and nickel called invar, swinging in a vacuum. A change of temperature of one degree Fahrenheit causes these pendulums to vary but not more than a three-thousandth of a second in twenty-four hours.

Mother: "Oh, Freddy, did you hit your little brother?"

Freddie: "Yes, but I told him it hurt me more than it did him."

A little nonsense now and then will undo the best of men.

Cuticura Shaving Stick 35c.

Want To Ban Fliers

Los Angeles Poultry Keepers and Film Men Object To Noise

Airplane pilots in and around Los Angeles have a new worry.

First, they were ordered by a poultrymen's association to keep away from chicken yards, since roaring planes frightened the hens until they refused to lay eggs for weeks at a time. Then, residents around the airports threatened suits and sought injunctions because the propellers kicked up dust. Now, letters have begun to come to airport officials that planes be kept from flying over the studios.

"The airplanes make so much noise that we can't take 'talkies' without every scene sounding like a reproduction of a saw mill," one company wrote, "please tell your flyers to fly some place else."

ST. VITUS DANCE

A Trouble That Usually Attacks Young Children

St. Vitus Dance is the name generally given to a disease described by medical men as chorea. This trouble usually attacks young children, though older people may be afflicted with it. The most common symptoms are a twitching of the face and limbs. As the disease progresses the twitching takes the form of spasms, in which the jerking motions may be confined to the face or all the limbs may be affected. Frequently the patient is unable to hold anything in the hands or walk steadily. In severe cases the speech is often affected. The disease is due to debility of the nerves and relief comes through an enriched blood supply. Dr. Williams' Pink Pills have been most successful in reaching this trouble through their specific action on the blood, which it enriches and purifies. The following instance proves the value of Dr. Williams' Pink Pills in this trouble. Mrs. Thomas Bowen, Bath, Ont., says:—"Dr. Williams' Pink Pills have been in use in my family for years and always with good results. I believe they saved the life of my only son. At ten years of age he grew very nervous and the trouble developed into St. Vitus Dance. His legs and arms would jerk and twitch, then his speech was affected, and his condition was pitiable. Just then there came to me a little book telling of Dr. Williams' Pink Pills and I decided to give them to him. By the time two boxes were used there was an improvement in his condition and by the time six boxes more were taken all traces of the trouble had disappeared, and he was well and strong. I have also given the pills to my growing girls, and I know of no better strengthening medicine. I may add that the same applies to grown-ups as well."

You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Must Pay Bills

Students In Manila Must Have Clean Record Before Graduation

Receipted board bills have been added to the prerequisites of degrees granted by the University of the Philippines.

Following loud complaints by owners of Manila boarding houses, dormitories and restaurants, concerning the alleged prevalence of "deadbeats" among their student patrons, university authorities have announced that failure to pay bills will be considered ground for refusing graduation.

Examination of the list of student delinquents showed that the poor students virtually all had paid their bills, while the well-to-do — or at least extravagant — were often habitual "bad pay."

Check Colds with Minard's Liniment.

A Portable Parcel

A 7 months old baby was part of one regular air mail parcel post sent to Guayaquil, Ecuador from Buenaventura, Colombia. The infant bore a tag marked "Perishable, please rush." It was laughing happily when postal officials handed it to its father through the regular parcel window.

An excellent protection against worms can be got in Miller's Worm Powders. They render the stomach and intestines untenable to them. They heal the surfaces that have become inflamed by the attacks of the parasites and serve to restore the strength of the child that has been undermined by the draughts that the worms have made upon it, and their operation is altogether health-giving.

Canada Live Stock

The total numbers of farm live stock in Canada, as in June, 1928, are estimated as follows: Horses, 3,376,394, milch cows, 3,792,822, other cattle, 5,080,750, total cattle 8,873,572, sheep, 3,415,780, swine, 4,697,367, hens and chickens, 49,302,085, turkeys, 2,085,797; geese, 1,120,047; ducks, 986,940, total poultry, 53,778,850.

Minard's Liniment for Grippe.

THE WRIGLEY MARATHON

William Wrigley, Jr., who says the next Wrigley marathon will not be held in the waters of Lake Ontario as it is too cold for the swimmers. He has not decided, however, where it will be.

Inbred Love For Horses

No Doubt Regarding the Place That Man's Noblest Friend Holds In the Affections Of Human Race

No one who has been to the Coliseum during the past week and has seen the immense audience that gathers nightly for the horse show can have any doubts regarding the place that the horse still holds in the affection of men and women. It is sometimes said that this is a mechanical age and that the ultimate doom of man's noblest friend is written on the wall. It is not so. That the automobile has largely supplanted the horse in matters of transportation must be admitted, but the splendid animal is still being bred and cultivated for various purposes on a scale that most peoples little dream of. The tremendous applause that greets the various horse events at the Royal, the murmured comments and the outspoken commendation of hackneys or hunters tell of deep-seated admiration that nothing can destroy. The love of good horses and good horsemanship seems to be a natural instinct of every human being. It may be an inherited characteristic, of course, having its origin far back in the days when the horse was the mighty factor in war and in peace and in the building up of civilizations. Whatever its origin, it is there, and the Royal Winter Fair is doing its best to see that the instinct is cultivated and maintained.—Toronto Globe.

A Mechanical Cashier

New Invention Makes Accurate Change and Gives Receipt

A machine that calculates change delivers the right amount to the customer in a fraction of a second, and totals up the money received for the day or week was seen at the recent Inventors' Exhibition, in London.

It is different from a machine that simply pays out money from a keyboard. The new invention does more; it does the thinking for the cashier or shopkeeper. If, for example, someone tenders £1 for a farthing bill, the operator presses the £1 stop key and the farthing sales key, and the machine delivers 19s. 11¾d. including a neatly folded ten-shilling note and a dated receipt. A bell rings when a coin magazine is getting empty.

Two years were spent on drawings and calculations before a model was made, for there are 949 different amounts of money in the change for a one-pound note, and several thousand different combinations in all of the tenders possible of one pound and less.

A safe and sure medicine for a child troubled with worms is Mother Graves' Worm Exterminator.

New Hotel For Vancouver

Actual work on the construction of the Canadian National Railway hotel at Vancouver, commenced when Mayor L. D. Taylor blew the whistle on a steam shovel which started excavation work. The new structure will be 15 storeys with 600 rooms and when completed early in 1931 will have cost more than $1,000,000.

Sores Heal Quickly.—Have you a persistent sore that refuses to heal? Then, try Dr. Thomas' Eclectric Oil in the dressing. It will stop sloughing, carry away the proud flesh, draw out the pus and prepare a clean way for the new skin. It is a recognized healer among oils and numbers of people can certify that it healed where properly applied.

The quantity of water underground beneath the crust of the earth's surface is nearly one-third the total volume of the oceanic waters.

Botanists say that no two leaves and no two blades of grass have ever been found to correspond exactly.

Keeping People On Land

Italian Farmers Cannot Move Into Cities Without Permission

Benito Mussolini has been wielding the big stick again—for the good of his country.

His latest decree is that agricultural workers in certain areas cannot move into the cities without special permission, and that former agricultural workers now in the cities must go back to the land.

That is a drastic method of coping with the problem of rural depopulation; too drastic for adoption in any other land.

Yet there is something to be said for both sides of the question in these days of universal decline of the rural areas by the migration of agricultural workers to the urban scene and the bright lights.

The main objection to the Mussolini decree—and it is a very strong one—is that it is an interference with the liberty of the subject.

On the other hand, it is a good thing for the welfare of the state.

In nearly every country there are not enough people on the land. And there are too many people in the cities.

Cities are full of misfits. Boys brought up on farms hanker for city life. Some succeed, and because of their rural upbringing, and because they are of the right fibre, they become successful men. Most of them, however, never rise out of the common ruck. They would have made better farmers than artisans.

Benito has the right idea, but perhaps, he has the wrong way of attaining it.

Reject Lovat Scheme

Government Of Canada Has Alternative Suggestions Under Consideration

The government of Canada, said Rt. Hon. L. C. Amery, secretary for the Dominions in the British House of Commons recently, has not accepted the scheme of immigration put forward by Lord Lovat, chairman of the Overseas Settlement Board, but alternative suggestions are under discussion.

The scheme sponsored by Lord Lovat provided for migration to Canada and called for Imperial, Canadian and Canadian provincial governments' co-operation. It would have a system of loans to British youths and co-operation in providing cottages on the land. It was chiefly directed to greatly stimulating the family settlement schemes.

For Sprains and Bruises.—There is nothing better for sprains and contusions than Dr. Thomas' Eclectric Oil. It will reduce the swelling that follows a sprain, will cool the inflamed flesh and draw the pain. It will take the ache out of a bruise by counteracting the inflammation. A trial will convince any who doubt its power.

Farmer (to horse-dealer)—"No I dont bear ye no malice; I only hope that when you are chased by a pack of ravening wolves you'll be drivin' that horse you sold me."

Picture telegraph service has been started between Berlin, Germany, and Vienna, Austria.

$1.25 per pound up. Twenty-four samples free.—Sterling & Yarn Mills, Dept. 17, Orillia, Ont.

Stock Breeder Is Honored

J. D. McGregor, Of Brandon, Is Paid Fitting Honor At Chicago

Signal honor was paid James D. McGregor, of Brandon, breeder of Aberdeen Angus cattle, and one of Manitoba's first citizens, at Chicago recently, when his portrait in oils was hung on the walls of the Saddle and Sirloin Club, an honor reserved specially for those who win the respect and esteem of the stockmen of North America by their prowess in the breeding of livestock beyond the usual sphere. At the luncheon given in his honor at the club, and at which the portrait was unveiled, were gathered together many of the outstanding stockmen of the continent to add their word of appreciation of Mr. McGregor's success.

Estimates Weight Of Earth

Chicago Man Revises Figures Given Thirty Years Ago

With her daughters striving earnestly to reduce, old mother earth has just learned that she is some 592,000,000,000,000,000,000 tons heavier than had hitherto been known.

Dr. Paul R. Heyl, of the United States bureau of standards at Washington announced the revised figures in a speech at Cooper Union. Five years ago he set about the task of weighing the earth to get a result more exact than the estimate of six sextillion—the figure of six followed by 21 ciphers-tons arrived at about 30 years ago by an English scientist and a retired Jesuit in a Bohemian monastery, working independently. Dr. Heyl's calculations indicate the earth weighs somewhat more than six sextillion 592 quintillion tons.

The Last Asthma Attack may really be the last one if prompt measures are taken. Dr. J. D. Kellogg's Asthma Remedy will safeguard you. It will penetrate to the smallest bronchial passage and bring about a healthy condition. It always relieves and its continued use often has a permanent effect. Why not get this long-famous remedy today and commence its use? Inhaled as smoke or vapor it is equally effective.

Japan Displays Sea Power

The greatest display of sea power ever gathered together in Far Eastern waters passed for inspection before the newly enthroned Emperor Hirohito, in the grand enthronement naval review. Approximately 80 fighting ships of all classes took part, ranging from the great super-dreadnoughts Mutsu and Nagato down to destroyers and gunboats.

Minard's Liniment for Asthma.

The best way of getting over a mother-in-law difficulty is to marry an orphan.

Keep Foods Deliciously Fresh

Keep your foods—cakes, bread, pies, cut meats, etc.—under a covering of Para-Sani Heavy Waxed Paper. You'll be amazed at the length of time they'll stay fresh...delicious! Para-Sani keeps them from staling. Get Para-Sani in the handy, sanitary knife-edged carton. For less exacting uses ask for Appleford's "Centre Pull" Packs in sheet form.

Appleford Paper Products

HUNTER-MARTIN & CO., REGINA, SASK.

LOW RATE FROM BRITAIN WILL AID IMMIGRATION

Ottawa.—A $10 rate for all British migrants to Canada from the United Kingdom and Northern Ireland has been agreed upon between the British government and the steamship companies, according to a statement issued by Hon. Robert Forke, minister of immigration.

The new rate does not affect the $10 rate under the Empire Settlement scheme, which continues in force. The agreement rounds off the several conferences held in recent weeks in London, which were attended by W. J. Egan, deputy minister of immigration. It becomes effective on January 1, 1929.

The difference between the $10 and the old rate of $84 approximately will be absorbed by the British government and the steamship lines on an agreed basis.

The minister's statement follows:

"The British government has reached an agreement with the British Steamship Lines for the quotation of a special rate for British subjects normally resident in Great Britain and Northern Ireland, coming to Canada for permanent residence. Under normal conditions the ocean rate for third-class passengers from Great Britain to Canada is £16 13s., but under the agreement just concluded between the British government and the British Steamship Lines, such passengers, if British subjects, normally resident in Great Britain or Northern Ireland, will be able to come to Canada at the rate of £10, the difference between the normal rate being absorbed by the British government and the steamship lines on an agreed basis.

"The arrangement will come into effect on the first of January, 1929. In order to give it a fair trial it will continue in operation for two years according to the understanding reached in London.

Telegraph Wire Sets Type For Newspaper

Despatches Transferred Into Machines By New Invention

Rochester, N.Y.—A telegraph wire operated two newspaper type-setting machines here at the plant of the Rochester Times Union.

Despatches by wire were transferred mechanically directly into the machines, with human touch eliminated, and were recorded in lines of metal type, each as long as a news column is wide.

The object of the invention is to shorten the time and work required to transfer news from the place where it occurs to the printed page. It is designed to be another step in the development of the distribution of the printed word, which began when movable type was invented by Johannes Gutenberg, at Strassburg, in 1438.

The operation was a private demonstration held in the presence of a gathering of men who direct large printing and publishing enterprises.

The sending was done in the demonstration room to machines on the opposite side of the room, which were operated simultaneously from the same wire. One was a linotype and the other an intertype.

Boy Takes Cattle Honors

Chicago.—Clarence Goecke, a 13-year-old school boy of State Center, Iowa, stepped in ahead of the most experienced professional beef cattle breeders of America, and took one of the highest cattle honors of the world when his yearling Hereford "Dick" was chosen as the grand champion steer of the International Livestock Exposition.

No Claims Recognized

London, Eng.—Great Britain has not recognized the claim of any foreign government to sovereignty over coastal waters beyond the three mile limit, Sir Austen Chamberlain, foreign secretary, says.

Goes To Moose Jaw

Brandon, Man.—The resignation of City Manager A. W. E. Fawkes was accepted by the Brandon city council. Mr. Fawkes has accepted the city commissionership of Moose Jaw where he will take up his duties January 1.

Anti War Treaty

Washington.—The Kellogg anti-war treaty was submitted to the Senate for ratification by President Coolidge.

Deplores War-Like Tendency

United States Attitude In Increasing Navy Is Criticized

London, Eng.—Field Marshal Sir William Robertson, former chief of the general staff, in a speech here declared that the U.S. "influenced by imperialistic tendencies apparently means, whatever happens, to go on increasing her navy and her official utterances on the question of armaments not infrequently bearing a close resemblance to Germany's claims previous to the tragedy of 1914."

The field marshal, who was a prominent figure during the great war was addressing a peace conference held in conjunction with the League of Nations Union and presided over by Viscount Cecil.

Sir William said that the United States must be fully entitled to take her own course without care or thought for the interests and opinions of other states, but it was nevertheless disquieting to reflect that she could not attach much importance to the League of Nations or to the recent Kellogg renunciation of war pact or she would not be so anxious about her navy.

The nations seemed to have learned little from the experience of a decade ago, failing to see that war can never bring lasting peace, he said. All Europe is arming, but only by the infusion of a more generous frank and trustful spirit into the conduct of international affairs will the world be saved from drifting into another war.

Sir William's remarks were applauded.

Christmas Seal Sale

Saskatchewan Anti-Tuberculosis League Asking For Co-Operative Effort

Fort San.—It is announced by Mr. A. B. Cook, president and managing director, that the Saskatchewan Anti-Tuberculosis League is this year entering into a new phase of its work dealing with preventive and educational measures outside of the sanatoria altogether.

The scheme carries with it provision for the examination of all children in homes where infection is known to exist, as well as all school children reported by the school officials as showing signs of being under par or a breakdown.

The scheme is of such magnitude that it requires the active co-operation of all school teachers, all school officials, and physicians as well as the intelligent sympathy of the general public.

In order to meet the cost of the examination and care of children reported, a campaign for the sale of Seals is being carried into the schools, and they are being asked to form clubs, and to assist in the forming of a "School Children for School Children Fund," which will be used solely for this purpose, and will not be used to defray the cost of Sanatorium treatment. It is too late in the year to complete a comprehensive organization along the lines indicated to school teachers and school officials of the province, so for this year, a small supply of seals has been sent to each school for sale among the pupils.

Abolish Capital Punishment

British House Of Commons Agrees To Consider Proposed Bill

London, Eng.—The House of Commons, by the narrowest of majorities agreed to consider a bill for the abolition of capital punishment and the substitution of penal servitude for life.

Commander Joseph Kenworthy, Laborite, asked leave to introduce such a bill and on a division being taken this was granted, 119 to 118, amidst some excitement over the closeness of the vote and loud cheers from supporters of the bill.

Arrested For Swindling

Paris.—Madame Marthe Hanau, 42, and her former husband Lazare Bloch, were arrested and taken before an examining magistrate on charges of swindling investors of sums reported to total nearly 500,000,000 francs ($20,000,000). Most of the victims are stated to be small investors.

Western Pioneer Dead

Vancouver, B.C.—Thomas Kernighan, 75, a pioneer of the Canadian west, is dead here. He resided in the province of Manitoba for many years before coming to British Columbia.

Floods in Russia

Moscow.—The River Volga overflowed its banks in the neighborhood of Astrakhan, and 25 villages were submerged as a result of a storm which swept the Caspian Sea.

Soviets Asks Increase For National Defence

Additional Hundred Million Rubles Is Included In Budget

Moscow.—An increase of nearly 100,000,000 rubles in the estimates on national defence, was one of the striking features of the budget which has been presented to the Central Executive Committee, by N. P. Bryukhanov, commissar of finance. The total of this estimate is 840,000,000 rubles, compared with 743,000,000 of the past year.

Commissar Bryukhanov explained that the increase was needed to improve the educational system and general condition of the army.

PILGRIMS GATHER TO MARK SIGNING OF PEACE PACT

London, Eng.—A distinguished company attended the dinner of the Pilgrim's Society to celebrate the signing of the peace pact for renunciation of war. Sir Austen Chamberlain, British foreign secretary, and United States Ambassador Alanson B. Houghton, were guests, while others present were the Lord Chancellor, Viscount Cecil, of Chelwood, Lord Hardinge, and Lord Davidson, the former Archbishop of Canterbury, Lord Desborough presided.

Ambassador Houghton told the guests that the 3,000 miles of unfortified and unguarded United States-Canadian frontier are proof sufficient to the world that two peoples can live side by side not armed against each other.

"This is an assurance," he said, "that the peoples of the New World, out of their own experience, may properly offer to the peoples of the old. Dangers and horrors of war have been impressed upon both peoples.

"Canadians and the people of the United States have demonstrated the fact that they are safer and happier without armaments and without problems which inevitably go with them.

"I do not want to exaggerate, I do not want to press the point too far," Mr. Houghton went on, "but I ask you, is there not a measure of truth in what I've said? Have we not solid ground for hope now that nations have agreed to renounce the right to use force and have undertaken to reach peaceful stages. I wonder if the apparent necessity of maintaining armaments may be found less substantial than it now seems. Our experience, at least, would appear to point in that direction."

Sir Austen, making one of his first appearances at a public function since he returned from Canada and the United States, seized upon the theme of Mr. Houghton's speech and evoked prolonged cheers when he declared that unfortified frontier represents not only a line "which divides only to unite," Canada and the United States, but stands in a similar relation between the whole British Empire and America.

B.C. House To Meet

Victoria.—The British Columbia legislature will meet on January 22, it was announced here.

RETURNS TO CANADA

Dr. F. G. Banting, co-discoverer of insulin and winner of the Nobel prize in 1923, who is back in Canada. Dr. Banting went overseas recently to deliver a lecture at Edinburgh University in recognition of his having won the Cameron prize. He made the Atlantic trip on the S.S. Mauretania.

Will Inherit Large Estate

Two Young American Girls Related To English Nobility

Chicago, Ills.—Two little American girls are about to enter the English nobility and become part heirs to a $13,000,000 estate. They are Isabelle and Marjorie Meuser, 10 and 9 years old, respectively, grand-nieces of the Marchioness Huntly, of Orton Hall, Testerborough, England.

The children's father, Floyd G. Meuser, nephew of the Marchioness, died last February and since then they have been cared for by their stepmother, Mrs. Louise Meuser.

In probate court, Judge Henry Horner, granted a petition awarding the two children to the Marchioness that they might share in her vast estate.

Given First Reading

Women Members Of British House Sponsor Bill For Charity

London, Eng.—The first bill to be sponsored entirely by women members of the House of Commons was presented in the House by Miss Margaret Bondfield, Labor member for Wallsend and member of the settlement committee. It would provide public funds to aid in charity and furnishing shoes for the children of poverty stricken families in the coal fields and other depressed areas. The bill got a sympathetic reception and was given first reading.

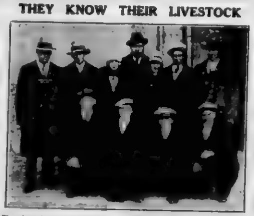
Conviction Is Quashed

Edmonton.—The conviction against Vernon Booher, under sentence to hang, December 15, for the murder of his mother, brother and two hired men, near Mannville, in July last, was quashed by the appellate division of the supreme court of Alberta. A new trial was ordered. This will probably take place in January.

Burglars Get Haul

Winnipeg.—Burglars broke into the offices of the Toupin Lumber Company here and blew open the safe securing $3,000 in cash and securities.

THEY KNOW THEIR LIVESTOCK



The champion teams of the Boys' and Girls' Swine Clubs of British Columbia, Alberta, Saskatchewan and Manitoba, photographed at Winnipeg on their way to the Royal Winter Fair, Toronto, as the guests of the Canadian National Railways. Back row, left to right; J. D. Guild, Canadian National Railways' agricultural department, Winnipeg, who accompanied the party east; Norman Williams, Vermilion, Alta.; Kathryn Coyer, Prince Albert, Sask.; J. S. McGowan, western manager, the system's department of colonization and agriculture; Alice Fear, Prince Albert, Albert Richardson, McConnell, Man.; E. R. Brocklebank, supervisor of Swine Clubs for Saskatchewan. Front row, Jack Thornton, Armstrong, B.C.; Roy Williams, Vermilion, Alta., Sidney Nash, Armstrong, B.C.; Wesley Pollock, McConnell, Man. British Columbia is represented this year for the first time. Kathryn Coyer and Alice Fear, Prince Albert, won the Dominion championship at Toronto, and with it the trophy awarded by W. D. Robb, vice-president of the National System.

Saskatchewan Legislature

House Of Regina Opens With the Usual Ceremonies

Regina.—The fourth session of the sixth Legislature of Saskatchewan was opened with the usual ceremonies befitting the occasion.

A feature of the opening was the introduction of Dr. F. T. Waugh recently elected to represent Arm River. The actual session lasted just long enough for the reading of the speech from the throne, probably the longest one ever read in Saskatchewan, the moving of the formal motions and the single introduction of the only new member. Following the adjournment the members and guests attended the usual reception in the library. Flowers in great profusion were used as decorations.

While for some reason an impression has been broadcast that the present session will be rather brief, those actually in a position to know can see no reason why that should be. In fact it is generally expected in well informed circles that the session will be just as long, if not longer than the average. It is fully expected to last seven weeks.

Worked As Sales-Girl

One Of England's Richest Girls Employed In New York Store

New York.—The New York American says in a copyrighted story that Lady Doria Lois Hope, one of England's wealthiest heiresses, has fled to Washington after being discovered while working as a salesgirl in a large department store.

Lady Doria is a niece of the Duke of Newcastle, one of the richest men in England, and when she is 21 next year, will inherit a liberal estate from her late grandfather.

With a friend, Miss Leonora Highet, The American says, Lady Doria came to New York recently, took an apartment in Greenwich Village and a week ago obtained a position with a department store at $25 a week.

Sails For Antarctic

Commander Byrd's Expedition Has Left Civilization

Washington.—Word that Commander Byrd's antarctic expedition had "left civilization at last" was received by Secretary Wilbur over naval radio from the explorer.

The navy has arranged to maintain constant radio communication with Byrd expedition after it establishes a base in the Bay of Whales of Ross Sea, the only safe harbor at the edge of the antarctic continent.

Ice Breaker For St. Lawrence

Ottawa.—It was officially announced by Hon. P. J. A. Cardin, Minister of Marine and Fisheries, that the contract for the government ice-breaker which will operate in the St. Lawrence River, had been awarded to the Saint John Dry Dock Company. The tender of the New Brunswick concern of $730,000 was $30,000 below the next lowest bidder. Specifications call for a craft of 3,000 horsepower, 200 feet long and 42 feet wide.

MAY EXTRADITE VIOLATORS OF U.S. LIQUOR LAWS

Toronto.—A special despatch from Buffalo printed in the Star states,

"Negotiations for a retroactive treaty between the United States and Canada to permit of the extradition of Canadians indicted here for alleged violations of the national prohibition laws are already under way at Ottawa. District Attorney Richard H. Templeton definitely announced.

"It has been tentatively decided that the conference is to be held some time in January between Canadian and United States customs officials to outline a treaty similar to that already in force between Cuba and the United States.

"Such instructions have already been sent to Hon. William Phillips, the United States minister to Canada, stationed at Ottawa."

Ottawa.—The Canadian government has so far received no representations for a retroactive treaty between Canada and the United States to permit of the extradition of Canadians accused of violation of the United States prohibition law.

The suggestion of the United States for a conference in respect to a possible revision of the anti-smuggling treaty of 1924, between the two countries, it was officially stated, is still under consideration by the Dominion government. A definite decision in this regard is expected to be made shortly.

GRADING SYSTEM DOES NOT FAVOR THE PRODUCER

Swift Current.—Vagaries of grading at country elevator points, use by private elevator companies in this district of illegal tickets, and frank confession from at least one superintendent that the system of the country is not for the benefit of the farmer producer, were the high lights developed at the sessions of the Saskatchewan Grain Inquiry Commission here.

The commissioners had emphasized before them that farmers totally ignore the protection afforded to them through the sample box being locked. Several witnesses when their complaint of bad grading had been examined had to admit that they did not take advantage of the protection afforded them under the Grain Act by keeping their sample boxes locked with the result that in their appeal for a review their samples were set aside as not necessarily being samples of their physical grain.

When the commissioners adjourned they left with an expression of deep appreciation ringing in their ears, on behalf of the 500 farmers who has been here for two days giving assistance to the commission in their efforts to study the whole question of grading and mixing an expression of thanks was tendered them by Ed. Stevens, a prominent farmer and a director of the U.F.C. for district No. 4.

Addressing the commission he stated he felt he expressed the feelings of the farmers present and those of the district when he stated they appreciated the work of the commission and the evident determination of this body created by the Saskatchewan Government to get to the root of the difficulties facing the farmers. On behalf of the commission Chief Justice Brown thanked the farmers briefly.

Record Price Paid For Champion Steer

Animal Raised By Iowa School Boy Sold For $8,000

Chicago.—Almost doubling the previous record price because of the peculiar circumstances surrounding the champion this year, the John C. Penny Company, operators of a chain of general stores throughout the United States, purchased "Dick," grand champion steer of the 1928 international livestock exposition, at a price of seven dollars a pound on the hoof.

The animal, owned and raised by Clarence Goecke, 13-year-old schoolboy of Iowa, weighs about 1,150 pounds and the price paid it will thus amount to a trifle more than $8,000.

International Conferences

Will Discuss Subjects Of Interest To Canada and U.S.

Ottawa, Ont.—Next year will see a series of international conferences in Ottawa on a variety of subjects of great interest to the United States and Canada. It is assured that there will be discussed by the representatives of the two countries radio control and wave length allocation, control of liquor exports from Canada to the United States, the development of St. Lawrence and quite probably discrimination in customs, rail freight, shipping and harbor rates and dues.

Personnel Of Radio Commission

Ottawa.—The personnel of the new radio commission has been announced at the office of the prime minister. It is as follows: Sir John Aird, president of the Bank of Commerce, chairman; C. A. Bowman, editor of the Ottawa Citizen, and Augustin Frigon, Montreal, director of technical education for the province of Quebec.

Sending Two Experts

Paris.—The newspaper Matin says that Premier Poincare has been informed by S. Parker Gilbert, agent-general of reparations that the United States has decided to send two experts to co-operate in the reparations settlement. The stipulation was added, however, that such action must not involve any responsibility on the United States.

Arms Commission Meets

Geneva.—A special commission which is seeking to reach an agreement concerning the control of the manufacture of arms and material of war, opened in Geneva under the presidency of Count Von Bernstorff, of Germany.

WINTER SPORTS AND FIRST AID

[illegible]

...ously thin. Accidents have been no[t] few fatal.

When a skater breaks through, he should hang onto the edge quietly and ... while his companions will get a ladder ... the break and will keep it ... where the skater pulls himself cautiously up it and crawls to safety. If a ladder is not available a hockey stick may be used the same way ... may be pushed cautiously over the ice ... be the means of saving a person in danger of drowning. With none of these expedients at hand a living chain may be formed, the first ... lies down flat and worms herself cautiously nearer and nearer the hole, a companion also lying down hangs on with both hands to the feet of the first one and so on until as many as is necessary or as can be found have formed the chain. In this way a drowning person may be pulled from the water. In every case speed with caution is necessary.

When free of the water, he must be treated for shock, bed with hot drinks, hot water bottles, warm blankets and a visit from the doctor. Literature on first aid for the apparently drowned may be had from the Canadian Red Cross, 407 Civic Block, Edmonton.

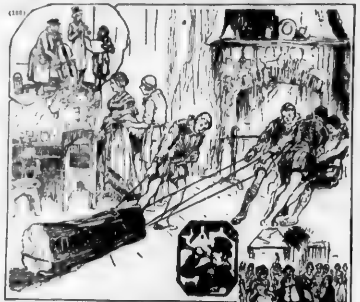
Victoria to Have an Old English Yuletide Festival



When ... Thomas Tusser, born ... years before Shakespeare, wrote

At Christmas play and make good cheer,
For Christmas comes but once a year,

he ... the success of ... Daily ... of "Four Hundred ..." with other agri... [illegible] ... But it remained for Dickens and Washington Irving in America to ... Yuletide spirit.

We on this continent have long ... modeled our Christmas celebrations on the model of the old English Christmas, which we find memorably described in the writings of Dickens and Irving. But during the coming Christmas the festivities hallowed by six centuries of English tradition will come alive as never before, and for their setting they will have the city of Victoria, B.C., which has been called "a corner of England on the Pacific coast." Here, in the Empress Hotel, an Old English Yuletide Festival is to open on Dec. 22. The holly and ivy and rosemary celebrated in English song all flourish in Victoria, and will furnish the traditional setting for the carolling, the wassailing, the mumming, the Twelfth Night merrymaking, the Yule log, the mistletoe, and the other delights that warmed Geoffrey Crayon's heart.

Harold Eustace Key, director of Canada's major music festivals, is arranging the musical programs for the nightly concerts at the Empress Hotel. He has in hand a representation of "Wardle's Christmas Party" as immortalized by Dickens in the Pickwick Papers. This is to have a running commentary of Yuletide music to set off the charming foibles of its lovely ponderous characters. Dr. Healy Willan of the Toronto Conservatory of Music has composed for the occasion incidental music to "The Chester Mysteries," a Christmas play selected from a group of medieval pageants which used to be enacted by the trade guilds of Chester, England, dealing with the timeless theme of the shepherds and the Babe of Bethlehem. The first performance of these Mysteries was in 1328, exactly six hundred years ago.

$2.00 Per Year

For several years the great majority of weekly newspapers in Canada have been $2.00 per year. This includes Eastern Canada as well as Western Canada. Some years ago the publisher of the Mercury had in mind to charge $2.00 instead of $1.50 but at that time the hard winter with its consequent feed shortage came upon us and we then carried on until this year at the $1.50 rate.

Printed matter is about the cheapest thing there is in the world today when very large numbers are required, and it is somewhat of a problem sometimes for the small office catering to a few hundred subscribers to compete with the product of the large cities.

But now, as before, the Mercury is distinctively a local paper. Edited and printed in the town in which you do business, carrying every day news about people whom you know, it has a particular and definite appeal to the residents of Tofield and district.

We are gratified that those who have paid the $2.00 rate up to the present have done so with a smile, which is the best possible encouragement to us to turn out a better paper.

The Tofield Mercury

for Economical Transportation

The
Outstanding Chevrolet
of Chevrolet History
—a Six in the price range of the four!

When you learn the full details of this sensational new automobile, you will realize that Chevrolet has provided those qualities of six-cylinder smoothness, power, acceleration and luxury which heretofore could only be enjoyed in cars costing several hundred dollars more!

The CHEVROLET Engine

The Outstanding Chevrolet is powered by a new six-cylinder valve-in-head engine of advanced design.

It develops 32% more power than the previous Chevrolet motor and affords greater speed, faster acceleration and an economy averaging better than twenty miles to the gallon of gasoline!

A new non-detonating cylinder head provides high compression performance without special fuels. The new hot-spot manifold assures complete fuel vaporization. The new and larger carburetor incorporates an automatic acceleration pump, and an improved venturi choke for quicker winter starting.

The new heavier crankshaft is statically and dynamically balanced. The entire rocker arm mechanism is automatically lubricated. Long engine life is provided for by AC air cleaner, continuous oil purification of the crankcase oil—and improved crankcase ventilation.

Big, powerful, easily adjustable four-wheel brakes. Ball-bearing steering mechanism. And such costly car features as two-beam headlamps with toe button control for "dimming", semi-automatic spark control, theft-proof Electrolock, waterproof spark-coil construction, larger shielded safety gasoline tank in rear, improved differential lubrication and many other features of comparable importance.

New Bodies by Fisher

In addition the New Chevrolet offers an order of beauty, distinction and style never before attained in any low-priced automobile! The high flattened hood and the gleaming chromium plated radiator shell furnish the keynote of rugged smartness and grace. The rakish unbroken lines, emphasized by distinctively grouped hood louvres, are suggestive of speed and alertness. The divided body moulding and concave front pillars reflect the vogue so widely favored by leading custom builders; while the larger, longer, lower bodies are themselves masterful examples of the craftsmanship for which Fisher is internationally renowned.

The seats are wider and more restful. The driver's seat in all closed models is easily adjustable, forward or back—a feature recently introduced on a few of the high-priced cars. The redesigned dash carries an attractive grouping of all control instruments indirectly lighted, including the new motor temperature indicator.

MUSIC IN THE HOME

AT NO time in the history of the world has music been so much enjoyed as at present. Music in some form or other as old as human speech, and it takes but little imagination for one to picture the primitive man of far away ages making sounds of joy and sorrow by humming and yodling. But music, as we understand it today is dated by the historians from the Greek music which was itself influenced by Chaldean and Egyptian and by Indian and Chinese.

There has always been an appreciation of music—one might say a growing appreciation. Without attempting to go into the technique of music, of which we are incapable, it can be said that as each century, generation and decade passed, different and better forms of music have been invented. The world having found the beauty of notes, half and quarter notes, time and rhythm, mechanical genius invented different mechanisms to produce them.

The organ is probably the most ancient form of instrument being of Chaldean origin. Originally a crude arrangement of pipes through which wind was driven at first by blowing with the mouth and later by a crude form of bellows, the organ has been developed step by step until today the organs in churches and theatres are magnificent mediums of musical expression. The piano, perhaps not so ancient as the organ, is quite ancient in its origin. Being a stringed musical instrument of percussion, it is the direct descendent of the lyre and harp of modern times. And one could go on with the violin, cornet, horn, trombone, etc., etc., and find in them all a deep rooted love of music catered to by mechanical genius.

Music has few or no class divisions. Years ago, and not so many either, the piano or organ in the well to do home was matched by the accordeon, concertina or flute in the workers domicile; and the fortunate musician who had had the advantage of a musical education, was matched by the individual "who could get a tune out of anything." Many a score times have the writer heard harmonious music from a mouthorgan played by a rollicking leather-lunged fisherman of the North Sea, he most likely being the centre of a group walking down the main thoroughfare of a large town. And many a score times has he been in cabins of Norwegian and Scandinavian lumber vessels from the Baltic and heard the Norwegian sailors play on their accordeons. And it was no mean music. It would be impossible to write a history of the early days of Western Canada without mention of its old time dances, and was not the "fiddler" king elect of the group; frequently old and without musical education, he was able to "tickle the toes" of his hearers.

Then in contrast there is the wonderful music of individual educated and practised musicians, grand concert orchestras and brass and silver bands. Music that has held thousands spellbound and music that has swayed multitudes.

It was never so easy to hear good music as now. In exchange for a few dollars, it is remarkable sometimes how few, one can have in their own home reproductions of the greatest artistes. With a radio installed one can hear music that only a few years ago was the privilege of those living in cities. With the improved phonograph and radio one can have music of all kinds; the rollicking songs of yesterday, the jazz of to-day and the real music of all time—music redolent of water falling over rocks, wind blowing through the trees and the lark on the wing.

"ALTOGETHER FOR—"

THE CITY of Edmonton now has a slogan. It is not that the city has been unduly modest in past seasons, or that slogans as a means of making individuals, firms or cities better known are new. The exact explanation of the idea of the donor of the prize for the best slogan for the city can of course only be given by him. We surmise, however, that he desired the city to have a figurative handle for everyone to take hold of, a figurative rope for everyone to pull on and a figurative lever for everyone, with which to lift the city to greater heights of fame. The committee who had the choosing of the slogan from many thousands made a wise choice. Simple and all embracing it contains the literary essence of civic pride and endeavor in one short easily said and understood sentence. It also indirectly but substantially nails down discord, strife, jealousy and anything that tends to mar the onward progress of the city. "Altogether for" anywhere you live, is a good policy to follow. Without attempting to steal the other fellow's thunder, the "altogether" appeals to us as being worthy of mention.

The application of two good intentions or plans if opposed to each other, become negative; a half dozen or a score become chaos. The application of one good plan with everyone pulling in one direction produces results. And this is true of the family, the smallest rural community or the largest city. The spirit of "Altogether for—" in the family, the community, the town and the city, is one that should be cultivated as much as possible and used on every possible occasion.

WORLD HAPPENINGS BRIEFLY TOLD

The Ontario government is expected to abolish the 30 cents per gallon [illegible].

Reports of a violent earthquake in Alma Ata, Russian Turkestan, where Leon Trotzky is living in exile were received in Moscow. No details were given.

Twenty-five villages were submerged as a result of a storm which swept the Caspian Sea and caused the River Volga to overflow in the neighborhood of Astrakhan.

Palestine's rapid development under the British mandate is evidenced with the recent arrival at St. John N.B., of the first shipment of Jaffa oranges ever to reach these shores from the Holy Land.

Herman Trelle of Wembley, Alta., the wheat king of the west, was forced to relinquish his hold on the oats championship at the Chicago show, when first place was awarded to Ivan Gustafson, Victor, Montana.

The proposal that British and United States parliamentarians meet in Canada to discuss naval parity and disarmament will receive no official recognition by the United States Government.

The first trial flight of the R-100, Britain's new giant dirigible, will be made to Cardington, Bedfordshire. If the trip is successful, the airship will proceed shortly afterwards to the United States.

Admiral Sir Roger Keyes, who gained fame as commander of the operations against Zeebrugge and Ostend, in April, 1918, has been appointed Commander-in-Chief of the Portsmouth station of the navy.

Plans for a tour of Great Britain by 800 secondary school boys of Eastern Canada were announced at a meeting of the Collegiate Institute Board of Ottawa by Dr. J. H. Putnam, senior inspector of Ottawa's public schools.

World's Oldest Wedded Pair

Serbian Couple Have Been Married Eighty-Nine Years

In a little Serbian village near Semlin are living probably the oldest married couple in the world. Documentary evidence proves that Demetrius Fillenovic and his wife Zivana were already married and living in the village where they spent their childhood days in 1839. Demetrius was then over twenty-one. He is fully 110, and his wife is 107.

They have lived together for eighty-nine years, and are now surrounded by numerous children, grand children and great-grand children, says a writer in Tit-Bits. Both are in excellent health and in the enjoyment of all their faculties. Fillenovic has never smoked nor drank spirits. He took his last glass of wine thirty years ago.

A Remarkable Ink

Nothing Could Be Added To Statement Of Producers

A concern that once produced a marking ink had the following to say about its product: "It is remarkable for requiring no preparation, penetrates powerfully, precluding previous pre-requisite preparations, possesses particular prerogatives, protects private property, prevents presumptuous, pilfering persons practising promiscuous proprietorship, pleasantly performing plain practical penmanship perfectly, precludes [illegible] panegyrics, preferring proper public patronage."

The only reason a great many American families don't own an elephant is that they have never been offered an elephant for a dollar down and easy weekly payments.

The average length of life of a business man is said to be two-thirds that of a farmer.

Yuma, Arizona, has only 14 cloudy days in an average year.

She: "How far we are from the trivialities of everyday life."

He: "Yes, especially beer." — Kasper, Stockholm.

TALENTED VOCALIST

MARION COPP

Marion Copp is a rising young contralto who will assist in the Sea Musical Festival to be held in Vancouver January 23-26. The festival programme will be interpreted by many distinguished singers, instrumentalists and choirs, and will be the music event of a decade.

Recipes For This Week

(By Betty Barclay)

SALMON EN CASSEROLE

Cook 1 cup of rice; when cold line baking dish. Flake 1 can of salmon. Beat 2 eggs, add one-third cup of milk, 1 tablespoonful of butter, pinch of salt, dash of paprika. Stir into the salmon lightly, cover lightly with rice. Steam one hour, serve with white sauce.

CINNAMON APPLES SUPREME

1 package vanilla junket
1 pint milk
6 apples
1 cup sugar
1-3 cup water
3 tablespoons red cinnamon candies.
1 tablespoon lemon juice

Peel and core apples and place in baking pan. Make a syrup by boiling the sugar, water and cinnamon candies together for 5 minutes; add lemon juice. Pour syrup over apples and bake until tender, basting several times. Place apples in individual dishes, adding a little syrup. When cooled and the syrup has jellied, prepare vanilla junket according to directions on package and fill dishes. Let stand in a warm place until firm. Then chill.

Canada's Great Prosperity

People Can Face the Future With Every Confidence

Never in history has Canada been in such comfortable and prosperous shape or faced the future with greater confidence and assurance. Dominion leaders reiterate this and the people of the country cannot but be aware of it. The record grain crop which the western provinces have gathered in has swelled that optimism generated in all phases of activity. Each successive month of the year has but served to brighten the prospect in all phases of Canadian endeavor, and all figures of employment have been broken back to the height of post-war activity in 1920. Construction, manufacturing, transportation, mining, trade, communications and services all record substantial and encouraging gains.

An Ancient Roadway

Built Across Mexico Is Probably Oldest On North American Continent

The old Spanish road, built across Mexico in the sixteenth century is believed to be the oldest road on the North American Continent. It was built in the form of a letter "Y" with the lower point of the stem starting at Vera Cruz on the gulf. The northern prong touches the Pacific at San Blas and the southern tip at Acapulco. Because of this road the westbound convoys from the Philippines were spared the dangerous navigation around Cape Horn. There is clear evidence that this old trail was used by the Indians before the Spaniards broadened it from a pack-mule path to a highway.

Paris Has Smallest Restaurant

Paris boasts that it has the tiniest restaurant in the world. It is called the Petit Restaurant, situated in the Rue Hippolyte Lebas, and seats five persons, who are accommodated at one table. In spite of the increasing popularity, the proprietor refuses to enlarge the premises.

Bobby (on his eighth birthday writes to his absent father): "My dear papa, whenever I'm tempted to do wrong, I think of you and say, 'Get thee behind me Satan.'"

Opposing Construction Of German Warship

Country Cannot Afford This Expenditure Say Social Democrats

There seems to be sound common sense in the argument of the German Social Democrats who are opposing the construction of the first German warship to be built since the end of the Great War. Germany can ill afford to spend the money on a lone warship which would be no match for the navies of other countries, one of the leaders declares. One warship would be a beginning however, and it could prove a starting point toward the development of a real navy. If Germany has aspirations toward naval power, a start must be made in some direction. But with the burdens of war still pressing upon her people, naval ambitions would appear to be a luxury which Germany well might forego.

Ancient Greeks Used Asbestos

Mineral Which Withstands Fire Was Called "The Unconsumable"

Few of the world's minerals have had a more curious history than asbestos, and few are more curious in themselves.

Though commercially merely fifty years old it was known to the ancients. The Greeks called it "the unconsumable," whilst the Tartars and the Assyrians were aware of the strange, fibre-like rock that could withstand fire.

Its earliest known use was for the shrouds of kings, whose dead bodies were wrapped in asbestos cloth, so that their ashes might be kept separate from those of the funeral pyre.

Must Be Improving

"Yes," he said, "I think the world is getting better."

"And may I ask why?" she answered.

For a moment he twirled the ring she had just handed back to him, held it in such a position as to make it flash brightly, and then replied: "This is the first time I have ever had an engagement ring returned without a fight or a protest."

Ethiopia is to have its first automobile highway, the project being backed personally by His Imperial Highness, the Prince Regent.

DOMINION CONSERVATIVE ASSOCIATION

J. R. MacNicol, president of the Dominion Conservative Association, who presided over the provincial convention of the party at the King Edward Hotel, Toronto, recently.

Mysteries Of Lightning

Scientists Have Discovered Peculiar Facts Not Known Before

Scientists have now succeeded in measuring lightning. They state that a flash takes about one-seven-thousandth of a second to complete itself, and no part of it last more than approximately one-thirty-five hundredth of a second. This is the first time in history that the speed of a lightning flash has been measured.

It has also been proved that lightning starts from the clouds and the ground at nearly the same instant, and approximately one-seven-thousandth of a second later the two ends unite in mid-air.

These facts were determined by Dr. C. U. Boys, a British physicist, who has been attempting hundreds of photographs for the last twenty-six years, until a stroke of lightning in New York at last gave him this information.

Favorite Name For Ships

Mary in its various forms—Maria, Marion, Marie, and so on—is the favorite ship name, and about eleven hundred vessels bearing it are afloat. Anne, Anna and Annie come next as the names of about five hundred craft.

No. 876—Important Flare. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 1¾ yards of 40-inch figured material with 2¼ yards of 40-inch plain material.

No. 837—Paris Lingered. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 5¼ yards of 40-inch material with ⅝ yard of 1⅝-inch lace banding.

No. 883—Trim and Slender. This style is designed in sizes 16 years, 36, 38, 40, 42, 44, 46 and 48 inches bust measure. Size 36 requires 3½ yards of 40-inch material with ⅓ yard of 16-inch contrasting.

No. 418—Attractive and Practical. This style is designed in sizes 36, 40 and 44 inches bust measure. Size 36 requires 1⅞ yards of 32-inch material with 7½ yards of binding.

No. 703—Junior Coat With Raglan Sleeves. This style is designed in sizes 6, 8, 10, 12 and 14 years. Size 8 requires 1½ yards of 54-inch material with ¼ yard of 27-inch contrasting and 1¼ yards of 40-inch lining.

No. 317—Cunning Bloomer Dress. This style is designed in sizes 2, 4, 6 and 8 years. Size 4 requires 2⅜ yards of 40-inch material with ⅝ yard of 16-inch contrasting.

SUNDAY SCHOOL LESSON.

DECEMBER 16

PAUL AND HIS FRIENDS

Golden Text: "A friend loveth at all times."—Proverbs 17:17.

Lesson: Acts 20.36-38; Romans 16 1-4; Philippians 2.25-30, Philemon.

Devotional Reading: Psalm 63:1-7.

Explanations and Comments

The Salutation Of the Letter, verses 1-3. Timothy is with Paul, and joins him, "a prisoner of Christ Jesus," Paul writes, in sending greetings to Philemon, their beloved fellow-worker, and to Apphia and Archippus, presumably Philemon's wife and son, and to the church that meets in his house. "Grace to you and peace from God our Father and the Lord Jesus Christ."

Thanksgiving For Philemon's Faith, and love, and service, verses 4-7.—Philemon was a man of means who had distinguished himself by his deeds of charity. He was zealous in spreading the gospel, and his house was the meeting-place of a group of Colossian Christians. Paul writes Philemon that he thanks God always as he mentions him in his prayers, "for I have much joy and comfort in thy love."

"I'm your friend now; I put you in my prayer last night!" were the words with which a little child greeted a house guest one morning—a beautiful way in which to take the first step toward a desired friendship. As Emerson says, the only way to have a friend is to be one, and we cannot fail to be friendly to those for whom we are praying.

Intercession For Onesimus, verses 8-21.—"Wherefore"—thus Paul begins his intercession for Onesimus, Philemon's runaway slave. Paul's "wherefore" means that since Philemon has proved himself good in so many particulars, especially in his love and care of the followers of Christ (as he has just written), Paul will expect from him the further proof of his goodness, that he will forgive Onesimus and welcome him kindly on his return.

"A disposition to do good, together with past instances and expressions of it, is a good handle to take hold of for pressing to more." Matthew Henry.

New York's Newest Club

Aims To Prevent Accidents To Motorist and Pedestrian

There are clubs innumerable in the automobile world, but a new one has been launched nevertheless, and it is ambitious to make its membership virtually equal to the complete roster of motorists in America. It has received a charter from the Secretary of State of New York, and its name is the Stay Alive Club. Its founders aim, in their own words, "to keep themselves from killing anybody, and to protect themselves from being killed by anybody else."

A life membership in this club costs only $5.00, and carries with it a copy of a new book, entitled "Stay Alive!" The author is Marcus A. Dow, president of the National Safety Council, and in it he tells just how the automobilist may get into thirty different kinds of motor accidents, but also how he may keep out of these same thirty kinds of accidents, if he really wants to stay alive and is willing to keep his eyes open and do a little real thinking.

More than fifty great corporations have given their hearty indorsement to the purpose and methods of the club, and it has the approval of the National Safety Council, the work of which, in many different fields, has saved innumerable lives in recent years.

Nicknames Of the Past

Personality Was Not Considered In Majority Of Cases

There may be something in the contention that the absence of popular nicknames for present-day political leaders—with the possible exception of "Jix"—shows a lack of personality, but it is quite probable that politicians of the past would readily have dispensed with some of the labels attached to them by their contemporaries. Wellington, "the Duke" to his admirers, was "Old Nosey" to his numerous enemies. Brougham was commonly referred to as "Beelzebub" or the "Arch Fiend." Peel went by the pleasanter title of "Spinning Jenny." And Creevy habitually referred to Lord John Russell as "Pie and Thimble," Lord Ripon as "the Imp," and the Duke of Cleveland as "Niffy-Naffy."

An Ancient Observatory

A prehistoric astronomical observatory, which it is estimated was constructed in 3181 B.C., has been unearthed at Buetzow (Mecklenburg). The observatory is in the form of circles of stones, which served for the observation of the annual circuit of the sun and also as a calendar.

Having a Hard Time

"One person is struck by an automobile in this country every forty-two seconds," says an informative contemporary. He must be in pretty bad shape by this time, whoever he is.—New York Evening Post.

Plans For World Wheat Congress

Regina Already Preparing For Big Conference In 1932

A building with floor space totaling ten acres will be built in Regina in connection with the World Wheat Congress which takes place during 1932.

This fact was made known in a statement at Toronto from D. T. Elderkin, secretary-manager of the Regina Exhibition Board.

Some 40 buildings will be used for exhibits, Mr. Elderkin adds, representing agriculture, industry, women's work, etc.

Preparations to be made in Regina for the conference were carefully outlined in Mr. Elderkin's report, which says in part:

"The city of Regina and the Exhibition Association have undertaken to provide accommodation.

"For the housing of the exhibits it is intended to erect a building with a floor space of up to ten acres. Some forty buildings also will be used for exhibits representing other products of agriculture, industry, women's work, school exhibits, fine arts, etc.

"The stadium provides seating for 7,000 people and the armory 3,000. Should conditions indicate the need for a larger meeting place the grandstand will be available for seating for 20,000 people. A system of amplifiers will be installed for the Grain Congress," Mr. Elderkin said, "so that a vast audience will be able to hear the addresses. It is intended to have at least six or eight small halls where the various sections may have their meetings.

"It is planned to reserve hotel accommodation for distinguished visitors. The loyalty of the citizens of Regina can be counted upon to open their homes to the rest as was done in the capital during the poultry congress.

"The city of Regina will be asked to provide tent city for the accommodation of about ten thousand visitors, while provision will be made for locating the thousands who will come in motor cars and bring their own camping equipment. It is intended to provide sleeping accommodation for as many as 50,000 visitors."

It was pointed out that the congress would coincide with the 50th anniversary of the beginning of agricultural development in the mid-west as a result of the establishment of railway transportation. It would also be the 50th anniversary of Regina which was selected in 1883 as the site for the capital of what was then the Northwest Territories.

The preliminary prize list committee includes: Dr. J. H. Grisdale, deputy minister of agriculture, chairman; J. A. Mooney, G. H. Clarke, L. H. Newman and D. T. Elderkin.

The prize list, as suggested by the committee's report, calls for prizes totalling $250,000.

In the wheat section, with six varieties of wheat, a total of $15,000 in prizes is offered for each variety or $90,000 in all. The manifestly less important grains offer smaller prizes.

The general committee as accepted includes: Hon. W. R. Motherwell, chairman; Hon. James Robb, Hon. C. A. Dunning, Hon. James Malcolm, Hon. Robert Forke, together with the provincial ministers of agriculture, the representatives of the Canadian Seed Growers' Association, Canadian Millers' Association, Canadian Bakers' Association, Canadian Malters' Association, Canadian Press Association, and the deans of all agricultural colleges.

Delegates at the outset stressed the fact that the holding of the congress in Canada was indicative that the Dominion's agrarian leadership was realized by the world. Mr. Motherwell pointed out that the phenomenal increase in Canada's grain production since the war amounted to about 250 per cent.

Life is much like a motor car. The faster you drive a car, the less mileage you get per gallon.

A queen bee, recently exhibited in London, had travelled 3,500 miles by post.

CHAPTER VIII.—Continued.

Still no answer, but a low silvery laugh was proof that the occupant of the nest was not a wraith.

"If you are a fairy," he persisted, "won't you come down and give me a Terpsichorean exhibition in the fairy ring on the floor of your enchanted glade?"

"I am a dryad," came the dulcet tone of a childish voice, "and a dryad's life is bound up in her tree. I cannot leave my arboreal bower until the hour of midnight."

"We'll see about that," laughed Donald as he seized the slender cedars and rocked them violently.

A scream of simulated fear came from the tree-tops. "Stop!" the voice cried, "I'll come down."

A tiny moccasined foot felt its way to a limb, and a slight figure clad in man's overalls and a brown cotton shirt, stood erect with downcast eyes.

"Jump," invited Donald, as he stood with arms outstretched; "fairies don't weigh much."

The "dryad" shook her head bashfully, then with a quick, bird-like motion sprang straight out into the air, her golden hair streaming and flashing in the sunshine. She landed gracefully on her moccasined feet and went bounding across the valley, leaping the creek with the ease and grace of an antelope, and, without turning her head, disappeared in the dark forest aisles.

Donald's black eyes remained fixed on the spot where the fairy-like vision vanished from view. His whole attitude registered astonishment. He was completely mystified by the appearance of a girl in this remote wilderness.

He climbed the trees for a glimpse of the golden-haired fairy's bower. A rope was tied around the tops of four cedars, with interlacings of cord between. This rope pocket was filled with pine boughs, and these covered with ferns and moss. A cord that led to a nearby spruce was, he decided, used to impart a swinging motion to this strange maiden's cosy retreat.

In the centre of this rosy nest lay a copy of "Tennyson's Poems" and a book on "Bird Life." As Donald leaned closer a gentle breeze fluttered the leaves of the book of poems.

"Fairy hands turned to the right page," he mused aloud as he read these lines from "Maud."

"My bird with the shining head.
My own dove with the tender eye
Shine out, little head, sunning over
with curls,
To the flowers, and be their sun."

"A corner of dreamland," murmured Donald.

A stronger breeze swept down the valley, causing the nest to rock with gentle undulations. "A novel idea," he thought, "and what a restful spot to sleep and dream!"

Donald was tempted to finish his nap in the vacated dryad's nest, but put the thought aside as being sacrilege. He descended to the ground, picked up his basket and started down the mountain. As he neared the lake he saw the trapper with Douglas and Andy sitting outside the cabin door.

"Any luck, ol' timer?"

Donald lifted the lid of the basket.

"Whew!" ejaculated the trapper. "Them's wallopers, ain't they?"

"John," queried Donald as he sat down on the grass, "did you ever see a dryad?"

"A what?"

"A dryad."

The trapper's wrinkled face puckered. "Yeh," he answered quizzically. "I seen lots of them fellers in Vancouver one time after I'd bin drinkin' for a week."

Donald told of his meeting with the strange child of the forest. "Who is she, John?" he asked.

"That was little Connie Wainwright. She an' her father live in a little valley t'other side of that bluff," pointing up the mountain. "She's a great kid, too. She has a hoss that's named after a hoss that had wings. I forgit the name she calls him." The trapper pondered for a moment.

"Pegasus," prompted Donald.

"That's it. She rides that hoss like a Texas Ranger, an' she's a crack shot with the rifle. Funny thing, though, she ain't ever shot anything to my knowledge 'cept a cougar that tried to get her pet deer. Her father's jest the same, he won't kill nothin' an' they've got all the birds 'round their cabin as tame as chickens. They are always studyin' birds, flowers, an' animals. He's an Englishman of eddication, an' he's eddicated the kid, too. Was the 'Breed' with her?"

"No. Who is the 'Breed'?"

"He's a half-breed Indian with a lame leg. He came over the trail 'bout two years ago. Got one look at that shiny haired kid an' thought she was an angel, I guess, an' has been huntin' her ever since. He built hisself a cabin up there. Works for Wainwright in the summer an' traps in the winter. He follers that kid 'round like a dog follers its master."

Donald was interested.

"I must call on them."

"He'll be glad to see ye, as ye can talk his lingo. His langwidge is too high-falutin' for me. He sometimes comes to ask me 'bout the habits of animals, but I got a sneakin' notion that he knows more 'bout it than I do."

That evening Donald and Andy visited the recluse.

CHAPTER IX.

The trail to Wainwright's cabin was a mere path that followed the vagaries of a small mountain stream which at times flowed with a tranquil murmur, then suddenly plunged over ledges and shattered itself into creamy foam on the worn rocks below.

Out of breath from the steep climb, Donald and Andy sat down as they reached the bluff. Everywhere was the song of birds and the whispering of gentle zephyrs laden with the fragrance of the forest.

"Whit, whit, whit, ch' wee-e-e-e," sounded the shrill hunting call of an osprey, or "fish-hawk," as he wheeled over the lake, then made his spectacular plunge and rose on high with a fish gripped in his long, powerful talons. Donald watched him carry it to his mate, who was standing guard over a big nest in the top of a dead pine. Again the male bird dropped like a bolt, struck the water with a loud splash, and disappeared below the surface for a few seconds, then rose to scatter spray in his struggles to lift himself clear of the water.

A bald eagle, from the vantage point of a tall fir, took instant note of the successful fisherman, and with a majestic swoop flew under the smaller bird. Higher and higher rose the osprey, the eagle relentlessly pursuing, until at last the intimidated bird released its hold on the prize. With a scream of triumph the eagle seized the glistening, wriggling fish in mid-air and bore it away.

From the woods in their rear came the lilt of a song mingled with the thud of flying hoofs, and around a tangle of low spruce came a piebald cayuse at full gallop. On his bare back the girl of the woods was standing with arms out-stretched, pirouetting on her moccasined toes like a dancing dervish. Her heavy hair streaming about her face and shoulders, she seemed even more an elf than when poised for flight on the edge of her fairy nest. As she neared the bluff she settled to her seat and seized the reins.

Donald came to his feet. For a moment it seemed as if he were to be passed unnoticed. He ran to the trail and waved his arm with a yell coming about. This brought him a flash of startled blue eyes, then the cayuse with a snort of fear went straight up into the air, spinning high on his hindlegs. A sharp word of command and a quick twist of the nut-brown hands caused the frightened beast to half turn and lower his forelegs gently to the ground. As he stepped to the cayuse's head Donald noted the lean and sinewed flanks of the animal, the strong muscled shoulders, and the slender but powerful limbs. He stroked the shiny neck and Pegasus made answer to such advances by rubbing his moist nose against Donald's shoulder.

"Nothing mythical about this steed," observed Donald, gently prodding the bunched muscles on the horse's chest. "And," he added jestingly, "I do not see the golden bridle presented by the goddess to Bellerophon while he slept."

A subtle flicker danced momentarily in the corners of the blue orbs of the rider. "I have clipped his wings," so I have no need of the magic bridle," she said smilingly.

The voice was gentle and mellow. The pronounciation, clear and perfect, held a trace of English accent that was pleasing to Donald's ears. One could not look upon Connie without thinking of flowers, birds and sunshine. Constant exercise had turned her muscles into cords of steel; mountain air and sunshine had darkened her face and hands to a deep bronze and brought to her cheeks a warm glow that showed richly through the coat of tan.

Connie looked on this stranger as a being infinitely beyond her ken, a part of a world of which she had no knowledge. His tall, well-knit body, his shining black hair, dark flashing eyes, his fine clothes and his deep resonant voice were a source of wonder and admiration to this girl, whose knowledge of men was limited to a few lone trappers and Indians. She was suddenly disconcerted and felt like running away.

"I was on my way to call on you. Is your father home?"

Surprised at her own boldness, Connie slipped lightly to the ground and stood beside him.

"Yes," she rejoined awkwardly, "he is. I'll go with you."

Donald spoke again, with a playful smile that caused the girl to flush with a mixture of pleasure and confusion. "I thought when I saw you poised on Pegasus's back that a close inspection would disclose a pair of transparent, gauzy wings, but," peering at her shoulders, "evidently the rider is clipped as well."

As they walked up the path, Andy following, it seemed to Connie that they were strolling through the fields of Elysium.

At first glance Donald saw that Wainwright's log cabins had been built by a rank novice. The walls were rakishly askew, the corners out of plumb, and the joints showed big gaps filled with moss. The rough construction of the dissimilar, rambling cluster of houses served to enhance rather than mar the wild grandeur of this oasis on the rocky mountain side.

Into this valley poured a mountain stream which had gouged out for itself a canyon, through which its waters swept and tumbled, as green as jade in the sunlight, like emerald in the shadow, and snowy white in the roaring rapids. On the other side the towering profiles of the cliffs were edged with stunted growths of pine and spruce, while here and there were soft patches of green moss clinging to the damp places.

The few acres wrested from the wilderness were rich with a green carpet of clover and timothy, and in a pasture at the corner a sleek Jersey cow was feeding diligently. In the same enclosure a deer nibbled delicately at the tender shoots. A flock of pure white ducks, in single file, waddled down the hill and plunged with a subdued quacking into a small pond. Within a yard enclosed by a fence of split cedar the lusty crow of a rooster sounded above the cackling of his family.

The low walls of the main cabin were festooned with a mass of wild creepers in which the wild honeysuckle predominated. Wild-flowers, each species separate, were growing in neat round plots bordered with carefully arranged stones. Scores of birds flitted through the low bushes, rested on fences and roofs, or hopped unafraid through the grass. Siskins and finches there were, in gold or olive, blue-jays and their cousins, the camp-robbers; bluebirds; sparrows singing sweetly; waxwings "zeeping" through the garden; warblers gurgling softly; scolding grey fly-catchers and numerous other species unknown to Donald.

A camp-robber flew to Connie's outstretched arm. From the capacious pocket of her overalls she brought a crust of bread, at which the bird pecked hungrily. Another bird lighted on the brim of Andy's hat. The little man attempted to peer up at it without moving his head, and the effort set his bushy eyebrows dancing. "Get off there, you blighter!" he growled. "I don't want any bloomin' trimmin's on me 'ead gear."

It was the first time Andy had spoken. Connie turned to him, her eyes wide with curiosity. His droll face, the strange dialect and the lively eyebrows caused a flock of dimples to chase each other about her pretty lips.

Connie's father and the Breed, working in the vegetable garden below, glanced up and, seeing the strangers, laid down their tools and came up the hill, the Breed moving jerkily on his crippled limb.

Raleigh Wainwright was a man of rather striking appearance. He was slender, grey-haired, clean chiselled, and carried himself with a military bearing. There was a certain fineness in the slight figure, a symmetry of design, that suggested that indefinable something which is the hallmark of good breeding. He had a way of carrying his well-shaped head that accentuated this aristocratic air. His grey eyes met Donald's with a level gaze as they shook hands.

After a cursory glance, Joe Pardon, the Breed, settled himself on a seat against the wall of the cabin and rolled a cigarette. His face was swarthy and sombre; coarse black hair topped his head. In repose his features wore the impassive expression of the Indian, but when he smiled—which rarely happened—he showed the French strain in his blood and became almost handsome. He was of a sturdier build than the average Siwash Indian, and as he leaned against the logs, with muscular arms folded across his powerful chest, one would have thought him the embodiment of all that is strong and virile in man, until the eyes rested on the pitiful malformed leg, shrunken to one-half its normal size.

"Won't you come inside?" asked Wainwright politely.

Foot Ills

For aching feet, for chilblains and bunions, rub with Minard's. A sure relief.

MINARD'S "KING OF PAIN" LINIMENT

Gypsum Industry Developing

Demand For Gypsum Is Increasing and Industry Gaining In Importance

The gypsum industry is rapidly increasing in importance. The output in 1927 was valued at nearly $500,000, more than in 1926. Gypsum is mined in Nova Scotia, New Brunswick, Ontario, Manitoba and British Columbia, but New Brunswick and Nova Scotia are the principal sources of supply. Probably the most important developments in this industry have taken place in the products manufactured from gypsum. A few years ago only a small proportion of the gypsum mined in Canada was calcined in Canada. In 1927 approximately 192,000 tons were calcined and made into wall plaster, gypsum wall board, gypsum blocks and insulating material.

The export trade for calcined gypsum and gypsum products is steadily increasing. Shipments are being made from the Maritime provinces and British Columbia to New Zealand and points in the Orient and there are prospects that export markets will be extended to the British West Indies and possibly to some of the countries of South and Central America.

Boosting the Population

An item going the rounds of the press cites as a somewhat remarkable record, the birth of 238 pairs of twins and 3 sets of triplets in Canada in a single month. But it was only an average month. In 1927 there were 2,930 pairs of twins and 38 sets of triplets born in the Dominion. In Quebec alone the pairs of twins numbered 1,104, and the sets of triplets 13.

Graham: "It seems to me that you're awfully sarcastic about my home-brew."

Andrews: "Yes, it's sneer beer!"

Superlative Honey From West

Finest Grade In Canada Is Produced On the Prairies

"The far-reaching effects of western Canada's winnings in the honey classes at the Royal Winter Fair at Toronto this year can scarcely be estimated," declared Prof. L. T. Floyd, provincial apiarist. "This is the second time in succession that the best prizes, and nearly all of the prizes in the light extracted and granulated classes have been given to western samples."

Prof. Floyd said that among beekeepers the struggle had been interesting in that it had been until now an open question as to whether the honey from sweet clover was equal to that from alsike. Alsike clover is the predominating source of honey in eastern Canada, while sweet clover holds that position in the west. The eastern producer sells the bulk of his surplus in western Canada, so had it turned out that the eastern samples had won, it would have not have been so satisfactory to the western producer from a marketing standpoint.

Last year these classes were new ones at the fair, and the Ontario producers claimed that they had not been notified, but, said Prof. Floyd, "this year there were 53 samples in the light extracted class and 30 in the granulated from all parts of Canada, with one judge from Michigan and the other from Ontario, so no excuses will now be considered."

Honey is produced in large quantities in western Canada. One producer in the Brandon district reported two carloads in the past season, and there are now 12 carloads (24,000 pounds) produced in the province of Manitoba.

"With an increasing interest in the growing of sweet clover as a forage crop it is only a matter of a few years when our surplus will be selling in the big markets of Toronto and Montreal, so much credit is due the producers who prepare samples that can win in the competition that was faced at the last Royal Fair," declared Prof. Floyd.—Manitoba Free Press.

Why Call It "Xmas"

Might Be Excusable In Print But Never In Pronunciation

Some years ago a determined effort was made to discourage the practice of using "Xmas" for "Christmas," but, apparently, those excellent intentions met with little success. The "X" still appears with deplorable frequency in all forms of printed matter. At times the shortened form is convenient for the copywriter, limited for space and anxious to make an effective display, but there are instances where the correct spelling could be used to equal advantage. Habits die hard, and it is not to be expected that people will immediately abandon a practice which is sanctioned by old-established custom. But there is absolutely no defense possible for the pronunciation of the word with an "X," which makes it meaningless. In the first place, as all should know, the letter is not an "X" at all, but stands for the Greek "chi," the initial symbol of the name Christ. It would be well if more attention were paid to this small, but important point, in the interests of accuracy and reverence.—Hamilton Spectator.

Found Inspiration Behind Prison Bars

Many Famous Men Wrote Great Books In Prison

Ricardo Testa, who has won first prize in Rome for a play written while he was serving a term of imprisonment for theft, is far from being the first to find inspiration within stone walls and iron bars. Socrates completed his great argument on immortality in prison at Athens, and St. Paul dictated some of the finest of his Epistles while "in chains" in Rome. In his prison in Wartburg Castle, Luther translated the New Testament into German. In Bedford gaol Bunyan dreamed his immortal dream of "Pilgrim's Progress." To beguile the long years of confinement in the Tower, Sir Walter Raleigh penned his fragmentary "History of the World," including the apostrophe of Death which many count the finest passage in English prose. And, jumping the centuries, Henry discovered his talents as a short story writer in a prison cell, and in Reading gaol Oscar Wilde penned the whole of his poignant "De Profundis."—London Correspondence in Free Press.

Of 17 persons who have applied at the Marylebone police court for licenses under the new Money-lenders' Act, in England, 13 were women.

Snails dig themselves into the ground in winter and remain torpid, cementing up the opening to their shells.

CRUMBLY TEETH

Help your children to have sturdy bodies, sound bones and strong teeth. Give them Scott's Emulsion rich in vitamins. It serves the needs of childhood equally as well as it does grown people.

Little Helps For This Week

"The wind was contrary."—Matt. xiv. 24.

Yet I argue not
Against Heaven's hand or will, nor bate a jot
Of heart or hope; but still bear up and steer
Right Onward.
—John Milton.

Let us hold on, no matter what we are required to contend against, and let us rest assured that at length Christ will come to us with such strengthening influences that we shall rise to something nobler than without our struggles we could ever have attained. Let us then toil on. It is but a little while at the longest, and no contrary wind can last forever.—William M. Taylor.

THOUSANDS OF MOTHERS USE NO OTHER MEDICINE

Baby's Own Tablets Are the Ideal Remedy For Babies and Young Children

Canadian mothers are noted for the care they give their little ones—the health of the baby is most jealously guarded and the mother is always on the lookout for a remedy which is efficient and at the same time absolutely safe. Thousands of mothers have found such a remedy in Baby's Own Tablets and many of them use nothing else for the ailments of their little ones. Among them is Mrs. Howard King, of Truro, N.S., who says:—"I can strongly recommend Baby's Own Tablets to mothers of young children as I know of nothing to equal them for little ones."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Originated In Scotland

Idea Of Sending Christmas Cards Instead Of Gifts

The Christmas card has grown greatly in popularity in recent years. Nearly all of us send them, get them, or both. Yet we don't think of the making of them as a big industry.

It is, however. A writer in the current North American Review reveals that the American public pays $35,000,000 a year for its Christmas cards. There are forty factories engaged in the trade, employing some 5,000 workers. Designs are guarded as jealously as possible.

Oh, yes—there's one more point to it. The practice of sending Christmas cards instead of gifts, this magazine writer has found, originated in Scotland.

Many people are almost crippled with corns. But it is needless suffering which can be speedily ended with Holloway's Corn Remover.

Ruby (aged six):—"Mummy, isn't it ladies first always?"

Mother—"Yes, dear."

"Then why wasn't I born before Freddie?"

Minard's Liniment for Chapped Hands.

Ignorance in caring for goldfish has caused the death of 95 of every 100 taken into England, declares an expert.

Heart Trouble Hands and Feet Numb and Cold

Mrs. Wm. Fowler, Auburn, Ont., writes:—"Several years ago I was troubled with my heart and nerves, so bad, at times my hands would become numb and cold. I took doctor's medicine, for a while, but it did me little or no good. I happened to see MILBURN'S HEART AND NERVE PILLS advertised and started taking them at once, and continued for some time, and since then I have had no return of my trouble."

Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

RURAL COUNCIL MEET

Tenth regular meeting of the Council Municipal District of Cornhill, No. [illegible] held at their office in Tofield December 4th 1928.

The Reeve A. J. Williams in the chair.

[illegible] present Messrs. Morrow, [illegible] Wood and Verge.

The [illegible] the previous meeting were read.

[illegible] with account of $140 [illegible] Royal Alexandra hospital. Council decided the hospital should make [illegible] effort to collect from the patient [illegible] relatives.

Secretary was instructed to write Mr. Wm. [illegible] advising him that Reeve Williams would inspect road diversion on his land re making settlement with him for acreage taken and that Reeve Williams [illegible] would not be made until after spring seeding in 1929.

A number of [illegible] correspondence was read and disposed of.

Moved by Councillor Verge that Mr. [illegible] be offered the [illegible] for arrears of taxes [illegible] Cash payment [illegible] December 17th, 1929, [illegible] Balance December 15th, 1930, together with all additional penalties and costs. The offer [illegible] binding [illegible] has been received by the Secretary.

Secretary was instructed to re[illegible] separate school [illegible] advising them that [illegible] to the [illegible].

Moved by Reeve Williams that Mr. [illegible] be appointed returning officer for [illegible] municipal election [illegible].

Moved by Councillor Hilmberg that Mr. H. [illegible] be appointed as Deputy Returning Officer and that Mr. H. [illegible] residence [illegible] as a Polling Place [illegible] S.E. [illegible] W4M. Also that Mr. Frank [illegible] be appointed as Deputy Returning Officer and that Mr. Frank [illegible] house be used as a polling place [illegible] W4M. Carried.

Moved by Councillor Verge that Mr. Jno. Morrow be appointed deputy returning officer for DeVille district. Poll to be held at the School, Cooking Lake. Moved that Mr. W. C. Barnes be appointed deputy returning officer for Ministik district, poll to be held at the school at Ministik. Moved that Mr. Jno. Druce be appointed deputy returning officer for Hastings Lake district, poll to be held at the Hastings Lake school. Moved that a polling booth be established at the Lo-ma Vista school and that Mr. Geo. McAllister, South Cooking Lake, be appointed deputy returning officer.—Carried.

Moved by Councillor Wood that Mr. R. C. Phillips be appointed deputy returning officer and that the poll be held at the Lakeshore school, also that Mr. Wm. Lennie be appointed deputy returning officer and poll be held at McKenzie school.

Some accounts were presented, passed and ordered paid.

Reeve Williams gave an interesting account of the Municipal Convention held at Calgary during the latter part of November last.

The next meeting will be held on Tuesday January 8th 1929.

WEATHER NOTES

(By J W M in the Bay Lake Times)

With the exception of the very sudden change at the first of the month, the weather has remained fine and mild. Only three below zero temperatures have been recorded.

The following are the minimums for the past two weeks:

November 28th, 12 above
November 29th, 14 above
November 30th, 10 above
December 1st, 4 above
December 2nd, 15 below
December 3rd, 27 below
December 4th, 13 below
December 5th, 12 above
December 6th, 13 above
December 7th, 10 above
December 8th, 17 above
December 9th, 20 above
December 10th, 21 above
December 11th, 10 above

The C.G.I.T. held a successful tea and sale of home cooking on Saturday last. There was a fine array of good things to eat of which the general public availed themselves.

Mr. M. Ferguson, two Booth lads and two lads who have been working at the hotel, have taken up homesteads in the Athabasca country. Mark will ship his steam breaking outfit up there very soon.

$15.00 REWARD

A reward of fifteen dollars will be paid to the party or parties who can furnish the necessary information that will convict the party or parties who did wilfully cut and destroy my fence on diversion on N.E. qr. of section 22, Tp. 50, Rg. 20, W4, on or about November 13th, 1928.

Wong Jewelry Co.

LOCAL AND PERSONAL

Mrs. J. W. Carter and Mrs. Hamlin of Holden, Alta., visited at the home of Mr. and Mrs. L. C. Hay on Sunday.

Mr. and Mrs. Pincott and family, and Mrs. Firth motored to the city on Tuesday.

Geo. Agnew spent a few days in the city this week.

Mr. Ben Hobson of Jasper was in town on Tuesday attending the funeral of his little nephew.

Mrs. Burnett was an Edmonton visitor on Tuesday.

Mrs. W. Webb and Betty spent a few days in the city visiting friends.

Miss Minnie Wood is suffering from a nervous breakdown.

The Tuxis Boys are putting on a bazaar and tea on Saturday in the W. Bellamy store. There will be all the requisites of the usual bazaar with a few new ones thrown in. They have, we understand, imported an exceptionally talented darky chef, straight from the Waldorf Hotel, in New York, and this fellow is going to tickle the appetites of quite a few on Saturday. Why not be there? More fun than at a picnic.

For special holiday showing manager Frinski of the Variety is presenting "The Better 'Ole." This picture is very well know as being one of the comedy classics of the war. It has made millions laugh, it will make you laugh. There is also plenty of food for sober thought in the picture, and some splendid war scenery. There are two shows both on the 24th and 25th. A matinee in the afternoon and a regular show in the evening.

The Rev. A. A. Adams of Edmonton passed through Tofield on Tuesday on his way east. He will take an extended holiday visiting Winnipeg, North Bay, (where he will spend Christmas with his daughter, Mrs. McDowell) and after the new year, will go on to Toronto and Buffalo, and perhaps as far as Clinton, Mass, returning the end of March.

Our readers attention is drawn to the advertisement of the grain elevators in which they state all grain elevators in Tofield will be closed from Saturday, December 22nd to Wednesday December 26th and from Saturday, December 29th to Wednesday January 2nd.

Considerable interest is taken in the daily passing over of the daily mail plane. In at least one home, the plane passing over has taught the family to move quickly. Eating dinner the other day, the plane was heard and the entire family reached the door in record time.

KATHLEEN HARPER GREEN COMING

On Thursday night, December 27th, Tofield is going to have one of the richest treats it has ever enjoyed. Miss Kathleen Greene, a little girl of twelve years, who is such an exceptional READER that she has spent a season delighting great audiences on the Chautauqua platform, will give an entertainment on Thursday December 27th, at the Variety Theatre, Tofield. Miss Greene is a native of Calgary and she has already travelled extensively in the United States as well as Canada. She will present, "Pollyana," at Tofield and comes under the auspices of the Tofield Trail Rangers. Don't miss this treat.

BEHIND THE HOG

By A.B.C.

The yearly tussle McLaughlin vs. John Lee resulted in a win for 'Mack.' John Lee claims his rink was so dazzled by the resplendent new uniforms displayed by the McLaughlin Rink that it threw him off his game.

Frank Ball claimed a weak rink the early part of the season, but he gave the strong Jobb rink an extra end battle before giving up.

The feature of this week's play was Dr. Morrison's running shot on a guard to displace a nest of three rocks that Oliver Letourneau's Flying Frenchmen took a lot of time putting in the "house."

LITTLE CHARLIE HOBSON PASSES AWAY

It is with much regret that we have to report the passing away of Charlie Hobson, son of Mr. and Mrs. C. Hobson on Monday last, December 17th.

The young lad has never been real robust and in addition to much other care, he was sent to Victoria for some months for the benefit of his health. This seemed to benefit him quite a lot, and he was considered strong enough to come home for Christmas. On his way home, however, he contracted a cold from which he never recovered, despite skilled attention and loving care.

The funeral was held on Tuesday service being held at the Anglican church. The pallbearers were young lads of the town and comprised Arthur Beirnes, Everett McLean, Horace McHeffey, Willie Worton, Sidney Worton and

The Rev. Lloydal Bee, of Viking conducted the service both at the grave side and in the church. Among the hymns sung was the favorite hymn o fthe departed "When He Cometh, When He Cometh."

The floral tributes were most beautiful and numerous and included flowers from Mother and Dad; brother and sisters, Grandma, Auntie Winnie, uncle Jim and Jean, auntie May, uncle Ben and Archie; Lodge No. 44, A.F. and A.M.; The Tofield C.E.S.; Anglican W.A., Holy Trinity Sunday School; Tofield W.I.; school chums and teachers; from his little chum, Jim Brace; Willie and Sidney Worton; Mr. and Mrs. J. D. Hannan; Mr. and Mrs. McLaughlin; Mr. and Mrs. Carver; Mr. and Mrs. Agnew; Mr. and Mrs. Abbott; Mr. and Mrs. Beirnes and family; Mr. and Mrs. J. W. Cookson; Mr. and Mrs. McLean; Mr. and Mrs. Clutterham; Mr. and Mrs. McCarthy and family; Mr. and Mrs. Wilde and family; Mr. and Mrs. C. P. Gladue and family; Harold, Eddie, Bess and Gladys Hicks; Mr. Joe Sen, Mrs. Barden and Edith; Mrs. Burnett and family.

There is quite a lot of sickness around town and throughout the district. The trouble is chiefly bad colds or flu, which even if not right down serious (and this is a question) it is mighty inconvenient. A country correspondent in the Barrhead News expressed it very aptly, when he wrote: "What a price we pay for comfort, a fine open winter, and everybody sick."

BANK OF MONTREAL STATEMENT

It is with great interest that we read the report of the 111th annual general meeting of the Bank of Montreal, held recently in its Head Office at Montreal.

The splendid showing of this strong financial institution emphasizes the increased prosperity of this country.

A very full and comprehensive report on general conditions is made and it is of particular interest to observe the growing importance of the tourist trade, being second only to agriculture in point of revenue.

The extensive service and principle of Safety and Security for which the Bank is justly noted is commented upon by the President, Sir Chas. Gordon in his address. The tendency to gamble on stocks and shares in the recent sensational market fluctuations is deplored. On the other hand the spirit of progression is not over looked, as the Bank's services are to be extended, and in this connection, it is noted that it was the unanimous decision of the meeting to increase the authorized capital to the large total of $50,000,000.

One shareholder in his remarks states that in the minds of Canadians, the Bank of Montreal takes the same place as that held in the world by the Bank of England.

Certain it is, that with such a sound and capable banking institution at its head, Canada faces the New Year with increased confidence and assurance of continued prosperity.

KETCHAMOOT

Once again time has rolled around to wish our editor and staff and all readers of the Mercury a Merry Christmas and a Happy and Prosperous New Year.

Miss Lawson and pupils are busily preparing a programme for a Christmas party at the school house on Friday afternoon. It has gotten so there is not room to accommodate a crowd and put on a Christmas concert in the evening at the school-house.

Miss Fawcett returned on Thursday after spending a week in the city.

Mrs. M. Ingram of Tofield is spending a few days with her friend Mrs. A. McMullen.

Mr. Desmond Gladwin, brother of Mrs. Paul McMullen, returned to his home in Vancouver on Monday evening.

Mr. and Mrs. Aronsson and daughter of Mundare were guests of Mr. and Mrs. Wm. Lee a week ago on Sunday.

Misses Mildred and Gertie Ingram were Sunday guests of Misses Ines and Goldie Soma.

Mr. Carlisle and daughter Lillian, Mrs. B. Wildman and daughter and Mrs. E. Cookson motored to Edmonton one day last week.

Mr. and Mrs. Henry McGinnis and family spent Sunday at the home of Mrs. McGinitie's mother, Mrs. Bruha of Shonts.

Mrs. Frank Hull returned home Saturday from Edmonton where she had been several weeks taking medical treatments. She was accompanied home by Miss Good, a nurse who will care for her.

Mr. and Mrs. Albert Sutton and little daughter, were Sunday guests of Mr. and Mrs. Chester Coombes.

The Farmington school has been closed owing to an epidemic of chicken pox.

A special meeting of the two trustees was called at the McMullen home on Wednesday evening of last week. It was decided to have the books of the late sec-treas., audited. Mr. G. W. Sears will finish out the year as secretary. The office of trustee will be left vacant until the annual meeting in January.

LINDBROOK

Lindbrook folks wish the Editor and his family and all their friends and neighbors of the surrounding country a very happy Christmas and may it be the best yet.

Several residents have been and some are down now and "chesty" some are yet to go down with the flu. Whilst not so virulent as the last epidemic, being no fatalities here as yet, it certainly is a depressing sickness and one not easily shaken off. It seems the critical stage is when one begins to feel O.K., then's the time to stay in and keep warm and not take too many chances.

Messrs. Hicks and Clark from the West of England are the guests of Mr. and Mrs. J. Leahy for the holidays.

The slump in turkey prices did not affect the Lindbrook shippers much as most of their birds were sold before it came, for which we guess thanks are due to Mr. Walter Bellamy in getting them to ship early, and so miss the fall in price.

LAKESHORE

Melvin Bethel spent a few days in Edmonton last week.

Mr. and Mrs. J. B. Warner entertained a few friends at bridge on Wednesday evening of last week. Five tables played. Mr. and Mrs. Y. E. Seale were successful in winning both first prizes and Mr. and Mrs. Elmer Googlein the consolations. After the cards, Mrs. Warner served a delicious lunch to which full justice was done.

Mr. Joe Himy and Peter Gates took Sunday dinner at the Thos. Jones home.

A party of young people gathered at the Bethel home on Monday evening to welcome Mr. and Mrs. Wm. Seale who returned from their honeymoon at the coast that day. Refreshments were served and a pleasant evening was enjoyed by all. They will reside on the groom's farm near the Lakeshore school.

Mr. and Mrs. Thos. Jones and sons John and Norman motored to Edmonton on Friday of last week, returning the same day.

The teacher and pupils are working hard to prepare the Christmas concert to be held on Monday evening.

Church Built On Boundary

London Preacher In One Parish Addresses Hearers In Another

The Moravian Chapel, Fetter Lane, is the oldest place of Protestant worship in London, having been first used as such in the reign of Queen Mary, when the congregation met in a shed-like structure built over a disused saw-pit.

It possesses another unique distinction in that it is the only place of worship in the Metropolis, and probably in England, in which the preacher has to stand and deliver his sermons in one parish to his hearers seated in another, the boundary line between St. Bride's parish and that of St. Dunstan's-in-the-West running directly in front of the pulpit.

The Moravians bought the chapel in 1738, and amongst famous Nonconformists who have preached there were Wesley, Whitefield, and Richard Baxter.

Labor Leaders In Britain See Opportunities For Advancement Here

Replying to a question in the House of Commons, Right Hon. Sir Arthur Steel-Maitland, minister of labor, stated the speakers at a recent meeting in the Scottish mining centre of Hamilton, Lanarkshire, were two out of 10 miners who had been specially recommended by Labor leaders and others to go to Canada with the harvesters and see what the conditions actually were. Their expenses had been defrayed out of voluntary funds. The speakers of Hamilton had received travelling expenses, but no fees and were not employed by any government department, the minister added.

The speakers in question set forth the benefits and opportunities to be found in the Dominion, and a series of such meetings are being organized by the ministry of labor. It is understood they have already resulted in an influx of applications for special government training in agriculture preparatory to emigration to Canada.

Canada in 1928

The year of 1928 is drawing to a close, and it is timely, therefore, to take a glance backward and endeavor to sum up, however briefly, the extent of the progress made by Canada during the twelvemonth.

It will, we believe, be generally agreed that the hopeful outlook for Canada so eloquently expressed by press and platform at the time of the Diamond Jubilee celebrations last year has been strengthened by the developments of this year. During 1928 Canada has been prosperous and has made substantial progress in many ways, while in no one respect has it slipped back. Viewing the Dominion as a whole, there does not appear to be any one section that is not occupying a more favorable position at the close of the year than it did when the year opened.

Commencing down in the Maritime Provinces, it is frankly recognized that conditions are immeasurably better and that an entirely new spirit of confidence prevails which is in sharp contrast to the depression, even pessimism, which was noticeable a year or two ago. The people of the Maritimes are imbued with a new courage and energy, and are tackling their problems and engaging in productive enterprises, in a manner which recalls the days of their earlier history.

Throughout Quebec and Ontario all industry has been maintained at a high level, building construction in the cities has been carried out on a scale exceeding that of previous years, and as a consequence of these things employment has been general, wages good, and all business has enjoyed a fair share of the resultant prosperity.

Dealing more particularly with the Prairie Provinces, the same advancement is to be noted, but to an even more marked degree. A larger acreage than ever before was seeded to crop, and the largest volume of grain in the history of this country produced. Unfortunately, early frosts before the grain had fully ripened resulted in a serious reduction in grades and consequent heavy loss to the producers. Nevertheless, substantial progress has been recorded.

The rapid progress made in the building of the Hudson Bay Railway, the completion of the branch line to the Flin Flon, and the projection of other lines into the mineralized northern sections of Manitoba and Saskatchewan, and the successful conclusion of negotiations whereby the C.P.R. and C.N.R. jointly assume the ownership and operation of the railways in northern Alberta, have opened a new era for the West, and in the next few years a great volume of wealth will flow out of these formerly inaccessible regions.

And, while these Western Provinces will long remain pre-eminently agricultural in character and production, their present population of over two million people and their continuing growth, and increased productive capacity have during this year attracted the attention of manufacturing industry as never before. The year marked the beginning of a large movement of manufacturing industry westward which, it is confidently predicted will take on additional momentum in 1929, and succeeding years.

With development proceeding at an accelerated pace and on a permanent basis throughout the prairie country, the Pacific Coast province is enjoying a larger home market for its fruit, fish, lumber and minerals, and to an increasing extent is becoming the outlet through which Western grain passes to the markets of the world.

Such developmental activity in all the Provinces has found its combined expression in a tremendous increase in the trade and commerce of the Dominion, in buoyant revenues leading to gratifying decreases in the public debt, greater financial stability, reduced taxation.

Coupled with all these evidences of material growth and prosperity Canada has been fortunate in 1928 because of an absence of any great disasters or epidemics or disease. There has, also, been an absence of any great social unrest or industrial strife. Progress has been well balanced in all the activities of the Canadian people who, taken as a national family have found their ways to be ways of pleasantness and peace.

With 1928 having provided such an immediate background, and bearing in mind the staunchness of the foundations laid in preceding years, Canadians can, and do, look forward with confidence to the new year soon to dawn and with, we are convinced, a determination to still higher and nobler achievement.

Good Market In Belgium

Country Shows Partiality For Many Of Canada's Products

The extent to which the Department of Trade and Commerce, through its emissaries, the Canadian trade commissioners in Europe, is expanding trade for Canadian firms was shown in an interview last night with Jean J. Guay, Canadian government trade commissioner in Belgium, with his headquarters in Brussels. After spending six months in Canada, Mr. Guay is returning by way of Antwerp, on the Red Star Liner Lapland, sailing from Halifax.

A few years ago, he said, European firms generally were somewhat indifferent when Canadian trade commissioners approached them with a view to increasing business. However hard the Dominion representatives labored they could not work up any enthusiasm. But the situation has changed very considerably since then, "and with the aid of Canadian firms the amount of business will be increased very materially," Mr. Guay added.

At the present time Belgium shows a partiality for Canadian wheat, flour, rubber goods, automobiles, salmon, lobster, leather goods, zinc and lead ores, asbestos, wallpaper and de luxe articles such as the better class of silk goods. As an instance of the interest which has been built up in Belgium, Mr. Guay said that he was approached recently by a firm in Europe which wished to obtain a small shipment of Canadian lobster. Correspondence with a Canadian firm did not produce the desired results, as the latter was not interested, but when a trade commissioner, during one of his visits to Canada, called on the firm they decided to send over a small shipment.

Between last March and September, a period of only six months, the Belgian firm bought $21,000 worth of lobster from the Canadian firm, and now they have notified them that they will require an additional $36,000 worth during the winter months.

Mr. Guay gave still another instance of how Canadian products are favored in Belgium. On this visit he called on a manufacturer and persuaded him to send over a small shipment of his products because there is a demand for them in Belgium. Mr. Guay said he felt sure that this manufacturer will have almost the same experience as the other one, and that he will have no cause to regret his incursion into the Belgium markets.

Miller's Worm Powders will clear the stomach and bowels of worms so that the child will no more be troubled by their ravages. The powders are sweet to the taste and no child will object to taking them. They are non-injurious in their composition, and while in some cases they may cause vomiting, that must not be taken as a sign that they are nauseating but as an indication of their effective work.

Fund For the Blind

Aberdeen Storekeeper Had Happy Thought To Save Money

A certain fancy goods dealer in Aberdeen on being told that his blind was a disgrace to a window excused himself on the plea that a new one was so costly. "But," his friend replied, "you'll lose business if you keep a shabby blind like that." "I believe you're right," said the shopkeeper. "I must really see what I can do." Some weeks after his friend called again and was delighted to see a decided change for the better. "That's a lovely blind you've got," he remarked. "It must have cost a fine penny." "It did that," was the naive reply. "But my customers helped a good deal. You see, I placed a collection box on the counter with a printed notice, 'For the Blind,' and I got all I wanted."

May Sell Indian Lands

More than 20,000 acres of Indian lands, which include some of the best agricultural areas in the Peace River District, are likely to be sold at auction in the near future. This action will in all probability follow a survey that is being made in the north country by W. Morrison, inspector of Indian agencies for the three western provinces, with headquarters at Regina.

NEARING A BREAKDOWN

A Condition That Calls For a Reliable Tonic

Many women give so much of their time to the cares of their household that they neglect their own health and sometimes reach the verge of a breakdown before they realize that their health is shattered. Often the heart palpitates violently at slight exertion, the stomach fails to digest food and discomfort follows. The nerves become weak and headaches grow more frequent. The body grows weak and they are always depressed. This condition requires immediate treatment with such a reliable tonic as Dr. Williams' Pink Pills which enrich and build up the blood, carrying renewed energy to every part of the body. The value of Dr. Williams Pink Pills in a rundown condition is proved by the following statement from Mrs. Alex. McInnes, Bowsman River, Man., who says:—"About a year ago I had a serious illness which left me very anaemic. I was not able to get around to do any work; in fact I could scarcely walk. I was troubled with palpitation of the heart with the least exertion. One day a friend advised me to try Dr. Williams' Pink Pills as they had done her much good. I followed this advice and took the pills for some weeks when I felt as well as ever. I have since been able to attend to all my household duties. The dizziness and palpitation have left me and I bless the day I tried Dr. Williams Pink Pills. They are just the medicine for those who are weak and run-down."

You can get these pills from any dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Aviator Killed in Crash

Instant death came to Phillip H. Atkinson, cadet, of Asheville, N.C., at Brooks Field here, when his plane went into a tail spin 200 feet above the earth and crashed into the porch of a barracks, wrecking the porch and completely demolishing the ship.

For Burns and Scalds.—Dr. Thomas' Eclectric Oil will take the fire out of a burn or scald. It should be at hand in every kitchen so that it may be available at any time. There is no preparation required. Just apply the oil to the burn or scald and the pain will abate and in a short time cease altogether.

Mrs. June bride—Oh, dear! Strikes seem to be universal, don't they?

Her husband—Yep! Everything's striking except the clock your brother gave us for a wedding present, and that never did work day to speak of.

POOL SHOULD HAVE RIGHT TO DO OWN GRADING

Melfort, Sask.—A declaration that the Dominion government should stand out of the way, clear the tracks and give the right to do its own grain grading, thereby establishing grades for pool wheat and grades for non-Pool wheat has been made by locals of the United Farmers of Canada, Saskatchewan section.

This second "seige of Ottawa" has come by way of a resolution to the members of the Saskatchewan grain inquiry commission presented at their session here, and was the result of a meeting of certain locals of the organization in the Carrot River Valley District.

Announcement was made that Dr. F. J. Birchard, chemist in charge of the grain research laboratory of the Board of Grain Commissioners of Canada, would be a witness before the commission at some future date. It is expected that he will be called when the commission opens its sessions in Winnipeg in the month of February.

While complaints poured into the commissioners from farmers on the question of grading and while there was a unanimity of opposition to the mixing practices of private elevators, no serious car shortage has been reported during the present season from any point in the district.

But if the commissioners had been inclined to be critical in the last few days of lack of constructive suggestions and criticisms from farmers as to how the grading and sampling difficulties were to be overcome, no such criticism could have been made here. Hardly a witness closed his evidence without leaving some thought ...

Mooch Found Guilty

Yorkton Man Adjudged Guilty Of Murder By Spokane Jury

Spokane, Wash. Guilty of murder in the first degree with punishment by death was the verdict of the Mooch jury after deliberating two hours and a half.

Mooch whitened as the verdict was read, dropped his head and tears came to his eyes for the first time during the long trial.

Mrs. Mooch, who had sat with set face as the jury filed in, began to cry when the jury announced they had reached a verdict and when it was read she gave way completely and had to be assisted from the court room by Attorney Patrick.

Mooch was taken immediately to his cell in the jail where, asked if he had any statement to make first asked, "Why?" and when told it would go to his people at Yorkton, Saskatchewan, replied, "Not now."

The verdict was a stunning surprise to close followers of the case, who had not expected anything worse than life imprisonment.

J. A. M. Patrick, K.C., of Yorkton, advisory counsel, was saddened by the verdict, but said the defence had just begun to fight and that an argument for a new trial would be made at once. He firmly believed it would be successful or that a reversal of the verdict would be secured in the supreme court of the state.

Lindbergh Wins Trophy

For Most Outstanding Aeronautical Feat During 1927

Washington, D.C.—Col. Charles A. Lindbergh was awarded the Harmon trophy for the most outstanding aeronautical feat of 1927 at the International Civil Aeronautics Conference.

Pierre Flandin, vice-president of the French Chamber of Deputies and Chief of the French delegation to the conference, made the presentation.

The trophy was the gift of Clifford Harmon, an American residing in Paris, and founder of the International League of Aviators. Shirley Short, airmail flier, won the trophy in 1926.

Confer On Resources

Ottawa.—With the idea of conferring with the Dominion government the methods whereby the unalienated natural resources can be transferred, Premier J. E. Brownlee, of Alberta, and Dr. S. F. Tolmie, premier of British Columbia are visiting this city.

To Sell Home Bank Land

Toronto, Ont. "Cedarville," a land tract valued at $1,000,000, which forms part of the assets of the defunct Home Bank, is to be sold.

Time Limit For Pension Appeals

Chief Adviser Of Department At Ottawa Explains Matter

Ottawa, Ont.—The time limit within which all appeals to the federal appeal board in pension cases must be entered does not expire at the end of the month, according to a statement made last night by K. O. MacDonald, chief soldier's adviser of the department of pensions and national health.

There has been, Mr. MacDonald said, some apprehension concerning the statutory time limit governing appeals. He points out that the pension act, as amended at the last session of parliament, sets the time limit for entering an appeal from a decision of the board of pension commissioners as on or before Dec. 31, 1929, or within two years from the date of the decision complained of.

This means that an appeal can be entered at any time within two years of the decision, unless such decision was given on or before Dec. 31, 1926, in which case the final time limit is Dec. 31, 1929.

Time Has Been Extended

Alberta Will Ship Coal To Ontario During 1929

Ottawa.—Subject to the exigencies of the grain movement, the experimental shipments of Alberta coal to Ontario under the $6.75 per ton rate will be extended in 1929 for a period of six months.

No provision has yet been made for granting a six months test period to Alberta for 1930.

The railway companies have not yet turned in to the Board of Railway Commissioners a statement of the costs involved in the experiment for 1928. A hearing was held a week ago at which counsel for both the transportation companies declared that their cost sheets could not be ready before the end of the current fiscal year, March 31, 1929. Not until some time after that date will it be known if the government who are pledged to reimburse the companies for any financial loss sustained in the tests, will have to distribute any federal funds.

Alberta Will Aid Immigrants

Promises Month's Free Training and Selected Positions For Applicants

London, Eng.—An important agreement promising to stimulate the flow of migrants to Canada from Britain has been concluded between the province of Alberta and the overseas settlement department of the British government. Under the agreement the province will give one month's free training in agricultural schools in Alberta, to men 17 and 25 years, and a month's free domestic training to women from Britain between 23 and 32 years of age. Subsequently the province will place the students on selected farms and in selected domestic positions respectively.

The applicants will travel in two parties in the spring.

Queen Mary Unveils Memorial Tablet

Made Brief Address Which Was Broadcast By Radio

London, Eng.—Queen Mary presided at the unveiling of a memorial tablet on Tower Hill. It is to the memory of the men of the Mercantile Marine who lost their lives during the war. The Queen left Buckingham Palace at 2.30 o'clock and was cheered along the entire route by enthusiastic crowds.

The unveiling ceremonies were broadcast throughout the nation by radio. The Queen made a brief address in behalf of the King, this being the first time her voice was ever heard upon the radio.

Minister Of Fisheries

Montreal.—To seek the creation of a dominion minister of fisheries, and to present certain suggestions concerning Canada's fishing industry, a delegation of members of the Canadian Fisheries Association will meet Rt. Hon. Mackenzie King, the prime minister, and his cabinet at Ottawa, early in January, according to tentative arrangements agreed upon by Hon. P. J. Cardin, minister of marine and fisheries, and R. W. Gould, secretary of the association.

Sleeping Sickness In Africa

Lugano.—A report was submitted to the council of the League of Nations saying that sleeping sickness is a veritable scourge among the natives of Africa and is rapidly decimating them. The report was adopted by the council which approved the campaign league to combat the malady.

Close Of Navigation

Navigation On Great Lakes Ended On Night Of Dec. 12th.

Winnipeg.—Navigation on the Great Lakes is closed, following a season in which all former grain movement records were broken out of Fort William and Port Arthur. A total of 372,780,000 bushels of all grains was shipped out of the lakehead this year as compared with [illegible] bushels last season.

While the official close of the shipping season was really November 30, fine weather and the continued free movement of grain from the prairies kept grain boats plying back and forth until Dec. 12, which marked the last day on which insurance was obtainable.

Cargoes aggregating 2,780,000 bushels left the head of the lakes on the last grain freighters to attempt the [illegible] trip. [illegible] movement on the prairies still continues heavy.

Given Life Sentence

Mother Of Ten Children Given Maximum Penalty For Selling Liquor

Lansing, Mich. Mrs. Etta Mae Miller, mother of 10 children, must spend the rest of her life in prison as the first woman to be given the maximum penalty in Michigan, mandatory under the habitual clause of the State criminal code.

She was convicted by a jury here of selling liquor, her fourth felony. The jury deliberated 1 hour and 50 minutes.

MUST WAIT FOR THE EVACUATION OF RHINELAND

Lugano, Switzerland.—Dr. Gustav Stresemann, German foreign minister, belittled current reports that Germany is expecting the early and complete evacuation of the Rhineland.

He emphasized that Germany is counting upon complete evacuation of German soil when the reparations problem has been adjusted, but remarked upon the great uncertainty as to when and whether the reparations question would be satisfactorily liquidated.

It was learned that the conversations of the ministers already have touched upon the proposed creation of a committee of verification and conciliation in the Rhine area ...

Fought Police Five Hours

Sixteen-Year-Old Chicago Negro Was Evading Arrest

Chicago, Ill.—Two blocks from Oak and Milton streets, famous "death corner" of little Italy's gang and mafia slayings, a 16-year-old negro resisted for five hours the machine guns and tear bombs of 100 police who besieged his brick barricade.

Ernest Whiturst, the negro youth, was being sought for questioning in the breaking of a store window near his home. He [illegible] detectives who called at his home at 2.30 a.m. opened fire on them [illegible] behind a door and began a battle which called for every available [illegible] on the north side.

After five hours firing deputy police commissioner John Stege who had taken charge of the police forces and Sergeant Thomas Conley gained entrance to the youth's barricaded room and rendered Whiturst unconscious with two shots through the head.

Riches In Northland

Coal and Oil Discoveries Reported In Vicinity Of Hudson Bay Junction

Hudson Bay Junction, Sask. Mining talk is commanding a lot of attention in the Junction these nights, and it's not all about The Pas country either. Coal is reported to have been found about 16 miles southeast of the village, and some weeks ago there was a flurry when a Toronto company made a survey of the oil shales in the Porcupine Hills.

The oil find is declared to be better than that which Horace Halcrow and other prospectors from The Pas made in the Pasquia Hills, about ten years ago. The field is reached by a fair trail, about 16 miles of it being open to auto traffic and the rest is a wagon road. The oil shales are in the heart of the bush country.

Nothing is known locally about the kind of coal or the quantity available.

Would Sell Labrador

Newfoundlander Suggests Price Of One Hundred Million

St. John's, Nfld.—In the opinion of Sir William Coaker, head of the Fishermen's Protective union and colleague of Premier Sir Richard Squires, Newfoundland would be well advised to sell Labrador to Canada or to a syndicate, if $100,000,000 could be obtained for the territory, according to an article over Sir William's name in the Fisherman's Advocate of last week.

The main object of such a sale, he writes, would be payment of the colony's national debt.

Appointed Trade Commissioner

Montreal.—A. M. Wiseman, M.C., deputy British trade commissioner at Winnipeg, has been appointed trade commissioner in Canada. He will succeed G. F. Braddock, who has returned to the department of overseas trade, London, Eng. Mr. Wiseman, who is at present on leave in England, will take up his new appointment in February.

Wants Site For Town

Winnipeg.—Provincial government is asked for reliable information concerning site for the town site to be erected as a result of the Flin Flon mine developments. Letters to this effect was made through Hon. D. G. McKenzie, provincial secretary and minister of mines from The Pas Board of Trade.

Naval Appointment

RAIL CROSSING PROBLEMS WILL BE INVESTIGATED

New Dodge Of Rum Runners

C. N. R. BRANCH LINES PROJECTED FOR THE WEST

Toronto.—A special despatch from Ottawa to the Toronto Star says the newspaper's Ottawa correspondent has learned a three-year branch program aggregating more than $20,000,000 will be brought down to Parliament next session.

The despatch says:

In addition, the Hudson Bay Railway will be carried to Fort Churchill, reaching there next summer and the Canadian National Railways will participate on a 50-50 basis with the Canadian Pacific in the purchase of the Alberta government railways which include the Edmonton, Dunvegan and British Columbia Railway, the Alberta and Great Waterways Railway and the Central Canada Railway.

"The new C.N.R. program will be the third since the system became consolidated. In 1924, a three-year program was approved by parliament for the construction of 652.2 miles of branch line railway at a cost of $15,615,515. In 1927 another three-year program was passed, providing for the construction of 510.4 miles at an estimated cost of $20,000,000. Of this sum $3,191,005 was spent in 1927. By the end of this year a further $10,728,000 will be spent and the balance expended in 1929.

"The passage by parliament of these programs delayed action on them in the year they were passed so a new departure will be made next year. Parliament will be asked to approve the new program before the old has been completed. Thus, work can be started as soon as the work on the 1927-29 program has been finished.

The money is paid over to the Canadian National, which prepares the program for the approval of the minister of railways and the sanction of parliament. The financial experts and engineers of the Canadian National have almost completed the new program to be presented to the minister.

"The appropriations include the cost of stations and other railway buildings on the branch lines to be constructed. The extensions and improvements for the most part will be the development of roads in western Canada and better facilities for bringing out the steadily increasing wheat crop. The trend of construction will be northward and there will ...

THE OTHER MAN

Perhaps he sometimes slipped a bit—
Well, so have you
Perhaps some things he ought to quit—
Well, so should you.
Perhaps he may have faltered—why,
Why, all men do, and so have I.
You must admit, unless you lie
That so have you

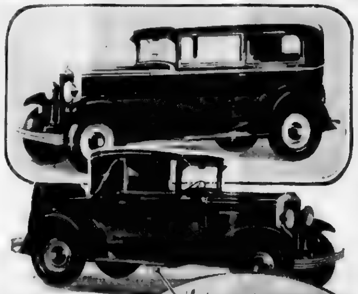
Perhaps, if we would stop and think,
Both I and you,
When painting someone black as ink,
As some folks do,
Perhaps if we would recollect,
Perfection we would not expect
But just a man half way correct,
Like me and you

I'm just a man who's fairly good,
I'm just like you,
I've done some things I never should,
Perhaps like you.
But thank the Lord I've sense to see
The rest of men with charity.
They're good enough if good as me—
Say, men like you.
—From the Masonic Digest

Notice

ALL ELEVATORS IN TOFIELD WILL CLOSE ON SATURDAY NIGHT DECEMBER 22nd AND RE-OPEN ON WEDNESDAY, DECEMBER 26th.

AND WILL CLOSE ON SATURDAY, DECEMBER 29th AND RE-OPEN ON WEDNESDAY, JANUARY 2nd.



In the Chevrolet six-cylinder line just announced is seen one of the most important developments in recent motor history—the production of a powerful and attractive six in the low price range hitherto occupied exclusively by fours. Among the seven new models offered are the coach and sport cabriolet, seen above together with the fully enclosed valve-in-head motor.

This motor develops 46 horsepower—32 per cent more than its four-cylinder predecessor. The factory states that "speed has been stepped up to satisfy maximum requirements."

Notable features are gasoline ... of vacuum tank feed, adjustable driver's seat, water temperature gauge on dash, and special accelerating pump which operates when the accelerator is depressed.

The announcement of the new car reveals that Chevrolet engineers began four years ago the research work, planning and proving ground testing which culminated in the new car. More than 100 different motors are said to have been built and tested.

$2.00 Per Year

For several years the great majority of weekly newspapers in Canada have been $2.00 per year. This includes Eastern Canada as well as Western Canada. Some years ago the publisher of the Mercury had in mind to charge $2.00 instead of $1.50 but at that time the hard winter with its consequent feed shortage came upon us and we then carried on until this year at the $1.50 rate.

Printed matter is about the cheapest thing there is in the world today when very large numbers are required, and it is somewhat of a problem sometimes for the small office catering to a few hundred subscribers to compete with the product of the large cities.

But now, as before, the Mercury is distinctively a local paper. Edited and printed in the town in which you do business, carrying every day news about people whom you know, it has a particular and definite appeal to the residents of Tofield and district.

We are gratified that those who have paid the $2.00 rate up to the present have done so with a smile, which is the best possible encouragement to us to turn out a better paper.

The Tofield Mercury

Here and There

Quebec city's new grain elevator will be completed in January, it is now thought. All that remains to be done to the 2,000,000 bushel structure is to complete the three galleries and the marine tower.

A Chicago Holstein breeder has made a special offer to R. H. Thomson of Braeburn Farm, Roberts, Saskatchewan, for his world champion Holstein cow, Canary Korndyke Alcartra, but representations are being made to the Provincial Government to have this famous animal retained in the province.

"You don't have to sell the idea of game protection and conservation to sportsmen," said James W. Stuber well known sporting writer who attended the recent banquet in Montreal of the Quebec Association for the Protection of Fish and Game. "The problem is to convince the settler and guide in the backwoods that a surplus of game for the attraction of the hunter means money in their pockets and a source of revenue to many classes in the community."

The Santa Claus team of fairy reindeer must be having an exciting time these days in keeping pace with modern delivery methods, for Christmas presents shipped by Canadian Pacific Express are being speeded through the clouds by airplanes. Between Quebec, Montreal, New York, Ottawa, and Toronto in the east and Winnipeg, Regina, Calgary, and Edmonton in the west, airplanes have been busy this season carrying air mail and express matter and many belated shippers have been able to have their presents delivered before Christmas by using the air express service.

Vancouver is rolling up its bell bottomed trousers in preparation for the four ...y Sea Music Festival to take place at the Hotel Vancouver from January 22 to 26. The cheery sea chanteys and famous salt water ballads that have been sung by sailors for many centuries will be presented at this novel music festival, which promises to be one of the most popular and important events of the season in the west. It will be preceded by a Yuletide Festival at the Empress Hotel at Victoria when Christmas carols will be sung by well known artists and many quaint old customs will be revived by the players.

The [illegible] herd and the only shipment of its kind ever sent out of Canada is now on its way to Australia. Twenty seven animals, three bulls and 24 females, the cream of James D. McGregor's famous Glencarnock stock farms, have been loaded into C. P. R. cars and started on their long journey to New South Wales. Twenty of the animals will be used for the foundation herd of the government animal husbandry department, while seven others will go to private purchasers. All are of the finest stock raised by the leading Aberdeen Angus breeder and most of them have won prizes at fairs and stock shows throughout the continent.

A SAFETY VALVE

THERE ARE very few people but who fully understand the function of the safety valve as applied to steam boilers. At least it is quite safe to assume that every school boy of twelve years and over fully understand it. The principle well enough known to-day is that water placed in a tight vessel with a fire lighted beneath it becomes first hot water, then steam, and unless the steam is allowed to escape its expanding force will wreck its container—hence a boiler explosion. Boiler explosions are not numerous, neither are they unknown. When one does take place and there are men in the immediate vicinity, terrible injuries and sometimes death result. The safety valve is designed to prevent such catastrophes. At a certain pre-determined steam pressure, a certain mechanism on the boiler will release the steam and thus cut down the pressure upon the entire inner surface of the boiler. As soon as the pressure has fallen to a pre-determined level the valve closes and this is repeated as often as there is fire burning and water to turn into steam.

Without unduly stretching the immagination, one can see a similarity between the steam boiler and our every day existence. There is the fire of ambition heating the water of determination resulting in the steam of achievement—and there is the safety valve of Christmas giving. All the good things said about needy ones at Christmas; all the good things said about making the children happy with toys at Christmas; and all demands upon the purses of the well to do, and the less well to do, at Christmas for the benefit of the poorer classes are good, doubly good. But it is not unsound argument to claim that the giver receives as much benefit, satisfaction and pleasure as the recipient. It is only a short while ago that the writer was reading a letter addressed to a young girl from another girl a few years her senior. They had exchanged experiences regarding club work in which both were engaged, working on gifts for poor people. The statement was made "It makes you feel good to do this work, doesn't it," and the only reply suitable and forceful enough would be "You bet your life it does." If there is any time more than another, when it is "more blessed to give than receive," it is at Christmas time.

Christmas, among other things, is an excellent safety valve. All through the year we must work and earn, spend and save and continually be balancing our lives on the sea of desire. Our neighbor gets this and that and we crave the same, and work a little harder and save a little harder to get the desired treasure for ourselves, for we argue with a certain amount of logic "the Devil gets the hindmost." The fires of ambition burning fiercely, heat the water of determination and the steam of achievement produces: sales, work, profit; until, too much steam! becoming too selfish; the safety valve functions—IT IS CHRISTMAS TIME!

For a short time at least prior to Christmas one thinks of what he or she can buy for him, for her, for them, rather than for himself or herself. One looks around to find the poor and needy and commences to estimate what he or she can give. The safety valve of Christmas has prevented many a catastrophe, by doing nothing more than causing one to forget, for a time at least, themselves, and think of other people.

The Editress and publisher takes this opportunity of wishing all the readers of the Barrhead News A Very Merry Christmas and a Bright and Happy New Year.

WORLD HAPPENINGS BRIEFLY TOLD

Sir John Phillips, 73, physician to Queen Mary, died recently in London.

Alice Mary Longfellow, daughter of the poet, Henry Wadsworth Longfellow, is dead at her home in Cambridge, Mass. She was 75 years old.

The Carnegie Foundation has offered to provide between $25,000 and $50,000 yearly for ten years to stimulate research in Australia.

Through the government's campaign for eradication of bovine tuberculosis, infection among cattle in the Dominion has been reduced five per cent.

The promotion of sheep clubs throughout the province of British Columbia was discussed at the annual conference in Victoria, of the advisory board of farmers institutes.

The appointment of Hon. Frank Oliver, former member of the Board of Railway Commissioners, as an advisory officer to the board in respect to grade crossings is announced.

A preliminary survey of Canadian broadcasting conditions is to be undertaken immediately, Sir John Aird, chairman of the radio commission, stated following the commission's inaugural session.

French circles assert that Foreign Minister Briand, of France, and Dr. Gustave Stresemann, German foreign minister, had reached a tentative agreement on the convocation of a preparatory disarmament commission in February.

Alberta officials are pleased by the decision of the Dominion board of railway commissioners at Ottawa extending the time for the low rate on Alberta coal to Ontario to six months in 1929 as against three months this year. The rate will be in effect from January 15 to July 15.

Good Year For Game

Ducks and Geese As Well As Partridge Have Been Plentiful in Alberta

The shooting during the past season in Alberta, has been unusual. The ducks and geese have been more plentiful than for many years and the Hungarian partridge have also increased markedly. Some very respectable bags of the latter have been secured—six and eight being not uncommon, as against a brace in former years. Prairie chicken are still scarce and it is felt that the game authorities are wise in continuing to extend the closed season.

SUNDAY SCHOOL LESSON

DECEMBER 23

THE BIRTH OF JESUS

Golden Text: "There is born to you this day in the city of David, a Saviour, who is Christ the Lord."—Luke 2.11.

Lesson: Luke 2.1-20.

Devotional Reading: Isaiah 11.1-9.

Explanations and Comments

The Birth Of Jesus At Bethlehem, verses 1-7. When Caesar ordered the enrollment of every one in the Roman Empire, the people of Palestine went each to "his own city" to be enrolled. Bethlehem had been the home of David, their ancestor, and therefore Mary and Joseph went from Nazareth of Galilee where they were living, to Bethlehem to be enrolled. There Jesus was born, and Mary laid Him in a manger, because there was no room for them in the inn.

The Story Of the Shepherds and the Angels, verses 8-14.—"Be not afraid, for behold, I bring you good tidings of great joy which shall be to all the people," were the angels' glad words heard by shepherds who were watching their flocks in the fields near Bethlehem on the night of the day that Jesus was born.

And this was the good tidings. "There is born to you this day in the city of David a Saviour, who is Christ the Lord." Christ is the title of Jesus as the One consecrated to be the Redeemer of the world, for it means "The Anointed One."

"And this is the sign unto you: Ye shall find a babe wrapped in swaddling clothes, and lying in a manger," the angelic host explained. The "sign" was in the unexpected circumstance of the Babe's being cradled in a manger. The swaddling clothes were the bands of cloth which the eastern mother wraps tightly around the body of her babe, confining legs and arms.

Suddenly a multitude of the heavenly host appeared praising God by saying, "Glory to God in the highest, and on earth peace among men in whom he is well pleased." The last part of this song always seems strange to us who are accustomed to the words of the Authorized Version, "good will to men." The different translations are due to the fact that in some manuscripts the Greek word is "eudokia" (good will), nominative case, while in other manuscripts the word is "eudokias" genitive case, (of good will). The revisers decided that the latter was the better version, and accordingly the English Revised ...

Canadian Orchestra Scores Triumph

The First Christmas Card

Accurate Date For Christmas Not Known

January Seventh Was Day Observed In Early Centuries Of Christianity

The day—Christmas Day not on the 25th of December would come as a shock, it wouldn't seem Christmas at all; yet in early centuries of Christianity, January 7 was Christmas Day.

The Eastern Church did not come into line with the Western, which had adopted December 25 for over 400 years. And even now the Armenian church keeps Christmas Day in January, on the day when the rest of Christendom is keeping a different festival, that of the Epiphany.

Christmas Day commemorates the birth of Christ, but the actual day and month of that event is not known. December 25 is not the actual date.

The latest researches put the year as B.C. 4, and the month as not later than February.

Recipes For This Week

(By Betty Barclay)

SOUR MILK CAKE

1 cup sugar.
1 egg.
1 large lump butter.
1 large lump lard.
Mix well together, then add
½ cup baking molasses.
1 teaspoon baking soda dissolved in ½ cup of sour milk.
1 full cup sour milk.
1 teaspoon cinnamon.
1 teaspoon nutmeg.
1 teaspoon cloves.
½ cup floured, seedless raisins.
2 cups sifted flour.

Mix all together and bake in a medium oven about twenty-five minutes.

RAISIN POLENTA

1 cup cornmeal.
3 cups boiling water.
½ tablespoon salt.
1 tablespoon fat.

CHAPTER IX.—Continued

"Thank you," answered Donald, "but if you don't mind I'd rather look at your flower garden."

It was quite evident that their host was pleased by this statement. "You are interested in flowers?" he questioned eagerly.

"I am," admitted Donald, "but unfortunately I don't know much about them."

The dignified Englishman proved to be not only an intelligent, but a most willing teacher. From plot to plot they went, the botanist glad to talk on his hobby to an attentive audience. He gave the names of the plants, their mode of germination, growth, nature and uses. For half-an-hour his quiet voice went on until the lengthening shadows deepened. As they moved toward the cabin, the Breed passed them carrying a pail brimming with milk, at which Andy gazed with longing eyes.

"We always have a light lunch in the evening, won't you stay?" begged their host.

Andy nodded his blond head vigorously in a silent signal to Donald for acceptance, and acceptance was instantly forthcoming.

... er Wainwright wore a shooting-jacket and riding breeches of excellent cut and of rare material, but now worn threadbare and neatly patched. Donald knew that those rents had been mended by a woman's hands. Wainwright's aesthetic face was impressive. The marks of toil could not hide the delicacy of his thin hands with their long, tapering fingers. The hands of a dreamer or poet, thought Donald, not the hands to wield an axe. A quick admiration for this man's gameness filled his heart. "A good job," he lied, as he surveyed the sagging roof and bulging walls.

"As good an authority as Hillier told me that it was excellent work," stated their host rather boastfully.

"Bless old John's heart!" thought Donald fervently.

It was plain that Connie had anticipated their staying for lunch, as the table was set—with tin plates and cups—for four. She drew a pan of hot rolls from the tiny oven, and, her face a deep red from the heat and her exertions, she sat down to the table, using a canned goods box as a seat. Donald noticed that the two chairs had been given up to the guests, and he arose at once to offer his seat. Andy, not to be outdone in gallantry, successfully prevailed on Connie to make a change.

"Bit shorter every day," he grinned as he sank to the box. At this Connie lowered her head her shoulders shaking with merriment.

Wainwright's manner was that of the owner of a baronial estate entertaining guests under the most luxurious surroundings. His cheeks were flushed, and he seemed filled with a boyish happiness. "It no doubt will seem incomprehensible to you," he remarked with a smile, "when I say that you are the first white men to break bread with me under this roof. We are quite a distance from the Pemberton trail, and therefore come in contact with but few travellers."

Little wonder Donald thought, at their's host's nervous gaiety and the child's distress. What turn of Fate had caused this scholar to seek a home in so lonely a spot? Misanthropes fled to the wilderness to escape their fellow-men, but their wel...

... ed several sheets of notepaper with drawings and figures. He became so deeply engrossed in his work that he sat up long after the others had gone to bed. At breakfast he placed the result of his night's work near Gillis's plate. "Jack, I believe we could put in an electric mill that would be successful," he said earnestly.

Gillis studied the papers carefully then passed them to Douglas. "Might be done," he said non-committally. "I don't know nothin' 'bout electricity; do you?"

"I've had a little experience," admitted Donald modestly.

Douglas, who had been poring over the drawings, spoke emphatically. "I'll bet Dad would be interested in this. I've heard him say that all mills would be electrically driven sometime. He's up-to-date—always willing to listen to new ideas."

"But old 'Moss-back' ain't," growled Gillis.

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

TOOTH CLEANSING FOODS

The most highly civilized peoples of today and, in particular, those living upon the North American continent buy more tooth brushes and dentifrices, and pay more attention to mouth toilet than any other peoples of this or any previous age but yet among them, tooth decay is universal and rampant.

In contrast, it appears that primitive man suffered little if at all from decayed teeth.

Investigators after having examined several hundred skulls of Indians from the South American continent, who lived between two and three hundred years ago, report that only a single tooth in the entire collection showed dental caries.

In proof that this is not merely a racial factor, they have found that where savage people and others have modified their diet in a manner similar to the European or American, there has resulted a rapid deterioration of the teeth with tooth decay becoming very prevalent.

Now, undoubtedly much of this deterioration of tooth structure has been due to a lack of inorganic salts, which are the essential "building stones" of tooth tissue. But, on the other hand, with the adoption of softer foods with their modern methods of preparation, much less masticatory effort is required on the part of the teeth, and they lose the beneficial effects of scouring and cleansing such as were secured when grains, roots, and raw fruits formed the chief articles of diet.

The habitual use of some of the harder foods such as toast, crusts, shredded wheat and nuts, along with certain of the raw and dried fruits ...

PIMPLES ON FACE AND HANDS

Were Hard and Red. Could Not Do Hard Work. Cuticura Heals.

"Small pimples broke out on my face which later grew larger and were hard and red. Later pimples broke out on my hands and kept getting worse each day. I could not do any hard work with my hands on account of the breaking out.

"I began using Cuticura Soap and Ointment and they helped me. I continued the treatment and after using two cakes of Cuticura Soap and one box of Cuticura Ointment I was healed." (Signed) A. W. Babychuk, Wishart, Sask.

Use Cuticura Soap, Ointment and Talcum to promote and maintain skin purity, skin comfort and skin health; the Soap to cleanse and purify, Ointment to soothe and heal, and Talcum to powder and refresh.

Cuticura Shaving Stick 25c.

Little Helps For This Week

"Our help is in the name of the Lord, who made heaven and earth.—Psalm cxxiv. 8.

I heard a voice, a tender voice, soft falling
Through the storm,
The waves were high, the bitter winds were calling,
Yet breathing [illegible]
Of skies serene, of summer uplands lying
In peace beyond;

HOLY TRINITY CHURCH
Sunday, December 23rd, 1928
Matis at 11:00 a.m.
Evensong at 7.30 p.m.
W. H. Teape will conduct the services.

The last paragraph in this week's editorial should read "The editor and staff of the Tofield Mercury Wishes all a Very Merry Christmas and a Bright and Happy New Year." The editorial in question was written in this office and used for the Barrhead News which we print, hence the slip.

Mr. T. W. Teape, of St. John's College, Winnipeg, will conduct the services at the Holy Trinity Church this coming Sunday. Mr. Teape, it will be remembered was in charge of this field during the past summer. In the Fall he entered St. John's college, Winnipeg, and is home on his Christmas vacation. His home is in Edmonton from which point he will come to conduct the services on Sunday. Many of his friends will be pleased to see him again.

U. F. A. Meeting

Announcement
To The Public

I wish to announce that I have purchased the Variety Theatre, Tofield, and the goodwill thereof. I am pleased to announce that having had considerable experience in the moving picture business at another point, I feel, that I can promise without undue confidence, proper and efficient management of the house. First class pictures will be shown and I respectively solicit the family patronage of Tofield and district.

I am happy to say that I have lived in Tofield since 1901, practically all my life and will endeavor to put into this venture all the care, skill and attention possible.

At this season of the year when each and every one is extending to the other best wishes, we extend to all patrons of the theatre, prospective patrons and all others the sincere wish that the 1929 may be the best ever.

Saturday's show will be Dolores Costello staring in "Old SanFrancisco."

There will also be a special feature for New Year's night.

Frank Wood

TOFIELD, ALBERTA

LOCAL AND PERSONAL

Mr. and Mrs. Carr and family left Sunday for Calgary where they are spending a few days.

Mr. and Mrs. Plum spent a few days at Innisfree this week.

Mr. and Mrs. Tobe and family spent Christmas with Mrs. Tobe's parents at Wainwright. Mrs. Tobe is staying until the New Year.

Mr. Clifford Hetherington spent Christmas at Innisfail.

Mr. Eldred is spending a few days in Saskatoon.

The Misses Audrey, Helen, and Thelma Jebb spent the Christmas holidays at home.

Miss Marion Foreman is spending the Christmas vacation with her parents in Tofield.

Miss Myrtle Bethel spent the Yuletide festival with her parents.

Mr. and Mrs. Griffin and family are spending a few days at the home of their daughter, Mrs. Bissett.

Mrs. Calvert's sister and children, who reside on the Pacific coast, were guests at the Calvert home over Christmas.

FRANK WOOD PURCHASED THE VARIETY THEATRE

The Variety Theatre, Tofield's amusement house, and assembly chamber, changed hands this week, Mr. Frinski the present proprietor, selling to Frank Wood. Frank is well known in and around Tofield and the deal will have popular public approval. Frank has had theatre experience for some years. At one time he was engaged in the work at Tofield with Mr. Bellamy and for the past year or so has been managing for himself, the picture theatre at Viking. Frank has been a resident of Tofield and district practically all his life, coming here with his parents when but eight months old, and this fact coupled with his experience will no doubt make him a popular theatre manager.

KATHLEEN GREEN PRESENTS POLLYANNA TO FULL HOUSE

An unusual and very enjoyable entertainment presented to a well filled house at the Variety on Thursday night, Dec. 27th. Kathleen Green of Calgary, age 12, presented the reading "Pollyanna" in an exceptionally clever and charming manner. Miss Green is a Calgary girl, and is already possessed of elocutionary talent approaching genius. Unaided for long periods at a time, she kept her audience thoroughly interested, changing from laughter to tears, from anger to winsomeness in a flash. The audience was highly delighted with the performance. The event was staged under the auspices of the Tofield Trail Rangers and they are to be congratulated upon bringing such a wholesome evening's entertainment to town.

TURKEY SHIPMENT TO THE COAST DELAYED

A large shipment of turkeys, billed to P. F. Ingram, Victoria, was sufficiently delayed enroute to cause considerable anxiety on the part of the shippers, who are farmers in the Tofield district. It appears that they arrived at Vancouver in good time, and left Vancouver for Victoria on a barge on December 17th. They did not arrive in Victoria until December 22nd, thus taking five days to cross over to the island, a journey which can be done by steamship in a few hours. It was then too late for the best of the Christmas trade, and about six tons of them had to be reloaded and shipped back to Vancouver as there is no cold storage in Victoria. A cold storage plant is now being erected and will shortly be ready.

DELORES COSTELLO IN OLD SANFRANCISCO

A picture different from the ordinary run will be shown at the Variety on Saturday at the usual hour, 8.30 p. m.

Dolores Costello well known and charming moving picture star will take the stellar role and is supported by a splendid caste. Besides presenting a splendid plot the picture gives valuable and interesting information of historical interest.

There will also be a special feature for New Years Day. See posters.

CHRISTMAS AT TOFIELD

Christmas of 1928 will go down into history as one of very few snowless yuletides. But of twenty Christmas days spent in Canada, the editor has never before seen one entirely devoid of snow. It has been necessary to use wheels instead of sleighs for travelling at least on one occasion but snow had fallen earlier in the year and the fields were white even if the roads were bare. This year up to nightfall there was no snow visible anywhere either on roads or fields.

It is also the first Christmas that the editor remembers, when skating facilities were not available at the Tofield rink. Due to primitive methods of flooding and extraordinary fine weather, it has not been possible to lay a sheet of ice yet.

Christmas Eve in Tofield was a busy day. The weather being nice there were many shoppers in from the country. During the afternoon and evening in all stores there was the usual last minute rush of Christmas gift shopping.

There was no Christmas day services in either church. Owing to the illness of Father McLeod, the midnight mass was not celebrated at the St. Francis Catholic Church. Special Christmas music was rendered at the Tofield United Church on Sunday evening when the choir under the leadership of Mr. R. Murray, with Mrs. Rowe as soloist rendered "The Star of Bethlehem". Mr. Cary also rendered a solo and the Cantata also included duets, quartettes, etc. Mr McCauley presided at the organ.

The church was crowded and the service was enjoyed by all.

Christmas day saw many family reunions in town and country and many a turkey and goose was enjoyed. Christmas night the Variety Theatre presented "The Better 'Ole" to a good audience. The day as a whole was spent quietly but joyously.

The Tofield schools will re-open on Thursday, Jan. the 3rd.

FOR SALE.—Three Police Dogs, 6 weeks old.—Apply at P. O. Ball's Office, Tofield. 49p

KETCHAMOOT

Christmas day passed in the usual way, minus snow, though a sprinkling in the evening made it seem more Christmassy. Christmas services were held at the school house on Sunday afternoon to a large congregation. Mr. and Mrs. W. A. Mitchell had their infant son christened William Henderson, after which communion service was held. The Sunday school scholars also received their treats of candy and nuts. Sunday school will discontinue for the remainder of the winter. Preaching services next Sunday at 2:30 p.m.

Miss Mabel Lawson and pupils put on a nice Christmas entertainment on Friday afternoon, mostly parents being present. The usual treats of candy, nuts and oranges were distributed to the children.

Miss Marjorie Lee is spending her Christmas holidays at the parental home.

Mr. and Mrs. Earl Owen returned to Edmonton on Monday evening after being the guests of their uncle and aunt, Mr. and Mrs. G. W. Sears for several days. They also visited other friends and relatives.

Mr and Mrs. Frank Hall and Mrs. Barnes have been very ill the past week but are on the road to recovery.

We were very sorry to hear of the death of a former neighbor, Mrs. Peters (our Holland neighbor), on December 2nd. They moved north of Edmonton in the fall on a homestead; she leaves a family of five or six little children.

The church board of managers held a meeting at the Wm. Lee home Wednesday evening.

Mr. and Mrs. Earl Owen, the Misses Hazel Sears, Mildred, Gertrude and Kathleen and Will Ingram were Sunday guests of their cousin and sister, Mrs. T. D. Ferguson of Lakeshore district.

Mr. and Mrs. Henry McGinitie and family and Miss Annie Bruhn visited Mr. and Mrs. Leslie Noland at their home on Sunday.

KINGMAN

Miss Gladys Horte of Daysland is visiting with her friend, Miss Inez Erickson for a week

The O. Bray, T. Bray, H. Bray families motored to Earling on Friday to attend the public school Christmas program

H. Sparby is spending the Xmas holidays with his mother Mrs. Scheidiger of Bawlf.

Miss Alice Simonson who is teaching near Holden arrived home on Friday evening to spend the holidays.

John and Lily Erickson of Camrose and Edmonton, respectively, are visiting at their home during Christmas

Miss Ray Hardin left for Foam Lake Saskatchewan on Sunday, where she will spend a couple of weeks with her sister

Mr. and Mrs. Ole Bjorgum were very much surprised on Sunday to see about twenty cars motor up to their home, the occasion being their twenty-fifth wedding anniversary. Mr. and Mrs. Bjorgum were chaperoned to the Kingman church, when several speeches were delivered, and lunch was served. They were presented with a chest of silverware on behalf of a large number of friends.

Mr and Mrs. C. Blyckert are spending Xmas with Mr. and Mrs. Jos. Munsen of Camrose.

Dinner guests at the W. Hartschen home on Xmas day were Mr. and Mrs. O. Bray, Mr. and Mrs. W. Jardie, Mr and Mrs. E. Erickson, Mr and Mrs. Jack Erickson and Connie, and Mr. and Mrs. Ed Tollefson and family.

Miss Mabel Simonson, who is employed at the post-office in Coronation is spending Xmas day at home.

MONKEY AND PICKANINNY VIE

NO—the little figure is not an effigy of Pan playing his pipes to inveigle the wood-nymphs; it is a young monkey who consented to pose for the official photographer on the Canadian Pacific cruise to South America and Africa last year. The camera-man, somewhat irreverently, titled his picture, "Boy, page Mr Darwin."

Monkeys, frightfully dressed Zulu ricksha boys, frightfully undressed Zulu belles and completely undressed pickaninnies vie with the rushing, roaring Victoria Falls; with Pao de Assucar more familiarly known as the "Sugar Loaf"—from which a marvellous view of Rio de Janeiro is obtained; with the tomb of Cecil Rhodes, mighty Empire-builder from which, carved in the living granite of a huge boulder topped with a bronze slab the spirit of the founder of Rhodesia can survey his handiwork; with the stranger sights and smells of the bazaars of [illegible] and the majesty of Vesuvius frowning on the fateful city of Naples famed for the gaiety of its life despite the ever present menace of the world's most famous volcano for supremacy in the memory of the voyagers when they sit back in their easy chairs at the end of the voyage.

Wherever the "Duchess of Atholl" calls her passengers will see new sights, their ears will meet strange sounds and they will gather impressions that will endure of many of the different races and countries of which this world consists.

And when it is considered that the cruise, starting from New York January 22nd, 1929 will visit Jamaica, Trinidad, [illegible], Argentina, [illegible] South Africa, Tanganyika, East Africa, Kenya, the Sudan, Egypt, Italy, Monaco, France, [illegible] and England, the sights [illegible] are not really needed to educate the "infinite variety" of this "cruise of contrasts."

The visit of the R.M.S. "Duchess of Atholl" during the three months of the cruise will provide an opportunity for citizens of ports in these various countries to see the new [illegible] Canadian Pacific liner and to realize the strides the great Dominion is making. The ship is equipped with an individually controlled ventilation system that makes it ideal for tropical climates.

WORLD HAPPENINGS BRIEFLY TOLD

Fully 15 000 people visited in September the plant at Hawaiian, England, where Airship R 100 is being constructed.

The Duke of Alnwyck has been sworn in as governor of Northumberland for a second period of six years.

U.S. Ambassador Schurman has presented an American load of flowers for a new hall in connection with the ancient University city of Heidelberg.

Commemorating the 21th anniversary of the Wright flight at Kitty Hawk the Paris chapter of the United States Aeronautical Association gave a luncheon.

Premier Mackenzie King celebrated his 54th birthday December 17 Mr King has been leader of the Liberal party since August 1919, and prime minister since December 1921

Using an obsolete "sound in copying the style, Percy B. Cruickshank and W E Bayne of Hereford, Sask have killed approximately 100 cry tons this season, hopeful even of the season's record for 1926.

Parliament will soon be asked at Ottawa next session to consider a bill, based on the report of Sir Henry Drayton and Prime Ministers of South Cabinet Hon Charles Stewart minister of interior states.

On Dec 17 Theodore Roberts was buried in Hollywood cemetery in the city where his motion picture characterizations made him an international figure Roberts wrote stars and actors attended the service

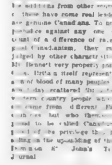
The New Canadian

Valuable Contribution From European Countries To Make Up Our Population

Hon H H Bennett, because he has lived so long in the west, deemed it essential in a speech delivered in Toronto recently to pay a tribute to what has been accomplished in that part of Canada by people who are not of British birth and many of whom have come from various other countries. The Conservative leader is well advised. What we Canada is predominantly British in its population but we have received and will continue to receive most valuable additions from other sources Our chief have come real leaders who are genuine Canadians. To furnish a particular against any one on account of a difference of race is not good Canadianism, they must be judged by other characteristics Mr Bennett very properly points out, Canada itself represents a typical blend of many peoples There are many scattered throughout the western country people whose forefathers came from different European countries but who themselves are proud to be called Canadians and proud of the privileges they have enjoyed in the upbuilding of the great Dominion of Canada Toronto Globe Journal

A teacher was trying to explain a word to Ikey. Now Ikey, can you use the word 'what' in a sentence?" asked the teacher.

Ikey answered the question readily "Vat's your name, mister?"



"Sophia, what do you mean by filling the pianos on your wedding day?"

"It doesn't matter, ma'am, as the bridegroom has to be washed in it also." Kasper, Stockholm.

Tentative Date For Next Arm Conference

Nations Have Agreed the Eleventh Of Next March

Agreement on March 11 1928, as the tentative date for the next session of the preparatory disarmament commission and an accord between Great Britain and France on procedure for carrying out the commission's work, were announced at the conclusion of the meeting of the council of the League of Nations.

The British delegation was announced by Sir Austen Chamberlain but no foreign secretary It was deemed important as the two powers were named as guarantors of peace on the Rhineland by the London pact The statement of intentions was also believed to imply an agreement concerning the part to be played by the United States in the commission if invited and conditions which would be acceptable to the allied troops when withdrawn removed from the Rhine territories

Germany does not wish to see the commission function after 1935 That year was set by the leaders of Versailles as the last year in which allied troops might remain in the Rhineland

HAND FEEDING OF CALVES

(Experimental Farms Note)

A calf may be descended from generations of prize-winning ancestors and be an outstanding individual when born and yet become a poor individual if not properly nourished during the early part of its life. A dairy calf denied of its natural food requires careful hand-feeding if development is to be normal.

There are a number of good calf meals on the market but the price is unusually high. A test conducted at the Dominion Experimental Station at Scott, with three lots of calves containing three calves in each group, included a comparison of a commercial meal known as Royal Purple calf meal and two home made preparations called No. 1 and No 2. Mixture No. 1 contained finely ground oats two parts, cornmeal two parts and ground flax seed one part. Mixture No. 2 was identical to No. 1 except that the cornmeal was replaced with finely ground barley. In addition to the meal each lot was given the same quantity of concentrates, fed dry, made up of two parts whole oats, three parts bran and one part oil-cake meal.

The total gains per lot in 112 days was 545 pounds in the lot getting the Royal Purple meal; 515 pounds in the lot getting No. 1 Mixture containing the cornmeal and 376 pounds in the lot getting the No 2 Mixture containing the ground barley.

The cost of all feeds per hundred pounds gain was $4.91 in the lot receiving the Royal Purple meal; $4.15 in the lot receiving the No. 1 Mixture containing the cornmeal and $5.31 in the lot receiving the No. 2 Mixture.

The Royal Purple meal and the home made Mixture No. 1 proved satisfactory; but the calves receiving the No. 2 Mixture were unthrifty and made smaller gains.

ERGOT, ITS CAUSE AND CONTROL

(Experimental farms note.)

Ergot is an important disease of rye, wheat, barley and many kinds of wild and cultivated grasses. Besides reducing the yield and quality of the grain, the ergot bodies cause sickness or death when eaten by animals or the domestic fowl.

The disease is caused by a fungous parasite, the spores of which enter the floral parts of the plants when these are open at blossom time, and the result is the development of the ergot bodies instead of the kernels of the grain. These blackish bodies mature as the plants on which they grow mature. Some of these fall to the ground, while others find their way into the threshed grain, and in this way the fungus is returned to the soil. In the spring, each of the ergot bodies on, or near, the surface of the soil, send out several stalks which, in turn, bear many tiny, light spores. These are shot out of the spore-bearing cavity, and carried upwards by the air currents and insects to the floral parts of susceptible plants. Under moist conditions these spores send out tiny threads which grow into and fill the place where the new grain would have developed. At this stage, the fungus exudes a large amount of sweet, sticky honey-dew, and with it thousands of spores, which spread the fungus. Insects attracted by this honey-dew, carry the spores on their body to the floral parts of other plants. Rain and wind also help to spread these spores. Warm showers followed by [illegible] produce favorable conditions for the spread of the disease. After [illegible] days the honey-dew stage comes to an end, and the familiar hard, black ergot bodies form.

Controlling the disease becomes a matter of eliminating the ergot from the seed and from the soil. Complete separation from the seed is possible by immersing the grain in a solution of common salt made up of dissolving forty pounds of salt in twenty-five gallons of water. On stirring the grain, the ergot bodies come to the surface, where they are skimmed off and then destroyed. The grain is then washed at once, and dried quickly, to prevent injury to germination. A combined salt-formaldehyde treatment must not be attempted.

$2.00 Per Year

For several years the great majority of weekly newspapers in Canada have been $2.00 per year. This includes Eastern Canada as well as Western Canada. Some years ago the publisher of the Mercury had in mind to charge $2.00 instead of $1.50 but at that time the hard winter with its consequent feed shortage came upon us and we then carried on until this year at the $1.50 rate.

Printed matter is about the cheapest thing there is in the world today when very large numbers are required, and it is somewhat of a problem sometimes for the small office catering to a few hundred subscribers to compete with the product of the large cities.

But now, as before, the Mercury is distinctively a local paper. Edited and printed in the town in which you do business, carrying every day news about people whom you know, it has a particular and definite appeal to the residents of Tofield and district.

We are gratified that those who have paid the $2.00 rate up to the present have done so with a smile, which is the best possible encouragement to us to turn out a better paper.

BRITISH PREMIER DEVISING WAYS TO HELP MINERS

London, England.—The policy of moving unemployed miners out of the distressed coal fields districts to more promising parts of the country under government direction [illegible] in the end [illegible] the only means of affording [illegible] relief, stated Premier Stanley Baldwin in the House of Commons. The prime minister was making an additional statement on the government's proposals for dealing with the [illegible].

The government is giving $750,000 already collected by the fund, is using $500,000 in transferring men and is going to contribute to the lord mayor's fund an equal proportion of future collections.

Premier Baldwin believed it a fallacy to say that absorption of labor from the distressed areas would seriously interfere with unemployment elsewhere.

The schedule of training centres to fit miners for agricultural work in the place of industrial employment would be greatly extended in the [illegible] the prime minister promised. The program for the next year would provide for sending at least 6,000 trained or tested men to Canada and it was hoped the recent reductions in ocean passage would be a real stimulant to the normal movement of migrants outside government schemes. He urged employers of Britain to second the government measures by taking on men from the distressed areas, even if only one such man was employed by a firm.

Explosion Shakes London

Violent Explosions Rip Up a Mile Of Pavement

London, England.—Leaping gas flames illuminated the wreckage of torn streets in London's busy West End where a series of violent explosions ripped up the pavement as though with a giant plow for nearly a mile.

In perhaps a dozen streets, the roadway was in ruins. Probably a score of persons were injured with burns or bruises, or affected by gas fumes.

Vehicles and lamp posts were overturned and great chunks of paving stones and manhole covers were hurled in every direction through the fronts and roofs of buildings.

The first explosion occurred in the post office tunnel; others followed rapidly, heaving up roadways and rocking the entire neighborhood so much that it was feared momentarily London was experiencing an earthquake.

Fire broke out in many of the broken gas mains and there was a fierce blaze for a while on the premises of the Overseas Film Service, the fire apparatus being kept busy all day.

The origin of the explosion is undetermined, although one report, credited for a while, had it that the first blast occurred when a workman crawled into a tunnel with a blow torch. Damage estimated at from $500,000 to $1,000,000.

Several hundred people living in flats of the damaged area were rendered temporarily homeless as a result of the explosion.

Prominent B.C. Citizen Dies

Hon. Walter Nichol, Former Publisher Of Vancouver Province Is Dead

Victoria, B.C.—Death removed one of British Columbia's best known citizens in the person of Hon. Walter Cameron Nichol, LL.D., former Lieut.-Governor of the province and until a few years ago owner and publisher of the Vancouver Daily Province. His death occurred in the Royal Jubilee Hospital, where he was a patient for the past two months and where he underwent an operation. Although Mr. Nichol suffered from illness at intervals for several years past, he was in comparatively good health until about two months ago, when his condition became serious.

Branch Line Endorsed

Saskatoon.—The executive of the Saskatchewan Branch United Farmers of Canada here have unanimously endorsed the projected Canadian National Railway route from Aberdeen to Melfort. This route it is claimed will make a difference of at least a cent a bushel on grain shipped to Port Churchill.

Canada Adopts U.S. System

Issuing Identification Cards To Citizens At Windsor

Windsor.—The card identification system now used by the United States immigration inspectors at the Detroit docks of the Windsor and Walkerville ferries will be adopted by the Canadian inspectors, according to announcement by O. G. Adams, immigration inspector in charge at Windsor. Cards contain the photograph of the applicant.

A [illegible] will be issued to the Canadian citizen by birth, a salmon [illegible] to the Canadian citizens by naturalization and British subjects with legal landing status; a yellow card for the citizens of the United States and preferred countries only who have made legal entry into Canada and who are residents of the border cities employed in Detroit and commuting daily, and a yellow card with one perpendicular green bar for citizens of the United States who legally entered the United States and residents of Detroit employed in the border cities and [illegible] daily for crossing the border frequently on business.

Alberta Resources Question

New Offer By Federal Government Is More Satisfactory

Edmonton.—A new offer from the Dominion Government for the transfer of Alberta's natural resources to provincial control is the outcome of the conference just held in Ottawa, according to Hon. R. G. Reid, provincial treasurer, who is the first of the Alberta ministers to return home. This offer is better than any yet made, says Mr Reid, and is not based on any accounting of previous receipts and expenditures.

As soon as Premier Brownlee returns and the Executive Council can get together, the offer now on the boards will be taken up by the Government, prior to introduction in the Legislature. No public announcement of the terms is being made in the meantime, the matter having first to be decided, as to acceptance or rejection by the Government.

Quebec Accepts Dawn Film

British Made Edith Cavell Picture Passed By Censors

Montreal, Que.—"Dawn," the British made Edith Cavell film, which has been the subject of considerable controversy in Britain and elsewhere throughout the Empire, has been passed by the Quebec provincial censors. Banned in Great Britain, it has also been rejected in Ontario and Saskatchewan, but is said to have been accepted by the authorities in the other provinces, and the holders of the Canadian rights are hoping that in view of Quebec's decision, the Ontario and Saskatchewan censors will reconsider their decision. The picture has been shown in New York. Sybil Thorndyke, one of the most distinguished of British actresses, takes the role of the martyred English nurse.

Aid For Distressed Miners

Prince Of Wales Has Issued An Appeal For National Effort

London, Eng.—The Prince of Wales has issued a personal appeal in behalf of the distressed women and children in the mining areas of the kingdom. He called for a combined national effort to give material help to the thousands who, through the shutting down of the mines, are suffering dire poverty.

Announcing that he had accepted the position of patron of the relief fund, the heir-apparent said:

"Let us recapture the spirit of the war when we recognized every effort made by the government as a new call to individual self-sacrifice."

Growth Of Saskatoon

Saskatoon, Sask.—The statement that a survey indicated a population of 45,000 in Saskatoon, and an attendance at educational institutions of 13,664, featured the report of Commissioner J. Holmes to the quarterly meeting of the Board of Trade here.

Postpone Treaty Parley

Washington.—Postponement of consideration of the Kellogg-Briand anti-war treaty reported to the senate until after the Christmas recess has been decided upon by Senator Borah in charge of the treaty fight after consultation with leaders.

Takes Police Post

New York.—Grover Whalen has given up his $100,000 a year position as general manager of the Wanamaker Department Stores, and entered upon his duties as New York's $10,000 a year chief of police.

New Gas Well

Largest Producer Ever Struck In the Medicine Hat Field

Lethbridge, Alta.—Forty million cubic feet of gas daily was struck in the Eagle Butte well being drilled in the Cypress Hills, 25 miles southeast of Medicine Hat, the largest gasser ever brought in in the Medicine Hat field. The gas [illegible] tapped at 2,200 feet. The structure on which the well was drilled by [illegible] Hat and Kansas interests, headed by C. E. Roth, was blanketed a year ago last summer by the Harkness-Rowe interests, of Toronto, in a filing coup, in which 80,000 acres were covered $30,000 being paid over the counter of the land office here in one operation. It is understood the gas is dry gas.

WHY CANADA SHOULD REMAIN IN THE LEAGUE

Ottawa.—It is well worth while for Canada to remain a member of the League of Nations, Hon. C. A. Dunning, minister of railways and canals told a large meeting of the Canadian Club here. Mr. Dunning was one of Canada's representatives at the meeting of the League of Nations assembly in Geneva this year along with Premier Mackenzie King and Senator Dandurand.

"I am often asked," Mr. Dunning said, "whether it would not be better for Canada to adopt the attitude of aloofness taken by the United States in respect to the League since we were a new country on a continent separated from the prejudices and animosities of the old world."

The last war, he said, had proved that Canada could not afford to ignore the quarrels of other countries and let them fight it out among themselves. The dispute of the smallest of nations might bring all nations in[illegible].

The exceeding courtesy that prevailed at all meetings impressed Mr. Dunning. The greater the prejudices, age-old hatreds and fears existing between nations, the greater the courtesy the representatives of these countries displayed to one another whenever they come in contact.

"As a westerner," Mr. Dunning explained, "accustomed to being more direct, this extreme courtesy at times became irksome. I asked one of the delegates why the representatives of the league did not say what they really meant. He replied that if they did the league would blow up in ten minutes."

Mr. Dunning pointed this out to show that every effort was made to avoid hurting any one's feelings.

Aviator Makes New Record

St. Louis, Mo.—A new world's record for continuous barrel rolling in an aeroplane was established at Lambert-St. Louis field, when Dale (Red) Jackson, test pilot, made 417 rolls in a Curtis 'plane. The previous record was 283 rolls. In a barrel roll an aeroplane rolls wing end over wing and in a corkscrew manner while maintaining its speed forward.

Rector Of Queen's University

Dr. O. D. Skelton, under-secretary of state for external affairs in the Canadian Government, has been elected rector of Queen's University in succession to Dr. Coverdale, whose three year tenure of office has expired. Dr. Skelton was graduated from Queen's in 1899.

Revolts Blamed On Ruler

Afghanistan King Has Not Paid Troops Is Report

London, Eng.—The trouble that King Amanullah of Afghanistan is having in suppressing revolts were said in despatches to be due to his failure to pay his army.

A despatch from Lahore, India, said that the army had not been paid for some time past. The Daily Mail printed a despatch from Bombay saying that the standing army of 35,000 was disaffected because of insufficient pay.

A Karachi despatch to the Daily Express quoted a merchant from Kabul, capital of Afghanistan, as saying that the King used army funds to pay for his many purchases in Europe. It was claimed that the army had not been paid for three months.

Promises Not To Interfere

U.S. Will Respect South America's Rights, Says Hoover

Buenos Aires.—La Epoca, a newspaper which is generally regarded as a spokesman for President Irrigoyen said that Herbert Hoover in conversing with the Argentine president, told him that in the future the United States government would never intervene in the internal affairs of other countries, that it would recognize their right to manage their own problems. President Irrigoyen was quoted as saying that he believed that Mr. Hoover was not in accord with the ideas of President Coolidge.

Spread Of Influenza

Toronto.—Influenza epidemics seem to have their origin in the common cold, and the Ontario Public Health Act should be amended to provide that pupils might be sent home from public schools when primary symptoms of cold are noticed according to the findings of the conference called today by Dr. W. J. Bell, deputy minister of health. The conclusion was reached that the outbreak of "flu" in the province was "widespread."

SAILS ON MAIDEN VOYAGE

The R.M.S. Lady Nelson, one of the five new vessels built for the Canadian National Steamships Fleet, in accordance with the Canada-West Indies Treaty, sails from Halifax on her maiden trip on December 14th. The photograph shows the Lady Nelson on her arrival in Canada from Great Britain, where she was built, and inset, her skipper, Captain J. M. Roth. The new ships are 8,000 tons and their passenger accommodation was designed specially [illegible] tropical travel. Already a [illegible] winter tours from Canada to the West Indies have been booked for the various sailings of these new steamships.

Cause Of Death Unknown

Coroner's Jury In Ralph McKay Case Unable To Determine What Caused Death

London, Ont.—The mystery of the fate of Ralph McKay deepened when a coroner's jury, after hearing medical testimony, returned a verdict to the effect that they were unable to state the cause of death. The son of Mr. and Mrs. J. H. McKay, of Regina and a student at Western Ontario University, disappeared strangely on the night of October 26 and for nearly two months diligent search failed to reveal any clew to his whereabouts. Recently his decomposed body was found in the River Thames by children.

The jury's finding was based largely on the testimony of Dr. Fred W. Luney, who was given charge of the body two hours after it was removed from the water.

Dr. Luney, who performed an autopsy, declared that he had found no marks of external violence and no fractures of any bones. There was no water in the lungs and the stomach, which was empty, did not indicate the convulsive struggle usual after death by drowning. Nor was any symptom of poison in the system.

"In fact," said the doctor, "I can not tell the actual cause of death."

Make Big Drug Seizure

Narcotics Seized At New York Pier Valued At Five Million

New York.—Narcotics valued by federal authorities at $5,000,000, were seized by special agents of the treasury department at a Hudson River pier.

The seizure was described by United States Attorney Tuttle as the largest of its kind on record.

Tuttle said arrangements for bringing in the contraband which arrived Friday, on the French liner Rochambeau, had been made by a man named Klein, a name which was one of the aliases used by Joseph Unger, recently arrested on narcotic charges growing out of the investigation of the slaying of Arnold Rothstein, Broadway gambler.

The narcotics, contained in five large packing cases, were marked as being trans-shipped to an unidentified consignee in Philadelphia.

Four of the cases seized were opened by special agents and were found filled with opium, cocaine and morphine.

May Be Elevated To Peerage

Sir Austen Chamberlain May Enter House Of Lords

London.—The Evening Star says there are strong rumors in Conservative circles that Sir Austen Chamberlain, secretary for foreign affairs, will not seek re-election in West Birmingham in the next general election. No confirmation is obtainable at the moment, but the newspaper says the suggestion is quite tenable. It is possible Sir Austen may be elevated to the peerage, it adds, for if the present government were returned to power it would be quite in keeping with Conservative precedent to have the foreign secretary in the house of lords.

EXPECT PEACEFUL SETTLEMENT OF BOLIVIA TROUBLE

Washington, D.C.—The Pan American conference through a special committee has asked Bolivia and Paraguay to reach a pacific settlement of their differences.

Meeting with Bolivian minister Diez De Medina and the Paraguayan delegate, Ayala, the special committee on mediation between the two countries formally expressed to the two representatives the "hope that their differences will be settled in a peaceful and satisfactory manner."

After a two-hour session, Dr. Maurtua of Peru, chairman of the special committee announced it would continue to gather certain information on the conflict before reporting to the plenary session of the conference.

"We have a well founded belief that the situation will be settled satisfactorily," Maurtua said.

Paris.—Foreign Minister Briand of France, who is president of the League of Nations council and Sir Eric Drummond, secretary-general of the League have reached an agreement that peace measures in the western hemisphere had removed the necessity of calling a special session of the League council.

EVIL EFFECTS OF MIXING ON GRAIN INDUSTRY

Yorkton, Sask.—Farmers of north eastern Saskatchewan as witnesses before the Royal Grain Commission here, stated that mixing was an evil that is damaging every phase of the grain industry with the exception of private lake terminals.

Claiming that he lost $225 on a car of grain because of erratic work of the Winnipeg inspection department, W. F. Golden, farmer of Ebenezer, condemned mixing as a vicious principle degrading Canadian wheat and unjust to the old country buyer as well as to the producer.

"Only the mixing house profits," he said.

"If a number 3 and a number 4 shipment were sold separate would the producer be as well off as if the two were mixed?" the witness was asked. If the profit from the mixing went to the producer he might be as well off, witness thought, but in any event he believed such a system to be a fraud on the old [illegible].

That the British miller would spurn the "degraded" mixed product from Canada when Russia comes back as a volume exporter was Golden's warning.

Huge Increase In Crop Movement

Over Hundred Million Bushels, More Carried On Great Lakes

Fort William, Ont.—Official figures on Lake movement of grain during the season of navigation and for the crop season of 1928 have just been issued by the board of grain commissioners. They show an increase of over 100,000,000 bushels in the movement of grain during the season of navigation from May 4 to December 12, and of nearly 90,000,000 bushels in the movement during the crop season, from August 10 to December 12.

During the whole season of navigation, grain taken down the lakes totalled 385,061,444 bushels as compared with 279,466,714 in 1927. From August 1 to the close of navigation, the movement was 262,366,416 bushels, compared with 185,913,976 in 1927.

The number of cargoes that went from this port during the season of navigation was 1,869, of which 882 were carried in Canadian bottoms, 986 in United States bottoms, and 18 in other vessels.

Leave For Far North

Airmen To Check Up On Conditions Of Prospectors Near Richmond Gulf

Winnipeg, Man.—Four airmen of the Northern Aerial Minerals Exploration Company left Winnipeg in two super-monoplanes to find out if "all is well" with a small party of the company's prospectors working on the eastern shore of Hudson Bay near Richmond Gulf.

The prospectors were brought to the bay by steamer. They have no means of communicating with the outside world and the only way they can get to civilization is to walk or go by plane.

The crews of the two planes will check up on the condition of the prospectors and probably bring them supplies from Sioux Lookout.

Power Of the Duce

Rome.—Mussolini, has taken over the Ministry of Colonies, thus assuming seven of the 13 portfolios in the government and constituting himself a majority of the cabinet. He now holds the most important departments in his own hands, having, besides Colonies, the departments of Foreign Affairs, War, Marine, Aviation, Interior and Corporations.

Heads Saskatchewan Pool

Regina, Sask.—A. J. McPhail, Ladstock, was re-elected president of the Saskatchewan Wheat Pool Association at the initial meeting of the board of directors held in the board room at the head office at Regina. L. C. Brouillette, Landis, was re-elected vice-president, while R. J. Moffatt, Bradwell, was again chosen managing director.

Will Discuss Matter Later

Ottawa, Ont.—It is understood the federal government does not desire to discuss at present terms with the Saskatchewan government on which the natural resources will be returned. It is felt that the Alberta terms should first be agreed upon, and the same given Saskatchewan.

KETCHAMOOT

(Continued from front page)

Mr. and Mrs. G. Hesketad and daughter and Miss Hannah Jensen motored to the city on Thursday.

Mrs. Leslie McGinitie entertained the M.A.S. at her home last Wednesday afternoon. A large crowd was in attendance, including several visitors. Those were Mrs. A. Johnson, Mrs. Jim Johnson, Mrs. Peter Lee, Miss Yager, Mrs. Geo. Yager, Mrs. George Weatherill, Mrs. Joe Brown, the Misses Annie Bruhn, Lillian Corlett and Janet Brown. Besides the devotional part a goodly amount of business was transacted including the sending of flowers to our sick member, Mrs. Gordon, and friend, Mrs Hall. Funds for the Bible Society, also $10.00 to the Red Cross Society. At the close of the meeting refreshments were served by the hostess. The January meeting will be held at the Bauer home.

Mr and Mrs. McCowan were guests of Mr and Mrs. C. A. Ingram on Wednesday evening.

INGRAM SCHOOL HAS ENJOYABLE AFTERNOON

An enjoyable afternoon was spent at Ingram school on Friday, December 21st, when the parents of the children and a number of visitors gathered to hear the program given by Miss Boptiste and her pupils. The concert consisted of songs, drills, dialogues, etc., each item being carried out very successfully.

The lunch being served by the mothers was followed by the Christmas Tree. All the children received very nice presents and their gift to their teacher was a box of stationery, handkerchiefs and novelty pen cushions.

After the singing of the Anthem, each and all wished the other a merry Christmas and departed for home with the report of a pleasant time

TURB BOY'S BAZAR

The Turbo Boys staged a bazar and afternoon tea on Saturday last, which was well patronized by the public. The event created quite a little interest it being unusual for boys to stage bazaars. It was both a social and financial success.

CANADIAN NATIONAL RAILWAY'S REMARKABLE HOOK UP

To those who tuned in their radio sets to C. N. R. E. on Thursday night, there was presented a programme of outstanding merit. The programme originated in the Mount Royal Hotel at Montreal, and was of three hours duration. During that time there was not a dull minute, each item following the other in prompt though unhurried sequence. The programme was in celebration of the anniversary of C. N. R. broadcasting and was re-broadcasted from 15 stations in Canada. Outstanding Canadian artistes sang and played and there an address by Sir Henry Thornton and Mr. Robb, president and vice president respectively. It was truly an outstanding programme and achievement, and to those who listened from beginning to end, one that will not easily be forgotten.

Arthur Beirnes visited the city this week.

Paul Thompson is attending the Boys' Parliament being held at Calgary this week.

ELEVATORS WILL BE CLOSED MONDAY AND TUESDAY

Farmers please note that all Tofield elevators and John Lee's grain buying station will be closed on Monday and Tuesday, Dec. 31st and Jan. 1st. Business will be resumed on Wednesday as usual.

Gradually increasing in volume until it became stupendous for the staff to handle it, the business at the local post office received a climax on Christmas eve. Both Mr. and Mrs. Chittenden were very busy, nevertheless by hard work and long hours were able to give general satisfaction there is more and more early mailing of Christmas parcels and letters, but most past the volume of post office business at this time increases.

CARD OF THANKS

We wish to express our sincere thanks to our friends for the many kind deeds and expressions of sympathy during our recent and bereavement. To those who sent flowers we are especially grateful.

MR. and MRS. C. HOBSON AND FAMILY.

LOCAL AND PERSONAL

Dr. and Mrs. Mills of Edmonton were guests of Mr. and Mrs. Forman on Monday.

Mr. C. H. Meyer of Calgary, arrived in Tofield on Christmas day and will be the guest of Mrs. Webb, sr., until after New Year's day.

Mr. and Mrs. J. W. Robinson and family, after having a jolly time at the Anglican Sunday School Christmas entertainment, paid a visit at the home of Mrs. Webb sr., where they spent a pleasant evening with music and song. Mr. Meyer favored them with a few selections played on his Hawaiin Guitar.

Allan and Hildreth Lewis talked to their mother, Mrs. Frank Lewis at Gresham, Oregon on Christmas day over the telephone and it came in clear and plain.

Mrs. Forman entertained at five tables of whist on Friday evening.

Wilmer Craig and Joe Sutton spent a few days in Edmonton this week.

Mrs. M. L. Shape left for her home at Wichita, Kansas, U.S.A. after spending some time with relatives in Tofield and New Sarepta.

Miss Ruth Paridis spent a few days in Tofield visiting friends.

Mr. and Mrs. Allan Lewis and boys and Hildreth Lewis spent Christmas at the Hosler home.

Mr. T. Carey received the sad news of his father passing away and left for B.C. on Sunday evening.

Miss Dorothy May is home from Edmonton to spent the New Year holidays.

Leonard P. Woodhams, (optometrist) eye-sight specialist, will be at the Royal Alexandra Hotel on the 8th inst., next Tuesday.

Born.—To Mr. and Mrs. Rubin Eide on January 1st, a daughter.

The annual meeting of the Women's Auxiliary of Holy Trinity Church, Tofield will be held on January 9th, 1929, at 2:30 p.m. in the church. A full attendance is requested.

Mr. and Mrs. Carver sr., of Edmonton were in town, visiting at the J. Carver home here for New Years.

Miss M. Bethel returned on Tuesday to her school at Cadogan.

Get your automobile licenses at J. O. Letourneau's, (Cornhill Municipal office).

Mrs. Lew and Jimmy returned from Bawlf on Tuesday.

Miss Mabel McLean is spending the holidays at home.

Mr. and Mrs. Byland returned on Saturday after spending a week at Wetaskiwin.

A pianoforte recital was held at the home of Mrs. Firth on Thursday of last week. The pupils acquitted themselves well. Lunch was served to the parents and guests.

Mrs. Tobo and children returned on Monday after spending the week at Wainwright.

We understand that Mr. Tobo who has been one of the telegraphers at Tofield for some time, will become agent at a station near Camrose.

Harold Smith, who has been on the staff of the Tofield C.N.N. station for some years has been transferred to Camrose.

Miss Lovett Ross spent the New Year holiday at her home in St. Albert.

A new barber shop has been opened in town, Mr. Slemco of Edmonton occupying a portion of the Letourneau block (next to the jewellers). Mr. Slemco is fully experienced and is already soliciting your business.

The primary department of the United Sunday school held a Christmas party in the church basement on Friday of last week. The youngsters had a slendid time playing games, etc. There was a dandy lunch and before leaving each one was given a bag of candy and some fruit.

A birthday party was held at the Worton home, on New Years day when Charlie and Leonard Worton celebrated their eighth birthday by having a number of school and play mates in. There was music and games, which were much enjoyed as was also the lunch.

TRAIL RANGERS PLAY FIRST HOCKEY GAME OF SEASON

The first hockey game of the season to be played on the Tofield rink took place on Wednesday evening between Tofield Trail Rangers and Viking Trail Rangers, the game resulting into an overtime one with Viking the winners by the odd goal.

The game was good to watch, both teams being aggressive. If anything the Viking team had a little the edge their players seemingly being able to stick handle a little better than ours. Tofield however, made up for this by being better at checking and saved many situations that seemed desperate.

At the end of the game the score stood at 3—3 and ten minutes overtime play was allowed. Both teams were out to win and in the first five minutes it looked as if Tofield was going to score. Lack of finish around the nets prevented them turning the tide in their favor. After about eight minutes of play one of the Viking lads made a nice solo rush and shooting from well out and to the side scored a neat and well earned goal.

The Tofield lads lined up as follows: goal, Jack Whyte; defence, Norman Glover, Everett McLean; forwards, Arthur Beirnes, Ray Martin, Bert Craig. Subs: Blake Clutterham, Murray McHeffey and Gerald Thompson.

Referee. W. Worton, jr.

MIX AGAIN PROVES GREAT HORSEMANSHIP

Tom Mix has proved to the world again that he knows horses in his new Fox Films Production, "Tumbling River," which will be shown at the Variety on Saturday, January 5th.

Tom has spent most of his life on the hurricane deck of a western pony, and now Mix is owner of the most famous and popular horse—Tony. Tony is Mix's inseparable compan-[illegible] hazards and risks that has made the Fox star known throughout the world.

In this production Mix is owner of a stock ranch and a fellow who is known for his breed of fine horses and his devotion to the animals. He is a connoisseur on well bred horses of the west. His two prize horses, however, are Tony and Buster. They mean more to Tom than all his other worldly possessions and when the cattle rustlers steal Buster, that is where the hot action begins.

Tony is just as anxious as Tom to chase down the thieves and Mix and Tony do some of their most brilliant riding feats and stunts through the desert on the trek for the lost Buster. Neither Tom nor Tony are daunted and the plot is fast and furious until the last shot of the picture where Tom outwits the rustlers and regains his lost horse and the girl he loves.

Mix is supported by a splendid cast including Dorothy Dwan, William Conklin and others.

TOFIELD SCHOOLS CHRISTMAS CONCERT GREAT SUCCESS

In the report of Christmas activities, we omitted by mistake, to mention the Tofield Schools' Christmas entertainment. This was held in the Variety Theatre on the 20th ult., and was excellent in every respect. The programme, as all Christmas programmes are, was long, every number being thoroughly enjoyed. The hall was full, and a jolly spirit was in the air. Mr. Bullock, principal of the schools, presided and made an admirable chairman. The teachers and all those connected with the event are to be congratulated upon its great success.

Mr. and Mrs. Swinton and sons entertained quite a number of young lads to a party on New Year's eve. Whist was played and other games indulged in, which with music and song made the evening pass all too quickly. A bountiful lunch was served and the lads had a real good time.

APOLOGY

We regret that due to one of the staff contracting a very bad cold coupled with the New Year holiday, the paper is late this week. However we fully expect to catch up in time for next weeks issue and subscribers on routes one and four may expect their Mercury next Friday.

KETCHAMOOT

"A Happy New Year To All.

The annual meeting of the M.A.S. will be held next Wednesday, January 9th, at the home of Mrs. G. W. Sears. A cordial invitation is extended to all.

Mrs. Keitha Oliver who is teaching school near St. Paul de Metis is spending her Christmas holidays with her parents, Mr. and Mrs. Peter Lee.

Master Harold Schultz rode his bicycle over to Holden Christmas week and spent a few days visiting relatives.

Mrs. Geo. Lawson, Misses Mabel Mildred and Mrs. Smith, Mr. and Mrs. Herman Lawson and family, Martin Lawson and Mr. and Mrs. C. A. Ingram, were guests of Mr. and Mrs. G. W. Sears on Wednesday night.

Miss Edith Ryley and Miss Lillian Shertel of Ross Creek visited their friend, Miss Lillian Carlisle on Thursday and Friday.

Mr. and Mrs. Soma gave a New Year's eve party at their home on Monday evening. Mostly friends and relatives from Kingman were present.

Mrs. O. Hanson who has been very ill for several weeks was taken to an Edmonton hospital on Monday.

Mr. and Mrs. Geo. Cookson left Monday for Rochester, Minn., where Mr. Cookson will enter the Mayo hospital for further treatment, his many friends wish for him a complete recovery and a safe return.

The Lawson young people entertained the young folk of the community to a whist drive at their home New Year's Eve, six tables playing. First prizes went to Miss Hannah Jensen and Henry McGinitie, consolation prizes to Miss Viola Lee and Roy Whillans. A nice lunch was served by the young hostess and all reported to have spent a very pleasant evening.

Mr. [illegible] of the Tofield C.N.R. office staff, has been transferred to Camrose. Mrs. Smith left for Camrose on Sunday after spending a few days with her parents, Mr. and Mrs. Geo. Lawson.

A delightful evening was spent at the Appleby home New Year's eve, when Mr and Mrs. Appleby entertained a large crowd of old time friends and relatives in honor of their sister, Mrs. Fannie Jackson of Merritt, B.C. After an hour or two spent in renewing friendships, Mr. Elgin Seale took charge of the entertaining. Old timers roll call was the first item on the program, giving date of coming to Alberta also to the Tofield district. Mr. A. J. H. McCauley and Mr. Wildman were the real pioneers having spent 40 and 39 years in the province. Duet by little Misses Lola and Fay Wilson accompanied at the piano by their mother; piano solo by Mrs. A. J. H. McCauley; step dance, Gwendoline Jackson; recitation, James Francis; song, "Golden Slippers" Mr. John Cookson; piano solo, Mrs. Rufus Wilson; violin solos, Mr. Wm. Lee; duet on the piano by the Wilson sisters. Mr. T. Cookson and Mrs. Wilson furnished old time music on the violin and piano throughout the evening. Just before midnight Old father time, (Mrs. Jackson) made his annual march through the room followed by little Cleo Wilson as the New Year. All joined hands and ushered in the New Year by singing, "Should Auld Acquaintance be Forgot." Delicious refreshments were served after which more music was enjoyed. Owing to sickness not all the old timers were present, those who answered the roll call were: Mrs. Jackson, Mr. and Mrs. Jack Appleby, Mr. and Mrs. Wm. Lee, Mr. and Mrs. B. Wildman, Mr. and Mrs. E. Seale; Mr. and Mrs. J. Munroe; Mr. and Mrs. Geo. Francis; Mr. and Mrs. Jim Francis; Mr. and Mrs. J. McGinitie; Mr. and Mrs. J. Morton, Mr. and Mrs. T. Cookson, Mr. and Mrs. Oliver Letourneau, Mr. and Mrs. R. Wilson, Miss F. Fawcett, Mrs. Oliver Cookson, Mr. Lloyd and Miss M. Wood, Mr. A. Shultz, Mrs. Henderson and son Jason, Mr. and Mrs. J. Cookson, Mr. A. J. H. McCauley, Mr. and Mrs. C. A. Ingram, Mrs. Wm. Wood, Miss Minnie Wood, Mr. Frank Wood, Mr. and Mrs. Howard Stine and Mr. Bergman.

Joe Sutton made a trip to Camrose on Monday.

Miss Alice Simonson will teach at the Farmington school with the commencement of the current term.

LINDBROOK

Lindbrook wishes all a Happy and Prosperous New Year; may it make up for 1928 which was not one of the prosperous kind, at least for this vicinity, still we guess it was happy enough, but with a new year in sight, let's all go ahead and prosper.

The annual Christmas tree and concert was given by the teacher and pupils of Lindbrook School here on December 20th. The concert was wonderful for children, many of the numbers being remarkably good. It shows that we have the talent here and an able teacher to bring it out. Every child was remembered on the tree, and the school was nicely decorated to suit the season. Santa Claus arrived with his bag of goodies for the kiddies and much fun ensued during the distribution. Mr. Hicks made a wonderful Santa and carried his part off fine. Supper was served after the concert and afterwards decks were cleared for a dance at which Mr. F. Kortzman and others supplied the music. It's a pity Christmas doesn't come oftener isn't it? Nuf sed!

The epidemic of "flu" is pretty general here, nearly everyone having had an attack. Mr. Burton's case developed into pneumonia and he has been seriously ill, but we are glad to hear that he is on the mend now.

Mr and Mrs. Macuws' two sons spent Christmas with their parents.

Mr. and Mrs. Ernest Hooper and family motored out to see the old year out and the new one in, with their relatives, the Hooper's of Lindbrook.

The flu was so bad in the Westside S.D. that the school Christmas Concert had to be postponed from December 21st until some time in January when all are better able to attend and enjoy same.

KINGMAN

Born.—To Mr. and Mrs. Roy Melvik on Christmas Eve, a daughter.

Mrs. J. Erickson and daughter Connie spent a couple of days in Edmonton last week.

Miss Hulda Johnson of Vermilion is spending the Christmas holidays with Mrs. Peter Simonson.

Mr. and Mrs. Geo. Welch and Evelyn, Mr. and Mrs. Henry Bray and Mr. and Mrs. Otto Grahn of Hay Lakes were the guests of Mr. and Mrs. T. Grahn on Christmas Eve.

D. M. Thompson, a prominent farmer of the Kelsey district has bought out the general stores of Messrs. H. and I. Bray and N. Detwiler. He is now open for business and we wish him success in his new venture.

Gertrude Asp spent a few days with relatives in Daysland.

Mrs. R. D. Bruce and children of Minburn spent a few days with Mr. and Mrs. J. Bosse.

Mr. and Mrs. S. T. Severson and family of Clyde are visiting with friends and relatives here for a few days.

Mr. and Mrs. Andrew Johnson and Inga were dinner guests of Mr. and Mrs. J. Bosse on Thursday.

Misses Evelyn Welch and Josie Thompson are spending a few days with Gladys and Irene Horte of Daysland.

Mr. and Mrs. S. Simovitch of Round Hill visited with Mr. and Mrs. P. Rodnunsky on Sunday.

Miss Lillian Lindberg entertained a number of Kingman young folk on Saturday evening at her home, and by the looks of things, everyone had a "whale" of a time. The evening (and part of the morning) was spent in music and games, and an appetizing lunch was served at midnight. At any rate, the party seemed to set an example, for it was decided to have one at the Soma home on New Year's Eve and one at the Onsom home on Thursday evening.

Sam Hardie of Alliance visited with Mr. and Mrs. P. Rodnunsky on Monday.

Mrs. MacIntosh was a Camrose visitor on Monday

Miss Lillian Lindberg is spending a number of days in Edmonton with relatives and friends.

Mrs. O Haboth is assisting Mrs. R. Malvik for a couple of weeks.

Make 1929 a Happy New Year

The old year has become a part of the history of the past. The new year has dawned. It is with a feeling of optimism that the people of Canada have hailed its coming. Conditions throughout the Dominion are most encouraging and the outlook for the future is distinctly bright.

If we all have faith in Canada, in her institutions, in her enterprises, in her resources, and we all work together striving for her greater development and prosperity, there is hardly any limit to the greatness to which as a people we can carry our country forward.

But if in 1929 the Canadian people are to realize the bright hopes entertained for their Dominion at the dawning of the year, there must be a realization of the fact that each individual must do his or her share. There is not a Canadian citizen, no matter how humble the sphere they occupy, but who has it in their power to do something to either promote or retard the welfare of the country during the next twelve months.

Of first importance is our own outlook on life. If that outlook is a cheerful optimistic one, if we are eager to see the bright rather than the dark things of everyday life, if we strive to see the good in all matters and things which affect ourselves and the community in which we live, if in our criticism of public men and affairs we seek to be constructive, to build up rather than tear down, if in a word, our thoughts and actions are of kindly intent, then a good foundation is laid for our work of making the new year the brightest, happiest, most prosperous Canada has ever known.

Next in importance is it to realize that for the vast majority the best service that can be rendered to Canada is to be found in the faithful discharge of whatever duties may fall to us in the daily round of ordinary tasks. For example, if, without a single exception, the farmers of the Dominion tilled the soil a little better, used somewhat better seed, fought weeds a little more vigorously, who can measure what the aggregate result would be in larger, better crops and resultant national prosperity? Or if every office clerk, every workman and laborer, did their work this year a little more conscientiously, exercising greater care and promptitude, the effect on the business of the Dominion would be tremendous.

Who can possibly compute the gain to Canada in 1929, if men and women, boys and girls, employers and employees, individually and collectively, co-operated to promote health and prevent disease; by taking only reasonable precautions largely reduced losses of life and property through fire; by obeying the laws and observing the courtesies of the road eliminated many of the preventable automobile accidents?

There is nothing very great or wonderful about these and sundry other matters of a like kind. They are in no sense spectacular. Their accomplishment does not call for great executive ability, large wealth, or high position. No, it is within the power of everybody to contribute their quota.

But it is just through the exercise of such commonplace qualities as care, forethought, presence of mind, courtesy, faithfulness to duty in discharging the smallest task, that this new year can be made exceptionally bright, unbelievably happy, and enormously prosperous.

And is Canada not worthy of such simple but effective service? Consider all the countries in the world today! Can you name one that is healthier, that has more varied beauty of mountains, lakes, rivers and forests, that possesses greater wealth of natural resources, that has less poverty, fewer slums, a better system of education or of government, more of the modern comforts of life available to a greater proportion of the total population, or that offers greater opportunities for advancement to those eager and willing to work that they may take advantage of offered opportunities?

Canada is deserving of the best we have in us to give, and if we give, as we should, there is no country in the world which will so fully and so quickly reward the giver.

BRANCH LINE PROGRAM OF C.N. WILL BE HEAVY

Montreal.—The Canadian National Railways, it was officially announced, will ask parliament, when it reassembles in January or February, for authority to construct additional branch line mileage, the program presented to be carried to completion within the succeeding three years.

Sir Henry Thornton, chairman and president, and S. J. Hungerford, vice-president in charge of operation and construction, have made a close study of the branch line needs of the National system and their recommendations are now being completed.

While no details are forthcoming at present it is definitely known that the extension from Aberdeen to Melfort, Sask., will be requested and it is understood that the new branch line program may be somewhat larger than that presented to parliament in April, 1927, when 506 miles of new lines were included. Due to the fact that parliamentary sanction was forthcoming in the early spring of 1927, excellent progress was made in that year and in 1928 on the work authorized. As a consequence working forces and construction equipment will be available early in the summer of 1929 for the new construction work admittedly necessary to keep pace with agricultural and other development.

Britain Wants Penny Postage

Would Follow Example Set By Canada To Restore Cheap Postal Rate

London, Eng.—The Daily Chronicle expresses the hope that Right Hon. Winston Churchill, chancellor of the exchequer, will take note of the decision of the Canadian Government to restore penny postage, and asks why Canada should have taken action before Great Britain in giving practical effect to the principle laid down by Right Hon. L. C. M. Amery, secretary for the dominions, namely, that the conduct of business depends upon cheap and effective intercourse.

The newspaper declares:

"When we demand penny postage we are not asking that it should be provided at a loss for the post office. The surplus is in the neighborhood of £7,000,000 and reduction to a penny would only cost £5,500,000.

When Churchill says that he cannot afford it, he is using words which have no meaning, for by annexing the post office surplus he is simply levying a tax on letter postage. Such a levy on trade intercourse is a form of taxation which this country can least of all afford."

New York Making Raid On Criminals

Police Commissioner Thinks Worst Type Will Leave City

New York.—An exodus of criminals is under way in New York according to Police Commissioner Grover Whalen, who believes there is a "lot of law in the end of a night stick."

After two days of intensive raiding, Whalen said he had captured eight major criminals. He refused to reveal their names.

In addition, the commissioner disclosed that several gunmen were caught. From now on a special effort will be made to rid the city of that type of criminal, Whalen said.

Left Large Estate

New York.—An appraisal of the estate of the late Judge E. H. Gary, head of the United States Steel Corporation, at his death, August 15, 1927, placed its net value at $12,938,072.25.

Summary Execution Banned

Mexico City.—Abolition of summary executions has been ordered by President Emilio Portes Gil. He announced that even persons apprehended in open rebellion against the government would be turned over to the authorities for trial.

Discovery May Be Valuable

Cumberland, R.I.—The Cistercian monks of Cumberland have discovered on their property a vein of granite, which they believe, may prove of enormous value. The discovery was made while the monks were gathering stones for a new chapel.

Pays For Airplane Ride

Newark.—Miss Amelia Earhart, trans-Atlantic aviator, paid $10 for a 20 minute airplane ride in a commercial plane with her mother.

United Farmers Of Canada

Saskatchewan Section To Meet In Regina In February

Saskatoon, Sask.—The annual convention of the United Farmers of Canada, Saskatchewan section, will be held in Regina, February 12, 13, 14 and 15.

The provisional board of the Co-operative Wholesale Society will meet February 9, and the convention of the Co-operative Wholesale Society on February 11, also in Regina. The board of directors of the United Farmers will meet in Regina, February 8. Fraternal delegates will be invited from the wheat pool, livestock pool, egg and poultry pool, U.F.M., U.F.A., United Farmers of British Columbia, U.F.O., and the teachers' alliance.

Receive Salary Increases

Officers and Clerks In Federal Income Tax Office Are To Benefit

Ottawa.—Something over a thousand officers and clerks of the federal income tax division throughout Canada received a substantial gift on the eve of Christmas in the form of increase in salary. What is more, the increase is retroactive to April 1st last—the beginning of the fiscal year.

The raises vary from forty dollars to nearly eight hundred a year, according to the position held and the responsibility attaching it.

The income tax division is not under the civil service act and those who are employed in it have not shared in the increases in recent years extended to other branches of the service.

Three Killed When Train Strikes Auto

Two Small Children Hurled From Car Have Miraculous Escape

Chaplin, Sask.—Knute Hammerness, and Mr. and Mrs. "Scotty" McGowan, all residing in the valley north of Chaplin, were instantly killed at the C.P.R. crossing a mile west of Chaplin when a freight train crashed into the Chevrolet touring car driven by Hammerness.

Two small children of Mr. and Mrs. McGowan, aged three and five years, were hurled out of the car and escaped without a scratch. They were found afterwards huddled together hiding in the bush near the right of way.

Union Of Escaped Prisoners

French Soldiers Who Escaped From German Prison Camps, Have Organized

Paris.—Thousands of soldiers of the world war who escaped from German prison camps have banded together to form a union of escaped prisoners. They will hold annual reunions to talk over their war-time experiences, but their principal aim is to take care of the widows and orphans of other soldiers whom they know to have been killed in attempting escape.

Once each year they will hold a banquet at which they will toast their good luck.

Sweden's First Railway Tunnel

Stockholm.—An underground railway tunnel, the first of its kind to be built in Sweden, is now under construction in Stockholm. The subway will be 5,248 feet long and will cost $161,400 when completed. An entire borough of the capital, the "Soedermalm," or down town section, will be tunneled from one end to another.

Record For Motor Car Fatalities

Chicago.—There were 13 deaths from automobile accidents in Chicago over Christmas—one of the largest death lists from such a cause ever recorded during a holiday period here. The fatalities brought the number of motor car deaths for the year to 1,051, which is a record.

Rail Board Sittings

Ottawa.—The board of railway commissioners will open hearings in Vancouver on January 8, which will probably extend over several days. Following sittings in Vancouver, the board will sit in Victoria, B.C., opening January 18.

Mild Weather In East

Sault Ste. Marie, Ont.—Several robins were seen in Sault Ste. Marie on Christmas, and a citizen reported finding a live caterpillar in the street. The weather continues abnormally mild.

Friend Of King Dies

London, Eng.—Lord Lambourne, one of King George's old friends, died at Bishop's Hall near Romford, Essex, aged 81. He was a keen rival of the King at horticultural shows.

Queen Appreciated Message From Canada

Governor-General Receives Thanks For Greetings To King George

Ottawa.—A message from Queen Mary, at Buckingham Palace, where King George is slowly improving from his serious illness, was forwarded by the Governor-General, to Premier Mackenzie King, at Laurier House, Ottawa.

"On this Christmas morning," said the Queen, "my children and I thank you from our hearts."

The Queen's message was in reply to one sent by Premier King, conveying to King George Christmas greetings on behalf of the government and people of Canada who "join our prayers to those of all parts of the Empire for the complete restoration of your Majesty to health and strength."

The message from her Majesty said: "Please be assured that the message of greetings which you have so kindly sent on behalf of the King's government in Canada and the people of the Dominion will be highly appreciated and valued by the King when his progress to recovery is sufficiently advanced for him to receive it personally."

WILL CONSIDER AMENDMENTS TO THE GRAIN ACT

Ottawa.—Amendment of the Canada Grain Act as a means of improving the existing system of grading is under consideration by the federal government, it was learned here.

Arising out of the investigation at present being conducted in the western provinces by the commission on grain grading, it is understood steps will be taken at the forthcoming session of parliament to overcome any dissatisfaction among grain growers by amending the act.

While the details of the proposed changes have not yet been disclosed, it is believed that the government will recommend the re-drafting of clauses in the act relating to grading, in an effort to clarify and make more uniform their interpretation.

The regulations would be so framed that farmers would be in a position to determine on their own accord the grade they might expect for their wheat.

Reduction of the number of varieties of wheat which would qualify for the contract grades is another suggestion for improvement of the grading system. It is pointed out by authorities that that multiplicity of strains grown in Canada at the present time lends itself to the aggravation of the problem.

Several other proposed changes are under consideration, among them the one relating to mixing. It is understood that the federal department of agriculture is in favor of prohibiting mixing red and white wheat in the future. This practice, it is pointed out, has provoked considerable dissatisfaction among importers in Great Britain.

Income Tax For Bermuda

Hamilton, Bermuda.—Decrease in the export of trade of Bermuda, which includes onions, potatoes and celery, chiefly shipped to the New York market, has caused much concern, and the Colonial Parliament now in session is planning adoption to the income tax to meet expenses for running the government during the next fiscal year.

HONORARY SURGEON

Sir Hugh Rigby, honorary surgeon to his majesty, who has been in attendance at the bedside of the British monarch.

Prince Asks Relief For Workless Miners

Nearly Two Million Persons In Need Of Immediate Help

London, England.—The Prince of Wales' appeal broadcast on behalf of the distressed miners of Britain has awakened the country to the plight of nearly two million souls, who now constitute an economic burden on the country.

The Prince made his appeal on behalf of the Lord Mayor's fund for the relief of the distressed mining areas. He pointed out that 250,000 miners were workless, which meant at least 750,000 dependents, other estimates places the figure much higher, and it is generally accepted that there are now nearly a million persons in the mining and allied industries idle. In addition, there are approximately another million persons receiving relief from the poor law.

Many remedies have been suggested, ranging from a reform of the banking system so as to make credit for productive industry available at nominal interest to a great scheme for public works.

Australia's Capital Costly

Country Spent Millions Establishing Federal House At Canberra

Sydney.—Canberra, the capital of Australia, has been built on such a huge scale that it will be many years before sufficient revenue to meet the interest bill can be expected.

The total capital revenue expenditure to June 30 last, on the whole of the activities in the Federal Capital Territory, including revenue which had been received and expended was $52,730,000. Parliament House also has cost approximately $3,750,000.

Women and Children Removed

Calcutta, India.—A British airplane has arrived at Peshawar from Kabul, with 11 French and 10 German women and four children, belonging to the French and German legations. The women were cheerful, and reported that all was quiet in Kabul. Their husbands remained at the capital.

Special Plates For Doctors

Winnipeg.—In connection with the issuing of automobile license plates, at the Legislative building, a special arrangement for the benefit of physicians has been made. Plates from 4,000 to 5,000 are being reserved for them, no matter when the applications are received.

A Jolt Eliminator

This machine recently placed in operation by the Canadian Pacific Railway, is one of the many things which contribute to the smooth ride on rails. By welding a deposit of nickel steel to the worn rail surface at the joints with this apparatus and grinding a smooth surface the bump at the joint is practically eliminated. The machine which propels itself by electricity consists of a gasoline motor which runs two generators supplying power to the electric metallic-arc welding apparatus and a grinder.

Disastrous Fire In Hull Hospital

Nun Fatally Burned But Patients Were Removed Safely

Hull, Que.—Thirty-seven patients, many of them mothers with babies, some a few hours old, were carried from Sacred Heart Hospital here early Christmas morning when a fire in the laundry chute spread over the entire central portion of the building.

One nun died during the afternoon as a result of burns she sustained when she put out the blaze with a chemical extinguisher. She is Sister Celia, formerly Miss M. Chevrier of Cartierville, Que. She was 22 years of age.

The patients were taken to residences near the hospital and later most of them were transferred to the Water street hospital, Ottawa.

So far as could be ascertained none of these were seriously affected by their experiences.

Fire Captain E. Leblanc, of the Hull brigade, is reported in a critical condition from smoke poisoning.

Property damaged was estimated at $75,000.

Self-Government For India

Want Dominion Status Rather Than Complete Independence

Calcutta, India.—Self-governing dominion status for India rather than the alternative of complete independence, was the policy urged upon the All-Indian and Moslem League at its opening session by Maharajah Mahmudabad, the president.

He declared the British connection gave India undeniable security and was a valuable asset to Indian nationalism, "which must face laborious decades before reaching sturdy manhood," he added.

BYRD ARRIVES AT POLAR BASE FOR ADVENTURE

New York.—Commander Richard E. Byrd, head of an expedition to the "bottom of the world," is at the threshold of one of the greatest adventures of this adventurous century.

Before him lies the last geographical challenge to science—frigid, formidable antarctic, a continent of 5,000,000 square miles which is so little known that even a large part of its glacier-fringed coast line must be mapped by guess.

Byrd commands a million-dollar expedition, equipped as few, if any, previous polar parties have been fitted out, and is prepared to spend two years, if necessary, in wrestling from the vast land of silence secrets that science has long wanted to know.

The party finds itself at The Bay of Whales—one of the gateways to the continent—virtually at midsummer, when conditions are most favorable for the flying which Byrd plans to do. Whether he will attempt an immediate aerial trip to the South Pole is regarded as doubtful, it is believed, rather, that he will postpone this spectacular part of his program until the expedition has its second wind on the storm-swept tongue of ice that extends for an indefinite distance in the continental indentation known as Ross Sea.

On the South American side of Antarctic is Sir George Hubert Wilkins, himself an aviator of note, who is also known to be planning a polar flight. The two airmen have disavowed any intention of racing to the pole, previously visited by Amundsen and Scott, after sledge journeys over land, but it is known that each would like to be the first man to reach it by air.

Wilkins has already made at least one long Antarctic flight from his base at Deception Island near the Weddell Sea, and hence finds himself with a good bit of South Polar flying experience.

When supplies have been swung ashore from the expedition's boats,—no small problem itself in view of the height of the ice wall—the adventurers will erect the portable houses that are to be their homes during many months. When the encampment is complete it will be a tiny town, with dwellings, a recreation room, library, kitchen, workshop, store houses for tons of food and the gasoline, and shelters for the four aeroplanes.

Taking advantage of the slight moderation in temperature and storm which brief Antarctic summer will afford the expedition expects to make a start at laying supply bases along the 800-mile route which Byrd's big tri-motored aeroplane is to take some day to the pole.

B. C. WILL URGE LOWER DOMESTIC GRAIN RATES

Victoria.—British Columbia will soon launch a campaign to secure for its farmers drastic reduction in domestic grain rates, for many years a leading objective of the whole agricultural industry, Premier S. F. Tolmie has announced.

Meanwhile when the Railway Commission sits in Vancouver early in January, the province will ask for heavy reductions in express rates to benefit business generally, but particularly to assist the fruit industry of the interior, the premier said.

"We are not ready yet to launch our domestic grain rate application," the premier explained, "but meanwhile we are going ahead with the express rate hearing. The domestic rate situation is most unsatisfactory to this province and the Government will not leave a stone unturned in its effort to rectify this condition. In due course when proper preparations can be made, the work will start. There is no use going ahead unprepared at too short notice so that at the Vancouver sitting of the Railway Commission we shall pursue only our application for lower express rates."

Isaac Pitblado, K.C., of Winnipeg, will represent British Columbia, Saskatchewan and Manitoba before the commission in Vancouver. This agreement by which the western provinces are represented jointly was reached some time ago and adopted at a preliminary hearing on express rates in Ottawa. It will be continued in the coast hearings of the commission.

Radio Conference To Meet

Allocation Of Short-Wave Channels Will Be Discussed

Ottawa.—Resumption of the short-wave radio conference in Ottawa on January 9 next, was announced by the department of marine. It will be attended by representatives of the United States, Mexico, Cuba and Newfoundland.

This conference met in Washington in August last to discuss the allocation of short-wave channels, but no conclusion was reached then. It was stated that the main purpose of the forthcoming conference will be to endeavor to reach an agreement in regard to division of the remaining channels which are available.

Prize Winner Named

New York Man Wins $25,000 For Best "Dry" Law Plan

New York.—Major Chester P. Mills, former federal prohibition administrator for the New York District, has won $25,000 because his plan was adjudged the best submitted for enforcement of the prohibition laws.

The money was offered by W. C. Durant, automobile manufacturer. The $5,000 prize for the best enforcement plan submitted by a high school student was won by Malcolm D. Almack, of Palo Alto, California.

Loss From Penny Postage

Ottawa, Ont.—The restoration of two-cent postage from Canada to all parts of the British Empire instead of the present three cents will mean a loss of revenue of about $300,000, post office officials here figure. They state that about 20,000,000 letters go annually from Canada to other parts of the Empire, 90 per cent. of which go to the British Isles. However it is expected that increased volume will make up a considerable portion of the loss.

Influenza In Montreal

Montreal.—Influenza has taken a toll of 142 lives in Montreal since December 17, and during the same period 635 cases were reported, according to information supplied by Dr. S. Boucher, director of the health department.

Would Raise Salaries Of Cardinals

Rome, Italy.—Pope Pius is understood to approve raising the salaries of cardinals to $3,000 a year, believing that the present $1,100 is inadequate to cover the expenses of their offices.

Stanley Baldwin Shakes Hands

London, England.—Prime Minister Stanley Baldwin shook hands with more than 2,000 Conservative and Unionist workers at the rate of almost 30 a minute at a recent London reception.

NEW THINGS

AMONG THE most interesting things contained in the literature pertaining to Western Canada are the accounts of old timers. There is a thrilling interest in hearing early experiences personally recounted or even in reading of them. Experiences connected with the days when there were no railroads, when settlers were few and far between, when roads to and from trading centres were but trails, and when a journey to town was an adventure. Days when the prices of products were, according to present day standards, ridiculously low, but nevertheless, no easier to obtain. This Dominion, both east and west, unanimously accords honor to all brave pioneers who, sometimes with little more than an axe and a grim determination to commence with, carved out of the virgin prairie and forest first modest shacks and small cultivated patches and later substantial homes and fields of many acres. All honor to them. May their memory never fade, and may those now living enjoy the fruits of their labors to the full.

But in this week of the year, one is inclined to look forward and not backward. New things always contain charm, even if they lack substance. A new home, a new cow, a new plow, a new car, all have the power to excite within the owner an imagination which an old and used animal or article lacks.

And a new period of time is no exception. At this particular time we are all looking forward, some buoyantly hopeful and confident, others rather pensively and with doubts and fears; but whatever the Gregorian calendar is used, people are now wishing for their friends and themselves a Bright and Happy New Year. May all the good and wise wishes be granted.

But there is one beginning in life which in many ways overshadows all others, and it does not necessarily fall on January 1st. It is when a man and woman, newly wedded commence their life together on a Western Canadian farm. From that day onward, a new horizon is lifted unto them, a new responsibility falls upon them. If they are like many whom the writer has met they will have little money It may be a homestead or it may be a farm purchased on long terms; in any event, there will be hoping, planning, working, seeking credit from the bank, a hard time to pay back amount borrowed, but eventually doing it; success, contentment and good years and poor years. But through it all as the years advance there will be a gradual increase in this world's goods, in wisdom and in knowledge.

It is impossible to foretell what the year 1929 holds forth; it is beyond us to even imagine what the next fifty years—a period of time in which many now young will pass up and down the hill of life together—will bring. But to those who have just entered upon the journey of life together, to those who are well upon the journey; to those who are now on the homeward stretch, and to all others, this paper extends the wish that the new year may be a happy and prosperous one.

NEW YEAR RESOLUTIONS

THERE ARE many who believe living in a Western Canadian small town, or on a farm, is both dull and uninteresting. They are mostly those who live in cities, and are to be excused for failing to understand the life of those who live in the same land with them. The absence of clusters of bright lights, large departmental stores, gay theatres, noise and bustle leaves many city bred people in a void. These things to them are mistaken for life. Thus we dwell in small towns and on the farm, know better. They know that while the above mentioned things are often attractive, they offer little opportunity for personal expression of thought and action. Living in a small town or on the farm calls for constructive action on the part of everyone. If entertainment is desired, the community must provide it. Professional sport is out of the question and sport must be organized and run by volunteer effort; there are no paid church secretaries, but the minister and volunteer help must do every task from the highest to the most humble. All along the line citizens in some way or other, must keep the wheels of progress turning. To a large extent the same is true of the local newspaper. Lacking large circulations and high advertising rates, many local newspapers depend in some measure on the volunteer support of the citizens. Next to the school and church, comes the newspaper in public importance, and it is to be regretted that so many during past years have been allowed to fall by the wayside. This has been partly due to the lack of appreciation of advertising by many local merchants and in many cases due to the printer not having sufficient imagination and enterprise to bring his plant up to modern standards.

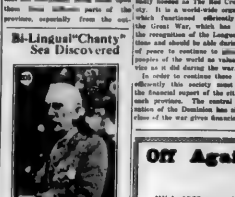
Anyway, with the new year here and new year resolutions in full swing, wouldn't it be a good resolution to resolve to support your home enterprises more? To get behind your church, school, sporting organizations, clubs for boys and girls, and if you like, your newspaper. It is not suggested that everyone should be running hither and thither, but there is generally one thing that appeals to each individual more than another. It is wonderful how much "life" one can find in volunteer effort for worthy local enterprises. To resolve to be a better citizen is a good resolution.

LIEUTENANT GOVERNOR AP-PEALS on BEHALF of RED [illegible]

We are now approaching the end of another year of very valuable Red Cross work in the province of Alberta, so as I can look back on the results and accomplishments with a great amount of pleasurable pride. Those who have had charge of the work in this province are deserving of the gratitude of every citizen who is interested in the welfare and happiness of our people.

Perhaps few of our citizens have a proper conception of the magnitude of the work which the Red Cross workers and the constant demands that are continually being made upon them. Many calls come to us from the province, especially from the out-[illegible]

Bi-Lingual "Chanty" Sea Discovered



RALPH CONNOR

Ralph Connor, the well known Canadian novelist, collected recently from a half-breed voyageur in the Canadian Northwest a highly interesting folksong which will be sung at the Vancouver Sea Binds Festival next January by Chanty Pagels, of Montreal. This song is half French, half English, the first part being the story of a beautiful Cree maiden who can speak no English and chants, "Slave pa winds of morning". This bilingual song appears to have been popular many years ago at a time when white blood was supposed to be a badge of honor, and which probably explains why it survived the logs rafted down the St. Lawrence from the Ottawa River. The word 'chanty' is considered by some authorities as connected with the 'shanties' of the Quebec lumberjacks who frequent the water sailors as well as woodsmen and sing at their work. According to Ralph Connor, the half-breed at Battle Prairie who he recorded this song was a headstrong chap with beautiful voice and manners and was a first-class voyageur. A number of purely French Canadian chanteys as well as those sung by Ulysse Pergis, at Valcartier, at the intention is to make this Sea Binds Festival as Canadian as possible.

$2.00 Per Year

For several years the great majority of weekly newspapers in Canada have been $2.00 per year. This includes Eastern Canada as well as Western Canada. Some years ago the publisher of the Mercury had in mind to charge $2.00 instead of $1.50 but at that time the hard winter with its consequent feed shortage came upon us and we then carried on until this year at the $1.50 rate.

Printed matter is about the cheapest thing there is in the world today when very large numbers are required, and it is somewhat of a problem sometimes for the small office catering to a few hundred subscribers to compete with the product of the large cities.

But now, as before, the Mercury is distinctively a local paper. Edited and printed in the town in which you do business, carrying every day news about people whom you know, it has a particular and definite appeal to the residents of Tofield and district.

We are gratified that those who have paid the $2.00 rate up to the present have done so with a smile, which is the best possible encouragement to us to turn out a better paper.

The Tofield Mercury

Off Again To Another Start

With 1928 now difinitely in the past and 1929 already on the wing, we are all of us hoping that the present year will be happy and prosperous. While we all wish for happiness and prosperity, most of us, if we are to have it, must help to make it. For many years now, the dairy industry has helped greatly towards prosperity and a resolution to milk at least one more cow and sell your cream to the Tofield Creamery, will go a long way to you—and us—obtaining our wishes.

FACE TERRIBLY DISFIGURED

Pimples Itched and Burned. Cuticura Heals.

"I had a breaking out of pimples on my face, neck, shoulders and arms. They itched and burned so badly that I used to scratch, causing severe irritation. My clothing aggravated the eruptions until at last I could not sleep on account of the torment. My face was terribly disfigured. The trouble lasted about two months.

"I read an advertisement for Cuticura Soap and Ointment and sent for a free sample. After about the fifth application there was a marked improvement so I purchased more, and in four weeks I was healed." (Signed) Miss Millie Dickout, Hunter's Rest, Que., Sept. 16, 1927.

CHAPTER X—Continued.

The words of "A Dream," sung in an impassioned tenor voice, came with surprising distinctness:

"I dreamed thou wert living, my dear,
And I dreamed that I pressed thee
Thy soft perfumed tresses and gave
Thy kisses to me.
Thrilled me and stilled me and
Filled me with love."

Donald saw that Wainwright was deeply moved. His throat was working convulsively, and he seemed to have difficulty in lighting his pipe. His shaking hands opened and closed his pipe-bowl in an attempt to hide his emotion. His face was pale and drawn between his clear grey eyes.

"Come on, John, let's 'it up a jig!" cried Andy as the singer ceased. "To the 'ell of the "Irish Washerwoman" the odd pair smacked the floor with their feet and in glorious circles, and who—ped like wild men. They finished with a pose like a bas until John's moccasined foot trod on Andy's long coat and brought them to the floor in a heap.

The comedy helped Wainwright to regain his composure, and he was soon his accustomed happy laughter.

"I've had a most wonderful evening, Andy," said Conlon gratefully, as they were leaving. "The concert was duffel in my life," she added softly.

"By the way, Mr. Pottray," spoke Mr. Wainwright from the doorway, "now are you progressing with your studies?"

"Not 'bad," answered Andy. "I've learned about the sepals, calyx, corolla, pistil, filament, anther pollen, style and stigma." As he rattled on these words he glanced at Gillis and Douglas. He had been longing for this chance to air his newly-acquired knowledge.

"Fine," complimented Wainwright smilingly. "You are having no difficulty, then?"

Andy wrinkled his brows. "I 'ave found it a bit difficult," he began importantly; "just a bit you know, to classify the flowers as to whether they are unilary, monadelphous, polyadelphous, gynandrous, syngenesious."

"Holy mackinaw!" roared Gillis, as he clapped his hands over his ears. "Stop him, somebody!"

Douglas caught Andy by the collar and dragged him from the door. Conlon's cheerful laughter drifted back to them through the darkness.

The Breed crossed the outer edge of light thrown from the doorway and limped to the trail. Wherever Connie went his argus-eyed guardian flitted in the background.

CHAPTER XI.

In the construction of the railroad to Summit Lake the steel and officers of the R. C. & L. Co's organization exceeded any past effort. The land-clearing outfit arrived in the evening after Andy's party had begun work on that portion of the right-of-way that entered the west shore of the lake. Like a swath of destruction, the ground became covered with the litter and wreckage of blasted rock—noble trees that had stood for centuries like silent sentinels guarding the hospid blue lake lapping gently at their feet.

For two days Connie had been a wearer than the bluff feasted on her horse she now stood in startled gaze on the avenues of her loved valley. On the third day, drawn by a horrible fascination, she wandered into the valley and watched with wide eyes the massacre of the mighty army, man with such tiny minds as the axe and saw, crushed to earth monarch trees that seemed as defying God.

The steam-shovel roared and crashed in the distance as it ploughed deep grades in the green hillside, more shouted, heavy wagons banged over the rough corduroy road, and high above the air Donald's piercing cries of command. Through all man in his mind the man worked in a frenzy of haste.

A giant fir—a veritable king of the forest, towering in regal grandeur high above its mates—stood near the center of the area. Around the massive base of this tree Connie had placed many her sunniest recollections. She had endowed this half-god with a living personality, to whom she had confided all her childish fancies and ambitions. The surrogate had been born numerous bits of nursery rhymes, and her name was carved deep with a sharp knife in several places. With a lump in her throat she saw the "fathers" move to the foot of this great tree and gaze aloft with approving eyes. Then axes and saws rent shining axes through the solid bark to form the "mark," which was then notched to the right and left with a wide opening on the dark grey trunk.

As the cross-cut saw with its rasping clang ate its way slowly through the tough fibre of the great tree, Connie made inarticulate sounds in her throat and, for a moment, covered her eyes. As the wedge was applied, a great shudder passed through the tree from the lower of dark branches at the top nodded as if in fond farewell. There was a pause, then with a rending and tearing crash it fell to earth with a thunder of sound that filled the valley with a wild tumult of echoes. A whistle blew—the men, satisfied with their day's costs and walked toward their camp.

For a short space Connie stood motionless. Then, with a last fond look at the fallen monarch, she sighed deeply and turned to the trail.

That night at dusk she came again. Donald found her as she crouched, as a forlorn figure, by the prostrate tree. Pointing to her fallen friend, whose top was torn and splintered, she told Donald in halting sentences of the tree's distinction. As he noted the grave face and trembling lips, he wondered at the depth of feeling in one so young. His soft words of sympathy brought unseen tears to her eyes, and she dared not trust her voice in answer. Its spoke to her cheerily on other subjects, but could not shake her melancholy mood.

Even the night calm was ravaged by the thunder of blasts. A lurid wall of flame shot high in the air as a rocky portion of the shoreline was rent asunder, and huge boulders plunged into the ochre lake, sending up pyramids of water to break in noisy waves on the shore.

Donald enjoyed the unusual experience of witnessing the construction of a railroad, but he understood now why the old trapper had wagged his grey head sadly when he heard the clamour of striving men and machinery creeping up from the south.

The night work had ceased, and a welcome silence settled over the shattered forest. Luminous stars sparkled and twinkled in the high, clear air, with colours that changed from orange to blue and back again. The eastern sky brightened, the glow gradually spread through the basin, and then the moon came slowly over the towering snow-peaks, flooding the valley with light. The fallen tree took on a ghost-like appearance in the moon's radiance.

Then an uncanny thing happened. Suddenly there was a clear sky, without a moment's warning, a dark and sinuous cloud obscured the moon's light. Connie came quickly to her feet, and gazed with startled eyes at this strange phenomenon. The air took on a sudden chill. A quick, strong wind swept up the hill. From the swaying tree-tops there came a moaning like a wailing requiem for the dead—as much like the human voice that Donald shivered.

To Donald the darkening moon and the sighing trees were a coincidence, but to this child of nature, who had been reared in loneliness where silences reared and mountains loomed, and who understood so intimately the wild things of the forest, it was a

Could Not Sleep Heart Would Start Pumping and Pounding

Mrs. Fred. Arnott, Elm Park Ave., Calgary, Alta., writes — "I was troubled so much with my heart I could not sleep. I would awaken up in the night pounding and my heart would start pumping and pounding. A neighbor lady told me to try

so I started taking them and I can truthfully say I am a different woman. Altogether I only took two boxes."

Head Of Emotional Training

Pioneer Training Of the Child Has Made Difference Between Mediocrity and Success

From Lake commercial the child's training mental hygiene plays a great part but according to Dr Hincks, this does not mean mental deficiency or its treatment, but the expansion of sound mental growth through emotional training. He declared that although training is use its intellect the child may be emotionally as to have grave personality defects. The average child must be forcibly timid fearful or anxious; possibly even with no ability to make friends. It may be cowherd or sullen or have an uncontrollable temper which may rule, partially at least, its later adult life.

"Such emotional training among many the difference between mediocrity and brilliance or success and failure and it is only recently that steps have been taken to remedy this grave lack of training," declared Dr. Hincks.

The speaker declared that from the time a child was 18 months old until it is five years old its training is the thorough system which its future will grow, he it good or bad

Discovers New Type Of Receiving Set

Radio Experts Puzzled By Experience Of South Dakota Mechanic

There may be sediments in stones, in the rotating bombs, but it was left for a South Dakota woman to reveal that there is a Schubert Symphony in a pan of boiling vegetables.

As the hours voice of a radio announcer floated through the living room of a quiet home there, and the wife of Ave Maria filtered from a pan of beans simmering on the electric range, the housewife might have been excused had she exhibited a touch of nervousness, because there was no announcer nor anywhere in the house.

But she didn't. She approached the range in a scientific spirit and turned up the beans vigorously. In another room her husband, a mechanic, was listening to the announcer's voice.

Visible Opera For Radio

Visible as well as audible opera is a possibility of the not very distant future for your radio set. The science of television has taken some strides during the past year. The broadcast of a complete grand opera by sound and by television is a goal toward which some of the best minds in the business are working today.

Compton Mackenzie, the Scottish novelist, is learning Gaelic.

Boat Launching Device

Mrs. Littlejohn Launched In One Minute By New Contrivance

A device which launched not 50 lifeboats per minute and the liner's motor ships within two minutes was turned out in New York, on the Canadian Pacific liner, "Duchess of Bedford." United States inspectors witnessed the test and found it satisfactory. The device known as the Welin-Davis patent boat launching davit, will be installed on the "Duchess of Bedford," six of whose boats were lowered seventy feet into the water within one minute, while it took only two minutes to lower and start under power the two motor ships which operate with the liner. The latter were lowered with ease and steerage and radio equipment to commence.

Recipes For This Week

(By Betty Barclay)

POTATO STUFFING FOR ROAST GOOSE

2 cups hot mashed potatoes
1 teaspoon grated onion.
½ cup chopped walnut meats.
1 teaspoon grated onion.
Paprika.
1 teaspoon salt
½ cup evaporated milk
1 tablespoon butter
Yolks 2 eggs.
1 teaspoon of poultry seasoning.

Mix the ingredients in the order given and handle as any stuffing.

SCALLOPED POTATOES AU GRATIN

Into a well-buttered baking dish put a layer of thinly sliced potatoes, salt, pepper and a thin scattering of finely cut cheese and one-half the thin white sauce (1 tablespoon flour, 1 tablespoon butter, to 1 cup milk). Repeat and cover with buttered crumbs. Bake in moderate oven about an hour, until the white sauce bubbles through and the potatoes are well done and browned on top. If cheese is omitted, add small pieces of butter to each layer of potatoes. In order to save time of making cream sauce, a small amount of dry flour can be sprinkled over layers of potato, and milk added to cover the potatoes.

For Neuralgic Pains

Still another use for cod liver oil has been discovered. Dr. Thomas' Eclectric Oil, the soothing and healing properties of this famous remedy have been demonstrated for fifty years like it also for inflammatory pain in the chest, sprains, bruises and sprains, either in human beings or the lower animals.

SKATING RINK OPENED NEW YEAR'S DAY

After much delay due to the abnormally mild weather, the Tofield skating rink opened up on New Year's day. The ice was a little rough in spots but this has since been remedied. There were quite a number out, chiefly young people. Although a month late in starting there is plenty of time for skating before the spring weather comes along. Skating tickets can be purchased at the Town Hall, the prices prevailing being the same as in other years.

ED. HARDY WINS HIGH HONORS AT CALGARY

At the recent provincial poultry show held at Calgary, Mr Hardy won quite a number of awards, among them being the cup for the best display of buff orpingtons. This is the third time Mr Hardy has won this cup, which is now permanently his. It is also the second cup of its kind that he has won. This means that for six years he has had the best string of Buffs at the provincial show.

WEATHER NOTES

By J.W.M. in The Hay Lake Times

It is only in the last few days that winter has really arrived. Light falls of snow in the past few days have made everything white and wintry looking. The temperature however, has not undergone any great change and the mercury has stayed on the pleasant side of nothing.

It is reported that the roads are very slippery for traffic but otherwise in a good condition.

The following are the minimum temperatures for the past two weeks:

December 19th, 4 above.
December 20th, 19 above.
December 21st, 19 above.
December 22nd, 20 above.
December 23rd, 20 above.
December 24th, 21 above.
December 25th, 12 above.
December 26th, 10 above.
December 27th, 12 above.
December 28th, zero.
December 29th, 1 above.
December 30th, zero.
December 31st, 1 above.
January 1st, 3 above.

S.C. WHITE LEGHORN PULLET LAYS AT 3 MONTHS 2 DAYS

During 1928, Alex. Taylor's Hatchery, Winnipeg, Man., ran a Competition with their customers to promote interest in Poultry Raising, giving prizes for the Earliest Laying Pullet; the highest per centage of chicks raised; the best picture and results obtained.

Miss Agnes Curtis of Craik, Sask., is the winner of the 100 Baby Chicks with a S.C. White Leghorn Pullet laying at 3 months, 2 days. A record of Early Laying Barred Rock Pullet, 3 months, 7 days, Mrs. W. Drader, Dunrea, Man., winner of 100 chicks. Raised 196 from 200 Bred-to-Lay Liv-An-Gro baby chicks received, Mr. F. S. Taylor, Halton, Man. winner of 100 chicks. Best picture of Bred-to-Lay chicks, Mrs. W. Heine, Irricana, Alta., winner of 100 chicks. Winners of 50 baby chicks, Mrs. Frank Colyer, Port Arthur, Ont., Picture of best pullet, Miss Ethel Meyer, Kenville, Man. Picture of baby chicks, Mrs. Leo Strachan, Crandal, Man. Raised 194 from 200 received, Mrs. W. T. Foan, LaFleche, Sask. Took first prize at local fair.

Mrs. Snell was taken to the Camrose hospital on Sunday, suffering from a bad attack of influenza which was developing into pnemonia. Reports are that she is progressing favorably.

January Colds

Are a source of annoyance as well as great discomfit (if nothing worse) and great care should be taken to avoid them. When one does become afflicted, however, it is necessary that PROMPT action be taken.

We have many valued and tried remedies that will help you to combat the effects of a cold. We suggest to our farmer friends especially, that they purchase a remedy and have it on hand, thus saving a long drive into town on a cold wintry day. Prices are reasonable and range of choice is extensive.

LOCAL AND PERSONAL

Born.—To Mr. and Mrs. Irving Plants, on January 4th, a son.

Two curling rinks skipped by A. A. Beirnes and G. McLaughlin, curled at Viking on Thursday.

Two rinks skipped by Messrs. Cory and Sinclair, curled at Holden on Thursday.

Mark Ferguson left on Monday for Athabasca, where he has filed on a homestead.

Mrs. Firth entertained a few lady friends to dinner and bridge on Thursday evening.

Mr. Martz, of Duhamel, father of Mrs. Snell, of Tofield, visited at the Snell household for a few days this week.

Mrs. Gardner and daughter, Helen, are at Camrose. The little girl is in the Camrose hospital having contracted pnemonia.

Miss Catherine Bowlby returned to her home in Calgary after staying with Mrs. Hedstrom for some time.

Mr. and Mrs. Edinburg, recent arrivals in town, have moved into the T. Robinson house. Mr. Edinburg is one of the new barbers recently established at Tofield.

Mrs. Hedstrom returned from the city on Tuesday, where she had taken her little daughter. On New Years Eve, a hot curling iron accidently touched the little girls eyeball and it was necessary for her to receive special treatment at Edmonton.

"Confederation" going both east and west is now taken off until summer.

OBITUARY

Wm. B. Hawley passed away on December 29th, after being an invalid for a number of years, at the age of 71 years. He was born in Ohio, but grew up on his father's homestead in Iowa, near West Branch. His own home had been for many years in the Coronation district, Alberta but through ill-health, he and Mrs. Hawley came to live with their daughter, Mrs. Roland Murray, of Tofield.

He was, in the days of his strength a worker in the church and Sunday school and the U.F.A.

He leaves to mourn his loss, a wife one daughter and two brothers, T. P. Hawley of Cheyenne, Wyoming, and Dr. J. M. Hawley of Los Angeles.

He was a loving husband and father and will be missed by his family and friends.

The interment took place from the home of T. R. Murray, on Monday, December 31st. The floral tributes were many and beautiful.

The sympathy of all [illegible] the bereaved for he was a good man and true.

W. I. NOTES

The regular meeting of the Women's Institute was held in the Institute rooms on Tuesday, January 8th. Owing to bad weather and sickness not many were in attendance.

A much appreciated violin duet was rendered by Mrs. Pincott and James McKenzie.

Delicious refreshments were served by Mrs. Abbott and Mrs. Letourneau.

The postponed banquet was arranged for Thursday evening, January 10th, when the programme for the ensuing year will be discussed.

The Institute meetings are held on the second Tuesday of every month and visitors are always welcome.

Will all members who took lunch cloths home to launder, kindly return same.

BRIDGE CLUB FORMED

The Tofield Suitus Bridge Club held its first meeting last Friday afternoon at the home of Mrs. Pincott. The club is made up of local ladies who are not curling, and started with two tables, but it was voted to add one more table for the next meeting, which is to be held at the home of Mrs. Carr. A very pleasant afternoon was spent and a dainty lunch served by the hostess, which was thoroughly enjoyed by all, and the non-curlers are congratulating themselves and think the name of their club quite appropriate, as it surely "suits-us."

AMISK CREEK

Wishing you all a happy and prosperous new year.

Christmas has come and gone since my last correspondence. Due to the "flu" there was no Christmas concert held in the church. The teachers and children were not able to practice so the program was given up.

Christmas passed very quietly. There was some visiting and entertainment among friends and relatives where people were well but the flu visited nearly every home here at Christmas and New Year.

Arnold Berg spent Christmas with his uncle and aunt near Elk Point.

Arthur Moen from Bardo visited with Gunvald Flaaten a few days between Christmas and New Year's.

Ruby Berg and Hennie Annebo spent their holidays at their parents homes, returning to Camrose last Sunday.

Olive Olson, Lillian and Raymond Patterson, Astrid and Olaf Moline were all home for Christmas.

Arthur Patterson was not able to come home for Christmas, he having now been at the hospital ten weeks. He underwent a second operation last Friday morning, and the last we heard he was getting along as well as could be expected.

Mrs. E. A. Moen and Conrad Patterson, were city visitors last Friday returning the following day.

Mr. and Mrs. Annebo entertained the Young People on New Year's evening. Lunch was served at midnight. When the new year arrived the time was spent in playing games and other amusements.

Mr. and Mrs. R. O. Berg entertained the B. Ness, I. Annebo and Flaaten families on Wednesday evening.

Mr. and Mrs. E. A. Moen entertained the young people from Bardo and several from here on Saturday evening. An appetizing lunch was served [illegible] after midnight and all went home happy soon after.

KETCHAMOOT

The annual school meeting of the ratepayers will be held Next Saturday January 12th, at 2 p.m. for the election of two trustees, Mr Schultz whose term has expired and one to fill the vacancy of the late Mr McMullen.

Mr and Mrs. G. W. Sears' names were omitted in last week's issue in answering to the old timers roll call at Mr. Appleby's.

Mr O. Hansen and little son visited Mrs. Hansen in Edmonton over the week end.

Mrs. Henry McGinitie underwent an operation for appendicitis at an Edmonton hospital on Friday last. The latest reports are that she was doing nicely.

Mr. and Mrs. Herman Lawson entertained relatives and friends at their home on Friday night of last week. Those present were, Mr and Mrs S. Sturritt and family, Misses Mabel, Mildred Lawson, and Viola Lee, Milford Lawson and Roy Lee.

Mr and Mrs. Maurice McGinitie and little daughter Betty has been under the Dr.'s care but are now improving. Little Donnelly and Harvey McGinitie are staying with their grandmother, Mrs. Bruhn, in the absence of their mother, Mrs. Henry McGinitie.

Mr. and Mrs. P. Flaaten entertained the B. Ness and Berg young people, and Hilmar Moen on Friday evening.

The Young People's Society will have a program in the church next Sunday evening at eight o'clock. Everybody welcome.

Mr. E. A. Moen is shipping cattle and hogs from Ryley to day, Tuesday.

Mr. and Mrs. J. Blackburn's youngest son, Harold, passed away at a Vegreville hospital on Saturday morning. He took sick with the flu and that developed into pnemonia. The funeral took place on Tuesday at Lavoy, the interment taking place in the Ryley cemetery.

Our deepest sympathy is extended to Mr. and Mrs J. Blackburn and family in their sad bereavement.

KINGMAN

Mr. and Mrs. O. Bray and son Billie were dinner guests of Mr. and Mrs. E. Erickson on New Year's day

Esther and Hymie Rodunsky were Edmonton visitors for a couple of days

Mr and Mrs. T. Grahn and family and Mr and Mrs H Bray were dinner guests of Mr. and Mrs G Welch on New Years' Day

Mr and Mrs. O Bray moved to Camrose on Wednesday where they will reside for a couple of months

Mr and Mrs. Jack Erickson and daughter, Connie, motored to Camrose on Friday.

A dance will be held in the Kingman hall on Friday, January 11th. The music will be furnished by Rasmus Walde and Ted Swindson and Lilly Erickson of Edmonton.

P Haugen of Tofield was a Kingman visitor on Saturday.

N.N. Dettwiler and P. Rodnunsky motored to Bruce on Sunday

Bert Hardin of Bruce is visiting with Mr and Mrs. P. Rodnunsky.

Mrs. M. Crawford returned here on Monday after spending two weeks with her parents in Edmonton.

Mr and Mrs. W McIntosh were the guests of Mr. and Mrs. Oscar Thompson on Sunday.

U.F.W.A. NOTES

The annual meeting took place on December 13th. The auditor's report and the secretary's report were presented and adopted.

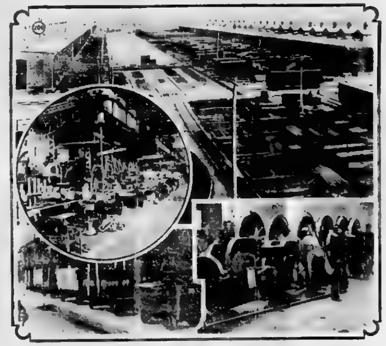
The election of officers then took place. Mrs. Ferguson was the only nominee for president, so she was declared elected by acclamation. Mrs. J. B. Warner and Mrs. J. H. Ingram were named for vice-president, Mrs. Warner being elected; Mrs. Phillips was re-elected secretary-treasurer.

The directors and sick committee were re-elected.

The exchange of gifts then took place, these were varied and pretty.

The next meeting will be held on January 24th. A joint meeting with the U.F.A. to hear delegates reports on convention. A full attendance is hoped for.

HIGH PRODUCTION AT ANGUS



Here is shown one small corner of the Angus Shops. Inset, a section of the great machine shop. Lower left, transportation within the Shop and right, setting the wheels for a new 3100 locomotive.

Canada's increasing agricultural, industrial and commercial prosperity is making more and greater demands upon transportation and the country's railways must always be a long way ahead of the times in order to keep up with them. That, in a town within a city, sixty-five hundred men with a monthly pay-roll little short of a million dollars will be engaged all winter building, equipping and repairing rolling stock for one Canadian Company reflects not only the immediate benefits of a record crop year, but the encouraging and inspiring confidence of its directors in the continued prosperity of the country. This is particularly true when one realizes that the Angus Shops of the Canadian Pacific which employ these sixty-five hundred men and through them support, say, a community of at least twenty-thousand within the city of Montreal, is not engaged in the actual construction of its freight cars and locomotives, that the frames for the passenger equipment are purchased outside and that these shops alone do not handle the whole of the repair work of the system, there being other shops in the west.

The present volume of work and the probability of further increases are due to the orders for rolling stock that have been placed with various Canadian [illegible] construction companies. The steel frames are built at Hamilton and other points in Canada and are taken to Angus where the finishing is carried out. One hundred and six passenger cars, including sleepers, diners, first class coaches and other equipment will have to be handled shortly by the Angus shops, while at present the construction of 40 cabooses, 7 snow ploughs and 2 rail hoists is going on. At present, also, eleven repaired passenger cars and 120 freight cars are being turned out daily, and every five-hours and forty-five minutes shop time, an overhauled and repaired locomotive is returned to service.

The Angus shops of the Canadian Pacific Railway, situated on the eastern outskirts of Montreal, are the largest diversified railway shops maintained by any railway on the continent. They cover 200 acres of ground and handle each year upwards of 25000 railroad cars of various sorts and descriptions. The first two of the 3,100 type of locomotive, the largest in the British Empire, were built at Angus by the company's own employees and from its own design.

Blending Red Rose Tea is an art. To obtain the fine flavor and full-bodied richness required years of experience. Every package guaranteed. 71

RED ROSE TEA "is good tea"

RED ROSE ORANGE PEKOE is extra good

In the best package—Clean, bright aluminum

Better Health In 1929

A year or two after the close of the Great War and when it was organizing its peace programme for "the improvement of health, the prevention of disease and the mitigation of suffering," the Canadian Red Cross Society launched a monthly magazine for the purpose of arousing public interest in the matter of individual, community and national health. With the end of 1928 publication of this little pen-ful ceased, and in announcing the cessation of publication, the Red Cross stated that in the intervening years the subject of health improvement and disease prevention had made such great strides, and so many organizations and publications were devoting their energies to the subject, while almost every daily, and weekly paper regularly printed health articles that the same necessity did not exist for the Red Cross magazine, consequently the matter it met to publish would be devoted to other purposes.

There has certainly been a gratifying increase in public interest in health matters in the years following the war. With all its awful sacrifices and enormous loss, the war at least served the purpose of awakening the cause of health Today Canada is probably the healthiest country in the world, but, even so, there is still vast room for improvement, and that improvement cannot be brought about alone by medical men, governments, hospitals, and health organizations. It rests largely with the individual.

In the past it has been true in a great measure that people are actively interested in their health when they become sick, notwithstanding the fact that every intelligent person will frankly admit that prevention is better than cure. In no industry is this age special efforts are directed at the elimination of waste and all unnecessary costs in business. Yet loss of time, loss of efficiency in production, loss of earnings by the employee and of profits by the employer, loss occasioned by increased expense at the very time when income is decreased or stops, is the direct result of sickness. It is the cause of the greatest aggregate loss to our national life.

No better New Year resolution can be made, or observed, by the individual or the community than one which finds expression in a determination to safeguard health. Such a resolution finds added force at this particular time when an epidemic of influenza is again sweeping the country although, fortunately, of a milder type than those of some years ago. Influenza is very contagious, but, on the other hand, it is easily conquered through the taking of very simple precautions. If it is not so combatted at first reception. It may quickly result in serious complications such as bronchitis, intestinal trouble, or pneumonia.

All health authorities are alive to the danger; so, too, are the life insurance companies, and all are engaged in extensive publicity campaigns to guard people of the danger and to make known to them the simple precautions they should exercise. Thousands of dollars are being spent on newspaper advertising and other forms of publicity, and it is money well spent, but it will nevertheless be largely wasted unless the masses of the people to whom these appeals and advice is directed profit by it.

This new year of 1929 cannot be a happy, prosperous year if sickness enters the homes of Canada, followed by death carrying off loved ones, or leaving members of the family weakened and unable to contract other forms of disease. Good health is the first essential to happiness. Without it no person, community or nation can be prosperous

The Canadian people cannot render better service to themselves and their country than by giving immediate and constant attention to their health. By so doing they will be laying the only sure foundation for happiness, prosperity, progress.

League Of Nations

Coast To Coast Membership Drive To Take Place In April

The weekly and daily newspapers of Canada are warm supporters of the League, it was stated at the regular monthly meeting of the League of Nations Society held in Ottawa, when arrangements were announced for the membership drive to take place next April. Throughout the length and breadth of the Dominion, it was said, editors have shown an interest in the activities of the League of Nations and in the efforts of the Society to promote it in this country. The support of the press will prove a great asset in the annual "Coast to Coast" Membership Drive due to take place on April 16th, 1929, which will be known as "League of Nations Day."

Testing Canada's Fuel

The Department of Mines has erected in Ottawa a new Fuel Research Laboratory. Hand-picked has been equipped with modern instruments and machinery for conducting extensive research in Canadian fuels, solid liquid, and gaseous.

No man or woman should hobble regretfully about with corns when so certain a relief as Hindway's Corn Remover.

Stern Wheel Steamboats

Last Of Picturesque River Boats Are Disappeared In B.C.

The Fraser River has seen the last of its picturesque stern wheel steamers which until now have formed a link with the romantic past, the Cariboo gold stampede and other notable events in the early history of British Columbia.

The old steamer Sheena has been used as a cannery tender, and will be used as a bunkhouse for Asiatics soon. She will no longer navigate the shallows and treacherous curves of the mighty Fraser, and she was the last of her line.

Others, wheelers first, commenced to operate on the Fraser in 1858.

Every careful and observant mother knows when her child suffers from worms. She also knows that if some remedy be not speedily applied much harm will result to the infant. An excellent preparation for the purpose is Miner's Worm Powders. They drive worms from the system and set up stimulating and soothing effects so that the child's progress thereafter is painless and satisfactory.

The cheapness of Mother Graves' Worm Exterminator puts it within reach of all, and it can be got at any druggist's.

Missionary (to cannibal)—I warn you in regard to enting my brother. He will give you indigestion. He never agrees with anybody.

Minard's Liniment is good for colds.

Mink farming is rapidly developing in Alaska.

Cuticura Heals Annoying Rashes

Bathe the affected parts freely with Cuticura Soap and hot water, dry without rubbing, and anoint with Cuticura Ointment. This treatment not only soothes and heals rashes and irritations but tends to prevent such conditions.

Soap 25c. Ointment 25 and 50c. Talcum 25c. Cuticura Shaving Stick 25c.

Grand Champion Steer

Alberta Steer Is Held For a Net Sum Of $1,500

A new record was set for Alberta in the Dressed and Slaughtered Steers, of Lacombe, and Earl Marshall the steer which recently won the grand championship at Vancouver, he got a net sum of $1,500. This steer which was bred by a Prince Marshall bull, owned by S. Henderson of Lacombe, weighed 1,250 lbs. and was purchased by Jackson Brothers, of Vancouver, at $1 per pound—the highest price ever paid for an Alberta fed steer.

WEAK, LISTLESS GIRLS

Need Such a Tonic As Dr. Williams' Pink Pills To Restore Health

When a girl in her teens becomes pale and sallow, especially if about the same time she shows inclination to live much by herself, and pays little attention to her work or studies, she needs Dr. Williams' Pink Pills, a tonic which directly and specifically corrects the condition in which she is suffering. A chemical analysis of the blood of such girls will show it to be deficient in just the elements Dr. Williams' Pink Pills can supply But an analysis of the blood is not needed, the physical signs are a pallor of the cheeks and lips, dark circles under the eyes, hearty tired ans breathless after slight exertion. These symptoms, headaches, and sometimes fainting spells are signs that the patient is weakened and is startled at the least noise. In these conditions there is no other tonic will build you up so promptly and surely as Dr. Williams' Pink Pills. The treatment should be continued long enough to obtain a real cure. Don't accept substitutes or imitations. Always insist on getting Dr. Williams' Pink Pills. If your dealer does not have them, and offer using six boxes I will send you them postage paid. Dr. Williams' Pink Pills will be my answer to the question if your blood needs building up again, and I should feel great pleasure in recommending them to o here." You can get these pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Recipes For This Week

(By Betty Barclay)

SCALLOPED CORN AND CELERY

1 cup corn (fresh cut from cob).

1 cup celery (finely chopped).

cup buttered dry bread crumbs.

1 teaspoon salt.

1 small red pepper chopped.

2 tablespoons butter.

1 cup hot milk.

Arrange corn, peppers, celery and crumbs in two alternate layers in a buttered baking dish. Add butter to hot milk and pour over the vegetables. Cover with buttered crumbs and bake 30 to 40 minutes. Serves eight.

RICE WITH DATES

1 cup rice.

2 cups boiling water.

1 teaspoon salt.

½ cup dates.

Wash rice and add to boiling water. Add salt and boil 5 minutes. Cook in double boiler for one hour. Add dates, cut in pieces, and cook until rice is tender and all the water has been absorbed. Serve hot or cold with milk or cream.

Quite Simple

"Yes," said the timid passenger to the airplane pilot, "I understand I'm to sit still and not be afraid and all that, but tell me if something should go wrong, for example, if the engine should stop. What then?"

"Oh," said the pilot, "I'll just give anything that we're passing and bang on."

Canadian Firm Gets Contract

Will Supply B.C.A.F. With Moth Plaster To Be Assembled In Canada

The de Havilland Aircraft of Canada Limited, has received notification from the director of contracts of the Department of National Defence that their tender for the supply of Moth aircraft will be re-supplied most of the Royal Canadian Air Force had been accepted.

An order was placed immediately for thirty-four two-seater Moth light aeroplanes, twenty-eight being land planes for the re-equipment of the Camp Borden station. Three seaplanes which will replace the old Lynx Avros" at present in use, will be supplied for the use of the school of the force and for the annual flying training of probationary pilot officers who attend during the summer months. The remaining machines are for the conditional hire to other tools will build up to up to twenty-four by early so. Dr. Williams' Pink Pills. The statement from Mr. Leslie Langdon, that the de Havilland Company hope to obtain a sale abroad for the machines.

The Moths will be of the latest metal fuselage type which has been specially evolved for Canadian flying conditions and recently passed exhaustive tests at Ottawa with flying colors.

The order includes six spare Gipsy engines and approximates in value almost $200,000.

The Moths will be partly manufactured in England, but assembled and tested at the de Havilland Company's plant at Mount Dare a, Ont., Delivery is to be completed by March 31.

The Way It Is Done Here

Canada and the United States seem queer to Europe. When they went something from one another. Europe is the same to them.—Montreal Herald.

You may have more than you need, but you never have more than you can get.

Two Hundred Mile Dog Derby Returns To North Country

Pioneer Members Will Race This Year From The Pas To the Pas

After a lapse of four years, the endurance dog derby, which once thrilled the north country, and, it might even be said, the world, is returning to The Pas. The gruelling two-day race which brought fame to Northern Manitoba and its hardy members will be revived at the frontier town's winter carnival, March 6 to 9. This time, romance will be added to romance. The course will be from The Pas to the famous Pas Mine some said back, a distance of 200 miles.

Two thousand dollars in cash prizes, besides other valuable awards, and the Walter Gayne-Great Northern memorial cup, which has an intrinsic value of $1,000, will attract sandy-to-from wherever members much. The winner will have the dog racing championship of the world.

"Sporty" Russell, veteran driver, and the youthful, though none the less noted Emil St. Godard, present world's champion, each have a log on the memorial cup. St. Godard has been one of the leading drivers of the year, and it is likely that Russell will also enter. Other prominent members are bound to make a strong bid for more fame at the derby since it has gone back to epic proportions. Seppala, Alaska's pride, has been riding for another endurance race, his friends say, and other numbers, from both the east and the west, have already signified their applications for entrance forms.

Dog racing has developed their teams for the test in March. St. Godard's dogs are in fine shape after a summer and a fall of work-outs. The team of the French-Canadian driver have been tested for the speedier, 130-mile lap races of the last three years, but Emil claims that the dogs have the endurance for the longer route. They have been harnessed to an auto chain in the meantime and are in good condition for the test.

All the color, the lure, the joys and the sorrows of the land of the northern lights is revealed into the romantic history of dog racing at The Pas.

Happiness is not in getting what you want, but in not wanting what you can't get.

Turkey has been a feature of Yuletide fare since the sixteenth century.

Pneumonia Reach Hudson Bay Coast

Epidemic Spreads From Cochrane, Ontario, To Eight Prospectors

Winnipeg.—Reports of the appearance of the Northern Lights, while Exploration Company have arrived on the east coast of Hudson Bay, from Richmond Gulf, after a flight from Cochrane, Ont., where they left on Dec. 23. The party was piloted by Captain H. A. (Doc) Oakes and Patrick Reid, who were accompanied by two mechanics. The purpose of the flight was to bring supplies to eight prospectors who have been stationed on the east coast of Hudson Bay since early summer.

New Commander For Rangers

Ottawa.—Lieut.-Col. Hubert Bayfield has been announced by the department of national defence to that of Major E. Poole to the rank of lieutenant-colonel, and to command the Rocky Mountain Rangers, with headquarters at Kamloops, B.C., vice Lieut.-Col. T. Aldworth, who has been transferred to the reserve of officers.

New Air Marshal Appointed

London, Eng.—Sir John Maitland Salmon, air marshal, has been appointed chief marshal of the Royal Air Force in succession to Sir Hugh Trenchard, resigned. December 20. Sir John Frederick Higgins, air vice-marshal, will be promoted to Sir John Salmon's rank.

Students May Make Change

Toronto.—The scheme whereby University students may exchange from one Canadian university to another for one year of the course will come into effect in 1929, according to L. J. Green, president of the National Federation of Canadian University students which recently held its annual convention at Kingston.

RICKETS

Children with weak bones or poor dentition receive great benefit from the use of

Scott's Emulsion

It is wonderfully pure, vitamin-rich cod-liver oil and helps build a strong, healthful body, sound bones and teeth.

Scott & Bowne, Toronto, Ont. 27-29

Standards Of Intelligence

Impossible To Measure Intelligence With a Fool Rule

Dr. Edmund E. Free, a noted chemist, tells the American Society of Electrical Engineers that intelligence tests are the most intelligent chaos in the nation. Second comes engineers; third, business men. Last of all, but safely out of the category of thought, are writers, preachers, doctors and college professors.

And how does Dr. Free measure intelligence? It is "the ability to reach a reasonably correct conclusion from a set of discoverable facts." But of sets of facts there are all kinds of varieties, Prof. Phaps Dr. Free would tend to overemphasize the relative importance of book learning. If so, one wonders why he ranks college professors low in the scale. Surely such professors as Dr. Millikan and Dr. Compton should take high rank on materialistic grounds. A physician like Dr. Banting the discoverer of insulin, might be expected to possess some degree of human power and logical capacity.

Dr. Free's definition is unacceptable. It is not to be tested with a foot-rule. It has as many standards as there are people to apply them. Because blackbeyes are an asset we should not be inclined to send him down the chute because of his inability to reach a reasonably correct conclusion from a set of discoverable facts.

CORNS

Relief in 2 Minutes

Just a drop or two of Putnam's Painless Corn Extractor and the pain goes away. Relief is almost instantaneous. Removing corns with "PUTNAM'S" is so easy, so sure, so painless—thousands use this wonderful remedy, and say it is the best. Don't suffer any longer, use Putnam's Corn Extractor, the one sure relief for sore corns. Sold at any drug store.

What She Reduced

Robert: "I'm never going to take Grandmother out to dine again. Too expensive."

Calvin: "Why, she told me she reducing."

Robert: "She has. She reduced her meal—at least 15 bucks!"

Russia, which stands third in the countries of the world as regard highway mileage, is thirty-fourth in the number of automobiles.

WINDOLITE

MADE IN ENGLAND

The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer, Fairway's universal disinfectant and germ destroyer as well as stimulant and tonic, is the all-powerful life preserver.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective ray of light is the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the demand for a practical Solarium, which have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled them for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years immediately revolutionized poor gardening, given a new occasion to poultry breeding, increased the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in hospitals and household requisites.

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, for stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanatoriums, hot beds, plant coverings and greenhouses. It keeps out cold —will not crack or chip,—rots with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. 1 square yard of WINDOLITE weighs about 16 ozs., while a square yard of glass of ordinary thickness weighs about 180 to 190 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price $1.35 Per Square Yard, f.o.b., Toronto.

Use WINDOLITE and let Fresh, Fragrant, Fresh Cucumbers Your Cattle Thrive in 100 % Sunlight Send for booklet "WINDOLITE"

W. M. U. 1767

OPENING OF PARLIAMENT ON FEBRURARY 7TH

Ottawa.—Parliament will open on Thursday, February 7. Official announcement to this effect was made recently by Premier King, at the conclusion of a meeting of cabinet council.

The Prime Minister stated that no appointments to the unoccupied senatorships were made at the sitting of the cabinet.

Hon. R. B. Bennett, Conservative leader, who is now in Europe, will return to the capital about the middle of this month. Mr. Bennett sailed for England two weeks before Christmas on a brief holiday prior to the opening of parliament.

Political prognosticators forecast that the session opening next month will be much livelier than the previous one. With enthusiasm rife in the air of a possible general election next fall, the Liberals have the majorities in both the commons and the senate will be somewhat more spirited.

No intimation has been made in official circles, though, on the possibility of an election this year. Two general elections have been held in the Dominion during the past few years, one in 1925 and the last one in 1926, and there are many political observers who look towards the opinion that no general election will be made to the people before 1930.

The budget, it is understood, will be brought down in March, after the opening session. Presentation of this document usually depends on the government's fiscal policy with any changes to be made in the tariff, if there is support for them.

Indications are that the coming session of parliament will be a busy one. While the legislative programme of the government has not been announced, it is understood that several matters are definitely scheduled to come before parliament for necessary action.

Recently, Hon. Charles Stewart Minister of the Interior, announced that a bill for the return of natural resources to the Province would probably be introduced in the course of the approaching session.

Negotiations for the return of natural resources to Alberta are also well advanced, and legislation may possibly be also introduced in this case during the session. Premier J. G. Gardiner, of Saskatchewan, is due to arrive in the capital early next month to discuss the question of the early return of natural resources to his province.

The whole question of the stimulation of employment in Canada will likely receive attention.

Mosquitoes Reach Hudson Bay Coast

Epidemic Spreads From Cochrane, Ontario, To Eight Prospectors

Winnipeg.—Reports of the appearance of the Northern Lights, while Exploration Company have arrived on the east coast of Hudson Bay, from Richmond Gulf, after a flight from Cochrane, Ont., where they left on Dec. 23. The party was piloted by Captain H. A. (Doc) Oakes and Patrick Reid, who were accompanied by two mechanics. The purpose of the flight was to bring supplies to eight prospectors who have been stationed on the east coast of Hudson Bay since early summer.

New Commander For Rangers

Ottawa.—Lieut.-Col. Hubert Bayfield has been announced by the department of national defence to that of Major E. Poole to the rank of lieutenant-colonel, and to command the Rocky Mountain Rangers, with headquarters at Kamloops, B.C., vice Lieut.-Col. T. Aldworth, who has been transferred to the reserve of officers.

New Air Marshal Appointed

London, Eng.—Sir John Maitland Salmon, air marshal, has been appointed chief marshal of the Royal Air Force in succession to Sir Hugh Trenchard, resigned. December 20. Sir John Frederick Higgins, air vice-marshal, will be promoted to Sir John Salmon's rank.

Students May Make Change

Toronto.—The scheme whereby University students may exchange from one Canadian university to another for one year of the course will come into effect in 1929, according to L. J. Green, president of the National Federation of Canadian University students which recently held its annual convention at Kingston.

To Preserve Niagara Falls

Treaty Is Signed Between Canada and United States

Ottawa, Ont.—The construction of remedial works in the Niagara River designed to distribute the water so as to ensure at all times unbroken greatness on both Canadian and American Falls, is provided for in a treaty between Canada and United States which was signed at the office of the Prime Minister here.

In addition to providing for the construction of these works, provision is also made that each country may divert an additional 36,000 cubic feet of water per second for power purposes. These diversions will be permitted only "during the winter or non-tourist season, beginning on the first day of October and ending on the 31st day of March of the following year."

The treaty was signed by Right Hon. W. L. Mackenzie King, acting in the capacity of plenipotentiary for His Majesty the King, and Hon. William Phillips, United States minister to Canada, as plenipotentiary for his government.

Reviving Regulations On Incoming Autos

Officials At Ottawa Investigating Options On Ending Restrictions

Ottawa.—Immigration officers of Western Canada are taking an active interest in the revision of the Canadian regulations in regard to the entry from the United States of automobiles.

The Department of National Revenue has been engaged for some time in this re-drafting of the regulations with the purpose of removing the restrictions which hamper incoming autoists, and such has been the interest of business men in the west that the work has been delayed somewhat, but it is expected that it will be completed in a few days.

Many board of trades have written to the department, and the officials are welcoming every expression of opinion. Every effort will be made to draft the regulations that they will be acceptable.

Langmuir Leaves Canada

Man Who Investigated Ambrose Shea Mine Goes To West Indies

Toronto, Ont.—Adolph Maximilian Langmuir, who investigated the Ambrose Small case here, some weeks ago, has gone to the West Indies and later will go to Mexico. These sections are pronounced very sympathetic in his theories and more than Canada ,whose authorit as, scientific or legal, have ever pronounced a dissatisfaction to renew his immigration permit as a visitor in this country.

As on his previous departure from Toronto, he promises to return, make sensational disclosures regarding the Small case, and solve the mystery in spite of all they can do.

Influence was brought to bear by his enemies and opponents in the Small case, he said, before his deportation, with the object of preventing him continuing his investigations of the mystery.

Early Seeding

Marquis Wheat Shows At Indian Head On January 2nd.

Indian Head, Sask.—Sa'isfactorem in past years has been noted for the erection of records, some of them strange and unusual, and on the second day of 1929, another was made that will stand for some time.

On that day, the first spring wheat, five acres of Marquis being planted on an experimental plot at the experimental station, At 5 o'clock, the superintendent ordered the seed turned on, and according to information given Wednesday afternoon, the five acres were seeded before dinner.

The land, summerfallow, was in excellent shape, and the wheat was buried to quite a depth.

New Hotel Is Assured

Saskatoon, Sask.—Definite assurances of construction of a new C.N.R. hotel, commensurate in size and character with the needs of the city of Saskatoon, was contained in a telegram received by Mayor G. W. Norman, of Saskatoon, from Sir Henry Thornton, president of the Canadian National Railways.

British Members Nominated

London, Eng.—The British government has nominated Sir Josiah Stamp and Lord Revelstoke as the British members of the projected committee of experts on reparations. The names of the two deputy members will be announced later.

Was Pioneer Ra ilroad Builder

Pat Welch, Well Known In West, Dies In California

Spokane, Wash.—Pat Welch, 79, member of the firm of Stewart and Welch, railroad builders, died recently at Coronado, California, a telegram to relatives here said. Mr. Welch who had gone to California for his health last summer, had been ill for nearly four years.

Associated with Major General John Stewart, of Vancouver, B.C., Welch had a part of the construction of many railroads in the northwest with General Stewart, held many contracts in the United States Canada, Great Britain and Africa.

The Flu Scourge

Epidemic Most Severe In Nova Scotia and Ontario

Ottawa, Ont.—Ontario and Nova Scotia are the two provinces of the Dominion where the ravages of the flu are most severe at present, declared Dr. J. A. Amyot, deputy minister of health, but the visitation of the scourge this winter is by no means as serious as those of 1918, 1919, and 1920.

The complications which accompanied the epidemic in those years have not been present to such an extent in the present epidemic.

ECONOMIC LIFE OF GERMANY IS REPORTED SOUND

Berlin.—Confidence in Germany's economic stability is expressed in a report to the Dawes committee of experts in Agent-General Seymour Parker Gilbert's report for the fourth quarter of 1928, which has been addressed to the three experts.

Canada's Trade With U.S.

Best Customer Last Year Says Bulletin Issued At Washington

Washington, D.C.—Canada Hera! y purchased a little of everything American manufacturers had to offer during the first ten months of 1928, and may have "bought the Brooklyn Bridge" if Uncle Sam offered such a structure for sale.

This unique the substance of "our world trade," says a bulletin, issued by the foreign commerce department of the Chamber of Commerce of the United States. It stated that the Dominion was the best customer of the United States during the designated period.

Famous Analyist Dead

Ottawa. — Dr. Anthony McGill, C.M.G., F.I.C., Dominion analyst, is dead at his home in Rothesay, Calif., according to advices received in this city by relatives. His death occurred on Sunday, and "sorry to say" is the message received by Dr. McGill's wife. Dr. McGill was one of Canada's most prominent chemists and was an outstanding figure in scientific circles.

HEADS NATIVE SONS

Dr. James Cotton, president of the Native Sons of Canada, who expects four that Canada's new immigration agreement with Britain may bring so many settlers here, there will be necessary the establishment of driving Canadians to the United States.

Prisoners Help Fund For Distressed Miners

Heart Appeal Made By Prince On Christmas Day

London, Eng.—Evidence in fund accumulating for the relief of distressed miners by the personal appeal of the Prince of Wales broadcast by radio on Christmas Day. The fund now amounts to nearly $2,000,000 exclusive of the governmental contribution which is double it.

The governor of a certain prison has given over his entire prison pay to the miners' fund. The Prince of Wales received at the headquarters of the fund, the Mansion House, addressed to the Prince personally.

Vancouver Adds To Official Population

Suburbs Have Been Absorbed By Great Metropolis

Vancouver.—The gentlemanmen who welcomed the New Year also welcomed the beginning of a new Vancouver. For they added some 50,000 to its official population at the stroke of 12. The suburbs and separate municipalities of Point Grey and Vancouver South merged with Vancouver proper to form one metropolis with a population of 230,887, according to figures drawn up by a survey completed in December, 1927 by a local directory, however, places the total population at 277,640. According to the lower estimate, Vancouver has a population of 142,150, South Vancouver 63,500, and Point Grey 25,238. Thus this Pacific gateway, which less than half a century ago was but a settlement, has reached a position where it lays claim to being Canada's third city. The new Dominion census will officially place the rumor as between Vancouver and Winnipeg.

EFFICIENCY OF NEW COMBINES AMPLY PROVEN

Ottawa.—Contributing to the progressive transition of Canada's farming industry, one of the more recent labor-saving devices, the reaper-thresher, or "combine" is playing an important part, according to E. S. Archibald, director of Dominion experimental farms.

Latest statistics, compiled by the federal department of agriculture, show that more than $12,000,000 have already been invested in this new harvest by machine by farmers of the prairie provinces. It is also estimated that more than 3,500,000 acres of grain were cut and threshed during 1928 by the new method.

Saskatchewan, the premier grain producing province of the Dominion, leads in the number of combines in use with a total of 2,356. In Alberta 1,800 machines were in operation, while 206 were introduced in Manitoba.

Exhaustive experiments with the combine have been conducted by the federal department. Data has also been collected from owners scattered throughout the Dominion. From this information it has been established that with very little trouble to be experienced in operation of the combines and that grain kept without loss in grade or selling quality.

The survey further revealed that harvesting with combines resulted in an approximate saving of eight cents per bushel. A number of owners reported a saving of grain averaging 2.56 bushels per acre and that better grades were received than for binder harvested grain. A few received lower grades, while the majority of more noted no difference.

The canvass indicated that weeds caused delays in some sections. Several operators, however, stated that burning of combine stubble and straw had rendered the succeeding crop free from weeds and in several instances had increased the yield from two to six bushels an acre.

FAVORITE PHOTOGRAPH OF PRINCE

Here is reproduced a photograph of the Prince of Wales which was taken from the Illustrated London News. This picture is declared to be the best ever secured of the young man who recently returned from the big game haunts of Africa to the sick room of his father, King George.

Two Opposite Camps

Difficulty Of Opinions Within the Ranks Of Salvation Army

London, Eng.—For the first time both parties within the Salvation Army have openly admitted that the high council which will meet shortly was composed of two opposite camps

Officials at the international headquarters and at the headquarters of Evangeline Booth, head of the Army in the United States, freely made pronouncements on the probable line-up of voting when the question of removal of General Bramwell Booth as commander-in-chief, and reorganization of the Army will come up.

An official of the Evangeline Booth group stated that after a careful canvass the group was satisfied more than the necessary three-quarters majority of the council will vote for the removal of General Booth and subsequent reorganization.

At international headquarters those who are supporting General Booth refused to concede a possible victory to the other camp, saying that they were sure of at least seven votes, and that they believed the council would vote confidence in the general to continue his leadership.

They said, however, the method of choosing a successor, and other administrative reforms, might be effected, and that even certain of those who would support the general would favor this.

ESTABLISHMENT OF AIR MAIL IS FURTHER URGED

Calgary, Alta.—Resolutions requesting that the post office department should establish an air mail service in Western Canada connecting all the principal cities, and that the Dominion Government should help to bear the expense of lighting air ports, which would result from air mail services, were passed at the air conference held here, at which seven western cities were represented.

Tariffs for both visiting planes and those with headquarters in those cities were arranged, while the cities had shown a uniform policy with regard to companies and private individuals taking lessons for accommodation on municipally owned aerodromes.

Final control of all municipally-owned aerodromes will remain with the municipalities, it was decided, even though the cities hand over the administration of the flying fields to official care spheres.

The following were present: Mayor F. E. Osborne and Commissioner A. J. Gregg, representing Calgary; Mayor J. U. G. Berry and Edmonton Commissioner J. Leslie, of Saskatoon; T. J. Emerson, of Moose Jaw; Mayor I Bullivant, of Medicine Hat. Regina was represented by George M. Bell, of the Board of Trade. Mayor Sine of Calgary, represented Lethbridge.

The conference was attended by J Wilson-Patten, district superintendent of the post office, Capt. Ed McCall of the Grand Western Airways, and D. K. Wrath, of Calgary Aero Club.

In discussing the possibility of regular schedules of the air mail services, Mr. Carley stated that in his opinion night flying was necessary. Another proper to form an aero club was accepted lking in the United States.

Canadian on the practice were as good as anywhere in Canada, Mr Carley stated, and it had been shown in the last recently conducted that 24 hours could be saved in the transcontinental journey provided that planes were able to make train connections.

The test period had been an experiment to try out the possibilities of winter flying with mail. Mr Carley went on, but should re-establishment of the service be considered it would be the best time of the year to prepare for night flying

Mayor Osborne pointed out that lighting facilities would not be required either for commercial companies or private planes at the present time, but would be provided solely for the use of aeroplanes carrying mail for the post office department

Senate Editor To Retire

Albert Horton Quiz Office After Fifty Years' Service

Ottawa.—After half a century of service, Albert Horton, editor of Senate debates in Canada, has resigned it to retire shortly, it was announced recently. It will be succeeded by David Halpin, at present of the Senate Hansard staff.

Mr. Horton has been a familiar figure on parl ament hill since he was brought here in 1877 by Hon. George Brown, to report the proceedings in the Senate for the Toronto Globe.

Makes Endurance Flight

Los Angeles, Calif.—A new world's endurance flight record for feminine flyers was entered by Miss Tobbie Trout, 19-year-old Los Angeles girl, when she landed her Golden Eagle plane here, setting a new continuous flight time of 12 hours and 11 minutes.

Transpot in Japan

Tokyo. — Seven hundred houses were destroyed and 2,000 persons were killed and scores injured by storms on the Hondo coast, southwest of Niigata. Information reaches the railway department here that at least 30 villages were inundated by the high seas.

A Vanished Heroine

Brockville, Ont.—Charleston Lake has an ancestral youthful heroine in Mary Allen, four, who succeeded in pulling her two-year-old sister, Ruth, out of the waters of the lake after she dropped through in the thin ice.

Looking For Work

Detroit.—Milling about the employment office of the Ford Motor Company at Fordson, a crowd estimated at 22,000 men, responded to the announcement of the company that 30,000 additional men would be employed

TOFIELD HOCKEYISTS BOTH TAKE AND GIVE DEFEAT

Due to the courtesy of Mr. Bulleh, Mr. Pinsett, and Les Glover, who drove them over, the Tofield hockey team journeyed to Ryley to play on Saturday afternoon last.

The game was an unusual one, inasmuch as the Tofielders had much the better of the ice play, yet were defeated by the score of 3—0. The Ryley goalkeeper (Oslund) was nothing less than a wizard in the that afternoon. Time and time again he would be subjected to almost a barrage. Everyman on the Tofield team with the exception of the goal-keeper took a number of shots at him, but he kept his citidel intact during the entire game.

The first period was scoreless. The second counted one for Ryley and in the third period Ryley put two more past Bowick making the score 3—0 in their favor.

Leone Umphries umpired the game to the satisfaction of all.

The same teams met at Tofield on Monday night, and strange to say, while the Ryley ice men put up a stiffer opposition, Tofield won by a score of 6—2.

Ryley scored first, but the lead was short lived, W. Worton soon after putting the puck solidly into the net. Whyte made it two and the period ended.

From then on the locals were not headed, Ryley scoring two more and Tofield four. Of these W. Worton got three and S. Worton one.

The game was a good one to watch and in spite of the soft ice, fast. There was more slashing at the puck than usual due to its being hard to control on the sticky ice.

While the scoring fell to the forward line, the defence was equally responsible for the win. Martin and Glover team well together and in their age and weight are a pair of defence players who could hold a place on any intermediate team. Bowick in goal showed real class on Monday and stoped many a one ticketed for the net.

Mr. Clutterham refereed the game and gave general satisfaction.

There was a fair crowd, but the brand of hockey merited a larger one. These teams will meet again during the next week or two. Its worth 25c. to see them mingle.

Line-up—Tofield—Goal, Bowick; defence, Martin, Glover; forwards, Whyte, W. Worton, S. Worton.

Subs: Swinton, Thompson, Ball.

Due to the interest in the game itself, we omitted to procure the Ryley line-up, but will do this when these teams meet again.

Here and There

More than 11,000,000 tourists entered Ontario during 1928 and spent about $100,000,000, according to figures issued at the Provincial Parliament Building in Toronto the other day. This is an increase of over 20 per cent. over the record made last year.

Production of tobacco in 1928 totalled 66,996,375 pounds from 68,188 acres. Of the total output the Province of Ontario accounted for 22,365,850 pounds from 32,684 acres; Quebec 3,546,325 pounds from 10,200 acres, and British Columbia 104,200 pounds from 116 acres.

Ethel Catherwood, who distinguished herself as an athlete representing Canada at the Olympic games in Amsterdam in August, has been honoured by the Canadian Pacific Railway. A station on the recently constructed Rosedown-Perdue branch has been named "Catherwood," after her.

Twenty-five years ago Thomas Hubert, now employed as a baggageman on the C. P. R. between Ottawa and North Bay, lost a valuable silver watch while working in a field near Pembroke. The other day a glittering object was turned by a plough. It was Hubert's watch, the glass broken and the hands gone, but still retaining a brilliant lustre. The field had been ploughed many times since it was lost.

Toronto is preparing to receive the largest number of prominent baseball figures ever to be in Canada at one time. The National Association of Professional Baseball Leagues will meet there shortly and every baseball club in America will be represented. Judge Landis will be on hand, and the total attendance is expected to amount to over five hundred, delegates coming from points as far as Pueblo.

The trainload of artificial snow that was brought from Hollywood to Lake Louise recently was not required by John Barrymore, in producing an Alpine movie story to be released shortly, as plenty of the real stuff was available at the glaciers. This popular actor, with Camilla Horn and a cast of about twenty-five persons, spent some three weeks at the Chateau Lake Louise, rising each morning at four o'clock in order to reach their "locations" on Victoria and Saddleback Glaciers in time to get the best light effects in the morning for their various "shots"

When a young couple from Calgary drifted back to the station at Winnipeg 10 minutes after the "Imperial" had left for the east, Canadian Pacific officials were given the choice the other day of feeding and otherwise caring for a nine-months-old baby for two days or holding the train for thirty-five minutes at North Transcona. They chose the latter, much to the relief of the porter and conductor who are not family men. The reunited family sailed on the "Montroyal" to spend Christmas in the old country.

A real January thaw appeared on Monday and Tuesday of this week. On Monday night it was raining fast, and if it had not been for the snow around, one could have taken it for a September night.

Apple shipments over the Dominion Atlantic Railway in Nova Scotia up to and including December 6th totalled 2,166 carloads—an increase of 272 cars over the same period of last year

A motor road that will shorten the present Banff-Calgary highway and take in some of the finest scenery in the Rockies is now in course of construction and should be in operation next year

The Port of Montreal has again scored a new record with grain deliveries at 210,500,000 bushels for the season of navigation. Last year's deliveries ran to 196,307,916 bushels and those of 1926 to 134,-601,240 bushels.

Many visitors from western cities in Canada and the United States are expected at the Banff Winter Carnival this season, said W. A. Brewster, president of the winter sports organization at Banff, judging from the number of inquiries that have been received. Skiing, skating, and other kindred winter sports will be in full swing, he said, and it now appears there will be many competitors from outside points in the various events.

The present season of navigation is characterized as "a phenomenal year as far as general cargo is concerned" by the chief of the wharfage department of the Harbor Commission of Montreal, commenting on business outside of grain. "We shall show a revenue increase that will be astounding when the annual report comes to be made up," he said.

Although the Canada Colonization Association only started to operate in Ontario last February, it has already placed 130 families on 5,671 acres of Ontario farm lands, according to a statement made recently in Toronto by W. C. Kent, Hamilton, provincial representative of the association. It was his opinion that British settlers found it easier to start in Ontario than elsewhere.

Some 200 of the thousand head of buffalo in Elk Island Park, east of Edmonton, have been slaughtered during December in order to keep the size of the herd within the carrying capacity of the park pasture. It is expected that most of the meat thus secured will be shipped north in the form of pemmican to provide food for Eskimo inhabitants of the Northwest Territories as a result of the growing demand from this source following the trial shipments made last year.

Supplies for the 150 inhabitants of the lonely little island of Tristan da Cunha in the southern Atlantic not far from St. Helena are being collected by Montreal chapters of the I.O.D.E. and will be delivered in February by the Canadian Pacific Liner "Duchess of Atholl" This great liner, making a cruise of South America and Africa, is one of the few vessels to call at this isolated point. The visit is one of the unique features of the cruise for the passengers and the event of the year for the inhabitants of the island.

MERCURY ADS PAY!

THRILLING TALE OF HEREDITY

While it is said to retain all of the customary thrills and romantic action of western pictures, the new Fox production, "Blood Will Tell," with Buck Jones in the starring role, is a story of decidedly unique nature according to the synopsis by Paul Gangelin from the story by Adele Buffington. The picture will be shown at the Variety Theatre on Saturday, January 12th.

As the title indicates, the story centers in the theory of heredity, dealing with a picturesque character of the west who hears the subtle call of the range from the farthest corner of the earth. Buck Jones, a westerner in every sense of the word, plays this role.

Humor enters into the account with the arrival on the range of an eastern girl, come to claim a ranch which she believes she has inherited. Her arrival is simultaneous with that of the real owner, the wandering westerner, who humorously permits her to believe that she owns the property. The situation naturally results in complications and there is where a most interesting narrative comes to life on the screen.

CARD OF THANKS

We desire to express our thanks to all those who by their help and sympathy, assisted us in our recent sad bereavement.

Mrs. W. R. Hawley.
T. R. Murray and Family.

BEING NOW COMPLETELY Out of the radio business we offer a split new Brown Horn (large), a couple of storage 6 volt batteries, a beautiful inside aerial and a few sundries at any reasonable price at all.—R. W. PINCOTT. 4tc.

Off Again To Another Start

With 1928 now difinitely in the past and 1929 already on the wing, we are all of us hoping that the present year will be happy and prosperous. While we all wish for happiness and prosperity, most of us, if we are to have it, must help to make it. For many years now, the dairy industry has helped greatly towards prosperity and a resolution to milk at least one more cow and sell your cream to the Tofield Creamery, will go a long way to you—and us—obtaining our wishes.

$2.00 Per Year

For several years the great majority of weekly newspapers in Canada have been $2.00 per year. This includes Eastern Canada as well as Western Canada. Some years ago the publisher of the Mercury had in mind to charge $2.00 instead of $1.50 but at that time the hard winter with its consequent feed shortage came upon us and we then carried on until this year at the $1.50 rate.

Printed matter is about the cheapest thing there is in the world today when very large numbers are required, and it is somewhat of a problem sometimes for the small office catering to a few hundred subscribers to compete with the product of the large cities.

But now, as before, the Mercury is distinctively a local paper. Edited and printed in the town in which you do business, carrying every day news about people whom you know, it has a particular and definite appeal to the residents of Tofield and district.

We are gratified that those who have paid the $2.00 rate up to the present have done so with a smile, which is the best possible encouragement to us to turn out a better paper.

The Tofield Mercury

GREAT CLEARANCE SALE

OWING TO THE EXCEPTIONALLY MILD EARLY WINTER SEASON, WE HAVE STILL A QUANTITY OF WINTER WEAR LEFT ON OUR SHELVES. RATHER THAN CARRY THIS STOCK OVER TO ANOTHER SEASON WE ARE OFFERING IT AT GREATLY REDUCED PRICES, MANY THINGS BEING SALE MARKED AT COST PRICE. WORLD HAPPENINGS BRIEFLY TOLD

The preparatory commission for a disarmament conference has been convoked to meet at Geneva on April 15.

Dr. J. D. MacLean, former premier of British Columbia, has taken an important post in the federal department of finances at Ottawa.

At a meeting of the selection committee in Winnipeg Lawrence C. Bonnycastle was selected as Manitoba Rhodes scholar for 1929.

Plans Being Made At Coast For a Monument To Capt. Vancouver

Plans are being laid to raise money in Vancouver for the erection of a statue in honor of the famous captain who gave his name to what is now the biggest port of the American Pacific coast, says the Vancouver Province. "We cannot emulate the imposing scheme of the Statue of Liberty. We cannot hope to spend a million dollars on our Captain Vancouver as the United States between them spent on their 310-foot high lady of the torch. But our Captain Vancouver should stand a memorial and a symbol, guarding our local habitation and our name, rising out of our sea to be a witness for us that we honor them that laid our foundations. It should stand somewhere at the entrance of the harbor, in a high place looking down upon the ships as they pass, a landmark for the mariner by day and a beacon light by night, visible far out in the ..."

LINDBROOK

Well, the New Year is certainly treating us to a variety of weathers and all in a week too! Let's hope it isn't going to be a freak year, but then with the boundless optimism that one breathes in with this Alberta air, we'll say that whatever comes here, there's lots of worse places.

The flu epidemic [illegible] still flourishing but is thought to be on the wane here, most [illegible] having had their dose but still we hear of fresh cases.

Mr. Hurt [illegible] around al[illegible] slowly [illegible] from his attack of pneumonia. Mr. W. Lancaster is seeing [illegible] chores whilst he is on the sick [illegible].

Mr. Lancaster has dug a 43 ft. well on his [illegible] and so far has seven feet of water. He was assisted by Mr. W. [illegible] [illegible] says that being down a [illegible] reminds him of [illegible] the [illegible] days before [illegible].

Mr. and Mrs. [illegible] gave a whist drive at their home on Friday night. Seven tables were [illegible]. At the interval supper was [illegible] and afterwards the [illegible]. The ladies first was won by Mrs. [illegible] Burton[illegible] [illegible] a [illegible] of tobacco, whilst Mr. [illegible] who won the gents first was agreeably surprised with a [illegible]; of course the mistake was [illegible] noticed and rectified. Mr. Lancaster received the [illegible] and Mr. Leahy the gents [illegible]. Then [illegible] and years and [illegible] kept the ball going till 3 a.m. when it looked as if it were going to be like the old parties of eight years ago, so much so that more tea was served. Anyhow no one felt tired but finally the chores [illegible] everyone decided [illegible] agreeing that it was a very pleasurable evening.

The icy roads practically prevent team work and are rather awkward for cars. Mr. Geo. Weatherill had his fender and bumper torn off by an auto swerving into him last week near Appleby's. Mr. N. Ellis' car also "about turned" near the store here last week and absolutely without orders from Norman.

The annual S.D. meeting of ratepayers is to be held at the School here on Friday, January 11th.

School re-opened here on the 2nd of January.

Meedames Glenn and Whibley journeyed to Edmonton on Monday evening's train to visit their mother, Mrs. Swain, who has been ill with influenza in Edmonton. We are glad to report that she is getting well again.

LAKESHORE

Mrs. W. A. Lamrock of Coronation, who visited at the T. R. Murray home over the holidays, returned to her home on Monday. Mrs. Lamrock was an old friend and neighbor of Mrs. Hawley and the late Mr. Hawley before they removed to Tofield some three years ago. Mrs. Lamrock was unfortunate in contracting flu during her visit but was much improved when she left.

Norman Jones broke his collar bone on New Year's day when a horse he was riding fell. Latest reports are that he is doing as well as might be expected. Some of the other members of the Jones family are laid up with flu we are sorry to report.

Mr. and Mrs. H. B. Stine of Lindbrook were Sunday visitors at the B. C. Phillips home.

Miss Beulah Johnston has been a victim of the flu epidemic.

Mr. S. Bethel was taken to the hospital on Tuesday for treatment for his foot which has been troubling him considerabley lately.

Mrs. Carty and children of Deville returned to their home one day last week after spending the holidays with Mr. and Mrs. Everett Noland.

Friends of the Murray family will be pleased to hear that they are all on the mend now from their serious attack of flu. Mrs. Hawley, however is not getting on so well and Mrs. Gray is careing for her.

LADIES' CURLING CLUB BONSPIEL TO BE HELD NEXT WEEK

The Tofield ladies' bonspiel commences next Tuesday. Given suitable weather, the event is assured of success. Already the registrations exceed those of last year, and the number of local lady curlers is greater.

There are several competitions and trophies, with which go valuable prizes.

LADIES' BONSPIEL GREAT SUCCESS

With excellent weather to aid them the Tofield Ladies' Curling Club held a very successful bonspiel on Tuesday, Wednesday, and Thursday of this week. There were a large number of visiting rinks which with the local rinks, made atotal of 17, or 68 curlers.

The Ash Cup (grand challenge), was won by Rose of Edmonton, who in a very close final game with Lee of Tofield, won out by the narrow margin of 9—10.

The finals for the Young trophy are in course of play while this is being written.

Play in the Kline trophy was well advanced but not completed when this was written.

On Wednesday night a sumptuous banquet was tendered the visiting curlers, of which the phrase "greatly enjoyed" hardly expresses the sentiments made public by the visiting lady curlers.

A more detailed report of the bonspiel will be given next week.

Mrs. Snell returned home from Camrose hospital on Wednesday.

A return hockey game with Chipman is billed for Friday night at Chipman.

A junior hockey game will be played at the Tofield rink on Friday night. Viking and Tofield teams will mingle.

LOCAL AND PERSONAL

Born.—To Mr. and Mrs. Wm Christenson, on January 17th, a son.

Born.—To Mr. and Mrs. H. Martin, on January 13th, a daughter.

The W.M.S. of the United Church will meet in the basement of the church on Monday, January 21st, at 4 p.m.

Miss Minnie Wood is spending a few days in the city.

Mr. W. Clark of Edmonton spent a day or so in town this week.

Mrs. Tobe and family left for Kelsey by way of Edmonton and Wetaskiwin on Wednesday. She will join Mr. Tobe who is now agent there.

Mrs. Hall, of Edmonton, former resident of this district, visited at the Chapman jr. home during the bonspiel.

E. Hardy won honors with his string of buffs at the Saskatoon poultry show, taking four firsts out of a possible five.

Mr. Edinburg, a barber from Manitoba, has opened up for business in the premises next to Bruce's store.

TRAIL RANGERS PLAY AT VIKING

The Tofield Trail Ranger hockey team played at Viking on Saturday last. We understand the score was 7—3 in Viking's favor. If this is not correct, someone please correct us. We would also appreciate a little report of these away games.

BUCK JONES EXCELLS IN NOVEL TYPE OF PICTURE

In a novel story of human emotions and typical western action, Buck Jones excells his own best efforts in "Blood Will Tell," a Fox picture which will be shown at the Variety on Saturday night. Kathryn Perry is a charming heroine in the feminine lead.

The story tells of a young ranchman returning to his property on the open range who encounters a girl and her brother from the east, also bound for their ranch. He is amused to learn that they are under the misapprehension that they have become owners of his ranch.

The westerner is so charmed by the girl and so curious as to her reactions when she takes possession of the property that he whimsically determines to say nothing of her error. Instead of identifying himself as the rightful owner, he goes to work on the ranch as a common "hand," under direction of the lovely "owner."

As may be expected, there are instant and intricate complications, giving the hero a variety of opportunities to extricate himself as well as the girl.

Cattle thieves and renegades combine their efforts to make life miserable and precarious for the watchful hand at the ranch. This, of course, gives Buck Jones an ideal oportunity to display his ambidexterous [illegible] with Colt 45's, as well as his spectacular trickery in a plunging saddle.

Silver Buck, the famous Jones horse, has a prominent part and the principals are supported by a strong cast. Among the players are Lawford Davidson, Bob Kortman, Harry Gripp and Austin Jewell.

Ray Flynn was the director, and he has lost none of the western tang in flavoring the story with an atmosphere of romance and action.

MRS. WM. HAWLEY PASSES TO HER REWARD

Mrs. Wm. B. Hawley (nee Josephine Cook) died January 10th, 1929, at the home of her daughter, Mrs. T. R. Murray, of pneumonia, following influenza contracted at the time of her husband's death.

She was born October 31st, 1861, of Quaker parentage in the Quaker village of West Branch, Iowa. Her early womanhood was invested in school teaching. Al. Hoover, now president of the U.S.A. was one of her pupils.

On Christmas day, 1884, she and Wm. B. Hawley were married. Their one child is Mrs. Roland Murray with whom they spent so happily their declining years, after having homesteaded and pioneered in Alberta since October 1911.

She was a loving and faithful wife and mother, with a beautiful strong Christian character. Through life she actively engaged in Church and Sunday School work, and her influence was ever towards the beautiful, the good and the true. She will be deeply missed in home and church and friendly circles. Since the husband she tended through invalidism so capably and sacrificially was called Home at the fall of the old year, it seems fitting that so early in the rise of the new, she should be called by the dear Heavenly Father to rejoin him in the new life of larger freedom and abounding joy.

The affectionate sympathy of the church folk particularly is given to Mr. and Mrs. T. R. Murray and family.

Besides her daughter, Mrs. T. R. Murray, Mrs. Hawley leaves two sisters, Mrs. Martha E. Moore, Longbeach, California, and Mrs. C. H. Hathaway, New York City; also two brothers T. W. Cook, Scotia, Nebr., and H. L. Cook, Lincoln, Nebr.

U.F.A. CONVENTION BEING HELD THIS WEEK

What is expected to be one of the most epochal conventions in the history of the U.F.A. and U.F.W.A. is being held this week in Edmonton. It is the 21st convention of the U.F.A. and its "coming of age" celebrations promise to be far reaching.

Starting humbly 21 years ago, the U.F.A. convention with its 1200 delegates and visitors is now perhaps the largest thing of its kind in the agrarian world to-day. Delegates from all districts of the province near and remote are in attendance and are instructed to pass on the views of the Locals they represent. The leaders of the various political groups watch closely this convention with an eye of obtaining the drift of public opinion.

Many resolutions are on the agenda dealing with practically every phase of human welfare—shall the Province or private interests operate the power resources of the province; revision of gasoline tax with rebate to tractor owners; old age pensions; revision of school act, with flat mill rate spread over province to pay teacher's salary; abolition of beer parlours; shall the U.F.A. support an increased tariff on Australian butter; shall market roads receive equal grants with Provincial highways, etc.

Tofield is well represented at the convention with Messrs. Geo. Abernethy, J. Ferguson and Alf. Schultz for the U.F.A. and Mrs. Carlisle and Mrs. Wildman for the U.F.W.A.

On Thursday, the 24th, in the Town Hall, the delegates will make their report of the "high lights" of the convention and no doubt will have much of interest to tell us.

TOFIELD VICTORIOUS IN EXCITING HOCKEY GAME

From the goalie (Harry Bowick) out to the forward line, the Tofield hockey team entered the hall of fame on Monday night when they combined to defeat Chipman by a score of 8—5. The goalie who turned in the best game of his life (17 years) pluckily kept his citadel safe for seven or eight minutes, after sustaining a badly cut face from a careening puck. This was in the dying minutes of the game and when the entire Chipman team were desperately battling for goals. Harry played a superb game and it was unfortunate that a skidding puck should cut his face; but thanks to the kind and prompt attention of Dr. Law, he will be as good as new in a day or so.

The game was solicited by Chipman who are a senior aggregation, but as there is no senior team here, the intermediates consented to give them a game.

The thanks of the hockyists are due to Mr. Clutterham, who kindly gave up a curling date to act as referee.

The opening minutes or rather seconds of the game handed a surprise of a breath-taking nature to the locals. W. Worton at centre procured the puck at the face-off and passed over to S. Worton who lost it to a Chipman forward who rushed through and scored. Less than thirty seconds played and a goal down.

The game then opened up fast and furious, with end to end rushes. Both goalies were frequently tested and were on to the play. Then [illegible] beat the Chipman goalie and tied the score. Both teams speeded up for the leader and fast and exciting hockey was seen. The locals held their their own until the end of the period and the teams went to the dressing room with the score a tie 1—1.

The second period opened up with a rush, and the Tofield fans frantically calling for a goal. Chipman scored first and a minute or two later repeated, putting the locals two behind. Not dismayed, but settling down to harder work, the locals again broke into the scoring column when Sid Worton, working his way down the side evaded the defence, shot and scored a neat counter. He repeated this a few minutes later and the game was tied again. With both teams going great guns, Martin from defence worked his way through and scored for the locals and W. Worton following suit, the second period ended 5—3 in Tofield's favor.

Sensing defeat, the visitors put all they had into the first ten minutes of the last period and ran in a goal which was matched by S. Worton getting one. Chipman retaliated with another one, but their hopes of victory vanished when W. Worton scored and a little later repeated, thus making the score 8—5.

It should be mentioned that Chipman scored a goal during a scrimmage, after the time-keeper had called time, the puck still being in play. The time-keeper had no whistle and could not make himself heard amid the yelling and shouting. This goal is not counted in the above given score.

The crowd was not as large as hoped for.

Line-up.—Tofield: Bowick; Martin, Glover; Whyte, W. Worton, S. Worton. Subs: Heatherington, Swinton.

We expected to get the Chipman line-up after the game, but other urgent duties prevented us from doing so.

The teams meet again at Chipman on Friday night.

KINGMAN

P. Redounsky was a business visitor in Edmonton last week.

A surprise party was held on Wednesday evening at the home of Mr. and Mrs. John Johnson, four miles north of Kingman. About seventy-five friends were present, and a suitable speech was given by Mr. Haugseth. A number of gifts and a purse of money were presented to the couple.

Miss Lily Erickson of Edmonton spent Friday and Saturday at her home here.

Mr. and Mrs. C. Simonson and family were the guests of Mr. and Mrs. C. E. Blyckert.

A number of Kingmanites were Camrose visitors on Saturday.

Miss Borghild Haugstad is assisting Mrs. R. Melvik for sometime.

The Holroyd's orchestra of Camrose is giving a novelty dance in the Kingman hall on Friday, January 25th. Prizes will be given.

Mr. and Mrs. W. Hartchen were the guests of Mr. and Mrs. J. Erickson on Sunday.

KETCHAMOOT

We are sorry Mr. and Mrs. W. A. Mitchell's names were also omitted from the list in the Mercury of the oldtimers roll call at the gathering at the Appleby home.

Albert Sears returned home on Thursday after taking a two months aviation course at Fargo, N.D.

Mrs. L. Carlisle and Mrs. B. Wildman are attending the U.F.A. convention in Edmonton this week. They are going as delegates.

Mr. and Mrs. O. Hanson was able to return home from an Edmonton hospital on Saturday.

William Ingram has been suffering from an attack of appendicitis the past week.

Messrs. A. F. Shultz and J. H. Ingram are attending the U.F.A. convention in Edmonton this week.

Little Miss Maud Wildman is staying with her aunt, Mrs. W. A. Mitchell in the absence of her mother.

Mrs. Wm. Lee and daughter Viola are spending a few days in the city.

Mrs. G. W. Sears was a passenger to Edmonton on Monday evening returning home Thursday.

Miss Mildred Ingram is assisting her sister, Mrs. F. D. Ferguson with her house work.

Only five ratepayers attended the annual school meeting on Saturday. Mrs. Sears resigned owing to ill-health. Mr. Sears was elected to finish out her term of one year. Mr. W. A. Mitchell was elected to finish out the late Mr. McMullen's term of two years and Mr. A. F. Shultz was re-elected for the term of three years. The trustees held a meeting at the Sears home on Monday afternoon. Mr. G. W. Sears was appointed Secretary-treasurer.

The Annual meeting of the M.A.S. was held at the home of Mrs. Chas. Ingram. A large crowd was in attendance who enjoyed the business session and social hour. Practically the same officers were re-elected for the coming year. Mrs. L. Carlisle, president; Mrs. Chas. Ingram, vice president; Mrs. J. Appleby, secretary-treasurer; Mrs. Chas. Whillans, assistant secretary; Mrs. Appleby and Mrs. Whillans social committee; and Mrs. C. A. Ingram, Mrs. W. A. Mitchell and Mrs. G. W. Sears, refreshment committee. A valentine basket social was planned for February 15th at the Schultz home.

WORLD HAPPENINGS BRIEFLY TOLD

A Toronto newspaper opened a fund for the relief of the British unemployed, particularly the miners and their families.

Units of insulin to the number of 1,126,900, costing $4,500 were issued by the Ontario Department of Health during last November.

Representatives of the salmon industry of British Columbia estimate that this year's pack will be worth more than $14,000,000 as compared with $12,000,000 in 1927.

Major Carl Spatz and his Question Mark crew probably will be awarded Distinguished Flying Crosses for their endurance feat of 150 hours and 40 minutes non-stop flying.

England's oldest resident, William Walker, celebrated his 107th birthday recently. He received a presentation from the lord mayor of Nottingham. He was a bricklayer until he retired 23 years ago.

Howard Douglas, pioneer western Canadian, chief motion picture censor of Alberta for 13 years, and a former superintendent of Banff National Park, died at his home in Edmonton, at the age of 78 years.

The completion of the laying of steel into Churchill, the terminus of the Hudson Bay railway, will be marked by a celebration on a grand scale, it is announced. Plans will be formulated when the end of the work is in sight.

When the agreement with the transportation companies in regard to continental European immigrants expires in 1930 it will not be renewed. In the meantime immigration officials say they will restrict this immigration as far as possible.

A commission appointed to study the possibility of building a tunnel under the Straits of Gibraltar has returned to Madrid with a favorable report. The cost of the tunnel was estimated at 300,000,000 pesetas (approximately $48,000,000). The tunnel itself would be 20 miles long.

To Check Outlawry

Detroit Policemen To Receive Bounty For Killing Criminals Caught In Act

Hereafter Detroit policemen who shoot and kill a criminal caught in commission of a crime will be paid a bounty of $10, according to Police Commissioner Rutledge, who explained that the move was designed to check further outlawry.

The first presentation was made to Patrolman Arthur Underman and Gerald McCauley, who on Jan. 3rd were forced to kill a negro when he resisted arrest.

John L. Pilgrim, a London woollen merchant, completed his 150th crossing of the Atlantic when he arrived at Liverpool in the White Star liner "Baltic."

"We stand back of every auto we sell," says an ad. Fine! The front is the dangerous end.

"Marlatt's Treatment"

INTESTINAL flu, high blood pressure, nervous disorders—how careful one must be to avoid these dangerous ailments at this time of the year.

Keep the system clear of poisons and impurities. Tone up the liver, prevent bile stagnation and intestinal lethargy. Let Marlatt's help you as it helps thousands every year to ward off illness and disease.

Canadians Are Meat Eaters

Per Capita Consumption Exceeded By Only Three Other Countries

In cattle holdings Canada ranks twelfth among the countries of the world. There are eight countries with more swine than Canada and apparently twenty with more sheep and lambs. The Dominion is exceeded in meat consumption only by Argentina, New Zealand and Australia, the per capita consumption of these countries being respectively 346.5 lbs., 211.6 lbs., and 2[illegible] lbs., against Canada's 136.3 lbs. Following come the United Kingdom, 12[illegible] lbs., France, 115.0 lbs., Germany 104.9 lbs., Denmark, 100.9 lbs., and Belgium 71.1 lbs. Canada's per capita meat consumption is made up of 6[illegible] lbs. of beef, having increased to this from 60.9 lbs. in 1910; 61.4 lbs. of pork against 66.7 lbs. in 1910; 6.1 lbs. of mutton and lamb, as compared with 8.7 lbs. in 1910, the total of 136.3 lbs. comparing with 136.2 lbs. in the former year.

A PROBLEM FOR YOUNG MOTHERS

Stomach troubles cause most of the distress of babyhood and childhood, and are the greatest problem that a young mother has to solve. The treatment for these digestive disturbances that disturb baby's sleep must be quick and effective and above all perfectly safe.

The absolute safe treatment for disturbances of the stomach and bowels is found in Baby's Own Tablets. Thousands of mothers have had their problem solved through them. They are guaranteed to be free from all injurious drugs and cannot possibly do harm to even the youngest babe—they always do good.

Baby's Own Tablets regulate the stomach and bowels; banish constipation and indigestion, break up colds and simple fevers and promote that health-giving sleep which is so necessary to the welfare of the baby or growing child. The Tablets are sold by all medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Anxious To Protect Canadian Fishermen

Regulations Aim To Prevent U.S. Fishermen Selling In Canadian Ports

Possible international conference regarding the fishing treaty between Canada and the United States may come as a direct result of the allegation made by Oregon and Washington fishermen of treaty violations on the part of the Dominion on the Pacific Coast which have been forwarded from Seattle to Washington, D.C., and to Canadian Government officials.

The department of Marine and Fisheries has issued the following statement: "There is no desire on the part of Canadian authorities to restrict in any way the privileges of which U.S. salmon trolling boats are entitled in Canadian ports, but when these boats are carrying on their fishing just outside Canadian water or along the Canadian coast they are not being allowed to use such ports for purpose of comfort and convenience and so make them in a large measure for practical purposes bases from which to operate. Seizures were made only when such action appeared necessary to impress the above fact and seizures were not made until after the boats concerned had received notification that Canadian ports might be used only for bona fide shelter or other treaty purposes."

At the present time U.S. ports charge a two cent duty on every pound of Canadian fish sold through them. The object of the Canadian regulations is to prevent United States fishermen selling their fish in Canadian ports and thus gaining an advantage of the Canadian fishermen.

Patrol Of Royal Mounted

Order Maintained Throughout Great Regions Of North-West Territories

The city or suburban policeman who is inclined to grumble about the size of the territory he has to patrol, should be given a glimpse of the area which has to be covered by the Royal Canadian Mounted Police. To them is given the task of maintaining law and order and administering relief among the scattered settlements in the great regions of the North-West Territories, stretching in a belt 2,000 miles wide from Baffin Island in the east to the Mackenzie River delta in the west. Posts are established along the Arctic coast from which patrols and investigations are undertaken each year by the officers stationed there. Two years is the normal span of duty for a constable in these territories, but not infrequently the call of the Arctic is so irresistible that the members of the force return for duty again and again.

Newspaper Suffers Loss By Fire

Plant Of the Turtleford Recorder Is Prey To Flames

Fire of unknown origin destroyed the post office and newspaper plant at Turtleford, Sask., recently. The building and printing plant were owned by C. R. McIntosh, M.P., and were covered by insurance. Post office fixtures, owned by A. Vinge, postmaster and editor of the "Turtleford Record," were also insured. Owing to strenuous efforts on the part of volunteer fire fighters the blaze was kept from spreading. No fire had been made in the building on the day of the outbreak, according to Mr. Vinge.

Regularity Is Essential

Live stock thrives best when fed and watered regularly. There is a strong temptation to lie in on the cold mornings or to do the chores earlier than usual when the days are short and dull. Irregularities in the handling of live stock do not favor greatest thriftiness or production. For best results "chores" should be done by the clock.

Radio school lessons may soon be in vogue in some of the secondary schools in Canada. The Department of Education is said to be considering this innovation.

Always keep Minard's Liniment handy.

Proves Laborious Task

Editor Of Oxford Dictionary Searching For Definitions Of New Words

So many new words have been coined in the past four decades that thirty pages of the New Oxford Dictionary are necessary to record only those beginning with the letter "A." This was revealed by Dr. O. T. Onions, who is editing the new supplement to the dictionary.

It was not only such obvious additions as automobile and airplane that are giving the dictionary staff a laborious task. The new words, according to Dr. Onions, include a "multitude of common colloquialisms, technicalities that have become public currency, and labels, discoveries, inventions, names of exotic plants, garments, terms of sport and of the new psychology.

There are, for instance, auto-suggestion, auto-plane, auto-erotism, autogiro, accent in art, to put or get it across, apperception, the all-red line, apache, adenoids, aspidistra, aerobatic, alpha rays, drug addict, airpath, airworthy, Anglo-phobias and accelerometer."

In the original Oxford Dictionary, published in 1888, "adenoid" was included but only as an adjective signifying glandlike. "Aspidistra" is a plant long known in old-fashioned English homes, but it never before achieved a place in a dictionary. On the other hand some words used in 1888 have since become obsolete. The older meaning of "airplane" was a plane or wing, while animatograph," meaning moving picture, is now dead as a doornail.

[illegible] searching for adequate definitions, quotations and exact references for many words. Musical terms which puzzle him are atomality and attack.

He thinks he ought to include the word "agin" as in "agin the government," and also the shopping term "on approval." There is a further possibility that the new dictionary may sanction "allright" as one word because of its universal usage.

"Truly," comments the Manchester Guardian editorially, our dictionary makers are toilers at a Sisyphean task. Just as soon as they have "Z" neatly caged an enlarged and adipose "A" has broken loose at the other end of the menagerie."

Heart Palpitated Nerves Bothered Her Sleep Was Broken

Mrs. Fred A. Pugsley, East Southampton, N.S., writes: "I was bothered very much with my nerves and palpitation of the heart, and my sleep was broken at night. I decided to try

MILBURN'S HEART AND NERVE PILLS

and after I had taken six boxes I found that they had done me so much good I will gladly recommend them to all those who are troubled with sleeplessness caused by their heart and nerves."

Price 50c. per box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Expert Advice

Some one notes that a generous supply of advice on care of children always is available and most of it is prepared by women whose names appear in print preceded by four letters, Miss.

Visitor—Why does your new clerk jump every time he hears the telephone bell?

Manager—Force of habit. Used to be a fireman.

ITCHY ECZEMA ON BABY'S FACE

Broke Out in Watery Pimples. Cuticura Healed.

"Eczema broke out in watery pimples on my baby's face. It itched and burned so badly that she scratched, and her face was covered with sore eruptions. When she scratched the eruptions they used to bleed something dreadful. She used to fret and stay awake nights. It caused disfigurement for a while.

"I sent for a free sample of Cuticura Soap and Ointment and after using it I purchased two cakes of Cuticura Soap and two boxes of Cuticura Ointment, and in five weeks she was completely healed." (Signed) Mrs. Clifford Fancy, Westfield, N. B.

Give Cuticura Soap and Ointment the care of your skin.

FOR COLDS

ASPIRIN

To break a cold harmlessly *and in a hurry* try an Aspirin tablet. And for headache. The action of Aspirin is very efficient, too, in cases of neuralgia, neuritis, even rheumatism and lumbago! And there's no after effect; doctors give Aspirin to children—often infants. Whenever there's pain, think of Aspirin. The genuine Aspirin has Bayer on the box and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

SUNDAY SCHOOL LESSON

JANUARY 20

CHRIST THE SAVIOUR

Golden Text: "And thou shalt call His name Jesus: for it is He that shall save His people from their sins." Matthew 1:21.

Lesson: Luke 2:11, 30-32, 15:3-7, John 3:14-17, 10:9-11, 14-16, 27, 28, Acts 4:12, Romans 5:1-11, Philippians 2:5-11, 2 Timothy 1:9, 10.

Devotional Reading: Isaiah 53:4-9.

Explanations and Comments

The Value Of a Repentant Sinner, Luke 15:3-7. To the Pharisees and scribes who criticized Jesus for receiving sinners and eating with them, Jesus said: "Is there a man among you who, if he possessed a hundred sheep and found one missing, would not leave the ninety-nine in the pasture lands and search for the lost sheep until he found it?" By the word translated "wilderness" is meant the uninhabited lands which were the pasture lands.

"The sheep may shiver with terror and cold when it no longer sees the flock, no longer hears the guiding voice of the shepherd, but it is only the shepherd who knows all that is involved in its position, only the shepherd knows the risks. We sometimes speak of man's infinite loss through sin, and I do not know that we can exaggerate it; but, after all, we do not realise it, even in a measure, until we view from the side of and the poverty and deformity of the Christless soul." Thomas Stewart.

When the shepherd finds the lost sheep, he puts it across his shoulders (the easiest way in which to carry it), and returns rejoicing. So great is his joy that he must have others share it, and he calls together his friends and neighbors and bids them rejoice with him.

Grief can take care of itself, says Mark Twain, but to get the full value of a joy we must have some one with whom to divide it.

If you would be so careful and tender of one lost sheep, how much more careful and tender must the Good Shepherd be of the lost sheep of Israel! "I say unto you," said Jesus, "that even as in the case of this human shepherd there will be joy with God and His angels over one sinner that repents, more than over the ninety and nine righteous persons (such as the Pharisees regarded themselves, Luke 18:9) who (as they think) need no repentance." Dr. W. L. Watkinson points out three facts in this verse: (1) the significance of the individual—over one sinner, (2) the importance of the individual lies in his moral life—one sinner, (3) the most important event in the individual life is the restoring of the lapsed soul to God—one sinner that repenteth.

Learned From Experience

The Sunday evening Bible Class had been enlarged to full strength and two of the latest recruits were discussing Bible topics.

"I think this yarn about feedin' five thousand people on five loaves o' bread an' two fish is all bunk," declared Bill.

"It can be did, buddy, it can be did," answered Henry.

"Aw, what's the matter with you? You goin' bugs on this Bible stuff?"

"Naw," replied Henry, "but I used to be a mess sergeant in France."

Man was made before woman to give him time to think of an answer to her first question.

Minard's Liniment is good for colds.

Inspection Of Vegetables and Fruit Products

Will Ensure Higher Grade Being Sent To Canneries

A thorough inspection of all fruit and vegetable products before preservation will be conducted in all canning plants of the Dominion, by inspectors of the fruit branch of the Federal Department of Agriculture. Through such a service, Mr. McIntosh, fruit commissioner, believes both producer and consumer would profit and encourage the delivery of higher grade products to the canneries. Fifteen permanent inspectors transferred from the health of animal branch, will be augmented by the full inspection staff of the fruit branch in carrying out the inspection service throughout the Dominion.

Practically Safe

Murderers have almost a 100 per cent. chance of escaping the electric chair if they commit crimes in Pittsburgh, the annual report of the homicide squad shows. During the past year thirty-five alleged slayers in fifty-one crimes were apprehended, but not a single one has received capital punishment.

It May Be *Urgent*

When *your* Children Cry for It

Castoria is a comfort when Baby is fretful. No sooner taken than the little one is at ease. If restless, a few drops soon bring contentment. No harm done, for Castoria is a baby remedy meant for babies. Perfectly safe to give the youngest infant; you have the doctors' word for that! It is a vegetable product and you could use it every day. But it's in an emergency that Castoria means most. Some night when constipation must be relieved—or colic pains—or other suffering. Never be without it; some mothers keep an extra bottle unopened, to make sure there will always be Castoria in the house. It is effective for older children too; read the book that comes with it.

Fletcher's CASTORIA

To Check Flu-Grip

Fight the Germs with Vapors Before They Can Get a Start

Treat All Colds Promptly But Be Careful Not to Disturb the Digestion With Too Much Dosing

While Flu is so prevalent everyone should take precautions to prevent its further spread. Flu is generally accompanied by a headache, burning eyeballs, and aching joints. But it begins so many times with just an ordinary cold.

Too often, the colds are neglected until they have lowered the vitality and permitted the lurking germs of influenza, or pneumonia to "get a foothold."

The only safe plan is to attack a cold at the very start. A hot bath, a laxative, and a vigorous application of Vicks VapoRub on the throat and chest at bedtime, will usually break up a cold overnight.

External Treatment Best

For hours after Vicks is applied, its ingredients, time tested remedies, such as camphor, menthol, eucalyptus, thyme and turpentine, are vaporized by the warmth of the body, and inhaled right to the inflamed air passages. At the same time, the ointment acts through the skin like an old-fashioned poultice, "drawing out" tightness and pain, and helping the vapors to break up the congestion.

Avoid Upsetting Stomach

This simple external treatment cannot disturb your digestion as too much "dosing" is so apt to do. This is doubly important when "flu" is around, for your stomach, as well as your respiratory organs, must be kept in good condition in order to keep your body resistance at its highest level.

For this reason, too, mothers prefer Vicks for children. It can be used freely and often, even on the youngest child, with no fear of upsetting a delicate stomach.

To Help Ward Off the Flu

When influenza colds are prevalent, you can often prevent infection by snuffing a little Vicks well up the nostrils every night and morning, or before exposure to crowds.

"Where's the bunk-house?" asked Blackie.

"We don't call them bunk-houses any more, we have dormitories," corrected Gillis as he nudged Donald slyly.

"A what?" questioned the puzzled Blackie.

"Dormitories," repeated Gillis.

Blackie glowered at his boss. "What are you runnin', a ladies' seminary?" he questioned sarcastically.

"And another thing, you don't need your blankets. Company furnishes 'em," informed Gillis.

"Well, I'll tell you one thing right now," declared 'Crazy' Jack, "I ain't goin' to sleep in a pair of blankets that forty smelly bohunks has wrapped themselves in. What kind of a joint you brought us to, Jack?"

"What I want to tell you fellers," said Gillis, ignoring 'Crazy' Jack's remarks, "is this: I want you to stay all summer. None of this runnin' to town to get your teeth fixed, or a new suit, see the ball game, or to meet your sister who's comin' out from the East, and all that old bunk. We got more orders——"

"Can that chatter," interrupted 'Fighting' Jack with a wide grin. "We're all goin' to town on Dominion Day, ain't we, boys?"

"You bet!" they roared as one.

Gillis shrugged his shoulders resignedly. "Thought you fellers was gettin' old enough to have a little sense," he said.

"Too much kick in us yet, Jack," demurred Blackie.

"Where is this door-mee-tory, Jack?" asked Hoop-la.

Gillis pointed to the long building, and the boisterous crowd moved noisily up the hill. The men dropped their packs to the ground outside the door, and, shouldering each other, peered in. The long rows of white beds stood immaculate against the walls, and two white-coated flunkeys were sweeping the glossy varnished floor.

"This ain't the right place," growled Hoop-la, "this is the hospital. They must expect to kill about a hundred men every day. Hi! Jack! Come here. Where's the bunk-room?" he asked as Gillis approached.

"That's it."

"That!"

"Sure."

"Say! what you givin' us? I wouldn't dare sit down on one of them beds; 'fraid of dirty'n it."

The others gathered round.

"Jack, can we put up a log shack for ourselves?" asked Blackie.

"You sure can," responded Gillis tolerantly.

"All right, we'll sleep in this morgue 'till we get a decent place," said Blackie.

He poked his head in the door just as Andy, clad in white coat, entered by the rear.

"Say, nurse," shouted Blackie, "get ready for twenty-two cases of delirium tremens!"

"That's easy," was Andy's quick retort; "I've 'ad more than that by myself." His eyebrows lifted in quick surprise as he saw the brilliant shirt.

"When does the blinkin' circus start?" he grinned.

That evening in their explorations Blackie and Hoop-la found the log shack on the lake-shore.

"Say, Jack, can me and Hoop-la have that cabin down there?"

"You be you can, Blackie. You and Hoop-la can have anythin' round here," replied Gillis heartily.

Blackie had turned to go, but on hearing this broad statement he stopped quickly. "Say, Jack, me and Hoop-la came away from Vancouver owin' a little money—an' I promised to send——"

"You've got me when the gittin' is good," interrupted Gillis. "How much do you want?"

"Let me see," reflected Blackie, "I owe for my room in town; and I owe at Old Joe's and—an——"

"How much? Spit it out, I can stand the shock," commanded Gillis.

"'Bout a hundred, Jack."

"Whew!" whistled Gillis as he reached for his purse.

With Donald's assistance the hundred dollars was found and Blackie ran joyously down the hill.

"Little Devil!" smiled Gillis as he gazed after him. "Good-hearted a feller as ever lived," he added feelingly, "but he can't take one drink without goin' crazy."

The "redshirts" had been up in the woods looking over the logging operations, and they now came swinging down the hill, their bright shirts flashing in the sun. They were loggers, "every inch of them," as Gillis said.

CHAPTER XII.

Andy's study of nature proved to be no idle whim, and Gillis had long since ceased teasing him. All his leisure moments were spent in scouring the hills and meadows for specimens, and regularly every Sunday afternoon he ascended the hill to Wainwright's cabin with his collection for the learned Englishman's inspection.

On this afternoon, Wainwright, being in one of his solitary moods, had wandered up the mountain, and Andy found Connie busily engaged in spading the earth in search of worms, which she tossed to the swarm of birds that hopped on the ground and filled the air about her.

Scolding the bold camp-robbers that ventured dangerously near the shovel blade she scattered the soil then laughed joyously as the birds with a great flutter of wings pounced on the fat worms.

Andy threw himself luxuriously on the green sward. This beautiful spot was a diversion from the hot kitchen, a veritable haven of rest. The gentle murmur of the bees among the flowers, the soft, subdued twittering of the birds, the rustle of the leaves, and the laughing of the water, all combined to make one sweet monotone of sound that lulled him into drowsiness.

Connie sat down near him, the birds all about her.

"'Ow do you get them so tame, Connie?"

"They know that I love them," she replied simply.

"I can't get anything but the camp-robbers to come near me," said Andy.

"It takes time and patience, Andy. As soon as the birds are assured that you mean them no harm, they are eager to be your friends. You'll remember, Dad told you that without plants man could not live," she went on. "It is equally true that if all the birds should perish, man would soon follow. And, still more wonderful, if we had no insects man could not survive."

Andy came to a sitting posture. "Do you mean to s'y that we should die if we 'ad no insects?" he asked incredulously.

"Surely, Andy, you haven't forgotten what Dad told you last Sunday about insects carrying the pollen from flower to flower," reproved Connie.

"I 'ave it now!" cried Andy, after a few moments of reflection. "If we 'ad no insects to carry the pollen the plants couldn't live. And if the birds were all gone ther'd be so many insects that they'd eat up every blinkin' thing the farmers raised, and we'd starve to death."

[illegible]

"Strike me 'andsome if ain't wonderful!" said Andy in an awed voice.

Connie explained very simply to Andy the benefits derived by mankind from the various birds. Her discourse proved so interesting to him that he paid little heed to the time until the sun, disappearing behind the trees, warned him that it was time to return to his duties. Regretfully he arose and turned to the trail, Connie walking by his side. A goldfinch, rich in his summer plumage of bright yellow, black and white, hung swaying like a dainty sprite on a slender stem near the path. From its bulging little throat came a rippling, bubbling song like a miniature torrent of ecstasy.

"Dear, dear, dearie," he called sweetly.

"Oh, you darling!" cried Connie as she clasped her hands in rapture. "I've been trying to find their nest for several days, Andy, but the little dears have hidden it too well."

She made soft clucking sounds as she moved nearer to the beautiful bird. The goldfinch fluttered close to her side to perch like a yellow flower on the top of a tall thistle, perked its pretty head and looked up at her with bright shining eyes.

"Dear, dear, dearie," it sang again, then flew with characteristic wavy motion to a clump of willows, twittering sweetly as if calling Connie to follow.

"I 'ave to 'urry 'ome," said Andy as he looked at his watch. He glanced back at a turn in the trail to see Connie pressing the willows gently aside in her search for the goldfinch's nest.

"Strike me pink! but she is a wonderful girl," soliloquized Andy. "The 'andsomest and the brainiest kid I ever saw in me life. If I was thirty years younger, two feet 'igher, and 'arf decent to look at, I'd fall 'ead over 'eels in love with 'er."

He smiled broadly at these ridiculous reflections, but there was a tender light in his bright blue eyes. A swarthy foreign labourer, moving aimlessly up the trail, merely grunted in reply to Andy's cheerful salutation.

"One of Gillis's beloved bohunks," chuckled Andy.

A moment later he stopped suddenly. Connie was up there alone. For a short interval he hesitated, then resumed his downward journey. "She'd shoot 'is blinkin' 'ead off if 'e tried to 'arm 'er," he decided.

Just then he heard Connie's voice raised in a quick cry of anger. Andy jumped as though subjected to a galvanic shock. He turned in mid-air and before he struck the ground his short legs were going through the motion of running. The picture of Connie struggling in the arms of the burly foreigner made him fairly fly.

"I'm coming, Connie!" he shouted as he tore up the hill.

Donald and Gillis, sitting near the bluff enjoying a smoke came to their feet as they heard a faint shout from above. For an interval they listened intently, but hearing no further sound they resumed their seats. Andy slackened his pace as he came to the clearing and saw that Connie was unharmed. She was standing near the labourer with her head bowed over an object held in her hand.

"What's wrong, Connie?" panted Andy.

"Andy, look!" she choked, "it's the mother bird. I had just found her nest—here it is." She parted the [illegible] a compact, cosy cup-like structure of fine grass and moss placed in a crotch of the tree. In the centre lay four downy fledglings whose tiny mouths gaped wide to receive the expected bit of food from the mother's bill. "Oh, Andy, if she dies the little ones won't live," said Connie in a voice filled with pity.

The Standard of Quality Since 1853

An American Knights Ramsay MacDonald

Labor Leader Is Dubbed "Sir Ramsay" At Jasper Park Lodge

If they come to hear of this in the Labor Party of Great Britain, there will be murmurings afresh in the left wing. It might even have a far-flung effect in the next general election. When Ramsay MacDonald was in Canada last summer he was knighted. Without sword or cushion, without kneeling in silken hose and breeches, but he was knighted. And by a citizen of the United States.

It happened when the former Prime Minister was a guest at Jasper Park Lodge. The man who brought him such distinction, a visitor from Cincinnati, was enjoying the rockies at the same time. He had a movie kodak with him and was having the fun of his life catching unsuspecting beaver, deer, bear, golfers and other denizens of the park. When Mr. MacDonald appeared with his four daughters, the heart of the man from Cincinnati leapt up. Here was bigger game. A scoop! When his friends gathered before the silver screens in their drawing rooms next winter and boasted of their summer's trophies he could afford to smile. And when he unwound his own reels they would all perish with envy.

The man from Cincinnati wangled an introduction. "Sir Rammy," said he, diffidently but firmly, "Sir Ramsay, would you mind if I took a few movie shots of you?"

The deed was done. But the man was too engrossed to be aware of [illegible] Mr. MacDonald did not [illegible] the error [illegible]. He merely smiled and protested that he was no sheik. "I don't want to bother you," said the amateur movie man. "If you and your daughters just step out of the Lodge and stroll from the path along the shore of Lac Beauvert, I'll get you as you go."

So was Ramsay MacDonald knighted and starred in the movies in one day.

Vicious Scientific Trip Around Pole

Captain Bartlett Has Spent Thirty Years In Arctic

A four year scientific coasting expedition around the North Pole was visioned by Captain Robert A. Bartlett, home only a short time from eleven months in the Arctic. Captain Bartlett who has spent 30 years in the frozen north returned to New York with his famous schooner Morrissey from the Behring Sea, with the Stoll-McCracken expedition. The ship which Captain Bartlett visioned for the four year trip would be almost saucer shaped to withstand ice pressure, and non magnetic.

Recipes For This Week

(By Betty Barclay)

EGGS IN NESTS

To 2 cups of left-over mashed potatoes well softened with milk add ½ cup finely chopped ham or bacon, 2 tablespoons finely chopped parsley, 3 tablespoons butter, salt and pepper. Cover the bottom of a well-buttered baking dish and arrange little nests into which gently break an egg. Allow an egg for each person. Sprinkle buttered bread crumbs over the top and bake in a moderate oven until the eggs are cooked, but not hard.

PRUNE WHIP DELICACY

1 package of orange junket.
1 pint milk.
1 egg white.
¼ cup sugar.
½ cup prune pulp.
2 teaspoons lemon juice.

Prepare orange junket according to directions on package and set away to chill. Beat egg white until stiff, add sugar gradually until thoroughly blended. Add prune pulp (prepared by rubbing cooked prunes through a sieve) and sugar. Before serving heap the glasses of junket with prune whip, and garnish with sections of orange, if desired.

Should Save Argument

S. Parker Gilbert, Agent-General of Reparations, says that Germany is able to pay to the full scale already fixed. That should save much argument at the coming conference.

Little Helps For This Week

"A friend loveth at all times, and a brother is born for adversity."—Proverbs xvii. 17.

Yet of the brother, who along our way,
Prone with his burden, heart-worn in the strife,
Totters before us,—how we search for his life,
Censure and sternly punish while we may.
Oh, weary are the paths of earth and hard
And living hearts alone are ours to guard;
At least begrudge not to the sore distraught
The reverent silence of our pitying thought.
Life too, is sacred; and he best forgives,
Who says, "He errs," but tenderly "he lives."

—Mary Mapes Dodge.

Do not keep the alabaster boxes of your love and tenderness sealed up till after your friends are dead. Fill their lives with sweetness. Speak kind, approving, cheering words while their ears can hear them, and while their hearts can be thrilled by them. The things you mean to say after they are gone, say before they go.

Bee Pollination Unnecessary

That bees are not actually necessary to the pollination of fruit trees is understood to be the important finding of a group of government experts whose report will shortly be delivered to Hon. W. R. Motherwell, minister of agriculture.

Letty. "She swears she has never been kissed by a man."

Lotty. "Well, isn't that enough to make any girl swear?"

Ward off Flu and Pneumonia

Neglected bronchial colds are dangerous. Keep them instantly with Buckley's Mixture. Its action in relieving the cough and clearing the tubes is amazingly swift—and sure. All druggists sell "Buckley's" under a positive guarantee. Buy a bottle today, and be safe.

FARMER COMMITS SUICIDE

Another very unfortunate accident happened in the neighborhood of Barrhead this last week. Mr. W. H. Dickson, of Freeman River, who is farming in that district had not been seen around for some little time, on investigation by Mr. Nathan Harvey he was found in his shack dead. It [illegible] how long Mr. Dickson [illegible] dead. Constable S. W. Thurston and Dr. Verreau, the coroner, [illegible] the scene. Mr. [illegible] that [illegible] pain lately, and [illegible] the easiest way out, [illegible] committed suicide [illegible]. Mrs. Dickson is [illegible] Ft. Assiniboine [illegible] Mr. D. A. Dickson of Claresholm [illegible] of the deceased is here [illegible] Mr. W. H. Dickson was 52 years old and [illegible] Ft. Assiniboine.

MAN FALLS DOWN WELL AND IS DROWNED

A very sad accident occurred on [illegible] 10th in the Barrhead area. [illegible] Camp Creek had started on a trip with his wagon and [illegible]. Evidently the weather [illegible] Hover returned. [illegible] Orlean [illegible] with [illegible] around [illegible] not be [illegible] Christensen lowered a pail [illegible] and came in contact [illegible] body. It was very slippery [illegible] well and apparently Hover had slipped in. Dr. Verreau and [illegible] S. W. Thurston were called [illegible]. It was decided no inquest [illegible] death be [illegible] to misadventure. Mr. [illegible] 22 years old and has [illegible] own farm for some time. He was very highly respected by all [illegible].

WEATHER NOTES

[illegible] (the Hay Lakes Times) [illegible] fall of snow over the [illegible] brought about a more [illegible] to the landscape. In [illegible] with same the temperature has dropped and the following [illegible] are reported.

[illegible]

Here and There

(212)

Ojibway Indians of the Nipigon district will not touch bear meat because they are mostly members of the Bear Clan, says Ozark Ripley, the well known sporting writer. They are averse to killing the bear and one hunting party relates having to forego eating bear steak and having to bury a bear's carcase because their cook refused to touch the meat.

A trout weighing eight pounds was a catch reported last summer by William Mitchelltree in the neighbourhood of Banff Alberta. "My record for the season is 396 fish," he writes, "all caught on rod and line within easy reach of Banff. Recently at Wapta I caught two six pound rainbows and several cutthroat weighing from two to three and a half pounds."

A record was hung up beside the Christmas stockings of the employees of the Canadian Pacific Express Company on Christmas Day when, from coast to coast every Christmas package was delivered to its destination, except where there was no one to receive them. According to T. E. McDonnell president of the company express traffic was unusually heavy this season and was well handled.

[illegible] Reward wheat [illegible] varieties [illegible] by the Canadian Government [illegible] received by the Dominion Cerealist. [illegible] farm will have 10,000 bushels of this new wheat for distribution and the 250 growers who were allowed to grow Reward in [illegible] will have a surplus [illegible] making available [illegible] for seed in 1929.

Production of agricultural implements and machinery in Canada amounted to $42,996,284 in 1927, according to the Bureau of Statistics, as compared with $38,2[illegible] for the previous year and $2[illegible] for 1925. Of the 65 firms reporting 41 were in Ontario, 12 in Quebec, 4 in Manitoba, 4 in Alberta, one in Saskatchewan and one in Prince Edward Island.

Having successfully completed her trials off Scotland the new Canadian Pacific British Columbia coastal steamship "Princess Norah" will arrive shortly at Victoria, Vancouver Island. The new ship is the seventeenth "Princess" of the company's fleet and is equipped with bow rudders to facilitate navigation in the narrow channels of the west coast.

Canadian seed wheat is in considerable demand in South America according to officials of the agricultural department of the Canadian Pacific Railway at Winnipeg. A ton of seed wheat was recently shipped from Brandon to Peruvian wheat ranchers, and it is expected that further orders will come from the South American republic.

Less than a minute was required to launch each boat when the life saving equipment of the Canadian Pacific liner "Duchess of Bedford" received its regular test at New York recently before embarking on its Christmas cruise of the West Indies. "The finest and most efficient boat lowering apparatus I have ever seen," was the comment made by John J. Grady head of the United States steamship inspection service, who was present at the test. The "Duchess of Bedford" is one of four sister ships of the new "Duchess" class all of whom are speedy oil burners and equipped with the same efficient life saving apparatus for use in an emergency.

Here and There

[illegible]

For [illegible] time in history [illegible] been catching fish from the [illegible] of Northern Manitoba to the Winnipeg market. Holden left on [illegible] Cranberry Portage for [illegible] settlement recently taking [illegible] veteran [illegible] whose aim was to beat all competitors who take a month to travel by dog team.

During 1928 between 5,000 and [illegible] Prince Edward Island foxes [illegible] shipped abroad an increase over the 4,260 shipped the preceding year. These have been handled without a single known casualty. Since the middle of October foxes have been shipped to Norway, Sweden, Scotland, Germany, Czecho Slovakia, Bavaria, Finland, France, Holland, Switzerland and Japan.

Forty two years of service with the Canadian Pacific Railway without having broken any of the company's rules or otherwise earned a mark against himself is the unique record held by Arthur W. Savage, engineer, who has just retired on pension. Mr. Savage who is well known throughout the Eastern Townships, fired the train that laid the first steel on the line between Sherbrooke and Farnham.

The old English Yuletide Festival held recently at the Empress Hotel in Victoria B.C. proved to be one of the most popular events of last year. Carol and ancient music were rendered, the ancient Chester Mysteries staged and Dickens' "Mrs. Wardle's Christmas Party" was produced. The festival culminated in a ball at which some seven hundred persons attended. It is believed that plans are already being made for a larger and better celebration next year.

A change in telephone numbers has drawn attention to the main inquiry office in the great Windsor Street Station of the Canadian Pacific Railway in Montreal. The girls who are on duty there handle each on an average of 2[illegible] calls an hour and as many as 3[illegible] an hour during [illegible] They carry most of the information in their heads and seldom have to refer to a time table. They are asked queer questions sometimes. Recently someone asked "When does the afternoon begin," and the old [illegible] "What time does the four o'clock train leave."

[illegible] farmer residing about [illegible] west of Souris, Manitoba [illegible] to ship [illegible] Western Canada in two [illegible] soon as the list of [illegible] from Ottawa for [illegible] under the supervision of the Dominion Government. As is pretty generally known Reward which matures about a week earlier than Marquis and for this reason can be grown further north. This early ripening means [illegible] that a new strip of country 75 by 1,000 miles is made available for wheat growing.

MERCURY ADS PAY!

AH—HAH

A young women went into a bank to have a cheque cashed. "But Miss" the clerk told her, " You'll have to get some one to introduce you before I can pay you the money on this cheque. She stared at him distainfully. " Sir" she said haughtily, "I wish you to know that I am here strictly on business. I am not making a social call. I do not care to know you".

$2.00 Per Year

For several years the great majority of weekly newspapers in Canada have been $2.00 per year. This includes Eastern Canada as well as Western Canada. Some years ago the publisher of the Mercury had in mind to charge $2.00 instead of $1.50 but at that time the hard winter with its consequent feed shortage came upon us and we then carried on until this year at the $1.50 rate.

Printed matter is about the cheapest thing there is in the world today when very large numbers are required, and it is somewhat of a problem sometimes for the small office catering to a few hundred subscribers to compete with the product of the large cities.

But now, as before, the Mercury is distinctively a local paper. Edited and printed in the town in which you do business, carrying every day news about people whom you know, it has a particular and definite appeal to the residents of Tofield and district.

We are gratified that those who have paid the $2.00 rate up to the present have done so with a smile, which is the best possible encouragement to us to turn out a better paper.

ARRANGING FOR 6,000 BRITISHERS FOR FARM WORK

Ottawa.—Arrangements have been completed by the Department of Immigration to place in farm employment in Canada 6,000 British-trained immigrants which is the maximum number that will be available before the end of July. The department will assist in placing as many as possible of any others who want farm work and come to Canada on the new $30 rate.

This was announced by W. J. Egan, deputy minister of immigration, in making public a letter to the railway companies.

The deputy minister explained to the railway companies that it had been the experience of the department during the past three years that not more than 50 per cent. of the alleged farm laborers brought from non-preferred countries actually stayed on the land.

Unquestionably there was a very strong feeling against the unduly large proportion of foreign as compared with British immigrants shown in the immigration statistics for the last few years, the letter set forth, and the movement under the railways agreement was largely responsible for this condition.

Thah restrictions, however, do not apply in any way to the movement of central European agricultural families coming to Canada for land settlement nor to the movement of house workers who are coming under proper arrangements for their protection.

The province of Alberta had made representations to the department that while they are anxious to secure a supply of British farm labor and also a supply from preferred countries, they already have in the province all the non-preferred country immigrants they require for farm work this year. In view of this situation the department will endeavor to carry out Alberta's wishes and the province is being so advised.

Death Of Senator Ross

Conservative Party Leader In Senate Passes Away

Guelph, Ont. — Senator William Benjamin Ross, Conservative party leader in the Senate for the past two years, died in Homewood sanitarium, where he had been a patient for two months. He was 74 years old.

Senator Ross succeeded to the leadership of the Conservative party in the Upper House in June, 1926. He had been a member of the Senate since 1912.

In 1881 Senator Ross went to Regina and practiced law there. Among his clients was Gabriel Dumont, the rebel, an associate of Louis Riel.

Later he came back to Halifax and went into partnership with Robert Sedgwick, afterwards a deputy minister of justice and later a judge of the supreme court of Canada. Later he became connected with several other law firms.

Ship Huskies To Byrd

Dogs Required For Pole Exploration Have Left Vancouver

Vancouver.—When the R. M. S. Niagara sailed from Vancouver, January 9, for New Zealand and Australian ports she carried 15 young husky dogs for Commander Byrd's Antarctic expedition. The dogs have been housed at the Grouse Mountain Kennels here.

The dogs must reach Dunedin, N.Z., by February 7, in time to be forwarded by the steamer Elinor Bolling for the Antarctic base on the edge of the great ice barrier. E. J. Farr, agent for the White Pass and Yukon Railways, has completed all arrangements for the shipment in response to a recent request by Commander Byrd, it is stated.

Succeeds To Earldom

Alberta Farmer Is Now the 10th Earl Of Egmont

London.—Charles John Perceval, 9th Earl of Egmont, died recently.

Frederick Joseph Trevelyan Perceval, a distant relative, who resides at Priddis, Alberta, succeeds to the title.

The ninth Earl of Egmont was a widower without children or near relatives. His successor is the great-great-grandson of the Second Earl of Egmont. The earldom was created in 1733.

Harvest Help Influx

Hon. Peter Heenan Explains Why Harvesters Were Brought From Britain

Ottawa, Ont.—A total of 75,000 harvesters were needed in western Canada harvest fields last year and as no assurance was forthcoming from the eastern provinces that they would supply 44,000 to add to the west's available 31,000, the federal government was obliged to appeal to Great Britain for men and as a result the miner-harvester scheme was brought about. This was the explanation of the influx of British harvesters last year to help garner western Canada's wheat crop, given by Hon. Peter Heenan to the labor delegation which presented its legislation program to the federal cabinet.

The federal government had to protect itself, Mr. Heenan explained and as the eastern provinces could not assure the government of 44,000 harvesters, it was decided to bring ten thousand Britishers to help in the harvest fields.

The estimated requirement of 75,000 was made by a committee which investigated the harvesting conditions.

German Report Shows Gold Reserve Increase

Reichsbank Vaults Contain Twice As Much As Before War

Berlin.—Five years after the stabilization of the German Reichsmark the vaults of the Reichsbank contain more than twice as much gold as before the world war.

At the beginning of December the Reichsbank reserves showed a total of 2,650,000,000 marks worth of gold, while on December 31, 1923, the Reichsbank had only the equivalent of 1,170,000,000 marks in gold.

Since 1924 the gold of the Reichsbank show a constant increase, 1928 being a record year with acquisitions of gold amounting to 787,000,000 marks until the end of the first week of December.

During the years 1924, 1925, 1926 and 1927, the Reichsbank has bought up gold amounting to 293,000,000, 449,000,000, 377,000,000 and 24,000,000 marks respectively.

Japanese Stage Revolt

Assistance Of Infantry Required By Police To Control Peasants

Tokio.—Three companies of regular infantry were rushed to Namoru, a village near Fifu, when Japan's smouldering rural unrest flared up momentarily.

Two thousand peasants marched in a body on the local government offices and 300 police were unable to control them. Fighting ensued with casualties on both sides and the troops were called.

The peasants were protesting against a government riparian project which they claim would flood hundreds of acres of paddy (rice) fields.

It was officially reported that the peasants were still gathering in the neighborhood districts and arming with bamboo spears.

To Broadcast British Campaign Speeches

Broadcasting Debate Between Party Leaders Is Also Proposed

London, Eng.—Radio will play a big part in the political speech making of the coming general election campaign. Addresses by Hon. Neville Chamberlain, at Liverpool, on January 18, and Premier Stanley Baldwin, at Newcastle, on January 24, will both be relayed throughout the country. A proposal to broadcast a debate between the leaders of the three parties on the de-rating bill has been accepted by the Labor party, and it is expected the Conservatives and Liberals will fall in line.

Joins Governor's Staff

Ottawa.—Arrival of Captain R. J. Streatfield from London, Eng., to join the personal staff of His Excellency the Governor-General has been announced from Government House. Captain Streatfield is a nephew of Col. H. Streatfield, who was secretary to Lord Lansdowne, when the latter was appointed governor-general of Canada.

Expect Increased Migration

Liverpool, Eng.—Authorities, both British and Canadian, expect heavily increased migration of British farm settlers to Canada in the spring. Negotiations are under way between the two governments it is understood, looking to the movement of 6,000 trained and partially trained men for farm work in April.

Test Saskatchewan Seed

Seed Testing Laboratory Is Established At Saskatoon

Saskatoon. — Saskatchewan seeds will in future be tested in the laboratory of the Dominion Seed Branch of the federal department of agriculture which is being put into operation in rooms occupied by this department here, according to a statement given out recently.

Preparations for opening this laboratory and offices have been under way since December. In all about 3,000 feet of floor space will be occupied.

Nelson Young, of Winnipeg, acting district inspector for the whole district of Saskatchewan will be in charge. Dr. F. T. Wahlen, chief seed analyst of Ottawa, head of all laboratory work in Canada, is here in connection with the opening of the laboratory.

Science Aids Farming

Soon Be Able To Develop Wheat That Will Resist Both Rust and Frost

Ottawa.—Within the next few years Canadian experts will have developed scientific means to resist both frost and rust in the great the new Peace River fields, Hon. W. R. Motherwell, member of agriculture, said when addressing the first day's session of the eastern Canada Fruit and Vegetable Jobbers' Association here.

"Canada is a great next year country," said the minister. He meant, he explained, that no matter what conditions of one time were Canadian people had a habit of pinning their faith upon the future and working whole-heartedly for the prosperity of tomorrow.

NEW PICTORIAL STAMP ISSUES NOW ON SALE

Ottawa.—Canada's new pictorial stamp issue is completed and the four larger denominations are now on sale. The stamps are stated by post office officials to be regarded by philatelists as the finest produced in any country.

Each section of Canada is represented. The one-dollar stamp carries a picture of the parliament buildings and is significant of the central part of the country. For the maritimes the 50-cent denomination shows the schooner, Bluenose, winning the international fishermen's race. The Quebec bridge appears on the 12-cent stamp. The prairies are typified in the 20-cent stamp by a picture of a wheat field. The ten cent stamp bears a representation of a mountain in British Columbia with totem poles on the border.

The lower denominations carry the king's head. All numerals are larger than in previous issues. The stamps are stated to be among the finest examples of the engraver's art. Under the microscope the windows in the parliament buildings may be counted and figures of horses in the British Columbia stamp smaller than a pin head, are replete with detail.

PREDICTS POLITICAL CRISIS

Arthur Beverley Baxter, the Canadian who is managing editor of the Daily Express, London, who has "spilled the beans," as he himself cheerfully puts it, by announcing that Beaverbrook is prepared to go to the end with the die-hard political parties in Britain in order to effect an empire-wide tariff. Baxter, who made the announcement during his present visit in Canada, predicts that Beaverbrook's action will result in one of the greatest political crises in British history.

Boost Automobile Insurance

Expert States Rates Throughout Canada Are To Be Increased

Toronto. — Automobile insurance rates throughout Canada are to be increased sharply—as much as 50 50 per cent. for legal liability and as much as 25 per cent. for collision, it was announced here recently, following a meeting of the Canadian Automobile Insurance Underwriters' Association. The increase will be graded to differentiate between urban and rural areas.

It was stated that the ground upon which the increased rates would be put into effect were that business under present conditions was unprofitable and that Canadian rates are lower than those prevailing in the United States.

It was announced that after a survey of present rates at the meeting, it was decided that "adjustments were imperative."

McLean To Receive Eight Thousand Yearly

New Post Carries Salary Of a Deputy Minister

Ottawa, Ont.—Hon. J. D. McLean, former premier of British Columbia, and newly appointed farm loan commissioner, is in conference with departmental officials here and beginning the preliminary work of organizing the rural credits system.

Mr. McLean will be paid $8,000 per year, the salary of a deputy minister. Two other members of a farm loan board who will serve part time, will shortly be appointed.

Earthquake In Turkey

Constantinople.—A violent earthquake accompanied by a terrifying subterranean roar occurred at Angora recently. No accident to life or property was reported.

Dog Days of Quebec

There was great consternation in the canine world a few days ago when it was decreed that no dogs in harness must roam the streets of Quebec. There was a rumour that the great classic, the Eastern International Dog Sled Derby, was to be cancelled, that the Chateau team was to be banished from the terrace—all sorts of horrible rumours; but as afterwards developed, the edict was not directed against any other than the small boy who, with a dog he may, or may not, be able to control, dodges under the horses' hoofs and car wheels, thus endangering his own life and others, including that of his dog.

So once again "Mountie," veteran Mounted Police dog, will, as leader of the Chateau Frontenac team, wag his tail as the winter tourist pats his head. And the Dog Derby is on February 21, 22, 23. One hundred and twenty miles in three laps with, perhaps, men whose names were famous last year—St. Goddard, Seppala, Chevrette and Dupuis.

Visualizes Countless Ideal

Henry Ford Says Farming Needs To Be Completely Revolutionized

New York.—A world in which no one smokes or discusses prohibition where farmers no longer farm and housekeepers no longer cook, and machines take care of the drudgery is outlined by Henry Ford in his book, "My Philosophy of Industry," just published.

"The great problem in the home today," the Detroit capitalist points out, "is too much drudgery. We shall soon find a way to do much of the cooking outside and deliver it in a hot and appetizing condition at meal time at no greater cost."

The old farm is likewise due for a big change, according to Mr. Ford.

"Farming needs to be completely revolutionized," he says. "Large corporations, whose sole business it will be to perform the operations of plowing, planting, cultivating and harvesting, will supersede the individual farmer, or groups of farmers will combine to perform their work in a wholesale manner. This is the proper way to do it and the only one in which economic freedom can be won."

New Directors Elected

Aberdeen-Angus Association Announces Appointments For This Year

Brandon.—The election of directors for 1929 of the Canadian Aberdeen-Angus Association, has been announced by the secretary, F. W. Crawford, as follows:

For Ontario and other eastern provinces, John Lowe, Elora, Ont.; James Bowman, Guelph, Ont.; Col. R. McEwen, London, Ont.

Manitoba—Harry Leader, Burnside; J. H. McGregor, Brandon.

Saskatchewan—U. D. Lyon, Deveron; W. J. F. Warren, Helbeck.

Alberta—F. H. Reed, Lacombe; S. J. Henderson, Lacombe; Charles Elliott, South Edmonton.

New Airplanes Ordered

Five Are Especially Equipped For Patrols In Alberta

Ottawa. — Fourteen new Moth planes were ordered by the Department of National Defence for distribution among flying clubs in Eastern Canada and for forest patrol work out of High River, Alta., air station. The order involves more than $80,000.

The order calls for five machines especially equipped with radio sets, added fuel carrying capacity and special navigation instruments for the difficult patrols in Alberta where it is necessary for pilots to make long flights at high altitude.

Report Is Denied

Ottawa. — The Canada-United States anti-smuggling conference recently issued a denial of statements appearing in a morning paper that the Dominion will not accede to the request of the American delegation for refusing of clearance to liquor cargoes for the U.S.

Customs Inspector Resigns

Nanking.—Resignation of A. L. F. Edwards, a British subject, as inspector general of Chinese customs has been accepted. Deputy Inspector F. W. Maze was appointed to succeed Mr. Edwards who resigned as a protest against dual control of customs.

MAY RESTRICT MIGRANTS FROM CERTAIN AREAS

Ottawa.—It is reported here that Hon. Robt. Forke, Minister of Immigration, is planning to restrict immigration from Central and Southeastern Europe. The information is supposed to have been conveyed in telegrams from the minister, who is in the west, to Ottawa.

W. J. Egan, deputy minister, stated that he had received no such telegraphic communication from Mr. Forke.

The report suggested that the government would decline to renew the conventional agreement of the railways, which expires in October, 1930. This agreement enables the Canadian National and Canadian Pacific Railways to bring agricultural and domestic workers from these countries to Canada if they are suitable from a physical and mental standpoint. This agreement is subject to cancellation at any time on one year's notice, or can be suspended by order of the minister of labor if labor conditions here warrant it.

MAY HAVE TO ARBITRATE ON BRANCH LINES

Ottawa. — The official announcement of the C.P.R. branch line program which is to be submitted to Parliament is taken here as meaning that attempts to remove conflict between the two railway companies have failed of success and that parliament will be compelled to arbitrate between them.

In the official list of branch lines for which the C.P.R. will seek charters from Parliament are several which will be contested by the Canadian National Railways on the ground that they invade Canadian National territory. The full extent of the conflict will not be revealed until the Canadian National branch line program is announced. This program, it is understood, has not yet been formulated but undoubtedly it will be very large and will call for lines in much of the territory being sought by the C.P.R.

The Canadian National Railways will ask for a charter to build a branch line connecting Saskatoon and Melfort. They already have a line started there running north from Vonda. In 1924 the National Railways asked for the right to build such a line, but their bill was killed in the senate. This territory is one in which the most acute controversy occurs between the railway companies.

Winnipeg.—An era of expansion involving construction of approximately 1,200 miles of track into virgin country in Western Canada at a cost of not less than fifty million dollars is foreshadowed by the application of the Canadian Pacific Railway for new lines. This will mean employment of many thousands of men extending over a period of five years, it is understood.

National Resources Question

No Statement By Premier King In Respect To Province Of Alberta

Ottawa.—Premier Mackenzie King has not yet issued any statement with respect to the return of the natural resources to the province of Alberta, and it seems doubtful whether he will discuss the matter until definite agreement is reached.

When Premier Brownlee was last in Ottawa, it was understood that a tentative arrangement had been arrived at, but that it would be discussed further in correspondence between the two governments.

A despatch from Edmonton outlying what is said to be a new offer by the Dominion indicates that this correspondence is proceeding. The prime minister, however, has made no announcement as yet.

Reach Flin Flon By Auto

This Means Of Transportation a Success During Winter

The Pas, Man.—For the first time in the history of Northern Manitoba, automobiles are being used this winter as a means of transportation over the trails and lakes between The Pas and Flin Flon, a distance of 400 miles.

Jim Reid, a well-known mining man, started out for Flin Flon via Sturgeon Landing and word was received here that he had reached the landing. Two other parties started out on the same trip a little later.

Automobiles are running daily between Cranberry Portage and Cold Lake as well as aeroplanes, tractors and snowmobiles.

Plans Non-Stop World Flight

Goebel Will Attempt It If Financial Backing Is Assured

Wichita, Kansas.—A non-stop 24,000 mile around-the-world aeroplane flight is the next objective of Arthur Goebel, of Wichita, winner of the Dole flight to Honolulu.

The flight will be attempted as soon as preparations can be completed and financial backing assured, Goebel said, in revealing his next endurance flight.

Endangered Many Lives

Montreal. — Five minutes before the opening of the morning classes of St. Edouard School here recently, a stick of dynamite was found under the teacher's desk. A boy who admitted the deed, was charged in juvenile police court with endangering the lives of 500 people.

Would Create New Department

Ottawa.—Creation of a Federal ministry of fisheries will be sought by a delegation from the Canadian Fisheries Association when it waits upon the Premier in the near future.

TIME TO THINK ABOUT SEED GRAIN

(Experimental Farms Note)

While admitting the importance of high fertility and good cultivation as essential for a good seed bed, let us not forget the importance of sowing good sound seed, pure as to variety, free from weed seeds, of high vitality, and which has been treated for smut.

The time was never more opportune or more ripe for the necessity of sowing pure seed than it is today.

With the ever increasing weed problem and the multiplicity of varieties that are on the market, the time is at hand when we must sow pure seed if we expect to reap the highest returns from our farms.

The wideawake farmer does not wait until the last minute to prepare and clean his seed and will always be found ready when seeding time arrives, to sow seed that has been cleaned, of good germination, and which has been treated for smut.

The practice of the Morden Experimental Station in regard to seed grain, is to clean all grain intended for seed purposes [illegible] after freeze up, and to forward [illegible] pound samples to the Dominion Seed Branch, Winnipeg, for grading and germination test. The Seed Branch, Winnipeg, will test samples of grain from past seasons' crop received before January 1st, free of charge. Too few farmers avail themselves of this opportunity.

With the long winter days at hand, when the farmer has ample time to spare, why not crank up the little gas engine, start the fanning mill going, get the seed grain ready, and be prepared for the big rush in the spring.

For those farmers who are intending purchasing seed grain, now is the time to get busy. Don't delay. If you secure your seed early, then you will have no worries about seed grain when spring opens up.

In a seed grain survey made in [illegible] one farmer was sowing seed supposed to be Marquis, but upon analysis, only 60 per cent was Marquis, while the other 40 per cent consisted of weed seeds, and other varieties of grain.

We cannot hope to produce grain that will maintain our high standards on world markets, if more attention is not given to the seed we sow.

HOW HONEY MAY BE USED

(Experimental Farms Note)

Honey, once the world's only source of sugar is still the best and purest of Nature's sweets. Not only is honey a sweet, but it is also a valuable energy producing food, and as such deserves a place on the daily menu of every Canadian home. It is especially good for children because it satisfies their natural craving for sweets and also supplies the necessary energy for their play or work.

Honey is the nectar of flowers, gathered and modified by the honey bee. Approximately it consists of 85 per cent invert sugars, 18 per cent water, small quantities of mineral matter and volatile oils. Honey varies in color and flavor according to its source, but all is of equal value as a sweet or food. All Canadian honey granulates sooner or later, depending upon the proportions of the invert sugars present. Unfortunately, granulation is often taken as a sign of adulteration, this, however, is not the case, as granulation indicates purity and does not in any way affect the quality of the honey.

Honey may be used in many ways, the most common way being as a spread or for dessert. Tons of honey are now being used in the manufacture of bread, cakes, cookies, etc., and many a housewife has found that when honey is used instead of sugar in the making of such articles, a better flavor is produced, and that the product will keep fresh and moist for a much longer period. Honey mixed with peanut butter or cheese also makes an excellent filling for sandwiches, and as a sweetener for cereals, fruit drinks, ice cream, etc. it is unsurpassed. Honey can also be used instead of sugar for preserving fruit and in the making of candies, and will impart a flavor all its own. In almost any recipe that calls for the use of sugar, honey may be wholly or partially substituted and the palatability and food value of the product increased by doing so.

TOWN OF TOFIELD
Notice of Annual Meeting

Public notice is hereby given that a meeting of the electors of the Town of Tofield will be held in the Town Hall, at the Town of Tofield, on Friday, January 25th, 1929, at 8 o'clock p.m., for the purpose of receiving the auditor's report of the finances of the town up to the preceding 31st day of December and for the purpose of receiving the reports of the chairman of the various committees of the council.

Dated at Tofield, this 14th day of January, A.D., 1929.

J. W. CHAPMAN,
Secretary-Treasurer.

TOFIELD SCHOOL DISTRICT No. 1939
Notice of Annual Meeting

Public notice is hereby given that a meeting of the ratepayers of the Tofield School District No. 1939, will be held in the Town Hall, Tofield, on Friday, January 25th, 1929 at 8 o'clock p.m.

Dated at Tofield, this 14th day of January 1929.

J. W. CHAPMAN,
Secretary-Treasurer.

January Colds

Are a source of annoyance as well as great discomfit (if nothing worse) and great care should be taken to avoid them. When one does become afflicted, however, it is necessary that PROMPT action be taken.

We have many valued and tried remedies that will help you to combat the effects of a cold. We suggest to our farmer friends especially, that they purchase a remedy and have it on hand, thus saving a long drive into town on a cold wintry day. Prices are reasonable and range of choice is extensive.

A. A. BEIRNES, Tofield

LOCAL AND PERSONAL

Born.—To Mr. and Mrs. C. W. Piper on January 20th, a daughter.

Miss Lorett Ross spent Sunday in Edmonton.

Miss M. Wood was home over the week-end returning Sunday evening to the city.

Mr. Durant and baby of Edmonton, spent the week end at the Wood home.

"Chip" McDonough, a former resident of Tofield, was in town on Tuesday.

Miss A. Wood is now nursing in Kingman.

Mrs. Carter of Holden is visiting Mrs. L. C. Hay.

Where are you going on Saturday night, January 26th? Why to the C.W.L. chicken supper at the curling rink. The ladies are serving a sumptuous supper from 5 to 7:30, You had better come along too. The charge is only 50c.

The annual meeting of the parishioners of Holy Trinity Church, Tofield, will be held on Sunday, January 27th, after the evening service, at which all members are requested to be present.

B. M. Malin, secretary of the Alberta egg and poultry pool, also Major J. Hughes, president of Co-operative Hatcheries at Vegreville will address a meeting in Tofield on Tuesday, January 29th in the W.I. rooms. All interested in poultry as well as all pool members are invited to attend.

Mrs. Snell, who recently returned from the Camrose hospital, contracted further cold and is again confined to her bed. Miss Nelson of Duhamel is attending to the household duties during the day, and Mrs. Borden attending to the patient during the night.

MEN'S BONSPIEL IN FULL SWING

As this is being written the Tofield Men's Curling Club Bonspiel is in full swing. There are quite a number of visiting rinks, including rinks from Edmonton, Viking, Holden, Wainwright, as well as a full complement of local rinks.

As in former years there are three competitions and a consolation even.

A more detailed account and list of prize winners will appear next week.

COMMUNICATION

The Editor, Mercury, Tofield:
Dear Sir:

I would like, through your paper, to thank all those who sent in clothing for the needy mother with nine children at Christmastime.

The response was so generous that we were able to send a complete warm outfit, even to coats, for each member of the family, mother included; and had a large bale of surplus which was sent to the Journal Sunshine Club in Edmonton.

My acknowledgement is rather tardy because of waiting for a letter from the woman.

The clothing was most gratefully received and the mother asks that her sincere thanks be conveyed to everyone who so kindly helped her and her little ones in their necessity.

Respectfully yours,
Mrs. N. Baptist.

W.I. NOTES

On Thursday evening January 10, the members of the Women's Institute gathered at the Institute rooms to partake of their annual banquet. After all had done justice to the delicious repast, the programme was opened by a few words of welcome from the president and the retiring officers were all presented with a Wedgewood cup and saucer as a small token of appreciation of the services they have so unselfishly rendered. The retiring secretary gave a report on the activities of the Institute during the past year during which time much was accomplished. The Institute choir, consisting of Mrs. Pincott, Mrs. McLaughlin, Mrs. Firth, and Mrs. Ward favored us with an Institute song, very cleverly composed by some of their number, which to say the least was immensely enjoyed by all. Mrs. Pincott favored us with a humorous reading which was also thoroughly enjoyed. A short discussion was then held on the programme for the coming year, after which all joined in singing Auld Lang Syne.

Let us again extend a hearty welcome to all women interested to join us at our meetings.

TOFIELD LADIES' BONSPIEL

The second annual bonspiel of the Tofield Ladies' Curling Club, came to a successful conclusion on Thursday night last, with two competitions being won by Edmonton rinks and the third by a local rink.

Mrs. Pat Rose, of the Granite, won the Grand Challenge and the Ash cup, when she defeated Mrs. J. Lee, of Tofield, in the final game. Both rinks did some fine curling and at the eighth end, the local rink was four up. In the pinch Mrs. Rose made a strong comeback to score three points and in the tenth the final end, she scored two more to win the game by a score of nine to eight.

In the previous game in the semi-finals of that competition, M Rose and Mrs. J. D. Hannan of the local club did some nice curling and in this game as in the former the Granite curlers came from behind to win by one point.

Mrs. Terwillegar, of the Royal Victorians, won the second competition and the Young cup, when she defeated Mrs. McCauley of the locals in a very close game. When the last end came to be played, the locals were one up but Mrs. Terwillegar made her last rock count so as to make two on that end, winning the game by a score of nine to eight.

Mrs. J. Lee, of Tofield, who reached the finals in the first competition, defeated Mrs. McTavish of the Granite in the finals of the Kline competition. This was the last game of the 'spiel and drew a large number of spectators. The game was closely fought all the way to the last rock, Mrs. Lee making a perfect raise to win the game.

Personnel of Rinks

The personnel of the rinks getting to the finals was: Mrs. Rose (skip), Mrs. J. M. Hall, third; Mrs. Sam Togan, second, and Mrs. G. N. Burke lead.

Mrs. J. Lee (skip), Mrs. A. B. Clutterham, third; Mrs. C. J. Craig, second; Mrs. J. W. Morton, lead.

Mrs. N. L. Terwillegar (skip); Mrs. McKibbon, third; Mrs. McBeth, second; Mrs. Harris McCloud, lead.

Mrs. McCauley, (skip); Mrs. L. M. Abbott, third; Mrs. J. W. Chapman, second; Mrs E. W. Rogers, lead.

The personnel of Mrs. McTavish's rink is not known. There were nine rinks from Edmonton, that took part in the 'spiel, namely: Mrs. N. L. Terwillegar, Mrs. Miller, Mrs. Lambert, Mrs. Quesnel and Mrs. Norquay, of the Royal. Mrs. Muir and Mrs. Mann of the Edmonton clubs, and Mrs. Pat Rose and Mrs. McTavish of the Granite

On the second evening of the 'spiel the games were called off while the local ladies entertained the visitors at a banquet which was held in the spacious club waiting room. Following the banquet a social time was had, which made a very pleasant interlude in a strenuous three days of curling.

The winners of the various events are as follows:

Grand Challenge: Mrs. Rose, Edmonton 1st prize and cup; Mrs. John Lee, Tofield, 2nd prize; Mrs. Hannan, Tofield, 3rd prize; Mrs. Norquay, Edmonton, 4th prize.

Young cup: Mrs. Terwillegar, Edmonton, 1st prize and cup; Mrs. McCauley, Tofield, 2nd prize; Mrs. Hannan, Tofield, 3rd prize; Mrs. Bruce, 4th prize.

Kline cup: Mrs. John Lee, Tofield, 1st prize and cup; Mrs. McTavish, Edmonton, 2nd prize; Mrs. Bruce, Tofield, 3rd prize; Mrs. McLaughlin, Tofield 4th prize.

OBITUARY

Mr. and Mrs. P. Aasmo, a well-known and highly respected couple of this community have passed away with just a few days between. Mrs. Aasmo took sick with the flu, and never recovered.

Peder Aasmo passed away on January 9th, at the age of 60. The funeral took place from the home on Sunday, the 13th. The funeral service was held in the Lutheran church, Ryley by the Rev. Bjelde and Dr. Lagerkoist. He was laid to rest at the Ryley cemetery

Mrs. Ingrid Aasmo passed away at the age of 62, on January 17th. The funeral took place on Sunday, January 20th from the home. The funeral service was held in Ryley Lutheran church by Rev. Bjelde, Rev. Labb and Dr. Lagerkvist. She was laid to rest by her husband's side at the Ryley cemetery. The flower tributes were many and beautiful and the church was packed on both occasions. Besides many friends, relatives, they leave to mourn their loss, two grown daughters, Mabel and Ida who now live at the farm.

KETCHAMOOT

Visiting and gatherings have been scarce the past week, owing to the low temperatures and drifted roads. The minister, Rev. Gordon was unable to get through on Sunday for preaching services.

Mrs. Chas. Whillans returned home on Monday after a week's holiday visiting her mother in Edmonton.

Mr. A. Harrison went to Edmonton on Sunday evening where he will sit on the jury.

Mrs. Henry McGinitie was able to return home on Friday after a two weeks stay in an Edmonton hospital following an operation.

Mr. and Mrs. O. Barnes braved the weather and roads on Sunday and spent the day visiting Mr. and Mrs. R. Phillips of Lakeshore.

Mr. Paul McMullen left on Saturday for Vancouver where he will visit his wife and family

Mr. Fred Sutton was a passenger to Edmonton on Friday evening

Miss Annie Bruhn is assisting her sister Mrs. Henry McGinitie in the home.

Ketchmoot friends of the Aasmo family in the Bardo district were very sorry to hear of the death of Mr. and Mrs. Aasmo, both passing away within the past two weeks of pnemonia. Mrs. Aasmo was a sister of Mr. P. B. Anderson and Mrs. Finseth. We extend our sincere sympathy to the two daughters, Mabel and Ida. Mabel also contracted pnemonia but hopes are held for her recovery.

KINGMAN

J. Fletcher attended the U.F.A. Convention in Edmonton last week.

Mr. and Mrs. T. Grahn motored to Hay Lakes on Wednesday.

Oscar Thompson spent the weekend in Edmonton.

T. J. Rogness was a business visitor in Camrose on Thursday.

Inga and Harold Johnson are visiting in Okatoks for a few weeks.

Miss Lillian Lindberg and Alvin Bjorgum had some dental work done in Camrose on Saturday.

Mrs. C. Rendall is now on the sick list with a bad case of pnemonia.

Viola Lindberg celebrated her 5th birthday last Saturday evening by entertaining a number of her friends.

Miss May Welsh spent the week-end at the home of Mr. and Mrs. H. Pederson of Camrose.

Mr. and Mrs. T. Grahn and family motored to Camrose on Sunday.

Miss Martha Wideman was rushed to the Camrose hospital last Monday where she had an operation. She is progressing favorably.

AMISK CREEK

Our deepest sympathy is extended to the Aasmo sisters and relatives in their sad and sorrowful bereavement.

The Ladies' Aid and members of the congregation held there annual meeting in the church on January 7th. The same officers were elected, namely, Mrs. E. A. Moen, president; Mrs. I. C Olson, secretary-treasurer; Mrs R. O. Berg, vice-president. The next meeting of the Ladies' Aid will be held at the P. O. Finsten home, February 6th.

The young people's program which was to be held in the church on January 13th, had to be postponed on account of the flu.

Mr. E. A. Moen attended the U.F.A. convention held in Edmonton last week. He contracted the flu while there and this developed into pnemonia. Mrs. J. L. Gray is caring for him and we hope for a speedy recovery.

Margaret Moline has been on the sick list, but we are glad to say is now much better.

Conrad Patterson visited with his brother (who is still at the hospital) last week. Arthur is now getting much better and we hope he will be able to come home soon.

Mr. A. Erickson visited the city last week.

Gunwald Finsten attended the young peoples' convention held in Camrose last week.

LINDBROOK

At last we got the real seasonable weather! Well, WHICH do you prefer?

A childrens party was given at the home of Mrs. A. Whibley last week. Games were the order of the evening and the young guests enjoyed themselves immensely. Those present were Miss. K. and G. Leahy and Evelyn Glenn and Messrs R. and A. Scott and V. Glenn. Time was called at 10:30 p.m.

There has been a recurrence of the flu in the Westlake SD. This time the Herbert family seem to be bearing the brundt of it, altho others have it too, with the result that the school attendance is pretty slim these days.

We are glad to note that Mr. Hedley Burton is up and around again after his illness, a bit worn and shaky perhaps, but that's better than the sick bay.

Mr. L. Hooper made a trip to Viking last week on business.

Mr. Lawrance Gill returned home from the Olds agricultural College which is shut down temporarily on account of so much sickness, measles being the prevailing ailment.

Mr. Elmer Lindberg left for the city last Monday night on business.

Mr. Stanley Smith has been assisting on the Bailey ranch last week; Mr. J. Bailey being down with lumbago. We hope that by now he is O.K. again.

MRS. F. E. HILLS VISITING AMONG FORMER PUPILS

(From the Wright County Monitor)

Mr. and Mrs. F. C. Hartshorn of this city have been enjoying a visit from Mrs. Hartshorn's brother and wife Mr. and Mrs. F. E. Hills of Tofield, Alberta, Canada, since the first of the year.

Many of the old timers of Clarion will be interested in learning that Mrs. Hills was one of Clarion's first school teachers. Mrs Hills, then known as Miss Vira Gates, taught in the schools of this place in 1876. She has recalled to mind a number of her former scholars.

This is Mrs. Hills' first visit here in 25 years and it is needless to say that the Hartshorns and Hills are enjoying this visit to the fullest extent. Also that a number of Clarionites will enjoy a visit with their former techer.

LAKESHORE

Born.—To Mr. and Mrs. C. W. Piper, on Monday, January 21st, a daughter. Congratulations.

Mr. and Mrs. Oscar Barnes of Ketchamoot visited Mr and Mrs. R C. Phillips on Sunday

Mr. and Mrs. H. Eaton were guests at the J H Johnston home on Sunday.

John Warner and son John jr., are the latest victims of flu in this neighborhood but are both well on the road to recovery now.

Mrs. Dorothy Walker and daughters Fern and Bessie visited Mrs Johnston on Sunday

Archie Munro visited friends in the district over the week-end.

A party of young people went sleighing up in the reserve on Sunday and report a splendid time. They visited Iron Spring, near Blackfoot Lake.

BIG NIGHT AT THE VARIETY SATURDAY

On Saturday, January 26th, an extra large programme will be presented at the Variety Theatre, Tofield. Commencing at eight o'clock there will be shown "Wolf Fangs", starring Thunder, the Wonder Dog. This is a very good feature, receiving the unqualified approval of all those who have seen it. Following this the Metropolitan Entertainers will present an up-to-date and snappy programme of vaudeville, music, illusionary work, etc. This company comes well recommended and should greatly please the Tofield audience. Following the programme by these artistes there will be a dance until twelve o'clock with a first class orchestra to supply the music. The cost of the entire night's programme is only $1.25, made up as follows. For the picture show only, 35c. For the vaudeville show 75c. For the vaudeville show and dance $1.00.

No Better Winter Breakfast than

SHREDDED WHEAT

Warms - high in calories and carbohydrates
Healthful - easy to digest, a safe regulator
Delicious - heat in oven, serve with hot milk
Made by The Canadian Shredded Wheat Company, Ltd.

Western Canada in the Spotlight

The attention of people in all parts of Canada, and in fact of the world, will be directed to the prairie provinces of this Dominion during the next few months in a way and to an extent probably unprecedented in the history of any country by reason of the applications to the Dominion Parliament for charters to build many hundreds of miles of railway in the northern portions of Manitoba, Saskatchewan and Alberta.

Both the Canadian Pacific and the Canadian National Railways are asking Parliament for power to enormously extend their lines into the north country and both announce their eagerness to proceed with the work of construction with the least possible delay. There is the keenest kind of rivalry between these two giant systems for rights into certain sections of this territory with the result that a battle royal will take place at Ottawa when Parliament assembles.

One thing emerges quite clearly from the situation that has developed with almost startling suddenness and that is, that, despite all former statements and predictions to the contrary, the railway managements of Canada are now convinced of the enormous wealth of natural resources in the more northerly portions of Canada and of the success of the Hudson Bay Railway and Hudson Bay route to the markets of the old world.

There had long been a suspicion in the minds of many Western people that the former opposition in Montreal and other Eastern centres to the construction of the Hudson Bay Railway was based, not on their professed scepticism as to the feasibility of the route, but because of their belief that the route would prove to be an unqualified success, with all the upheaval which the opening of this short route from the heart of the prairies to the markets of the world would cause in existing transportation conditions, rates, and routing of traffic.

Examination of the plans of the railways, as thus far outlined, indicates a reversal of formerly held views that the people of Western Canada should be served by lines running east and west with all the tremendous production of the prairies moving out either to the Atlantic or the Pacific seaboards, and all our imported products coming in through the same ports. Now, both of the great railway companies appear to be determined to connect up their east and west lines by short branches here and there and the construction of great north and south main lines, all stretching hundreds of miles north of existing settlement and heading towards tidewater in the north. A veritable railway revolution is in prospect.

This declaration of absolute confidence in the northern half of these prairie provinces, and in the Hudson Bay outlet, evidenced by the willingness of the biggest financial men in Canada interested in the C.P.R. to expend tens of millions of dollars in northern extensions, will attract the attention of the whole world and will constitute the greatest publicity this section of the Dominion has ever received.

Regardless of the decisions reached by Parliament as to division of the northern territory between the rival systems, and the respective zones to be allotted to each, the result will be to roll back the map of Canada hundreds of miles. The old reproach and weakness of Canada that it consisted of a narrow strip of more or less settled territory extending thousands of miles from the Atlantic to the Pacific along the Canada-United States boundary line, is to be removed. To the Dominion will be given great depth as well as great width and what for centuries has been looked upon as barren wastes of extensive territory, but of no value, will become a storehouse of treasure, the development of which will add enormously to the population and wealth of the Dominion, providing new avenues of employment, and diversified employment at that, for the people of Canada.

Utilizing Coal Resources

The new Fuel Research Laboratories of the Department of Mines at Ottawa, were designed and the equipment selected with a view to carrying out investigations which would be in the interest of the development of the coal resources of the Dominion.

Fresh Supplies In Demand.—Wherever Dr. Thomas' Eclectric Oil has been introduced increased supplies have been ordered, showing that wherever it goes this excellent Oil impresses its power on the people. No matter in what latitude it may be found its potency is never impaired. It is put up in most portable shape in bottles and can be carried without fear of breakage.

Canadian Cheese

The production of factory cheese in Canada in 1928 amounted to 171,731,631 pounds. The value was $41,733,300.

Proves Columbus Was Spaniard

A document found in the archives of Pontevedra Parish, mentioned that place as having been the birthplace of Christopher Columbus. It thus bears out the claim that the discoverer of America was a Spaniard and not a native of Genoa, Italy. The document contained a description of the burial of Columbus.

Frenchman Invented Eyelet

French celebrated recently the centenary of the birth of the metal eyelet Francois-Jean-Guillaume Gobin Daude was the inventor. The first application of the eyelet was to corsets and it gave that industry a great impetus. Eyelets later were put in shoes.

Snake bites kill more than $1,000,000 worth of cattle in Texas each year.

Simple Precautions Against FLU
Sore Throat — — The Danger Signal

Health Authorities Point Out The Necessity Of Treating The Simple Cold At Its Beginning

Nearly every case of "Flu" starts with a simple cold. At first the throat is sore—often just a little hoarse—soon the infection goes lower—then the chest is affected. A safe plan is to gargle the throat three times daily with "Nerviline"—this will keep the throat free from germs. If there is any sign of tightness in the chest, rub on Nerviline—every drop will penetrate deeply—congestion will be relieved—the cold will break up quickly. Many a dangerous case of "Flu" can be avoided by this simple home treatment.

Of course it is always wise to take some relaxing medicine, and for this purpose immediate results will be secured from Dr. Hamilton's Pills—they purge the system of impurities and carry off a lot of disease—breeding wastes.

This combination treatment of Nerviline and Dr. Hamilton's Pills is very effective for Grippe, Influenza, Bad Colds, etc., and can be relied upon to give very satisfactory results.

Alberta's Peer's Estate

Estate Of Earl Of Egmont Estimated To Approximate One Million Dollars In Value

That the estate to which the Earl of Egmont, of Priddis, Alta., has fallen heir, will approximate one million dollars is an estimate made at Calgary with his assistance.

The bulk of the estate comprises Avon Castle, the family seat at Ringwood, Hants, and 1,300 acres surrounding it.

Some $40,000 has been spent latterly in improving the land and the residence, declared the new earl.

In addition, he says, there are investments in stocks and shares and in war bonds amounting to a large total.

A STOMACH RESTORER

Good Advice From One Who Had Suffered Much

Discomfort after eating, gas pains in the intestinal tract, pains around the heart, sour risings in the throat called heartburn, are common symptoms of dyspepsia. It is a condition often neglected until it has done permanent harm, yet the treatment is simple. The great contributing cause to this trouble is thin blood. Good blood and plenty of it is required by the stomach to function properly. If the blood is thin the stomach becomes sluggish, food lies undigested, gas forms causing pains, often around the heart. Instead of getting nourishment from the blood the system gets poison. The proper treatment is to enrich the blood, and there is no other medicine can do this as promptly or as effectively as Dr. Williams' Pink Pills. The sole mission of these pills is to make new, rich, red blood, which reaches every organ and nerve in the body and thus not only banishes indigestion and dyspepsia, but also all other troubles having their origin in weak watery blood.

The splendid results following the use of Dr. Williams' Pink Pills is shown by the case of Mrs. Lucy A. Cushing, a former resident of Kempt, N.S., but now living with her son at West Bethel, Me. Mrs. Cushing says: "I have no hesitation in strongly recommending Dr. Williams' Pink Pills. For years I was a great sufferer from indigestion. Always after eating I suffered from pains in my stomach and other distressing symptoms that accompany this ailment. I tried different doctors while residing at my old home and also at West Bethel, but without getting relief. I was advised by a friend to try Dr. Williams' Pink Pills. I did so and I must say that I am feeling very grateful ever since to the good friend who gave me the advice. I soon found the pills helping me and by the time I had taken nine or ten boxes I was completely restored to good health. Though I am now in my 76th year I am feeling as well and smart as I did at 35, and am enjoying life once more."

You can get these pills through any dealer in medicine or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Speakers At Dinner Of Canadian Society

U.S. and Canadian Senators Guests At Function In New York

The Canadian Society of New York helped to strengthen the North American entente cordiale by bringing together as their guests at their annual dinner two senators, one from the Canadian Upper Chamber, Hon. C. P. Beaubien, K.C., and the other from the United States House, Hon. Simeon D. Fess, of Ohio. The speakers dealt with the aspirations of the two countries.

Senator Fess frankly discussed the two chief issues now agitating the Congress, the Kellogg treaty and the new cruiser program, and he readily supported both. The United States, he declared, should not put any obstacle in the way of the effort to banish war.

Senator Beaubien reviewed the development of Canada in recent years and painted a glowing picture of the Dominion's future.

"Canada, with a vision quickening and widening, has remained sober-minded, fairly traditional, and, I think I can add, hardworking and still law-abiding and God-fearing," he said.

"When you grow up you shall be a gentleman."

"I don't want to be a gentleman. I want to be like you, daddy."—Jugend, Munich.

WAS PROMINENT RUSSIAN

Outstanding personality of the Russian armies during the world war and regarded by Russian royalists as claimant to the throne of that country, Grand Duke Nicholas, cousin of the late Czar, died of pneumonia at his home in Antibes, France.

Winnipeg Newspaper Union — Fashions

342

Grace and Utility

A sheer woolen in Chanel blue with shirt in wrap-around effect ending in graceful side drape. The neckline of molded bodice simulates a diagonal closing, finished with applied bands and jabot frill of plain woolen. The flared cuffs of dart-fitted sleeves and belt use the plain woolen contrast. Modernistic buckles in deeper blue appeal at neckline, belt and sleeves. Style No. 342 is chosen by the smartest school and college girls and youthful type of woman for general utility wear. It is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust, and can be made with 2¾ yards of 40-inch material with ⅜ yard of 36-inch contrasting for the 36-inch size. Printed sheer rayon velvet, velveteen, crepe satin, silk crepe, canton crepe and wool crepe also appropriate. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Shows Canada's Loyalty

London Paper Expresses Appreciation Of Reverse To Penny Postage

The London Sunday Times in an editorial headed "Canada leads the way," welcomed the increased British immigrant quota as emphasizing the practical loyalty of Canadians to their British stock, but fears that the proper advantage may not be taken of it in Great Britain. The newspaper quotes further encouragement both of propaganda and finance. The Sunday Times also expresses appreciation of the penny postage and finds in it "a signal proof of Canada's strong imperial sentiments."

After urging Hon. Winston Churchill, chancellor of the exchequer, to follow Canada's example the Sunday Times advocates a common empire stamp which, it states would have a real psychological value as a symbol of imperial unity.

LAXATIVE FOR BABY THAT "STAYS DOWN"

Baby's tiny system rebels against castor oil and strong purgatives; but here's a medicine that just suits him. And it does the work quickly and so gently that Baby doesn't feel it. Fletcher's Castoria is soothing cross, fretful babies and children, to sleep and making the feverish, constipated, upset ones well and happy, in millions of homes today. Castoria is purely vegetable, harmless and endorsed by the medical profession. Avoid imitations. The Chas. H. Fletcher signature marks genuine Castoria.

Kellogg Explains Treaty

The Paris pact for renunciation of war commits none of the signatories to it to go to war in defence of any country attacked in defiance of the treaty, Secretary of State, Frank B. Kellogg, informed the Senate committee on foreign relations during the recent hearings. He added that Canada made it plain that the dominion would not be a party to the treaty unless that was understood.

An acquaintance says the most undesirable place in the world to live is beyond one's income.

New Metallurgical Discovery

New Process Said To Make Cardboard As Strong As Iron

What is called "the most important metallurgical process since the discovery of steel" is announced in an advertisement by the Elmore Electro-Chemical Process, Ltd., published in the London newspapers.

Materials which are non-conductors of electricity can now be electroplated, according to the claim made by this company, which asserts that wood, silk, porcelain paper and all metals can henceforth be coated with a surface of non-corrosive metal. As a result of the treatment even such flimsy materials as cardboard or plywood can be given the strength of iron and made resistive to the corrosive action of steam, heat, chemical fumes and water, it is declared.

Fortification of the frail fabric of airplanes and airships to the strength of steel, and solution of the boat-builder's problem by entirely metallizing craft of every description, are among the claims made for the new invention. Woodwork and textiles can be similarly metallized, it is asserted.

The advertisement asserts that the British Admiralty and Air Service have ordered articles on which the electro-chemical process has been successfully used.

Needed Some Practice

Aunt: "Johnnie, why is it that you never remember to say 'Thank you'?"

Johnnie (eyeing wistfully a box of chocolates on his aunt's knee): "I expect it's 'cause I don't get enough things given to me to practice."

Awful Asthma Attacks. Is there a member of your family who is in the power of this distressing trouble? No service you can render him will equal the bringing to his attention of Dr. J. D. Kellogg's Asthma Remedy. This remarkable remedy rests its reputation upon what it has done for others. It has a truly wonderful record, covering years and years of success in almost every part of this continent, and even beyond the seas.

A python 20 feet long, a giraffe 20 feet tall, an elephant weighing four tons and an insect measuring 12 inches are among the "records" of the London zoo.

Minard's Liniment prevents Flu.

The palatial stables of the former German Kaiser have been converted into Berlin's first indoor tennis court.

For Colds –

How many people you know who end their colds with Aspirin! And how often you've heard of its prompt relief of sore throat or tonsilitis. No wonder millions take it for colds, neuralgia, rheumatism; and the aches and pains that go with them. The wonder is that anyone still worries through a winter without these tablets! They relieve quickly, yet have no effect whatever on the heart. Friends have often told you Aspirin is marvelous; doctors have declared it harmless. Every druggist has it, with proven directions. Why not put it to the test?

Aspirin is a Trademark Registered in Canada

ASPIRIN

THE MERCURY, TOFIELD, ALBERTA.

UNITED FARMERS ASK FOR BETTER FREIGHT RATES

Vancouver.—Backed by the United Farmers of the three prairie provinces, the United Farmers of B.C. will carry British Columbia's claim for better freight rates to the governor-in-council at Ottawa.

The appeal has been prepared and forwarded to Ottawa by G. G. McGeer, K.C. The appeal involves three requests: That export grain rates on the Canadian Pacific Railway to Vancouver be reduced to the level obtaining at Fort William; that domestic grain and flour rates over both trans-continental lines be reduced to the level obtaining to Fort William and the removal of the mountain differential in all freight rates covering the movement of all traffic into, from or through British Columbia.

Mr. McGeer will conduct the case at Ottawa when argument is heard.

Mr. McGeer will also continue his appeal to the board of railway commissioners for leave to appeal to the Supreme Court of Canada from the commissioners' decision in the matter of domestic grain rates.

Mr. McGeer announced his intention of appealing direct to the governor-in-council before the board of railway commissioners. Later, however, when the board gave permission to Leon J. Ladner, K.C., who represented the attorney-general of British Columbia, permission to make formal application for extension of time in which the appeal would be made, Mr. McGeer said that if the attorney-general was going ahead with the appeal he was also going to ask for leave to appeal on behalf of his clients to the supreme court.

J. E. McMullen, acting for the Canadian Pacific Railways, said the application was one that should be answered by the full board at Ottawa. R. W. Hannington, counsel for the Canadian National Railways, supported Mr. McMullen's argument.

The chief commissioner, H. A. McKeown, said that in view of the circumstances connected with the application, and the fact that no notice had been given the railways, the application might very well be heard in Ottawa.

Favor Old Age Pensions

Lethbridge, Alta.—Old age pensions will be urged upon the Alberta government by the Alberta federation of labor as a result of a resolution passed by the delegates at a recent session. Alberta is the only western province which has not now this legislation in force and the labor men are determined that enabling laws shall be passed at the coming provincial session.

Gigantic Wave Strikes Liner

New York.—Leonardo Fiorani, cook, was killed and several other members of the crew were injured by a gigantic wave that surged over the bow of the White Star Liner Majestic on the crossing completed when the ship docked here. The wave twisted steel bulwarks, wet the mail, ruined part of the cargo and necessitated removal of the 200 third class passengers to other quarters.

Gift For McGill University

Montreal.—A gift of $3,000 has just been received by the McGill faculty of applied science from Walter W. Colpitts, of New York, to establish a graduate scholarship in civil engineering at the University in honor of Dr. John Bonsall Porter, emeritus professor of mining engineering. Mr. Colpitts graduated in 1899 from McGill faculty of applied science.

Again Heads Alberta Farmers

Edmonton.—Opposition to re-election of H. W. Wood as president of the U.F.A., was drowned in a vote which swept him into the first executive office for the fourteenth time. To a motion that he be "retired" as honorary president was added an amendment that he be made president. The amendment was passed by overwhelming vote.

Increase In Dairy Products

Fredericton, N.B.—The value of cheese, dairy and creamery butter in Canada during 1928 will show an increase of more than $11,360,000 over the preceding year, J. F. Singleton, chief of the dairy markets division of the federal department of agriculture, told delegates to the New Brunswick Dairymen's convention in session here.

Discussed Problems Of Egg Marketing

Canadian Producers' Association To Take Matter Up With Government

Toronto.—Egg marketing problems were discussed at the annual convention of the Canadian Producers' Association here. In view of the unprofitable situation which has confronted the dealers on account of surplus supply it was decided that a committee be named to take the matter up with the Dominion government. W. S. Cameron, Toronto, president of the association, suggested that the committee be representative of dealers, exporters and producers.

Alfred McCune, of Cheltenham, Ont., urged that advertising calculated to insure the consumption of eggs should be undertaken by the government.

Mr. Cameron in his presidential address, stated that the season had been a profitable one for the egg producers but on the average it had been unprofitable for the dealers. Consumption per capita in Canada had risen from 16.66 dozen in 1924 to 20.67 in 1927, and he expected the 1928 figures to show more than 30 dozen per capita.

Reparations Conference

Reported Meeting Will Be Held In Paris In February

Paris.—It has been intimated that the reparations conference will meet in Paris about February 9, and in addition to Owen D. Young, former agent general of reparations, J. Pierpont Morgan is expected to take an important part in the discussions.

As far as could be learned from a canvass of the interested officials no one seems to have any definite plan to submit. All the experts have ideas and some have a few constructive suggestions, but none have extensive programs.

The British experts, it is understood, will assume a waiting attitude, and the initial discussion is expected to be between France and Germany. The Italians will content themselves with trying to retain what they have already secured and Japan will trust to what turns up.

Great Increase Shown In Canadian Trade

Advance of Nearly $220,000,000 During Last Nine Months

Ottawa.—Canada's total trade advanced nearly $220,000,000 during the last nine months of 1928. The total of $2,007,000,136 compares with $1,773,082,834 for the corresponding period in 1927.

Figures were made available at the department of national revenue. Domestic exports were valued at $1,071,647,164, an increase of $121,542,797 over the comparative figures of $950,104,367 in the previous year. Wheat exports alone moved upward more than $81,800,000, while newsprint and automobiles were substantially heavier.

Air Pilot Killed

Toledo, Ohio.—Ted Hay, 30, pilot, for Trans-continental Air Transport Company here, was killed when his plane crashed as he was attempting to land. Witnesses said one of the wings of Hay's ship collapsed as the aviator soared 75 feet above the field for his landing. The low altitude apparently prevented him from righting the plane.

Will Participate In Scheme

Regina.—Manitoba will again participate in the British boy immigration scheme it has been announced by Hon. Albert Prefontaine, Minister of Agriculture for Manitoba, who stated that a requisition would be forwarded to the British authorities to bring 50 youths to that province this spring.

Find Tanks of Amundsen Plane

Paris, France.—The French builders of the Latham Plane in which Roald Amundsen and his companions were lost while hunting the wrecked dirigible Italia, in the Arctic, announced that fuel tanks found floating off Norway, exactly conformed to those used on the Amundsen plane. Five others were lost with the famous explorer.

Receives New Appointment

Ottawa.—Canada's recently appointed chief of staff of the Department of National Defence, Brig. Gen. A. G. L. McNaughton, has been elevated to the rank of Major-General. The appointment is post dated to take effect from January 1, 1929.

Will Sail For England

New Earl of Egmont to Leave About End of February

Calgary.—The new Earl of Egmont, Frederick Joseph Trevelyan Perceval, who for the past thirty years has been ranching in the Calgary district and who recently fell heir to a big estate in Great Britain, will leave about the end of February for England.

He will be accompanied by his fourteen-year-old son and heir, the Hon. Frederick George Moore Perceval, and Mr. and Mrs. Harry Trimmer, of Priddis, who have been friends of the new earl for many years.

Farm Loan Board

Ottawa.—While no announcement has yet been made as to the personnel of the farm loan board who will act with Dr. J. D. McLean, former Premier of British Columbia, and recently appointed to the chairmanship of that body, the understanding in the capital is that Hon. E. C. Drury, former premier of Ontario and Beaudry Leman, president of the Banque Canadienne Nationale will be named.

GERMAN PLAN FOR NEW CRUISER IS PUBLISHED

Berlin.—Publication by the London Review of Reviews of the text of a secret memorandum in which General Groener, German minister of defence, defended the necessity for the construction of a new battle cruiser has caused considerable consternation in government circles here.

As the memorandum was known only to cabinet members and a restricted number of persons official quarters are at a loss to explain how the "leakage" took place and an investigation has been ordered.

It is considered in Berlin that there is no doubt the London publication was from the original text and the indignation of the press is increased because the memorandum was withheld even from members of the Reichstag, who are determined to interrogate the government on the "scandal."

London.—Wickham Steed, editor of the Review of Reviews, said that the Groener memorandum he had published is "perfectly authentic and was not stolen."

"It reached me in an ordinary way through a channel that I trust and I satisfied myself as to its authenticity. They can make all the investigations they like as far as I am concerned."

RETIRES FROM BUSINESS

After 42 years as assistant manager of western business for the Canadian Bank of Commerce C. W. Rowley has retired from business. He is recognized as one of the leading bankers of Canada, and is well known in the west.

Railroad Wreck Was Caused by Drunkenness

Roumanian Train Crew Responsible For Death of Fourteen Persons

Turnuseverin, Roumania.—Railroad inspectors said that drunkenness on the part of the engineer and crew of the Bucharest-Temesevara express cost the lives of 14 persons. In addition to the fatalities about two score passengers were injured at Pruniscoru, near here, when the express crashed into a local train which had been derailed.

The express was plunging along at 55 miles an hour in the dead of night when the crash occurred. The engineer of the express, which was heavily laden, was apparently blind to all signals. In their excitement over the derailed local train station officials apparently forgot about the onrushing Bucharest express which ploughed into the passenger coaches of the local train like a catapult.

Salary Revision For Mail Clerks

Ottawa.—New classification and salary revision for mail clerks throughout the Dominion is considered probable by J. P. O'Farrell, of Quebec, president of the Dominion Railway Mail Clerks' Association. Mr. O'Farrell expressed himself thus after appearing before the Civil Service Commission with proposals along these lines.

Children Victims of Ranch Fire

Winnipeg.—Two young children, one six months old and the other two years, were burned to death when fire destroyed a ranch home near Arden, Manitoba, south of here.

CANDIDATE FOR THRONE

Count Folke Bernadotte, of Sweden, shown above, with his bride, formerly Miss Estelle Manville, of Pleasantville, N.Y., is one of the two foremost candidates for the throne of the United Baltic Kingdom, which it is proposed to form by merging Esthonia, Latvia and Lithuania.

Woman Leads Defence In Murder Trial

Pleaded For Plea In Old Bailey, But Failed to Receive Acquittal

London.—Miss Venetia Stephenson failed to secure acquittal at the central criminal court of the first man she had defended on a charge of murder, John Holmy Ward, aged 24. The jury without much delay returned a verdict the prisoner was guilty of the murder of his grandfather, a bookmaker, who was found with his skull fractured in Pimlico. But she received the warmest congratulations upon her case for the defence from Mr. Justice Humphries.

Miss Stephenson eschewed any attempt at rhetoric. "I am fighting for this young man's life and if words fail me it is because I appreciate the responsibility that rests on me," she said.

Miss Stephenson, however, used carefully chosen sentences when she passed to a review of the evidence urging the manner in which the accused's grandfather met his death was consistent with the younger man defending himself from attack by the elder.

"I know you will not let sympathy for the dead over-ride justice for the living," were her last words. "This is the most solemn moment of my life and I leave this young man's life in your hands, with a prayer that God might lead you to the right conclusion."

His Lordship in summing up said it was difficult to accept the theory of self-defence.

Western Pioneer Dead

Major Augustus Mills Came to Winnipeg in 1870

Winnipeg.—A pioneer of early western Canadian military expeditions, Major Augustus Mills, 79 is dead at his home here. He came to Winnipeg in 1870 as a member of the first Lord Wolseley expedition and later participated in the rebellion in 1885 as a captain in the Kildonan Infantry, which made a far western march in search of the Indian chief, Big Bear.

For a time he was a Dominion government land agent and then, in 1883, was appointed deputy prothonotary at the Manitoba law courts, a position which he held at the time of his death.

APPROVE NEW RURAL SCHOOL PLAN IN ALBERTA

Edmonton.—Approval of the Baker rural school plan, sponsored by the Alberta government, was voiced by the convention of the United Farmers of Alberta here. A vote, taken on the questions, favored approval of the Baker system by 208 to 161. According to the resolution the convention favored raising funds by grouping rural school areas in one district under a flat mill rate on assessed valuation.

Hon. Perren E. Baker, minister of education in the Alberta government, was the most prominent figure in the discussion on the system which bears his name. In the midst of a debate he was summoned into the argument at the request of the farm delegates. After outlining his system, the minister of education answered queries on the matter until the program was halted. According to the projected system, the province would be divided into 30 divisions of 13 school districts each. Chairmen of the district boards to form a general board, which, with the minister of education, would supervise rural educational matters in Alberta. Selection, placing and payment of teachers under the Baker plan, would be handled by the general board.

In the discussion on the Baker idea "government by proxy" was quoted as a name for the proposed mode of rural educational supervision. It was claimed that regarding single taxation areas, "none would stand for a blanket tax assessed by a bureau of the government."

In answering his critics, Mr. Baker denied the "bureaucracy" and "government by proxy" allegation and stated that matters would be governed by appointed representatives of the ratepayers. He estimated that the increase in taxation necessary to pay for the better supervision the new system would involve, would be covered by a three-quarter mill increase over the entire rural area. And he contended that the new plan would place experts in charge of the allocation and selection of teachers.

TAX REDUCTIONS ARE URGED BY MANUFACTURERS

Hamilton, Ont.—The report of the special committee on taxation was presented at a meeting of the Canadian Manufacturers association. It recommended consideration by the government of a method to avoid "double, and in many cases triple taxation," which, it was held, occurred through taxation of net earnings of corporations and the personal income tax, which applied to dividends. Reductions of the personal income tax, reduction and final abolition of the sales tax, and a reduction in the excise taxes on finished goods were other recommendations.

An important closed meeting of the council of the association was held at which over 200 members from all over the Dominion were present. A luncheon was also held, when Sir Joseph Flavelle, Toronto, spoke on "Industrial Research." He said:

"Premier Ferguson, some time ago promised $1,000,000 towards industrial research if the association raised a similar amount. We have since collected $1,500,000, and the premier has challenged us to make that $2,000,000, with the promise that the government would advance a like amount. It is for us to accept this challenge,' said F. P. Moneypenny, chairman of the Ontario division of the C.M.A.

Sir Joseph Flavelle said that Canadian manufacturers were behind their British and American competitors in applying science to their business.

Capital of Barclay's Bank

Amount Will Be $500,000 With Same Sum as Reserve

London.—Barclay's Bank of Canada, when incorporated, will have a capital of $500,000 and a reserve of a similar amount, F. C. Goodenough, chairman of Barclay's Bank, Limited said at the annual meeting.

Sir Robert Laird Borden, former premier of Canada, had accepted the chairmanship of the new bank and the directors included Premier L. A. Taschereau of Quebec, he added.

Application for a charter for the bank will be made at the coming session of the Canadian parliament.

Free Trip Offered Students

Paris.—A free trip from Montreal to Paris with expenses for a 15-day sojourn at his hotel to the student graduating with highest honors at Canadian Universities is to be offered by J. G. Metzraller, administrator of a Paris Hotel, if arrangements can be made with Canadian University heads. Metzraller is president of several hotels in France and Switzerland.

To Aid Paraguay Farmers

Asuncion, Paraguay.—The Paraguay government decided to set aside 25,000,000 pesos credits to farmers who are unable to harvest their grain because of the absence of farm hands in the army mobilized recently in the dispute with Bolivia. The government also is trying to demobilize the farmers first and as quickly as possible.

Ask Customs Rebate

Ottawa.—The government is being asked by the British Columbia Sugar Refining Company to include in the forthcoming estimates the sum of $34,424.55 with interest, being the balance of $50,250.83 claimed to have been overpaid by the company in custom duties.

Graf Zeppelin's Next Trip

Friedrichshafen.—The next important flight of the trans-Atlantic dirigible Graf Zeppelin will be at the end of February, when the big airship will fly to the pyramids of Egypt and on to Palestine, it has been announced. The dirigible probably will moor en route.

Hundreds Killed By Earthquake

Peking, China.—Hundreds of Chinese were killed in an earthquake in the Northwest part of Shansi province dispatches published here said. The earthquake occurred near the Mongolian border in a section suffering from a famine.

Fear Revolution

New Orleans, La.—Isaac Lehman, representative of a New York cotton goods manufacturer, arrived here with a report that United States citizens and other foreigners were fleeing Spanish Honduras in expectation of a revolution.

Off Again To Another Start

With 1928 now difinitely in the past and 1929 already on the wing, we are all of us hoping that the present year will be happy and prosperous. While we all wish for happiness and prosperity, most of us, if we are to have it, must help to make it. For many years now, the dairy industry has helped greatly towards prosperity and a resolution to milk at least one more cow and sell your cream to the Tofield Creamery, will go a long way to you—and us— obtaining our wishes.

Farmers Urged to Secure Seed Oats

Farmers throughout the province are being advised by the Provincial Department of Agriculture to make the necessary provision for securing the supply of oats for seed which they will require for their 1929 crop. The effects of frost in a number of districts are reflected in a reduction of the germinating quality of a great many of the oats threshed and in a number of cases, supplies of oats suitable for seed will have to be shipped in. Elevator companies have expressed their willingness to assist in the distribution of good seed and farmers are advised to communicate with their local elevator agents as early as possible in order to obviate the possibility of a scarcity occurring during the seeding season.

All inquiries will be answered by Miss Montgomery, Dept. Extension, University of Alberta, Edmonton, who is secretary of the Alberta Branch. led to honor and distinction.

A Complete Ailment

Doctor (to fair patient) "You certainly have acute appendicitis."
Fair Patient, "Oh, doctor, you flatter me."

CHAPTER XII.—Continued.

Andy took the wounded bird from her hand. "'Ow did it 'appen, Connie?" he asked tenderly.

Connie was as open and unaffected as the wild birds of the forest. She was as capable of hating as she was of loving. Her eyes were laughing eyes, and the soul that looked out of them a merry soul, but she had a temper, and under sufficient provocation her blue eyes could take on a dangerous glow.

She now turned like an enraged lioness on the foreigner. "He killed it with a stick!" she cried furiously. "You brute, you cowardly brute . . . . ." In her rage her voice became incoherent. With hands clenched and with breath coming in short gasps, she moved nearer to the object of her hatred. In her hysterical anger her voice rose almost to a scream.

"You cur, if I were a man I'd—I'd lick you!"

The cry came to Donald's ears, and he was off up the trail like a deer.

"Go ahead, I'll follow," responded Gillis.

Andy looked down on the mother goldfinch as it lay in his hand. He felt the quick throbbing of its heart grow fainter and fainter. One wing was broken and its white breast was stained with blood. The bird's head drooped lower, and a film settled over its bright eyes. The beautiful wings stretched rigidly, and it gasped convulsively, sending a tiny stain of crimson from its mouth that felt warm on his palm.

Andy's face became colourless. His hand shook violently as he placed the dead bird tenderly on the ground. "Connie dear," he said, in a voice that trembled, "I ain't a whole man, but 'ere's where you see 'arf a man goin' into battle to give all he's got."

He removed his coat and threw it from him. Through a rage-mist Andy saw the grinning foreigner throw up his arms in an absurdly unscientific posture of defence. Like a mad cat, Andy launched himself straight at his husky opponent. The grin was wiped from the big man's face by Andy's compact fist, as it smacked resonantly on the end of his thick nose with a snap like that of a whip, and with a skilled force that brought blood.

Andy's years of training boxers now stood him in good stead. He well knew that a small man would stand little chance in long range fighting, and he kept well inside the larger man's wild swings. With his blond head tucked against his adversary's body, his fists worked like pistons, he kept sending short jolts to the body that brought heavy grunts every time they landed.

Connie was delirious with excitement.

"Hit him, Andy! Hit him! Good! Good!"

And then she groaned as the big man's hand found Andy's throat an flung him to the ground. Little Andy was up immediately, but stepped into a swinging fist that caught him over the eye and sent him sprawling. Undaunted, he came to his feet, waited warily for an opening, and again sprang under the big man's guard.

Andy's fist shot up in a ripping uppercut that was judged to a nicety, catching his opponent on the point of his chin with force enough to send him rocking on his heels, and before he could recover himself the same fist, accompanied by its mate, beat a tattoo on his solar plexus.

In desperation the bewildered man wound his arms about the little Australian and lifted him high in the air. Like a game bulldog Andy hung on. Though his feet were off the ground he clung to the big man's body like a leech.

Again the big hands felt for Andy's throat, and he was flung six feet to strike with a thump that shook every bone in his body. Connie cried out in fear as he narrowly avoided a brutal blow aimed at his head.

Andy's sense of British fair play had received a rude shock. "An Methusalem said," he panted, as he came to his feet, "when in Bohunkia do as the Bohunks do."

"Take that, Spaghetti!" he shouted, as he kicked the foreigner viciously on the shin. While the latter leaned over in pain, Andy shot a well-directed uppercut to his face. The big man sat down, a dazed look in his eyes.

Breathless, Donald arrived on the scene, with Gillis puffing in the rear.

Breathing heavily, Andy's adversary came to his feet, picked up his hat, and with arms wound about his head beat a hasty retreat. Andy was after him like a hornet, sending stinging blows through his vulnerable guard. Donald and Gillis stood with mouths agape to see Andy administering a sound thrashing to a man twice his size. Right to the edge of the woods he relentlessly pursued his fleeing enemy.

Andy's head was held at its usual cocky angle, and he assumed a swagger as he retraced his steps, but his short legs wobbled and he sank dizzily to a stump.

"I brought 'is blinkin' meat-'ouse down, Connie," he gasped.

"Oh, Andy, you're a darling!" she cried, throwing her arms impulsively around the little man's neck, and touching her lips to his cheek.

Andy's florid face took on a deeper magenta, and he blinked hard to hide certain signs of emotion. He afterwards admitted to Donald that he was no "sweet sixteen," and that it was the first time that he had ever been kissed in his "bloomin'" life.

Connie wet her handkerchief in the cold water of the creek and bathed his face with tender care.

She showed Donald and Gillis the nest with the motherless birds, doomed to die a premature death by this act of wanton cruelty, and pointed to the tiny bird on the ground, for whose untimely end Andy had taken a well deserved and summary vengeance. Connie choked as the lovely male bird flew to a stalk of goldenrod near its dead mate and sent out its throaty warble.

"Dear, dear, dearie," sang the goldfinch in a plaintive, questioning note.

Andy presented a pitiful figure with an eye closed, his lips swollen his face bruised, but the indomitable spirit of him shone from his one bright orb.

"You darned little buzz-saw!" said Gillis tenderly.

Donald slapped his little friend on the back, his eyes shining with admiration.

CHAPTER XIII.

Renwick announced that Robert Rennie's daughter and a party of girl friends were to visit Summit Lake the following week, and carpenters were set to work erecting cottages for their accommodation.

A few days before her arrival Donald was both surprised and pleased to receive a cordial letter from her in which she said that she was looking forward with pleasure to the coming holiday, and that she would deeply appreciate anything he might do for the entertainment of her friends.

As always, her father spared no expense in providing for the comfort and pleasure of his daughter. That week a car containing a motorboat, canoes and six saddle-horses was run in on a side-track at the mill.

Connie learned of the coming event through Donald as she was watching with keen interest the unloading of the spirited animals.

"You will enjoy yourself next week, Connie," he said gaily. "Miss Rennie is coming with friends. We'll have rides, picnics and dancing."

A few minutes later Connie joined Andy, who sat on the steps of the kitchen door enjoying a breath of fresh air.

"Is Miss Rennie rich, Andy?"

"An 'ole barrel o' dough."

"Is—is she beautiful?"

"I've 'eard so, Connie."

A short pause ensued while she searched the pockets of her overalls and produced several neatly folded papers. She extracted one, pressed it smooth, then passed it to Andy.

"Does Miss Rennie dress like that?"

It was a photograph of an actress dressed for the street, taken from one of the magazines that Donald had given her.

"I think so, Connie."

"Oh! She must be wonderful, then!" said Connie earnestly.

She moved closer to Andy, unfolded another page, and spread it on her knee.

Andy bent his blond head close to the one of gold. A startled look crossed his features and his brows bobbed up and down. It was a full-page advertisement of ladies lingerie. The highly coloured illustration of a lady, partially dressed, achieved its object of arresting the eye, while the remainder of the space was occupied by articles of apparel similar to those adorning the lady's graceful form.

Andy coughed. "Er—yes, Connie."

Connie raised her eyebrows incredulously.

"All at one time?"

"Sure—sure," mumbled Andy.

Connie stared. "Why, there must be nearly a dozen pieces. How is this fastened?" she questioned as she pointed with a slender brown finger to one of the engravings.

Andy took a quick glance. "Buttons."

"And this?"

"Buttons," replied Andy, gripping the bowl of his pipe and sending out clouds of smoke.

"And this?"

"Strike me blind, what a 'ell of an 'ole," thought Andy.

"Buttons," he responded desperately without looking at the paper.

(To Be Continued.)

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this harmless, tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

COUGHS

Canada's Historic Sites

The Historic Sites and Monument Board of Canada is composed of historical authorities, and one of its duties is to recommend to the Department of the Interior, historic sites worthy of being marked, restored, or preserved. The board meets annually to consider the various sites brought to their notice and forwards its opinion to the Department of the Interior which makes the decision and carries out the work through the National Parks of Canada Branch.

"Your girl is a blonde, eh? Suicide or natural?"
"What do you mean by suicide blonde?"
"One who dyes by her own hand."

Suitor—And, darling, let's be married soon.
Film Actress—Sure. Let's make it next week. I've never been married in January before.

Minard's Liniment for Coughs and Colds.

Quality Of Canadian Goods Has Improved

Research And Skilled Labor Have Been Big Factors

The quality of Canadian products is steadily improving, with greater knowledge of research, scientific methods, processes, application of skilled labor and the needs of buyers. In the face of mass production competition, Canadian producers are seeking to hold their places by giving special service, better quality or distinctive features to their products. That they are succeeding is proved by the fact that Canadian manufactures are exported to over a hundred countries, while supplying the greatest part of domestic needs. A still greater share of the home market would result in more production, more employment and more exporting, and it is therefore important that home industry should be encouraged by stabilization and other necessary measures as much as possible.

Recipes For This Week
(By Betty Barclay)

RICE AND SALMON SALAD

Take equal parts of salmon and cold boiled rice; stir with a fork until the fish and rice are thoroughly mixed. Pour into a salad dish and cover the whole with mayonnaise or boiled dressing.

Canned tuna fish, left-over chicken, meats, ham, or vegetables can be used in the same manner—always use equal quantity of rice. The addition of celery and hard-boiled eggs make a more elaborate dish.

SANDWICH FILLING

One pound of mixed nuts (be careful to keep small particles of shell from clinging to the meats). One cup seedless raisins. Grind together in a food grinder, add a little salt and the juice of one small orange. Work together very thoroughly, place in a glass container and keep in a cool place. Can be used between thin, well buttered slices of whole wheat, white or bran bread. Ideal for school lunches, workman's lunches or picnics.

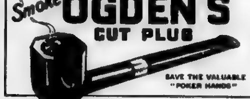
Already Advised

An "accident" case, in which the patient was suffering from a wound in the head, was taken to hospital. After taking the usual particulars as to age and next of kin, the official said: "Now, don't worry. I shall take immediate steps to ensure your wife being advised of your detention here, and so save her from anxiety." To which the patient resignedly replied: "She did it, Miss!"

Sixteen hundred different noises disturb Milwaukee, according to police survey.

Hewitt—"Can you get your wife to try the budget system?"
Jewett—"No; she won't budge."

Your best move,
Smoke **OGDEN'S** CUT PLUG



SAVE THE VALUABLE "POKER HANDS"

Congress Of Nurses

Delegates Coming To Montreal Convention From Many Lands

For the International Congress of Nurses, to be held in Montreal, in July, acceptances have been received from the following countries to date: Great Britain, United States, Australia, New Zealand, Hawaii, India, South Africa, Irish Free State, France, Belgium, Germany, Switzerland, Spain, Italy, Bulgaria, Austria, Poland, Greece, Turkey, Jugo-Slavia, Czecho-Slavakia, Latvia, Esthonia, Sweden, Norway, Holland, Denmark, Iceland, Cuba, Java, Philippine Islands, Brazil, Ecuador, Argentine, Chile, China, Japan, Korea, and Syria.

Trappers Use Airplanes

Bring Furs From North Country To Winnipeg By Modern Methods

For the first time in history, an airplane has been carrying furs from the wilds of Northern Manitoba to the Winnipeg market. Hollick Kenyon, aviator, left Cranberry Portage for Brochet settlement the other day, taking Del Symonds, veteran trader, whose aim was to beat all competitors, who take a month to travel by dog team.

She—"Alfred, I know I have my faults."
He—"Yes, dear."
She (frigidly)—"Then perhaps you'll tell me what they are."

Little Helps For This Week

"As we have therefore opportunity, let us do good unto all men."—Galatians vi. 10.

The means that Heaven yields must be embraced and not neglected.—Shakespeare.

Miss not the occasion; by the forelock take
That subtle power, the never-halting time,
Lest a mere moment's putting off should make
Mischance almost as heavy as a crime.
—William Wordsworth.

It is decreed in the providence of God that although the opportunities for doing good, which are in the power of every man, are beyond count or knowledge, yet the opportunity once neglected, no man by any self-sacrifice can atone for those who have fallen or suffered by his negligence.—Julian Horatia Ewing.

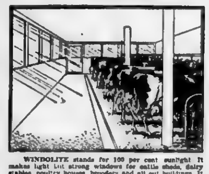
Easily Done

George (nervously): "I'd like best in all the world, Rose, to marry you, but I don't know how to propose."
Rose (promptly and practically): "That's all right, George, you've finished with me. Now go to father."

Actor—"I say, you know I'm getting awfully popular. I see some tobacco people have named a new cigar after me."
Manager—"Oh! Well, I hope it'll draw better than you do!"

WINDOLITE *The Improved Glass Substitute*

MADE IN ENGLAND



WINDOLITE stands for 100 per cent sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip, cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 128 to 160 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price $1.30 For Square Yard, f.o.b., Toronto.

Use WINDOLITE and let
YOUR PLANTS
YOUR CHICKENS
YOUR CATTLE
Bask in 100 % Sunlight
Send for booklet "WINDOLITE"

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer, Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays, are the Ultra-Violet rays which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

IONIC CHAPTER O.E.S. No. 72 TOFIELD, INSTALLS NEW OFFICERS

At a regular meeting of Ionic Chapter No. 72 O.E.S., held in the Masonic Hall on Monday evening January 14th, the installations of the officers for 1929 took place.

Mrs. M. W. Dawson, Worthy Matron, of Edmonton Chapter, No. 19, was the installing officer and Mrs. Stokes, P.W.M. of Edmonton the Marshal.

The officers installed were:

Worthy Matron, Mrs. L. McClurg.
Worthy Patron, Mr. Chas. Plum.
Associate Matron, Mrs. B. Lee.
Associate Patron, Mr. W. A. Webb.
Secretary, Mrs. M. L. McLean.
Treasurer, Mr. J. Lee.
Conductress, Mrs. J. McLaughlin.
Associate Conductress, Mrs. N. Beirnes.
Chaplain, Mrs. H. Hardy.
Marshal, Mrs. Anna Hobson.
Organist, Mrs. A. Warner.
Adah, Mrs. J. L. Abbott.
Ruth, Mrs. B. Lee.
Esther, Mrs. E. Webb.
Martha, Mrs. C. Hobson.
Electa, Miss T. Nolan.
Warder, Mrs. J. Webb.
Sentinel, Mr. K. [illegible] MacLean.

Mrs. McClurg, the newly installed Worthy Matron, presented a past matron's jewel to Mrs. M. L. MacLean, retiring worthy matron, and Mr. Plum, Worthy Patron, presented Mr. W. C. McClurg with a past patron's jewel.

[illegible] the installation, Mrs. M. L. MacLean gave a report of her year's work and wished for Ionic Chapter every success during the coming year.

After installation a delicious banquet was served and much enjoyed by all.

TENDERS FOR SCHOOL HOUSE

Sealed Tenders will be received by the Board of Trustees of MacKenzie School District, No. 234 at the office of the Secretary Treasurer up to [illegible] February 15th, for the erection of a [illegible] frame school building after Plan Number E. [illegible]. Plans and specifications may be obtained from Secretary Treasurer on payment of a deposit of $5.00. Plans to be returned within 24 hours, and deposit will then be refunded. A marked cheque for five per cent of the amount of tender should be enclosed with each tender as a guarantee that same is bona fide. The lowest or any tender will not necessarily be accepted.

WILLIAM LENNIE,
Secretary-Treasurer.

P.O. Tofield. Nearest station Tofield. Miles distant eight.

CARD OF THANKS

We again desire to thank our friends and neighbors for their unlimited kindness, sympathy and help during our recent sickness and bereavement.

MR. and MRS. T. R. MURRAY.

Tofield curlers tried to lift the new Go Company Trophy from the local curling club last Thursday afternoon but failed in the attempt and as a result the silver mug still holds a prominent place in the show windows of the Christie Grant store. However the margin was very small by which the local curlers held the cup here, the difference in the score of the two rinks being only three points.

McAthey took on John Lee's aggregation while Jack Slavich was drawn against McLaughlin, who is well known in Alberta curling circles as a man who is hard to beat.

In the forenoon a couple of friendly games were played when Kelly met McLaughlin and Collier met Lee. Collier beat Lee while McLaughlin was a few up on Kelly when the dinner bell rang. —Viking News.

AN INTERESTING MEETING

Everyone interested in the successful producing and marketing of poultry should attend the meeting held on Tuesday, January 29th.

Those who attend will have the opportunity of hearing D. M. Malin, secretary of the poultry pool, outline in detail the proposed developments and changes in the co-operative scheme of handling our poultry [illegible].

Major Hughe[illegible], president of the Vermilion Hatcheries, and can speak from practical experience on the financial success of the plan.

This meeting is arranged for the information and benefit of the poultry producers in the Tofield district.

But you must be PRESENT to get the good of it.

It is hoped that there will be a large turnout to make the meeting well worth while.

Remember the date, Tuesday January 29th, in the Institute rooms at 2:30 p.m.

The Tofield Trail Rangers were victors in an interesting hockey contest with Viking on Friday night last. Arthur Beirnes and Ray Martin were the Tofield stars of the game, while Jack White in goal saved a number of hard shots from the Viking sharp shooters. For Viking McAffey starred, getting most of the goals.

The score was 10—5 in Tofield's favor, Arthur Beirnes getting five and Ray Martin getting five.

Bob Whyte made an efficient referee.

NOTICE

Town of Tofield—Re Nomination Meeting

Public Notice is hereby given that a meeting of the electors of the Town of Tofield will be held in the Town Hall, Tofield, on Monday the 4th day of February 1929, from eleven o'clock in the forenoon until twelve o'clock noon, for the purpose of nominating candidates for the office of Councillor and Mayor for the next ensuing two years.

Given under my hand at Tofield, this 21st day of January 1929.

J. W. CHAPMAN.

NOTICE

Tofield S.D. No. 1929—Re Nomination Meeting

Public Notice is hereby given that a meeting of the electors of the Tofield School District No. 1929 will be held in the Town Hall, Tofield, on Monday, February 4th, 1929, from eleven o'clock in the forenoon until twelve o'clock noon, for the purpose of nominating candidates for the office of trustee for the next ensuing two years.

Given under my hand at Tofield, this 21st day of January 1929.

J. W. CHAPMAN,
Returning Officer.

HOLY TRINITY CHURCH

Sunday, January 27th, 1929

11:00 a.m. Morning service and Communion.

7:30 p.m. Evening service.

General meeting after service.

Preacher, Canon F. C. CoCruish.

At the annual meeting held at Ingram school on January 12th, Mr. Bighead was elected to finish out Mr. Geo. Cookson's term of one year, and Mr. Wm. Thompson was re-elected for a three year term. The result of the trustee meeting held on the 19th, was that Mr. Henry Haber will resume duties as secretary-treasurer and Mr. John Gray will act as chairman.

Picture Framing

Having a stock of PICTURE MOULD, I am prepared to frame pictures of all sizes at very reasonable prices. Will also build CABINETS and TABLES, ETC.

Ralph Forbes and "Flash" the screen's most perfect dog.

LOCAL AND PERSONAL

Mrs. Firth is spending a few days in the city this week.

Miss Marie Cooper spent the week end in the city.

H. E. Rogers made a business trip to the city on Wednesday.

Mrs. J. W. Cookson and Mrs. Appleby are attending the poultry fair being held in Edmonton this week.

Mrs. Bethney of Sherbrooke, Que., spent the week end at the McCauley and J. W. Cookson homes on her return from Vancouver.

Mrs. Hannan left on Saturday morning for South Bend, Ont., where her mother, Mrs. Bonner, is very ill. Mr. Hannan followed on Monday morning.

Miss Lillian Lee, Miss McLellan and Miss Ruby Cruickshank of Ryley were in town on Saturday, returning Sunday morning.

Born.—To Mr. and Mrs. Roy Longson, at Grande Prairie, on December 31st, a daughter.

Holy Trinity (Anglican) W.A. will meet at the home of Mrs. C. Robinson on Wednesday, February 6th, at 2:30 p.m.

Miss Mabel Thompson is assisting at the Beirnes home during the time of the Ladies' Bonspiel being held in Edmonton this week.

Swift and Emery unloaded a carload of new Ford cars this week.

An organ has recently been installed in the Westlake school. This has been made possible by the ladies and children of the district doing the janitor work, thus saving the money to pay for same. This is quite an idea and is a tribute to the energy and resourcefulness of the ladies and children connected with it. We hope the organ will be a source of real pleasure.

Anglican services will be held on Sunday, February 2nd, at Holy Trinity church, at 11:00 and 7:30. Rev. [illegible] Symes, newly appointed minister to this parish will arrive on Saturday and will conduct the Sunday services.

A business deal was transacted recently when the owners of the Club Cafe, Lee and Joe, sold to a restaurant keeper of Viking. The new man will take charge at the beginning of February. Lee and Joe have been at Tofield for about three years and are favorably known and well liked.

The weather has been cold enough to suit an Eskimo this week. Being away from the office the coldest night of the year (Saturday) our old Studebaker with which we run the press, froze up and refused to function when we needed it this week. With considerable fussing around and with the assistance of a mechanic it finally quit its grouch and popped off again. Old gas engines are funny that way, you know. When they stop you fuss round them a lot and tinker a little; you hope a lot and pray a little; and then when you least expect it, pippity-pop they go and the old press turns out this great family journal once more.

JOHN LEE SKIPS RINK AT WETASKIWIN

J. Lee is skipping a rink at the Wetaskiwin bonspiel and according to all reports the rink is going great guns. During the first day he won three games and later reports state the rink was still unbeaten. The following constitute the rink. J. Lee (skip); J. L. Abbott; C. Hobson; J. O. A. Letourneau.

OBITUARY

The death occurred at Elk Point, on Sunday, January 27th, of John Wills Francis, former well known Tofielder. The deceased who had reached the age of 42 years underwent an operation for appendicitis, and shortly afterwards contracted pneumonia.

The sympathy of Tofielders will go out to his wife, nee Miss Olive Brigley, who was a former Tofield school teacher. The funeral took place in Edmonton on Wednesday.

The [illegible] Bridge club held their weekly play last Friday at the home of Mrs. [illegible], Mrs. Hill being the hostess for the afternoon. It was necessary to secure three substitutes and the latter enjoyed the afternoon fully as well as the regular members. The first prize was won by Mrs. Webb and the booby by Mrs. Carr. It was decided to change the meeting day to Wednesday hereafter in place of Friday, and the play on Wednesday will be held at Mrs. Ed Kallal. Mrs. Hill served a tasty lunch, which was thoroughly enjoyed.

MEN'S BONSPIEL GOES OVER BIG

With real snappy weather to put the ice in first class condition, the Tofield Men's Curling Club's Bonspiel came to a successful conclusion on Friday night last. It was estimated that three days would suffice for the 'spiel, but owing to the fact that Lee of Tofield and Collier of Viking both got into two finals an extra day was required.

The following are the first prize winning rinks and their personnel.

Grand Challenge (McCallum Cup) —Geo. McLaughlin (skip); 1st, Shitch; 2nd, Calvert; 3rd, Bissett.

Boon Cup—Collier, Viking, (skip); 1st, ————; 2nd, Hellier; 3rd, Walters.

Terwillegar Shield—John Lee, (skip); 1st, H. Hicks; 2nd, A. B. Clutterham, 3rd, A. J. H. McCauley.

Pincott Trophy—Mann, Edmonton, (skip), 1st Wood; 2nd Clark; 3rd, Broadfoot.

The winners of the various events in addition to the honor and pleasure of winning were the recipients of valuable and handsome prizes, a complete list of which are not available.

The following are the rinks which came 2nd, 3rd and 4th in the different events.

Grand Challenge (McCallum Cup) —2nd, Hobson of Tofield; 3rd Beirnes of Tofield; 4th Mann of Edmonton Granite.

Boon Competition—2nd Morrison of Tofield; 3rd Craig of Tofield; 4th Hannan of Tofield.

Terwillegar Competition—2nd Collier of Viking; 3rd Kelly of Viking; 4th Dark of the Edmonton Royal.

Pincott Competition—2nd Lee of Tofield; 3rd Bowerman of Wainwright; 4th McPherson of Ryley.

JUNIOR HOCKYISTS LOSE TO Camrose

The Tofield Trail Ranger hockey team met a junior team from Camrose on local ice on Friday last.

This junior team from Camrose is the best thing in boy hockey seen on local ice for many moons. Nine of kind, fast skaters, good stick handlers and well managed, they were more than a match for our junior bunch, who were both lighter bunch. The score was 7—3 in favor of the visitors and this fairly well indicates the play.

—0—

The Tofield Intermediates journeyed to Edmonton to meet the 10th troop Edmonton Boy Scouts on Saturday night last. The game could hardly be classed as good hockey, the night being bitterly cold. The score was a tie of 1—1, though the Tofield goal was not recognized at the time of scoring. The night was so cold it was impossible to get adult goal judges or referee. Only three periods of 15 minutes each were played, the Edmonton boys not fancying a fourth period, claiming that three periods of 15 minutes constitutes a hocky game. This appears to be customary among youth hockey in the city, but it was a new one on the Tofield lads. At that the Edmonton fellows most likely had the most sense as another period would have probably meant a few more frosted toes and faces. It was 45 below and an open rink. The Tofield boys gave Edmonton three cheers and Edmonton immediately responded with three cheers for Tofield and once more history was made! Scoutmaster Mobry had made arrangements for the scouts to entertain our fellows and some went to a dance while others attended the show. The boys also had offers of billeting but as they had to leave very early Sunday morning they all took accommodation uptown.

Incidentally the boys searched around to find some of those butterflies the Edmonton papers have been boasting about recently, but none could they find.

KINGMAN

[illegible] Rodusesky was a business visitor in Edmonton a couple of days last week.

Mrs. C. Kendahl is improving after an attack of pneumonia, under the care of Miss. Wood of Tofield.

J. Anderson and E. Erickson spent Friday in Edmonton.

T. J. Regnese is spending a week in Edmonton attending the Emigrant convention.

Mr. and Mrs. O. Halseth visited with Mr. and Mrs. T. J. Regnese on Sunday.

Mrs. T. Grahm spent Friday with her mother Mrs. Nelson who is in the St. Mary's Hospital.

Miss Alice Skahn and Oscar Erga spent a few days in Edmonton.

Blackfoot Stock Association Annual Meeting

The Blackfoot Stock Association held their annual meeting in the municipal hall on Saturday the 26th. Mr. J. Sutherland acted as chairman.

The report of the secretary-treasurer Mr. J. M. Verge showed that a substantial reduction had been made in the Bank of Montreal debt and also that all interest accruing on fencing notes had been paid to date.

Six hundred and eighty head of cattle and horses had been pastured during the summer. In the final roundup there was a shortage of two head, a horse and a steer.

The meeting decided to leave the fees for the summer's grazing, the same as in the past, as follows; $3.00 per head from May15th to roundup. The range manager was to look after cattle during the summer, salt them and round them up shortly after October 15th.

A rather interesting discussion took place in regard to the future of the Blackfoot Stock Association with special reference to the repayment of members notes. It was felt that with a favorable season ahead the bank debt and fencing notes would be paid off. After that would naturally follow the repayment of members notes as funds become available. The method or procedure of same brought forth some quite heated discussions. That members be allowed to charge part of grazing fees against their notes; that all accrued interest on notes be wiped off, were some of the suggestions. However it was felt by all that some sort of re-organization of debt was necessary. It was decided to leave the matter over till the next annual meeting to be held the last Saturday in January, next, and further to hold that meeting in Tofield where it would be convenient for all notes holders to attend.

Messrs C. Moss and J. Ferguson were re-elected directors.

KETCHAMOOT

The many friends of the Francis family were very sorry to hear of the death of their brother, John, and extend to them their sincere sympathy.

The monthly meeting of the M. C. S. will be held next Wednesday, Feb 6th at the home of Mrs. G. M. Sears all members and visitors please take notice as it is one week earlier than the regular time, owing to the basket social on the following week.

School was closed Friday and Monday owing to the severity of the weather.

Mrs. A. Hankedel and little daughter went to Edmonton Wednesday. Mrs. Hankedel is caring for her sister's children, in the absence of their mother who is ill in an hospital.

Mr. J. H. Ingram returned home from Edmonton, Friday, where he had been a few days with his son Will.

Misses Mildred and Gertie Ingram, Roy Whilliams were guests of the Sears young folks Sunday evening.

Will Ingram underwent an operation for appendicitis at the Royal Alexander hospital in Edmonton on Thursday of last week. He is recovering nicely.

Mr. and Mrs. B. Wildman entertained a few friends to a card party at their home Friday evening.

Roy Whilliams and James Easton drove to Camrose Tuesday returning home Friday.

Miss Lillian Carlisle visited her friend Miss Emily McAllister over the week end.

LAKESHORE

School has been closed for several days owing to the illness of the teacher, Miss Emily Ferguson who has been a victim of the flu.

Mrs. J. H. Johnson, daughters Beulah and Lela and nephew Watson Johnson spent Friday evening at the [illegible].

Mr. and Mrs. N. Noland visited on Monday at the home of their son Everett.

Geo. Abernethy entrained Sunday evening for Edmonton where he is doing jury duty.

Mr. and Mrs. Leslie Jones were called to Camrose last week to attend the funeral of a relative of Mrs. Jones. Mr. Jones returned on Saturday while Mrs. Jones will remain there for a few days yet.

Todd and John Gray were visitors at the E. Noland home on Sunday evening.

William Seale suffered an attack of the flu at the first of the week.

WORLD HAPPENINGS BRIEFLY TOLD

The Turkish assembly ratified the pact for remodelling of war and the government instructed its ambassador at Washington to sign the pact.

The Rev Dr S Parkes Cadman pastor of Central Congregational church, Brooklyn, N.Y., has been invited to deliver the sermon at the opening of the League of Nations conference at Geneva on Aug 25.

Premier Stanley Baldwin announced in the House of Commons examination will be held into the 6-year-old project for a tunnel under that a congressman is to-party on the English Channel.

Several persons were killed and a thousand buildings destroyed in the populous Greek district of Tarsala in Constantinople by a tornado rip whipped by a Sirocco wind which has swept the Mediterranean.

Japan has notified the League of Nations that manufacture and distribution of narcotics in Korea had been taken out of the hands of private companies and made a government monopoly.

Every effort will be made to secure for Canada the return of sports of the Olympic games in 1932, it was decided at a meeting in Toronto of the executive committee of the Canadian Olympic committee.

The Victory scholarship of the Royal Institute of British Architects has been awarded to Miss Betty Scott of Kensington, England, 22 years old defeated 20 other competitors, most of whom were men.

McGill university library has some hints possession of two extremely valuable Greek manuscripts. The larger of the two dates back to the 12th or early 13th century while the other volume is a lectionary dating from the 10th century.

Col. Robert Johnson is home with his mother and sister in Chicago after having wandered all over the country, a victim of shell shock and a lot of memory since the World war Johnson's kin had given him up for dead.

Edmonton Telephone Subscribers

An showing the growth of business in Edmonton, "The Journal" points out that wherein 24 years ago some 600 citizens of the then town of Edmonton voted $27,000 for the purchase of the Edmonton district tele phone system (for the use of 203 subscribers), the system has now grown to represent a capital investment of $2,500,000, with over 25,000 subscribers.

Vancouver Grain Exports

Grain exports from Vancouver for the calendar (1929) year were 90,000,000 bushels, according to Merchants' Exchange figures.

The average depth of the ocean below sea level is 12,000 feet.

Going Upstairs Had to Sit Down Breath So Short

Mrs. H. Brousseau, Mount Que writes: For many years I suffered with the misery of breath than four years ago I had palpitation of the heart and was so bad I had to sit down two or three times when going upstairs. I read about

so I got a box, and in no time I felt better, so I took three boxes more and I have never had shortness of breath since."

Price 50c. a box at all druggists and dealers or mailed direct on receipt of price by The T. Milburn Co., Ltd. Toronto, Ont.

Time For Expansion In Sheep Industry

Can Be Greatly Developed in Canada Says Expert

In a review of the sheep industry, A. A. MacMillan, chief of the sheep division of the Dominion experimental farms, says the time is opportune for gradually expanding the sheep industry in Canada, and that it is feasible to establish the marketing of lambs only during certain periods when they are at their best, and to produce a superior quality of wool.

The report states

CHILDHOOD AILMENTS

Can be Quickly Banished With Baby's Own Tablets

The sufferings of children are many but nine-tenths of them are due to one cause and one cause only a disordered condition of the stomach and bowels. To quickly banish any of these ailments if observed in time, and to guard the bowels against recurrence by using the remedy that has been tried to deliver the sermon at the opening of the League of Nations, conference at Geneva on Aug 25.

Inventor Of Many Electrical Devices

J. W. Legg, Who Died Recently, Was Many Sided

The death occurred in Wilmington, Pa., of Joseph Willard Legg, inventor and one of the foremost workers in the field of oscillography, or wave phenomena. He was 61 years old. A member of the motor engineering staff of the Westinghouse Electric and Manufacturing company, Mr Legg developed many electrical devices, he has granted invention being the "subm." a small portable oscillograph extensively used in many branches of study. The instrument is now being used in Siberia to gage earthquake activity and has been spend by making visual records of their waves.

One has been taken by Commander Richard E. Byrd on his Antarctic expedition, according to word received in the study of radio "dead spots" and the reflection of radio waves. Its other uses include measurement of nerve responses, measuring intelligence, for the study of musical overtones, for hearing aid measurements, and one of its most important phases, its use as an electric speedometer, to be completed for manual record of the action of the

Baby's New Ensemble

"Flu" Is Here In Dead Earnest

SUMMERS IN NEARLY EVERY HOME IN WESTERN CANADA

Which one little cold, severe or common who is sneezing, coughing and avoid crowded places? Or will stop your grippy cold at the beginning?

Doctors and nurses who have had long experience in handling grippe cases advocate **Cascarets** once. Vapo rub an effective means of protection.

It is very simple to use Cascarets. Just one tablet when you feel a cold coming on and the whole family can enjoy its germ-killing protection at the end of a few hours.

Put a teaspoonful of liquid Cascarets in a glass of water or milk, or take on a spoon or lump and be sure to swallow a bath. The tiny candy tablets contains the most powerful disinfectants known, combined with a healing vapor, you kill the germs that cause colds, grippe, flu and pneumonia. Splendid for children. Usually good for the whole family. Far better to protect the whole family all like you than to have a house full of sickness. All druggists sell Cascarets in 10c. boxes.

Revenue From Poultry

In 1913 revenue from the poultry industry in Alberta amounted to $2,250,000. In 1927, 14 years later, revenue from the same source was $15,000,000 according to the poultry commissioner for Alberta.

In all infantile complaints that are the result of the depredations of worms in the stomach and intestines Miller's Worm Powders will be found an effective remedy. They allay the cause of these troubles and by expelling the worms from the system insure an orderly working of the system, without which the child cannot enjoy health in the fullest sense. These powders mean health and improvement.

A New York sculptress excels in carving bronze out of cheese. Her horses can be melted into veloz rarebits, later emerging as sightly

fricassees.

Scientists say the earth is cooling at the rate of two degrees every sixteen million years.

SUNDAY SCHOOL LESSON

FEBRUARY 3

THE HOLY SCRIPTURES

Golden Text: Open thou mine eyes, that I may behold wondrous things out of thy law. Psalm 119:18.

Lesson: Deuteronomy 6:4-9, Joshua 1:1-8, Psalms 23 & 24, Nehemiah 8:1-6, Psalms 19:7-14; John 20:25-27, Acts 17:10-12, 1 Timothy 4:11-13.

Devotional Reading. Psalm 119 105-112.

Explanations and Commends

The Value of The Scriptures Psalm 19:7-11. The law of Jehovah, the testimony of Jehovah, the precepts of Jehovah, the commandment of Jehovah, the ordinances of Jehovah, all of these expressions are terms for the Scriptures of the Old Testament. Each of these terms has a word with which they contain. "The Christian Church has gratefully avoided the words in the larger body of Scripture which forms the Bible. The Psalmist declares, is perfect, reviving the soul; sure, making wise the simple, right, rejoicing the heart; pure, enlightening the eyes—"less parting rejoicement and vigor to the mind; giving new life and hope and spirit to the godly. A rich man's eyes were opened and he saw the glorious inheritance true, and righteous altogether.

The Law of Jehovah. "In close connection for ever." When among the Scriptures, the Psalmist invokes the abstract expression "the law of the Lord," he must mean the whole collection, the Pentateuch, or interpretation of the Book whose prime is the burden of the song. (George Adam Smith.)

More to be desired are they than gold, yea, than much fine gold.

The Word like a sharp, keen razor. And jewels in a gold case.

Are hidden in it—a mystic design.

For every searcher there.

Then with heart set on the Psalmist cries, "More to be desired are they than honey and the dropping of the honeycomb." Honey by them is the servant warned, in keeping them there is great reward."

If only we would obey the leadings of Christ, in the pleasure of his men, our lives would be full of light and health and liberty. We should be restored to perfect health; our simplicity would be made wise, our hearts would be gladdened; our eyes would be lightened; our power increased, and our dispositions sweetened" (P. B. Meyer).

Prison Strange Society

Wives Of Gamblers In Budapest Have Organized Union

A strange society has just been formed in Budapest. The wives of gamblers have banded themselves into an anonymous union, with the object of protecting their property resulting from losses at cards. The members of the union propose to visit members of parliament and enlighten them on the tragic family conditions brought about by the gambling clubs, and eventually to make an appeal in their favour at the interior

The organizer of this union is the widow of a gambler, who devoted himself in the Danube after committing forgery to pay his gambling debts.

During her husband's lifetime she lived in fear of waiting for his turn by the vestibule of the card club in the small hours, but since his death there became intimate with members of women who wailed, trembling, at the thought of the hours which their husbands would disclose to the card club, they came from the card room

Speeding around corners is a straight road to the hospital

The King government has undertaken to erect a huge grain elevator 100 and one-half miles from Prince Rupert. The structure will cost $4,000,000, the first contract to be awarded last St. Lawrence river rivals in the same speed. In times of congestion next month. The elevator will be able to unload 20-ton vessels at the rate of 1,000,000 bushels daily and railway cars can be loaded on four tracks at the same time.

Royal Bank Annual Meeting

The ninth annual meeting of shareholders of The Royal Bank of Canada marked the close of the most successful year in the history of the bank. The report submitted showed that both the assets and the profits of the bank established a record for Canadian banking.

Dealing with the question of trade relations between Canada and the United States, Sir Herbert Holt, the President said:

"The country imports more goods from a single market than Canada imports from that country. The volume of these imports during the fiscal year ended March 31st, 1929, aggregated $746,000,000, and a total more than 300 million dollars in excess of Canadian sales to that market during the same period. Such an unbalanced trade relationship is unjust as to the national welfare of this country.

"In spite of the fact that the present trade relationship between the two countries is disproportionately favorable to the United States, there is active discussion of further tariff increases that would operate to shut out the few competitive items which Canada now sells there. It would seem that those who propose such tariff changes fail to realize that checks upon Canadian prosperity must inevitably react to the disadvantage of the United States, which is the Canadian market, is perfect, reviving the soul; sure, making wise the simple, right, rejoicing the heart; pure, enlightening the eyes—"less parting rejoicement and vigor to the mind; giving new life and hope and spirit to the godly. A rich man's eyes were opened and he saw the glorious inheritance true, and righteous altogether.

The Law of Jehovah. "In close connection for ever." When among the Scriptures, the Psalmist invokes the abstract expression "the law of the Lord," he must mean the whole collection, the Pentateuch, or interpretation of the Book whose prime is the burden of the song. (George Adam Smith.)

More to be desired are they than gold, yea, than much fine gold.

The Word like a sharp, keen razor. And jewels in a gold case.

Are hidden in it—a mystic design.

For every searcher there.

Then with heart set on the Psalmist cries, "More to be desired are they than honey and the dropping of the honeycomb." Honey by them is the servant warned, in keeping them there is great reward."

If only we would obey the leadings of Christ, in the pleasure of his men, our lives would be full of light and health and liberty. We should be restored to perfect health; our simplicity would be made wise, our hearts would be gladdened; our eyes would be lightened; our power increased, and our dispositions sweetened" (P. B. Meyer).

Training For The Mind

Need For More Varied Occupation Says Major Thomson

Fifty per cent of the breakdowns in the Dominion could be prevented it people were taught how to use their brains. India is suffer injury to their eyes while at work or play declared Major J. W. Thomson, assistant manager of the Canadian National Institute for the Blind at a meeting of provincial field officials at the office in Regina.

Major Thomson is touring the country to examine the work of the institute and has about completed the need of an intelligent and intensive training for the mind. He declared that with proper training the blind could work at almost any occupation besides the standard basketwork, reed work and broom making. In Saskatchewan alone, he said, some 150 blind persons would thus be enabled to earn their own living and not be a burden on society.

He said that over $100 000 worth of goods made by the blind have been sold in this province in 1924 by the sales department through women's organizations. Of this sum the broom sales amounted to $25 000. The total sales for Saskatchewan and Newfoundland totalled one million dollars.

Will Be Working Soon

Shovel Cradle Boards To Be Organized Soon

Now that the federal rural credits board has been completed, the task of organizing the provincial boards and of putting the Federal Farm Credits Act into operation will be proceeded with vigorously and it is regarded here as certain that the first loaning organization will be functioning before the spring break up.

The most important job now is to get the provincial boards appointed and the machinery set in motion and, therefore, six separate boards are required. The system to be followed is that the provincial governments will submit a list of names of suitable men for the board and from this list the members will be chosen. It is understood that Hon. J. A. Robb, minister of finance has written to the provinces urging that the boards be set up with the least delay in existence, a proclamation will be issued bringing the new system into operation, and Mr. Robb will then give the federal board $5,000, or five of interest to be used in loans to farmers. This will be a revolving fund since the loans or mortgages taken in exchange for the money will be discounted and the money so obtained used to continue the business of loaning.

Are You Ready

When your Children Cry for It

Baby has a sore spot at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—prompt physician would tell you to do—give a few drops of plain castoria. No soothing dope. Baby is soothed; relief is just a matter of minutes. Then you can feel your child without fear of a single doubtful drug. Castoria is safe. It is made to age or strive as to infant but say it's safe you cannot get away. And it's always ready for the crankiness of colic, or constipation, or diarrhea; effective, too for older children. Twenty-five million bottles were bought last year.

Fletcher's CASTORIA

CRUMBLY TEETH
Help your children to have sturdy bodies, sound bones and strong teeth. Give them
Scott's Emulsion
rich in vitamins. It serves the needs of childhood equally as well as it does grown people.
Scott & Bowne, Toronto. 27-29

THE CRIMSON WEST

— BY —

ALEX. FRIELD

CHAPTER XIII.—Continued.

Glenda raised her head. "Oh, an, I don't think so, Andy; that must slip on," she objected.

Andy made a pretense of studying the article in question.

"Yes, yes, sure! That's right! that's right!" he conceded quickly.

Andy's pipe was now sending out billows of acrid smoke. Connie never ceased to wonder how, even to Andy's relief, she set for a moment stirred by the adventure. meant. When she raised her head there was a look of wistful yearning in her blue eyes.

"Oh, Andy," she said dreamily, "it must be lovely to feel that some silly things neat your shoe."

"Tis—'tis sorry, Connie," stuttered Andy, "but I was only in fun, you know—I—"

"Just a minute Andy," she pleaded, "there is something else I want to ask you." She noted the papers for a moment.

"Glad 'tis me, what will it be now?" thought Andy, as he turned himself for the next question.

"Andy, what is a mesmade?"

A look of perplexity overspread the little Australian's face.

"A mesmade," he answered with an air of wisdom, "is a fish. It's—"

He was interrupted by Connie's peal of laughter. "Oh, Andy," she cried, "you're a funny man!" She leaned and ran laughing down the hill.

"Strike me lucky!" exclaimed Andy as he mopped his brow. "It's enough to make a blighter's heart bleed. The prar motherless kid seems to a blessed like me to ask such questions."

He watched Connie as she slowly ascended the trail, still studying the magazine page.

"But 'tow the 'ell can I 'elp 'er?" He pondered deeply for a moment, but, seemingly unable to answer the question, shook his head sadly and turned to his duties.

Fortunately for Janet's peace of mind, none of the guests were recognized in the photograph of the new designs of Andy's boat. Connie young man they had met at her home. They were puzzled by her description of the boat, but with the wilful child she casually mentioned that Mr. Mallard was arranging for their entertainment, and she accepted with a smile the sly teasing that followed.

The party arrived by special train a day earlier than originally planned, and on Janet stepped in the polished Donald was for a moment disconcerted by the familiar air he had assumed and the patience in her eyes they rested on him.

Then Athelstane Mallard came rolling down the hill minding in her direction, and Janet's color returned forever. She leaped from her horse and ran blithely around the corner of the building. Andy, dressed in white coat and hat, came smilingly forward to her.

"Andy, here are some rare flowers Dad sent for you," she cried, holding abruptly as Donald, leading Janet and her friends from a tour of the kitchen, came through the door.

That night, lights gleamed from every window of the big room, which had undergone a sudden transformation. The walls were now mass of wild flowers, and on the broken ever bend small cedars and balsams raised upright in room, adding a pungent odour to the air, already burdened with the sweet smell of wild flowers. The music of the phonograph floated out of the open door to vibrate softly through the dripping trees.

Connie learned of the dance, and after duty she strayed quietly down into the valley. She ascended by the open window, heedless of the rain dripping from the eaves, her eyes glued upon the enchanting scene within. She saw Donald and Janet gliding across the floor, and she marvelled at the grace of their movements. The hum of talk, the constant ripple of luminous laughter, the clink of glasses, were all strange to Connie She felt a touch of intense and utter loneliness. She a stranger in a strange land.

Janet seemed to have thrown aside the cloak of reserve; she seemed ever with an unwonted gaiety but at times her big brown eyes took on a tender look as they rested on Donald.

Connie's "rabbits" filed in to give an exhibition of old-fashioned dancing. Nikk the men were handsomely dressed in their new suits, and Connie that they were impersonating Andy and Andy's playing the part of while "Pigskin" Jock's rearing video did the "calico set." Cillie imitated the company that Blackie didn't know a note of music from a jew's harp, but he imitated the technical knowledge was made up in the immense volume of sound he set beyond the screen. Connie's eyes sparkled with delight when she recognized the imitations of the children's figure dances by the cold reception, her eyes wide with horror at the lack of pain, Connie turned quickly away.

Moving with the easy grace and freedom of a young panther, Connie, unseen, stole to the side of her self-appointed guardian, and, pressing herself with a speed that sent Connie into hysterics, began to pull his hands sent a cloud of dust in their faces, then heave and rider went down in a heap.

Janet stood staring after the flying rider, a look of blank astonishment on her face.

Then a visit to the mill ensued but from the highest point on the hill she watched the merry-making with keen interest as, dressed in dainty riding costumes, they rode their horses, deported themselves in ballin-sets on the sandy beach, paddled the lake in light, gracefully canoes, or chugged about in the white motor-boat Per two evenings after the arrival of the merry party Connie was left alone with Donald and Janet floated on the pine d like in one of the tiny canoes, but Connie was not lonely for long. Andy came up lazily from the harbor.

During the evenings she spent with Donald, Janet was unsalled by her dazzling loveliness in which she seemed to define her attitude toward him, but Donald was not the man for confidences, and the subject was never mentioned.

On the night before Janet's departure a dance was arranged, to which the Federal staff of the nearby mill was invited. Cillie promised a special feature on the programme in the form of an old-fashioned sailor dance with his "red-shirts" as the partners.

All that day the skies drizzled continuously, and Connie and mountain were hidden under a heavy blanket of the inclement weather did not dampen the spirits of the merry crowd, who, in slickers and oilskins, spent every description, gathered firewood and came in decorated for the dining room that was to be used as a dance-hall.

(To Be Continued.)

Guard Against FLU — Sore Throat The First Warning.

Few families will escape. This epidemic constitutes a real danger. Health authorities everywhere warn the public of the danger of the common cold. "Flu" usually starts with Sore Throat. Unless the germs are killed by some antiseptic treatment a serious illness may develop.

A simple treatment is to gargle the throat three times daily with Zam-Buk. The antiseptic properties of Nerviline quickly destroy the germs in the throat. Of course if the throat is sore Nerviline should be rubbed over the affected area—lots of rubbing—it can't burn a blister, but will bring out the congestion and break up the cold.

To prevent "Flu" or colds from gaining headway Nerviline will prove most effective. It is hardly necessary to point out that the bowels should be stimulated, and the system purged of all waste materials. For this purpose Dr. Hamilton's Pills are recommended. They act without griping or discomfort of any kind. This combination treatment of Nerviline and Dr. Hamilton's Pills will prove d very effective preventive for Grippe, Flu, etc.

Great Britain Saving Moving Picture Films

Plans To Keep Record Of Important Events In National Life

Plans for the preservation for posterity of motion picture films of important events, landmarks, records of British history are being laid by the British Empire Film Institute.

This particular work is under the trusteeship of Lord Ashcroft, Rear Admiral H. E. Reginald and Alfred C. Bossom, architect.

The first result obtained by the institute is the original film of Captain Scott's ill-fated expedition to the South Pole, of which Reginald assumed command after Scott's death in 1912. Other films the institute hopes to acquire will show representative features of British life, such as Ascot Cricket, Henley regatta, and the Major's parade, pictures of the motor trials in the congested areas and activities of the royal family.

Says Food Controls Height

Stature of Races Depends On Nutrition, Says Physical Anatomy

According to Dr. E. Bennett Bean, a professor of anatomy, who has analyzed the measurements of 22 groups of people of all ages and races, nutrition fixes the stature of human beings. Whether the son grows much inches and how he shall develop stature; inhand people get limbs, which makes for long limbs, or normal nourishment in the equanimity and vigor from his parents, depends, of tartar and bone deteris, and the purely negative factor, his lack of proper nourishment corrective.

Corrective measures such as the use of broader foods requiring more vigorous chewing, and more careful attention to mouth habit, will in most cases, effectively restore the bigness to a healthy man.

Dunn Or None

Mr. Nuritch had suddenly come into a fortune in the form used to dominate a radio station established on shore to communicate with ships in the Canadian there are 45 such stations. The primary object of the station is to provide radio facilities whereby any ship within 200 miles of the Canadian coast can broadcast touch with shore. Constant watch is kept for the full 24 hours of every day in the 365 days of each year.

About the only thing a man gets free in this world is criticism.

TEETH TONE

Just what does the term imply? Well, doubtless at some time or other, you have had your doctor advise you "that the system needed a general toning up." You should attend to this as to the reasoning.

Under conditions of normal life, as the tissues grow and perform their functions, worn-out cells die. As time grows, it is absorbed Utilized by little to make room for the remodelling and growth of the larger structure. Also, bacteria, ever present in the oral cavity, gains access beneath the protective covering of the mouth tissues.

However, nature has made provision for the disposal of these worthless cells and foreign intruders, by the activities of certain newly organized cells known as phagocytes.

In health, these little warriors are on the alert to meet their enemies as a note disposed and, as well, the more sullenest duties of combatting disease germs, or the healing of wounds.

But with a lowered resistance of the body cells, through local or general disturbances the defence so weakened, permitting in the one case, a poisoning of the body tissues by the toxins of the germs, and in the other, the securing of a foot-hold by such bacteria as may have gained access into the tissues.

Among these factors tending to lower this lowered vitality of the body cells or, in other words "tone of tissue tone," may be cited, systemic diseases, influenza, nervous strain; inhand people get limbs, which makes for long limbs, or normal nourishment in the equanimity and vigor from his parents, depends, of tartar and bone deteris, and the purely negative factor, his lack of proper nourishment corrective.

Corrective measures such as the use of broader foods requiring more vigorous chewing, and more careful attention to mouth habit, will in most cases, effectively restore the bigness to a healthy man.

WINDOLITE
MADE IN ENGLAND
The Improved Glass Substitute
COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer, Nature's universal disinfectant and health restorer. Its rays are health-giving and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from 10% to 20% of the sun's rays are Ultra-Violet rays, so that by using glass which admits practically these vital health-giving rays. Therefore the invention of WINDOLITE was practically making sunlight wear.

Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that it has a most beneficial effect on the growth and development of a child's body and on the well-being of rattle, enabled for the first time to have healthy light instead of darkness in their sheds

Indeed, the discovery of WINDOLITE has during the last 2 to 3 years completely revolutionized gardening, given a new impetus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the hen-fit of cattle and is now being used in domestic and hermetical requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light like glass, and is waterproof for rattle sheds, dairy, d'abbot, poultry houses, brooders and all out buildings. It is unbreakable, flexible, fast-colored and is easy to cut and fit. It is now being successfully used for sunrooms, motor-boats, aeroplanes, invalid carriages, bassinettes, bed-head coverings and greenhouses. It keeps out cold and dampness, and dirty rain, as well as glass, and is easy to clean. WINDOLITE is supplied in rolls any length but 36 inches wide. A square yard of WINDOLITE will cover a square yard of glass of ordinary thickness. Only about 1/3 to 1/4 the weight. WINDOLITE requires no varnish. WINDOLITE is neat in fixing.

Price $1.50 Per Square Yard, f.o.b., Toronto.

Use WINDOLITE and let YOUR PLANTS YOUR CHICKENS YOUR CATTLE Bask in 100 % Sunlight

Little Helps For This Week

Now are we sure that Thou knowest things—John xvi. 30.

Only God knows the trials that we have to bear.

The weary longing for a different life.

The daily struggle and the anxious fear.

He knows, and we can well.

Only God knows.—we have no trust in Him.

Our Father watches over us from We feel our weakness, but His hand is ever guide

He knows, and He is kind.

—Mary Dickinson

Trust him implicitly, entrust to Him cheerfully, and you will find that all shall be well: that more grace will be given you; that the heavier the trial the larger will be the blessed measure of the strength. The Shepherd is leading you in the right way to His own blessed fold. Leave it all to Him.

—Alexander McGregor

Edward's Limerick prevents Flu.

Limerick Music

Time you distinguish classical music?" asked Mrs. Edwards. "I think so," replied her husband. "When a paper limerick every moment to be a tune and always disappoints you, it's classical."

A good rule for autotats is to keep the car and your family wore in the other car.

Off Again To Another Start

With 1928 now difinitely in the past and 1929 already on the wing, we are all of us hoping that the present year will be happy and prosperous. While we all wish for happiness and prosperity, most of us, if we are to have it, must help to make it. For many years now, the dairy industry has helped greatly towards prosperity and a resolution to milk at least one more cow and sell your cream to the Tofield Creamery, will go a long way to you—and us—obtaining our wishes.

Combines Numerous in Alberta

Some 1095 combine harvesters were purchased in Alberta in 1928 bringing the total number in operation in the province up to 1316 according to a survey recently conducted by a western farm paper. Purchases in the three prairie provinces during the year totalled 3,657 of 2,264 were in Saskatchewan and the remaining 298 in Manitoba. The sales in the three provinces in 1928 represent an increase of 611 per cent over the sales in the previous year.

Supplies of antitoxin have been sent by the provincial Department of Health to McMurray and Fort Smith in order to combat any possible outbreaks of diptheria in the territory surrounding these northern posts. Smaller quantities have been supplied than in the recent delivery by air to Red River Settlement, 2000,000 units having been sent to McMurray, and 100,000 to Fort Smith for dispatch from these points to Hay River and Chipewyan.

J. W. CHAPMAN, Secretary.

A Two-Sided Story

Following is a letter that appeared in a Western newspaper, written by one of its readers. There is information in it for storekeepers:—

"Your paper is always boosting that hometown buying is the right thing, for if everybody bought away we would not have a town very long. In your editorial a week or two ago you said there would be less buying from catalogues if every merchant would advertise, because it is advertising that keeps the catalogue men going. Well, I believe that's right too, but one thing I would like to see all the local merchants do, and there are more who think the same, and that if for them to print the prices as much as they can in their advertising. And I also think that if the prices are going up they should say so and tell why, if they know.

"These times we all have to bite our nickles, or most of us, and we certainly don't like the idea of prices going up on staples particularly, and not a word about it till you reach the store.

"I am not an advertising expert, but I know what I would like to see in my local paper a long that line and that is a lot of genuine information about goods and prices every week. Then we should feel better and if we were being fairly treated there would be less sending away. I hear this talked about a lot, so thought I would write you."

WEEKLY NEWS BULLETIN

Agriculture Short Course at University

Announcement is made of a special agricultural short course which will be held at the University of Alberta from February 11 to February 22 1929. This will be given by the teaching and investigation staff of the College of Agriculture and will provide an opportunity fwor the farmer of the province to obtain in a short time first-hand knowledge of the work being carried on at the University for the [illegible] of agriculture in the province. The course is [illegible] to meet the needs of farmers and others who are anxious to secure this information without spending the time or the money involved in taking a complete winter's course. Lectures ad demonstrations will be given in connection with soils, field and garden crops, common insect and disease pests, farm machinery, livestock, poultry and common diseases of animals. It is made clear in the [illegible] that there are no fees, no entrance requirements and no age limit imposed on the candidates. Those interested in attending the course are asked to communicate with Dean E. A. Howes of the College of Agriculture at the University.

Short Course given for Weed Inspectors

The attention of the farmers and others interested in weed control and eradication is drawn to the fact that a short course specially designed for weed inspectors will be offered at the University of Alberta by the provincial Department of Agriculture from February 25 to March 1. Instruction will be given during the course in the interpretation of The Noxious Weeds Act, in the identification of weeds and on other subjects having direct bearing on the question of weed control. The candidates who satisfactorily pass an examination at the termination of of the course will be given a diploma by the Minister of Agriculture qualifying them as weed inspectors, and entitling them to recognition by those districts requiring such service. Applications for attendance at this free course should be recieved at the office of Field Crops Commissioner W. L. Stephen, before February 22nd.

Fairs Association Holds Annual Meeting

The annual convention of the Alberta Agricultural Fairs Association will be held in Calgary on February 12 and 13. At this gathering approximately 125 delegates will be representing fairs in all parts of the province. Arrangements for the meeting are in charge of V. E. Forster of Camrose, president of the association, H. Huxley of Loydminister, secretary, and S. G. Carlyle, Superintendent of fairs and Institutes for the province.

A new high mark in the value of the poultry industry in Alberta has been set during 1928 according to the annual report of the poultrycommissioner, J. H. Hare. Figures arrived at with the co-operation of the Dominion Bureau of Statistics show that the numbers of the various kinds of poultry on Alberta farms in 1928 were as follows;1. 1,298,214 turkeys, 200,922 geese; 90,250 ducks; 5,496,120 other fowl; a total of 6,212,706 as compared with 5,358,000 in 1927. A corresponding increase in the total value of poultry is shown in the fact that this reached $6,086,290 in 1928 as against $4,921,000 in 1927.

Outposts Supplied With Anti-toxin
Alberta Has Large Park Areas

Out of the 11,874 square miles devoted to national parks throughout the Dominion, Alberta has 8,052 square miles. There are seven park areas in the province, the largest being Jasper National Park with an area of 5,300 square miles. Rocky Mountain National Park is next in line with 2,751 square miles and the remainder is made up as follows: Buffalo Park 197.05 square miles; Elk Island 51 square miles; Nemiskam 8.08 square miles; Wawaskesy 54 square miles and Waterton 220 square miles.

Combines Numerous in Alberta

Some 1,095 combine harvestors were purchased in Alberta in 1928 bringing the total number in operation in the province up to 1,316 according to a survey recently conducted by a western farm paper. Purchases in the three prairie provinces during the year totalled 3,657 of which 2,264 were in Saskatchewan and the remaining 298 in Manitoba. The sales in the three provinces in 1928 represent an increase of 611 per cent over the sales in the previous year.

TENDERS FOR SCHOOL HOUSE

Sealed Tenders will be received by the Board of Trustees of MacKenzie School District, No. 234 at the office of the Secretary-Treasurer up to noon, February 15th, for the erection of a two roomed frame school building after Plan Number E 3. Plans and specifications may be obtained from Secretary-Treasurer on payment of a deposit of $5.00. Plans must be returned within 24 hours and deposit will then be refunded. A marked cheque for five per cent of the amount of tender should be enclosed with each tender as a guarantee that same is bona fide. The lowest or any tender will not necessarily be accepted.

WILLIAM LENNIE,
Secretary-Treasurer.

PALLISER AND EMPRESS EXTENSIONS

Over the signature of E. W. Beatty, chairman and president of the Canadian Pacific Railway, has come the announcement that large extensions are to be made to the Palliser Hotel at Calgary and the Empress Hotel at Vancouver and that the additional accommodation will be ready for occupancy before the peak of the present years tourist traffic. This is good news, not only to the two cities more directly concerned where a total of more than four million dollars will be spent in the work, but to a vast legion in all corners of the earth to whom the Canadian West is a lodestone.

When Calgary read of the four additional floors which will add 200 rooms with bath to the city's accommodation it thought of Stampede week, and the thousands who pour in from all points of the compass, clamouring for accommodation and joining the mill of Cowboys, Indians and old-timers who for one week drop back to the color, romance, gaiety and sport of the early 80's.

Calgary is a steadily progressive city. Its trade and commerce continue to expand. It is a great city of the plains and the Palliser will be as spacious and beautiful as is fitting to city and the times.

The "Empress" addition of 270 rooms with bath shown above will also be appreciated by an ever increasing number to whom the quiet English city of the Pacific coast holds annual appeal. The new wing will be a beautiful structure carrying out the chateau type of architecture exemplified by the old building. When, however, its walls become ivy clad and its stone lines and traceries are covered by the foliage it will lose nothing and fit still more with the background of holly hedges and box-wood trimmings.

When these two extensions are completed, Canadians may take still more pride in a chain of Canadian owned and operated hotels which extend from coast to coast and in point of view of service comfort and appointments is second to none in the world.

Too Much ACID

Many people two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

This Changing World

Annual stock-taking is a wise procedure on the part of every individual and nation. It is absolutely essential in the case of the man in business if he is to make a success of the enterprise in which he is engaged. This is true whether the man be the manager of a large industrial concern, or the owner of a small country store. It also applies to the man who is engaged in the business of farming because to succeed he must know where he made money and where he lost it; he must find the leakages before he can plug up the holes.

Any such stock taking should include a study of the trend of business throughout the country and the world to the extent that such study is possible. Especially in view of the close commercial relations existing between them, and the fact that they do a larger business with each other than with any other country, the people of Canada and the United States should understand not only what is taking place in their own country, but also in the neighboring country. For these reasons recent analysis of United States business in 1928 as compared with 1927 are of value to Canada.

These comparative studies reveal some startling developments and trends in business. For example, soft coal output decreased 6.1 per cent, and petroleum production 0.9 per cent, while the output of electricity increased 9.2 per cent, thus indicating the rapidity with which electric power is overtaking steam power. Railway carloadings dropped 0.6 per cent, and gross railway income by millions of dollars, but freight movement by motor trucks progressed over a larger mileage, and mail and express movements were heavier, while the output of automobiles increased 24 per cent., thus showing the modern trend to more rapid transportation of commodities.

Department store sales increased 1.1 per cent., mail order sales jumped 14.9 per cent., and chain store sales 17.1 per cent. On the other hand wholesale trade fell off 1.5 per cent., indicating steady progression in more direct selling from producer to ultimate consumer. Possibly one of the effects of this development is found in the increase of 1.2 per cent. in the number of business failures notwithstanding the year was one of great production, large constructive development and prosperity.

The modern trend in the larger use of electricity, more and still more and efficient machinery, and more direct and rapid transportation is emphasized by the fact that, in a year of amazing growth in production and construction, employment decreased 3.3 per cent. In contrast with this is the fact that union wage rates were 0.4 per cent. higher, indicating that, while there was decreased employment, those in employment were paid slightly higher wages.

The buying power of United States farmers rose 6 per cent., revealing an improvement in the agricultural situation. Business profits rose 11 per cent., savings bank deposits 8.9 per cent., life insurance sales 5 per cent.

The above figures would seem to indicate certain factors and lessons deserving of earnest consideration by all business men. The fact that business profits rose 11 per cent. but business failures increased indicates that the business man who keeps himself informed of, and adjusts his operations in conformity with, changing conditions succeeds while the uninformed and ultra-conservative loses out. To the artisan, clerk and working man the figures seem to say that in this machinery age the man with knowledge and initiative, in a word, the efficient man, is in demand and at even higher wages, while the inefficient finds increasing difficulty in securing work.

The same economic forces are at work in Canada as in the United States, and the same tendencies are to be noted, the only difference being that this country is not so highly industrialized and has much greater natural resources still in an undeveloped state calling for manual labor. In the commercial world, especially in the retail merchant class, the problem of the mail order house, the chain store, the consolidation of merchandising in the hands of great concerns, and the allied problems of transportation and distribution, are becoming quite as acute, and if he is not to go under the small dealer must meet these changing conditions. He cannot do it alone, single-handed, but his chances of success are good through co-operation.

In the past few years, and particularly in 1928, a great change has taken place on our western Canada farms through the introduction of the combine, the motor truck, and the building of good roads. Through these means production will be increased on the one hand, while less human labor will be required—that is, there is the same tendency in agriculture as in manufacturing industry. This means that, large as western farms are on the average compared with other countries, they will, as operating units become larger, with all the changes involved. Here, too, the further application of co-operative principles and methods will make for success.

The world will not stand still; it is moving forward at an ever faster pace and he who would stay in the procession, be he merchant, mechanic, farmer or clerk, must be capable and equipped to move with it. The basic foundation of such equipment is as wide a knowledge as possible of the current trend of events, and the accepted methods of coping with the changes and developments so rapidly taking place.

"Blue Blood" Defined

"Blue blood," designating an aristocrat, had its origin in the popular belief that the veins of the high-born carried blood of a purer deeper blue than those of a plainer people. This misapprehension probably arose from the fact that ...

STEP TOWARD STABILITY IN EASTERN EUROPE

Paris.—Poland's acceptance of the Soviet proposal for a protocol putting the Kellogg pact into effect immediately in eastern Europe, will yield beneficial results, it is believed in connection with the general situation in that part of the world.

The Russians have indicated that they are willing to [redacted] not only Poland [redacted] also Rumania and the Baltic states to the provisions of this protocol.

Because of the Bessarabian question no diplomatic relations have ever existed between the Soviet and Rumania. It is surmised that the new protocol negotiations will lead to such relations.

The protocol will also go far in quieting Soviet fears of a great aggressive plot against Russia by the capitalist states led by Great Britain.

It is significant that Poland has waited until the United States ratified the Kellogg pact before accepting the Soviet proposal.

Sacrifices Life To Save Companion

Montreal Woman Insists on Firemen Saving Friend First

Montreal, Que.—Trapped in a top floor apartment, which she occupied with Miss Harriet Barr, a close friend, Mrs. N. Ralpe, widow of Col W. N. Ralpe of London, England, sacrificed her life to save that of her companion in a fire which destroyed the Elonia apartment building, a four-story building here. When the firemen forced their way into the Ralpe apartment from a ladder, while the fire was sweeping the lower floors, they found Mrs. Ralpe near the window and started to carry her to safety, but she insisted that they first save Miss Barr, who was already overcome by smoke. The firemen carried Miss Barr down the ladder and returned to the top floor to find it a seething mass of smoke and flames. Their efforts to rescue Mrs. Ralpe were in vain and it was not until four hours later that they were able to make their way into the building and carry out her charred body.

France Seeks Payment For German Sugar

Over Three Million Dollars Worth Not Paid For Is Claim

Paris.—A search for more than $3,000,000, owing the French government, was being made by police after it was revealed that reparations payments of sugar had been turned over to private concerns and not paid for.

Leon Polier, former professor of political economy at the University of Lille, has been arrested as a ringleader in the plot against the government. He is accompanying police on their visits to various concerns believed involved in the deals.

Forty thousand tons of sugar were delivered by Germany in lieu of cash as reparations payments. The sugar was turned over to the Sugar Farming company and the Franco-Moroccan Navigation company to sell, but the government has not received payment for it.

King's Condition Improves

London.—Continued improvement in the health of the King today led the court officials to begin planning the regular levees and other functions of the season. The first levee at which the Prince of Wales will preside, will be held at St. James palace on Feb. 26. The King's physicians have made it known that he must spend no more winters in England, and that he must seek a warmer climate for several months each year.

Booher Found Guilty

Edmonton.—Vernon Booher will hang on April 24, 1929. After a deliberation of five hours and eight minutes, the jury found the accused youth guilty of the murder of his mother, brother and their two hired men on July 9, 1928, at Manville. Mr. Justice Walsh immediately sentenced the slayer to be hanged.

Will Advocate Railway Link

Winnipeg.—J. T. Thorson, member of parliament for South-Centre Winnipeg, will bring up in the House of Commons at the forthcoming session the subject of more direct railway communication for Winnipeg with Hudson bay.

Will Urge Negotiation Of Trade Agreement

Chinese Nationalist League Would Develop Business With Canada

Vancouver.—Development of trade between China and Canada through the negotiation of a treaty between their government and that of Canada is a major recommendation to be voiced at the annual convention of Kuomintang, Chinese national government at Nanking, by the seven delegates from Canada. Seventy-five representatives of all branches of the Chinese National League in Canada are now holding their annual conclave at Canadian headquarters, Gore avenue and Pender street, and will elect their representatives before the sessions end Jan 31.

An increase in the number of consuls throughout the Dominion will also be sought by the delegates from Canada. Consulates are at present maintained only at Ottawa and Vancouver.

There are 75 branches of the league in Canada, with three divisions, governing the east, middlewest and west. There is a Canadian membership of more than 10,000.

Prizes For Research

Two Will Be Given for Best Work in Cancer Investigation

London.—The grand council of the British Empire cancer campaign announced approval of an offer of two prizes of $2,500 each, in 1931 and 1933, for the best original piece of work in the investigation of cancer carried out in the British Empire. They will be known as the Garton prizes.

The report of the Medical Research Council, summarizing the work of various research centers in 1927, claims malignant growths in the early stages of cancer can be removed by the radium treatment as efficaciously as by any surgical means.

New Railway Station

C. N. R. Station At The Pas Is Officially Opened

The Pas.—Another chapter in the development of northern Manitoba was written today when the Canadian National Railways' new $75,000 station was officially opened here.

A ceremony was held at the new station, which is situated in the heart of the town. Maj. J. G. MacLachlan, district engineer of the C. N. R., turned the station key over to V. I. Smart, general superintendent of transportation, who opened the door of the station to the public.

Believes Soviet Rule Over

Montreal.—The Soviet experiment in Russia had failed tragically and its endurance was now but a question of the patience of the Russian people, according to his imperial highness the Grand Duke Alexander Michailovitch, brother-in-law of the late czar, cousin by marriage to King George, who has arrived here. The grand duke was certain that his countrymen would not suffer the yoke of the communists very much longer.

New Senator Appointed

Ottawa.—Hance J. Logan, former Liberal member for Cumberland, N. S., in the House of Commons, has been appointed to the Senate, filling the vacancy in that body caused by the death of Senator W. H. Ross. Announcement of the appointment was made at the prime minister's of-[redacted]

Will Take King To Sussex

London.—Preparations are going forward for the removal of King George to Bognor in Sussex as soon as his doctors decide that the time is opportune. The King will travel the 65 miles to the coast resort in a large car fitted so that he can lie as comfortably as in his bed at Buckingham palace.

Canada's Record Wheat Yield

Ottawa.—Canada's yield of wheat for the year 1928 amounted to 533,571,700 bushels. This is the highest on record and the first time that Canada has harvested a crop of over half a billion bushels. This announcement was made in the crop report just issued by the Dominion bureau of statistics.

Is Acting Postmaster

Ottawa.—William H. Pennock, for several years assistant postmaster at Ottawa, has been named acting postmaster. The vacancy was created by the death recently of Andrew G. Acres.

Class B Fairs

New Dates Are Set At Meeting Held in Winnipeg

Winnipeg.—The establishment of an eastern and a western circuit of B class fairs, and the setting of dates for fairs in each circuit, was the principal result of a session of the Western Canadian Fairs association held at the Fort Garry hotel.

The Western Canada Association of Exhibitions, which comprises the class A fairs concluded their convention in the afternoon.

Archie Wilson of Saskatoon, heads the Western Canada Association of Exhibitions for the coming year, being elected president to succeed H. W. Abbott of Edmonton at the closing session. H. G. Smith, Regina, was re-elected vice president of the organization and S. W. Jones, Saskatoon, will continue in office as secretary-treasurer.

Johnny J. Jones was awarded the contract for midway shows at class A fairs.

Because the circuit of the Western Canada Fairs Association had become so unwieldy by reason of the large number of fairs, it was divided into two circuits, and the dates for fairs set as follows:

Eastern circuit—Carman, June 28 to July 1; Estevan, July 3 to 6; Portage la Prairie, July 8 to 10; Dauphin, July 11 to 13; Prince Albert, July 15 to 17; Melfort, July 18 to 20; Yorkton, July 22 to 27.

Western circuit—Weyburn, July 8 to 10; Assiniboia, July 11 to 13; Lethbridge, July 15 to 20; Red Deer, July 22 to 24; Camrose, July 25 to 27, Vegreville, July 29 to 31; Vermilion, Aug. 1 to 3; Lloydminster, Aug. 5 to 7; North Battleford, Aug. 8 to 10.

EMBARGO BRINGS PROTEST FROM RAILWAY HEADS

Montreal.—The partial embargo placed against central European colonists by the Dominion department of immigration and colonization drew from the Canadian Pacific and Canadian National railways today a formal protest.

The decision, it was claimed in a statement issued by the presidents of the companies, will not only work distinct hardship on both transportation systems but will destroy the faith the governments, whose people are affected, have in Canada.

The companies deny they are interested in moving colonists from non-preferred countries in Europe rather than those from Great Britain or other northern European or preferred countries.

The attitude of the transportation companies was outlined in a statement issued to The Canadian Press by the railway presidents, E. W. Beatty and Sir Henry Thornton.

RECEIVES IMPORTANT POST

Dr. Charles R. Best, collaborator with Dr. F. G. Banting in the discovery of insulin, has been appointed to the chair of physiology of the University of Toronto. He succeeds Prof. J. J. R. MacLeod, who left Toronto to return to the University of Aberdeen.

Exhibition May Be Re-Established

Winnipeg Ratepayers Will Vote On Question in March

Winnipeg.—An exhibition which the promoters hope will take a prominent place among the exhibitions of the Dominion is being planned at Winnipeg, according to Wesley McCurdy, director, speaking to western exhibition authorities meeting here yesterday.

Winnipeg ratepayers will vote March 15 upon the question of whether or not they wish to authorize expenditure of $850,000 for the re-establishment of the city's exhibition.

Decline in Dairy Production

Winnipeg.—High spring feed prices and tempting offers by American buyers for dairy cows caused a falling off in total dairy production for 1928 in Manitoba, according to Alex. McKay, president of the butter manufacturer's section of the Manitoba Dairy association. The year on the whole, was successful the president intimated in his address.

To Tour Europe

Ottawa.—Arrangements have been concluded here for the European tour of a large party of Canadian club members. The group which it is expected will draw members from every part of the Dominion, is to sail from Montreal aboard the liner Laurentic June 8.

Wrote For "Punch"

London.—Rudolph Chambers Lehmann is dead at Bourne End after a long illness. He was famous as an oarsman and rowing coach and also for the light, witty verses which he contributed to "Punch."

BACK FROM THE BARRENS

Although he had not been out of the Barren lands for fifteen years, George Yandle, trapper, maintained a fine sense of civilization. The first thing he did when he got to The Pas—he did not even wait until he reached Winnipeg—was buy himself a pair of spats with zippers. Yandle acted as interpreter when Count Ilia Tolstoy entertained the Eskimos in the far north. The photograph, which was taken outside the Canadian National Railways station in Winnipeg, just after the trio's arrival, shows Yandle; Tolstoy, in the centre; and W. J. Casel, photographer. Count Tolstoy, who is the grandson of the great Russian writer and philanthropist, headed an expedition into the Barrens to study the migration habits of the caribou, and some unusual photographs were obtained of the immense herds. After spending a day in Winnipeg, the party, together with five Eskimo dogs, worth $65 apiece, went to Timagami, the Ontario forest reserve, for further study of wild animals, and thence to New York.

Needs Britain's Protection

Iraq Is Not Sufficiently Prepared to Defend Itself

London.—Differences between the British and Iraq governments over the ability or otherwise of Iraq to defend itself have resulted in the resignation of the Iraq cabinet under Premier Asha Jafar Pasha el Askeri.

The British authorities hold the view that Iraq, placed under British protection after the war, is not yet ready to assume full responsibility for its defence.

A treaty between the British and Iraq governments in 1922 provides responsibilities of Great Britain as a mandatory power shall be terminated when Iraq is admitted to the League of Nations.

Iraq has a population of nearly 3,000,000, practically all Mohammedans. Its chief city is Bagdad, and the territory is east of Arabia, comprising 150,000 square miles.

The real difficulty it is pointed out in London is that even the existing agreements between Great Britain and Iraq are not fulfilled particularly with regard to military and financial matters, including railways and forts.

South African Tourists Greeted By Snowstorm

Students Wanted Thrill and Got It in Toronto

Toronto.—In the midst of a blinding snowstorm 27 students of South African universities arrived here in the course of their tour of United States and Canada.

"Just what we wanted," one of them exclaimed heartily, though citizens of Toronto were finding the storm troublesome.

"We were counting on Canada for the thrill of real cold weather, lots of snow and the novelty of ice hockey," T. Thorpe, Capetown university spokesman for the visitors said.

The students were the guests of Toronto university and left for Montreal for a visit to McGill university. Before completion of the tour the students will have been away from home for three months and will have travelled 25,000 miles.

Crosses Atlantic In Steamer's Lifeboat

Stowaway From England Had Feet Frost-Bitten During Voyage

New York.—Matthew Badderley youthful cheese cart driver of Cheshire county, England, completed a stormy crossing of the Atlantic in a lifeboat, an uncomfortable but not a dangerous journey, for the lifeboat all the time was hanging in its davits on the liner Lancastrian. For 10 days the stowaway stuck it out through storm and cold, living on the emergency rations in his hiding place. He kept his hands warm against his body, but his feet were frost-bitten and just before the ship reached quarantine the pain drove him forth.

He collapsed while telling his story but was revived and put to bed in the ship's hospital. He will be sent back to his cheese cart.

URGES BETTER FEELING BETWEEN TWO NATIONS

New York.—J. Ramsay MacDonald, former premier of Great Britain, in an article under his name in the current issue of The Nation, Liberal weekly, makes a plea for the understanding public men of the two nations "to meet and drag from the obscure corners of sulky suspicion the things that make difficulties between us."

"The relations between the United States and Great Britain grow increasingly unhappy," he says. "A spirit is growing in the two countries which is estranging them and is encouraging a kind of squabbling criticism which destroys mutual understanding and forebearance."

"Have both of us failed to observe how easy it is to slip into war for nothing, how ready popular imagination is to be set on fire by any one—even an almost anonymous newspaper proprietor who cares to light a match?" he asks, then continues:

"This is no case for private and unofficial action and conferences. The governments must act. Both countries ought to appoint five or six outstanding men to discuss our differences. Mayhap fresh air would clean our minds of them."

CANADA'S CLAIM APPROVED BY RADIO MEETING

Ottawa.—Canada's claim to 40 per cent. of the intermediate waves has, it is ... been successfully ...

There are 630 channels in the band with approximately 250 channels available for distribution after allowing for amateurs and dot-and-dash stations.

Ratifies Kellogg Treaty

Action of Lithuania May Affect Dispute Between Russia and Poland

Kovno, Lithuania.—The Lithuanian government ratified the anti-war Kellogg pact.

Ratification of the Kellogg pact by Lithuania has significance in its bearing upon negotiations between Russia and Poland for a special protocol applying the pact in a localized sense to the states that touch the western frontier of Russia. Poland and Lithuania have been at odds over frontier questions and over the ownership of Vilna, a city which Lithuania claims as its legitimate capital but which is now held by Poland.

Plan Air Endurance Test

Flight to Prove Claim Made for New British Plane

London.—The Mail says that a non-stop flight from Capetown to England is planned to test the claim made for a new British aeroplane that it is capable of flying further without refueling than any other in the world.

The 'plane, which has tanks for three and one-half tons of gasoline in its hollow 38-foot wing, is now being put through trail flights. Two pilots will fly it to Capetown by easy stages and attempt the return flight without a stop.

Inspect's Seagrave's Car

Prince of Wales Learns Things About Speed Riding

London.—The Prince of Wales, driving alone in his automobile made one of his typical impromptu visits to a London motor house to inspect the car "Golden Arrow" and the speedboat "Miss England" with which Maj. H. O. Seagrave intends to attack world's speed records this year.

The major happened to be present and he showed his vehicle to the prince, answering many questions about the sensations of speed riding.

Treating Drug Addicts

Geneva.—Nostake Sato, the Japanese League of Nations representative, has informed the international opium committee that Japan was successfully applying medical treatment to Korean morphine addicts. Out of 684 cases, 660 had been sent to hospitals and cured.

Director of Cattle Association

Brantford, Ont.—R. B. Fall, for 25 years editor of the Farm Journal, has been appointed director of extension of the Holstein Friesian association of Canada. His headquarters will be in Brantford.

Wireless For 'Planes

Toronto.—Provincial air force 'planes will be equipped this year with wireless, so they may send reports to headquarters from any distance up to 400 miles it has been an-[redacted].

Report Severed Relations

Berlin.—An entirely unconfirmed report circulated in Berlin said Japan had severed diplomatic relations with Russia. The source of the report was not known.

A Bid For Freedom

The trend of business is towards amalgamation and centralization—building up vast organizations through combinations of many small ones. In the face of this development the farmer as a single unit has found himself isolated, helpless and working at a disadvantage.

The first step taken by producers to remedy their position was the formation of producers' organizations, of which the Wheat Pool is the most notable example. In the Pool the strength of unity has been demonstrated time and again.

For the protection of himself and his family, and for the advancement of agriculture in general, every wheat producer in Alberta should join the Alberta Wheat Pool. There is no question but that the Wheat Pool has created stability, increased grain trade profits, stabilized prices and lessened disaster as specially felt by the benefit of ALL wheat growers in Canada.

Undoubtedly the Wheat Pool has paid higher average prices to its members than the Grain Trade has paid to non-Poolers.

The Pool is not only operated on a non-profit basis but it pays patrons prices at least four weeks in advance of any other organization or individual.

To Those Who Have Not Yet Joined the Wheat Pool:

A [illegible] you're going to join the Wheat Pool, you should join now. [illegible] for stock-holders your after year.

If you're going to join the Wheat Pool and want to help further your own interests and the interest of your fellow neighbors?

The Alberta Wheat Pool

3—Mrs. Abbott.
4—Mrs. McAuley.
1—Mrs. J. Morton
2—Mrs. Craig.
3—Mrs. Chatterton.
4—Mrs. J. Lon.

ENTERTAINMENT AT WESTLAKE SCHOOL

The Christmas entertainment (which was postponed through illness) was held at the Westlake school on Friday night. There was a very good attendance. The teacher Miss. R. I. Fyffe put on splendid program which was thoroughly enjoyed by all those present. It was one of the best program's put on at the school. The pupils from the oldest to the youngest did their work splendidly, and deserve our congratulations.

The programme, which was too long to be listed, included recitations, dialogues, songs, etc., and during the last item, a dialogue, in costum Old Santa to distribute the gifts.

Congratulations were then given to the teacher for the splendid manner she made of the program presented to the audience.

Then up sprang the ladies of the district and handed out a repast which was thoroughly enjoyed. I wish through the medium of your paper to thank the ladies for that repast. It was a splendid ending to a most enjoyable evening.

—By the chairman of the evening

Stock Medicinal Foods

This is the season of the year when farm stock, horses, cattle, pigs, poultry etc. need a medicinal tonic to assist them to withstand the changes from mid-winter to early spring weather.

We carry Dr. Hess's famous stock foods. A small amount of money and care invested in stock at this time often prevents serious losses when the spring is more advanced..

A. A. BEIRNES, Tofield

Saturday, February 23rd
A Girl In Every Port
VICTOR McLAGLEN and NATALIE JOYCE
You'll sure get a laugh out of this.

LOCAL AND PERSONAL

Mr. A. P. Harrold was called to New York where his brother is very ill. He left on Sunday.

Mr. W. Stutzman is here visiting his daughter, Mrs. Etel.

Mrs. Pinnott spent a few days in the city last week.

Mrs. J. W. Francis of St. Paul de Metis is very ill at the home of her sister in Edmonton.

Mr. R. W. Pincott motored to the city on Monday.

Mrs. W. C. Swift spent Thursday in the city.

Mr. A. E. Evenson visited at the Jobb home for the week end.

Mr. C. M. Coombes is home again after quite a stay in the city. He was a journman in the recent court sessions at Edmonton. He was on of the jurymen on the new famous Boser case.

Lesle Ball, young daughter of Mr. and Mrs. Frank Ball is at present in in an Edmonton hospital suffering from an attack of sore eye. We trust that future reports will be more favorable, present reports indicating that an operation of an optical nature may be necessary.

Rev. Symes arrived at Tofield on Saturday last and conducted his first service here on Sunday morning. Rev. Symes is just recently from England, but has travelled extensively in various parts of the world. He spent some years in the British Navy and was present at the battle of Jutland. He has also spent some time in the Australian bush and lived in New Zealand for a time.

The Ladies' Aid of the United Church will hold a Valentine tea and sale of Home Cooking, on Friday, afternoon, February 15th, at the home of Mrs. Frith.

On Saturday, January 26th, the C.W.L. held a chicken supper at the roring rink. A large number attended and thoroughly enjoyed the event.

Leonard P. Woodhams, optometrist (eye-sight specialist) of Camrose, will be at Tofield on Wednesday, February 13th. Regular appearance combined with expert treatment is increasing the number of Mr. Woodham's consultants. Those desiring to meet him will find him at the Royal Alexandra Hotel on the above date.

The C.W.L. will hold a Valentine tea and sale of home cooking on February 14th from 2:30 to 6.30. in the Institute rooms. Everybody welcome.

The Holy Trinity W.A. are contemplating holding a tea and sale of home cooking in the Institute rooms on Saturday, February 16th. Remember sale in connection. Watch paper for further announcement.

Inspector Hale and E. Hill of the police department visited the local office on Thursday. There was quite a reunion as both inspectors and Mr. Chatterham were members of the 49th Battalion and were in the same company. Mr. Chatterham had not seen them for a number of years, and after the official post office business was done, there were many yarns exchanged of old times together.

W. I. NOTES

The regular February meeting of the Women's Institute will be held in the W. I. rooms Feb. 12th. at three o'clock. Mrs. Baptist convenor of education, will give a paper on "Standard Fiction." The roll call will be answered by "Scraps from Authors" and every member is urged to come prepared to read us a few lines of poetry or prose from any writer which has appealed to them.

We are asking all those who can to kindly donate a dish towel to the institute rooms.

The Institute this year is planning on compiling a cook book from favorite recipes of members, copies of which will be sold to help swell our funds. At each meeting members are asked to bring a written-out recipe including method, which will be collected by the secretary. For the February meeting we are asking for recipes of all varieties of breads, buns and biscuits.

HOCKEY

On Saturday evening last the Tofield Trail Ranger team augmented by the forward line of the Tofield town-ups boys team, journeyed to Camrose to meet the Camrose All Stars boys team. Of the game probably the least said the better as the Tofielders were walloped to the tune of 16—2.

To understand the score aright, a certain explanation is necessary. This game and the game on the previous Friday were arranged by the Trail Ranger team with the All Stars. The two teams are not in anyway associated, the Camrose team being much superior both in experience and age. The Trail Rangers, knowing that they were up against superior forces, brought the aid of the town age forward line. Against the advice of their manager, the town age forward line went to Camrose with the above mentioned result. The Camrose All Stars are a really good age boys team and if they met the Tofield town age boys team, a first class game should result. Since the game and especially since the report of it in the Edmonton Journal, the boys have been the target for some good natured remarks, both at home and from a distance.

The journey to Camrose was made through the courtesy of Mr. Ross and Mr. Galloway who kindly took their cars for the actual expenses of the trip.

On Monday night the Tofield town age team, augmented by Reg Lee, Cliff Bertron and Ted Hazard, journeyed to Chipman to meet the Chipman seniors. Glenn Wood was left out, taking the place of Harry Bewick who had just recovered from an attack of the flu. The score was 6—2 in favor of Chipman. The fast age of the game rose to no end and from an actuon again, Roy having lost none of the old time artistic manipulation of the puck, and Bud is as peppy as ever

As regards play, Chipman had a distinct edge in the first period and during three goals. In the second Tofield had an edge on play but they were out scored, Chipman getting three more and Tofield one. The last period was distinctly Tofield's, they putting one past the Chipman goalie, while Chipman were unable to score. In this period Chipman were literally backed into their own territory for minutes at a time, but Tofield's shooting was very poor.

The Chipman team is well balanced, contains good stickhandlers and checkers and can provide good stiff opposition for any amateur senior hockey team.

The Tofield goals were scored by Bud Hinman, who got one by shooting hard, following it in and getting the rebound; and Bob White who shot and scored a neat counter when Wood was pressing

The team made the trip through the courtesy of Messrs. J. White, W. Slaits and Bert Swift, who took their cars for the actual expenses of the trip.

On Tuesday the annual town and country hockey meet was held at the rink, Hardy being the opposition to the local lads. There were two games the smaller lads taking the ice first. This resulted in a win by the local lads though the country fathers were game to the last.

During the interval between the junior and older lads game there appeared to be about forty hockey players on the ice, and they all appeared to be enjoying it.

Glenn Wood with his patent referee's whistle, cleaned the ice and the real performances lined up. Hardy gave the local boys a run for their money, but the locals found a weak spot in the line up and went in quite a number of times and scored. One got passed Bewick however. Glover checked an on coming Hardy forward, the puck went high into the air and dropped nicely behind Bewick into the net.

Coming Games

Friday night, Tofield will meet the Camrose Huskies. This promises to be a hard tussle for the locals. The Huskies are an organization that have been going strong for years and will no doubt provide stiff opposition.

On Saturday afternoon the same local teams will meet the Edmonton Acmes. The Acmes are the same team the local boys met several times last year. They are smart, know their stuff and this game should provide some of the best hockey seen on local ice this winter. The boys would appreciate good support from the side lines.

- SKETCHAMOOT -

We are very thankful for the change in the weather which is quite livable again. School is being run regularly, people getting out and around again, last but not least, the stock are not perishing.

Mrs. Geo. Lawson spent a few days last week visiting her daughter Mrs. Harold Smith of Camrose.

Mr Wm. Lee spent few days in Edmonton last week.

Where are you going next Friday evening, February 15th? To the basket and valentine social at the Shultz home of course? Lunch will be served to those not getting baskets. Everyone welcome and a pleasant evening assured you.

Mr. and Mrs. G. W. Sears were guests of Mr. and Mrs. John Lee on Friday evening.

Mr and Mrs. Harold Smith motored up from Camrose on Saturday and spent over Sunday at the home of Mrs. Smith's parents Mr and Mrs. Geo. Lawson.

Mr. Nill Ingram was able to return home from the hospital in Edmonton on Tuesday. He was accompanied by his uncle Frank Ratigen.

Mrs Sears, Misses Lillian Carlisle, Annie Brehn, Mildred and Gertie Ingram, Ray Williams, James Easton, Harold and Alvin Schultz, Stanley Sears and Jimmie Ingram, braved the cold and attended the C. G. I. T. girls concert in Tofield last Wednesday night and all reported that it was one of the best concerts they ever attended. They will give the concert in Kingman on Friday night February the 8th.

- LINDBROOKE -

The cold weather continues and the majority would like to see it ease up if only to give the livestock a little exercise, drawing it however crusts still continues to go from Lindbrooke.

Mr. and Mrs. Leahy spent a few days in Edmonton last week. It is reported that THEY ENJOYED the trip.

Mr. L. Hooper went down the line one last week on business

Mrs. W. Hooper and James Hooper spent the week end in Edmonton visiting relatives.

We are glad to hear that Mrs. W. Pashina is up and about again after her illness of a month's duration. Mr. Harris was O.C. cows during Mrs. Pashin's illness.

Mrs. C. Kootsman was down on a visit from Edmonton over the week end.

Mrs. Swain visited Edmonton this week.

The teacher and pupils of Lindbrook School wish to thank Mrs. Smith for the books that she so kindly donated to the school for their benefit.

- KINGMAN -

George Silinco, formerly of Edmonton has opened up a barber shop in T. Hertz's building.

A few Kingmanites attended the International tractor school in Edmonton last week.

K. Engstad left on Friday for Banff where he will enter the ski races during the carnival.

Mr. and Mrs. T. Grahn motored to Camrose on Thursday.

Mr. and Mrs. W. Jardie were the guests of Mr. and Mrs. W. Hartelon on Sunday

A number of Kingmanites were Camrose visitors on Saturday.

Melvin Stanley and Lillian Lindberg, and Florence Benson motored to Camrose on Sunday.

The Tofield girls will give a concert and play in the Kingman Hall on Friday, February 8th, at 8 p.m. A good time is assured.

The Holroyd orchestra of Camrose will give a dance in the Kingman Hall on Friday, February 15th.

Mr. and Mrs. O. Thompson and family motored to Ryley on Saturday.

Mr. and Mrs. E. Erickson and Mr. and Mrs. Oscar Thompson and family visited with Mr. and Mrs. Jack Erickson on Sunday.

LAKESHORE

Mrs. H Eaton is suffering with an infected arm necessitating medical attention

The Misses Peari and Edna Gray attended a card party at the home of Mr. Ed Brehn on Friday evening They report an enjoyable evening

Mr and Mrs. Wm. Seale made a business trip to Edmonton on Saturday. They were accompanied by Mr and Mrs. T. D. Ferguson.

The organization meeting of the trustees of the school district was held on Friday evening at the home of Mr. and Mrs. R. C. Phillips. The trustees Mr. F. W. Ferguson and T. R. Murray were accompanied by their wives and a pleasant evening was spent as well as a profitable one The advisability of building a new school was discussed and a meeting will be held on Monday evening next (of the ratepayers) to go into the further

Leo, Abernathy who went to Edmonton a week or so ago to serve on the jury is in the isolation hospital with the measles. His father went up to the city on Sunday evening to visit him

Mr. and Mrs. Lester Noland spent Saturday evening visiting Mr. and Mrs. R. C. Phillips.

Mrs. J. R. Warner curled in Edmonton last week with Mrs. McCauley in the bonspiel.

Mr. and Mrs. Owen Easton and son Walter also Mrs. Easton's brother, Sam Campbell of Lamont who is visiting there, have been ill with influenza for the last week.

Mr. and Mrs. R. C. Phillips visited Mr. and Mrs. H. B. Stine of Lindbrook on Sunday.

MAYOR McCAULEY RETIRES AFTER EIGHT YEARS SERVICE

After eight years consecutive service as mayor of Tofield, Mr. A. J. H. McCauley retires this week. To say that his services are highly valued in putting it mildly, and in company with the Tofield ratepayers, the Mercury wishes to congratulate him on his past record and wish him many years of further, even though unofficial civic activity. The other results of nomination day are as follows:

Councillors—

Mayor—Councillor Swift, elected mayor by acclamation. He has served ten years as councillor and one year as mayor.

Councillors—W. Bellamy, re-elected by acclamation, served four years as councillor.

E. W. Rogers, re-elected by acclamation, served two years as councillor.

A. A. Beirnes, elected by acclamation, served two years as school trustee.

School trustee— All retiring trustees elected by acclamation.

John Lee, 12 years as trustee

Mrs. M. M Davison, 4 years as trustee.

J. W. Chapman, 5 years as trustee. Some months ago the school board promised to take a vote of the ratepayers as to whether the application of local school teachers for positions vacant in the Tofield school would be considered. At present writing we are not in a position to say definitely whether this will be done or not done.

EAST SIDE, WEST SIDE TO BE SHOWN ON SATURDAY

One of the best pictures to visit Tofield for months will be presented on Saturday night, when "East-Side, West Side," is shown on the screen.

The picture is taken from the famous novel of the same name and is story of New York as few persons see it and fewer still understand it.

The complete story of the picture is too long for a detailed description but Tofield theatre patrons are assured that East-Side, West Side, promises to be the best picture shown here for some time.

On Monday night the Georgian Singers will present a program at Tofield. This group of talented artistes are well recommended by press reports of former appearances at other points. This is we believe, their second visit to Tofield.

On Wednesday night next, February 13th, there will be a Valentine dance at the Variety theatre. Holroyd's orchestra will furnish the music. This musical aggregation is well known as a first class musical company. They hail from Camrose, but are in constant demand in many towns within a hundred miles of there. The admission on Wednesday next will be prets. $1.25, ladies free.

No Doubt About this Famous Cereal

SHREDDED WHEAT

High value at low cost
Ideal for Winter with hot milk
Proved by 34 years of growing popularity

Made by The Canadian Shredded Wheat Company, Ltd.

The Noxious Weeds Menace

This is an age of conventions. They are a natural growth and outcome of the more complex and highly organized development of modern life. They are too a recognition of the fact that the principles and methods of cooperation are in many ways and to a large extent replacing the old individualistic ideas and efforts of the past. This is not to say that the value of individual responsibility and initiative has been, or is to be, discarded, rather that in this age of rapid transportation and communication the old isolation has disappeared and peoples and nations are brought close together. They must therefore act as units rather than as distinct and separate entities.

This by way of introduction to a reference to a recent gathering held in Saskatchewan at the call of the Provincial Minister of Agriculture, namely the first Saskatchewan Weed Conference. It was not a large and spectacular convention as many present-day conventions are, but in the importance of the problem it met to consider it took second place to none. And while it was a Saskatchewan conference its deliberations and findings are of equal value to the other prairie provinces.

The conference was summoned in recognition of the fact that weeds are making tremendous headway in Western Canada, and that some action must be taken over and above the preventive policies of the past, if the inroads of weeds and the consequent enormous loss to the farmers and the country as a whole is to be checked.

The conference was attended not only by officials of the Saskatchewan Government, municipalities and farmers' organizations, but by Dominion Government officials, representatives of the railways, mortgage and loan companies, manufacturers, business men, merchants, in a word, every organization having a vital interest in the productive capacity and prosperity of Western Canada.

It was frankly and unanimously agreed that the whole country must be aroused and organized in a campaign for the destruction and elimination of weeds. The only alternative is a rapidly decreasing agricultural production both in quantity and quality, smaller returns to the farmer, and decreased business and prosperity for all.

The duty and responsibility of the individual farmer in the matter of keeping his own land free of weeds was in no sense minimized, but it was recognized that, human nature being what it is, some men will neglect their duty, and while they themselves suffer as a result of such neglect, they also inflict loss upon their neighbors who are doing their duty, and upon the community and country as a whole.

The need, therefore, for concerted Government and municipal action was emphasized, and the absolute necessity in the interest of all, for more [illegible] control recognized.

It was realized that not only must existing weeds be brought under control and eradicated, but that much more efficient measures must be taken and greater precautions observed to put a stop to the sowing of weed seeds and the propagation of the weed plants.

It is not possible in this article to discuss all the phases of this intricate problem, but at this season of the year when farmers are beginning to think of and plan their work for the spring, one factor may well be stressed, that is the importance of sowing good clean seed and not a mixture of good grain and weed seeds.

The astounding discovery was made by the seed drill survey conducted in Saskatchewan that 70 per cent of the seed sown in the province was lower than No. 2 due largely to the inefficient operation of farm fanning mills. In other words, while farmers and governmental authorities on the one hand are fighting weeds the farmers in the sowing of their crops are planting thousands of bushels of weed seeds.

The first step toward victory over the weed enemy is to put an immediate and definite stop to the planting of weed seeds in prepared soil. If the propagation of weeds is continually carried on and assisted in this way, it must be recognized that the weed menace will grow, and that final victory will rest with it and not with the farmer.

The spring slogan for all Western farmers in 1929 should be "Look to your seed grain. See to it above everything else that it is good, clean seed." If weed seeds are sown it is inevitable that weeds will be harvested. The number one still everlasting truth in farming as in all the activities of life is that "whatsoever a man soweth that shall he also reap."

Silver Foxes for Italy

A number of silver foxes have been sent from Canada to ranches in the Italian Alps where raising conditions are stated to be ideal, and where the fox farming industry is showing a steady growth.

When the plumber died his wife took no chances. She buried his tools with him.

During the World war a person's equilibrium was tested for flying by an elaborate turning chair.

Needs Some Exercise

The idle farm horse is better to be kept working a little. Heavy feeding is unnecessary, and standing day after day in a warm stable unfits the horse for spring work. A few hours in the yard or field every day keeps the muscles hard.

Use Minard's Liniment for the Flu.

He: I suppose I'm only a pebble on the beach of your life?

She: That is true, but you might stand a chance if you were a little boulder.

To Check "FLU," Grippe

Fights the Germs in the Throat Before They Invade Other Parts of the Body

EFFECTIVE PREVENTIVE MEASURES EXPLAINED

Simple precautions taken now will enable you to fight dreaded "Flu" which is sweeping rapidly through the whole country. The germs of influenza gain access to the body through the mouth and throat. Keep the throat healthy and you go a long way towards stopping the trouble. An effective means of prevention is to gargle the throat three or four times daily with Nerviline. Half a teaspoonful of Nerviline in water makes a most efficient gargle. The germ-killing properties of Nerviline quickly destroy any bacteria in the mouth or throat. If the chest is sore, if the throat is hoarse, if you have a cough, be sure to rub the neck and chest with Nerviline. Every drop of it will rub in, and out will come the congestion.

Of course it is absolutely necessary to house-clean the system with Dr. Hamilton's Pills which stimulate the eliminating organs, and rid the system of disease-breeding wastes. This combination treatment of Nerviline and Dr. Hamilton's Pills will give prompt and entirely satisfactory results.

Lieutenant-Governor Appointed

J. D. McGregor, Brandon, to Succeed Late Hon. T. A. Burrows

J. D. McGregor, Brandon, has been appointed lieutenant-governor of the province of Manitoba. Mr McGregor succeeds the late Hon. T. A. Burrows who died in Winnipeg recently. Announcement of the appointment was made by Premier W. L. Mackenzie King at the conclusion of a meeting of the cabinet.

The lieutenant-governorship was offered Mr McGregor several days ago and from his home in Brandon, he announced acceptance of the post stating that he considered the appointment as a compliment to the agricultural interests of the province rather than to himself personally.

WAS ALWAYS AILING NEVER FELT WELL

Health Restored Through the Use of Dr. Williams' Pink Pills

"I am one of the many who have found new health through the use of Dr. Williams' Pink Pills," says Mrs Everitt Ilowe, South Nelson, N.B. "For some years I never felt well and at times was so weak that I would be confined to bed. At the very best I was in an ailing condition and found it difficult at all times to do my housework. I was subject to headaches, poor appetite, breathlessness at the least exertion, and very pale. Before Dr. Williams' Pink Pills were recommended to me I had tried several medicines, but without any good results. I had become completely discouraged and felt that I would always be an invalid. A friend strongly urged me to take Dr. Williams' Pink Pills, and finally I consented to do so, but without much hope that they would help, when other medicines had failed. But in this, to my joy, I was mistaken. I had not been taking the pills very long when I knew they were helping me. As I continued their use I found my appetite improving, I slept better at night, and my strength was gradually returning. I continued taking the pills for several months, when I again found myself a well woman, and I believe that had it not been for Dr. Williams' Pink Pills I would to-day be a helpless invalid. The pills have since been taken by others in our family with the same beneficial results. I strongly urge every weak woman to try this grand health-building medicine."

If you will send your name and address to The Dr. Williams' Medicine Co., Brockville, Ont., a little book, "Building Up the Blood," will be mailed you postpaid.

You can get these pills through any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Advances New Theory

Baltimore Physician Says Lack of Lime Makes People Irritable

More lime in the diet as a preventive for divorce was urged by Dr. George Walker, addressing the National Housewives, Inc., at Baltimore. Absence of lime, he declared, makes a woman nervous and a man cruel, hence family troubles result.

When there is every appearance of a home being wrecked Doctor Walker suggested that lime, as found in a pint of milk added to the diet of a couple daily for two weeks in all probability would adjust matters, restore amicability and keep the home intact.

He also would add two oranges a day for each and a quarter pound of cold slaw at least three times a week.

It Rids Pain Regout.—When neuralgia racks the nerves or lumbago cripples the back is the time to test the virtues of Dr. Thomas' Eclectric Oil. Well rubbed in it will still the pain and produce a sensation of ease and rest. A trial of it will establish faith in it.

As a molecule of water passes through the pores of your skin it is like a man passing through a gate seven miles wide.

Recognized as a leading specific for the destruction of worms, Mother Graves' Worm Exterminator has proved a boon to suffering children everywhere. It seldom fails.

New Air Service Planned

Air express and passenger service between Winnipeg and United States points will be established within a month on a tri-weekly basis according to Capt. P. T. McCarty, president and operating manager of the International Airways Inc., of Seattle. The service will be in co-operation with the Western Canada Airways, Limited.

How many people with an automobile today owned a horse and buggy in the days of not so long ago?

Minard's Liniment for the Grippe and Flu.

Hydro Power Shows Record Development

Dominion Now Has Total of 5,339,000 Horse-Power

With world interest centered upon the efforts being put forth in almost every country to secure additional supplies of low-priced power for the needs of industry, the recent official review of hydro-electric progress in Canada is of particular interest, indicating, as it does, that throughout the Dominion the greatest activity prevails in harnessing for industrial, commercial and domestic use the advantageously situated and ample water-power resources of the country.

During the year 1928 the energy of the water-wheels or turbines actually installed and brought into operation amounted to 550,000 horse-power, thus bringing the total for the whole Dominion to 5,339,000 horse-power. In addition to this large increase there are many projects under active construction, some of them nearing completion and others just recently initiated, whose combined installations will result in adding more than 1,200,000 horse-power to the country's total. There are also many projects of magnitude in the formative stage, some of which will undoubtedly be undertaken in the near future.

For the actual development, transmission, and distribution of the power capacity installed in 1928, together with that now under active construction, it is estimated that not less than $330,000,000 will be required, while for every dollar expended in power development competent authorities have estimated that six dollars are required in its application. It is necessary, therefore, to visualize the effects throughout the country of the expenditure of an amount reaching, probably, $2,300,000,000.

New Oriental Silk

Japan and China Have Invented Mixed Fibre Product

To combat American artificial silk manufacture, Japanese and Chinese manufacturers have invented a new silk fabric, utilizing both real silk fibre and those of spruce wood in a combination, the sheen of which is expected to revolutionize the present market, according to a Yokohama exporting firm.

Artificial silk has seriously affected the production of cocoon skeins in the Orient during the last two years. The new cloth is expected to reach world markets in the early spring.

For Scalds or Burns.—Dr. Thomas' Eclectric Oil is a standard remedy for the prompt treatment of scalds and burns. Its healing power quickly soothes the pain and aids a speedy recovery from the injury. It is also an excellent remedy for all manner of cuts, bruises and sprains, as well as for relieving the pains arising from inflammation of various kinds. A bottle in the house and stable saves many a doctor's and veterinary's fee.

A Peculiar Timepiece

Clock Made in Switzerland Looks Like Sun-Dial

A turtle tells you the time in a unique timepiece produced in Switzerland. At first glance, the clock appears to be a sun-dial with a circular tray, filled with water, set in the face. In this tray a small imitation turtle floats, carrying a piece of steel in its beak. As the hour hand advances under the tray it attracts the turtle by means of magnet. If removed from the water and later replaced, the little turtle immediately swims across to the point on the tray directly above the hand thus indicating the time. The eight-day clock mechanism is wound in the usual way, and regulated after the tray and the face of the timepiece are removed.

Weapon Appears Harmless

Pistol Found in New York Looks Like Fountain Pen

A "fountain pen" that spurts 25-calibre bullets was picked up near a street corner in New York City recently and turned over to the police. The tiny weapon, little longer than the width of a man's hand, is shaped to appear merely a harmless writing instrument. A few feet away, it would be mistaken for a real pen. Only when it is examined closely does the open muzzle at one end reveal its dangerous character. The pistol unscrews in the middle to insert the cartridge. It is fired by pressing a small button, about the size of a pinhead, in the end of the weapon. This releases a spring that operates the firing pin.

The Adirondacks contain more than 100 scenic lakes.

Cuticura Soothes Burning Aching Feet

Bathe the feet for several minutes with Cuticura Soap and warm water, then follow with a light application of Cuticura Ointment, gently rubbed in. For tired, hot, irritated feet this treatment is most comforting. Cuticura Talcum is cooling and refreshing.

[illegible]

Three Hundred Years To Prepare Grammar

Immortals of French Academy Still Working on Book

"The world of letters moves slowly." Witness the speed in action of the "immortals" of the French academy; 293 years ago the body, the personnel of which remains numerically fixed at 40, although its component individuals change with deaths and new elections, announced that it was going to publish a grammar of the French language.

Now the permanent secretary of the academy promises that the book will actually go to the printer soon—probably in 1930.

At the time of its foundation in 1635 the French academy was pledged to undertake publication of three works. Ten years later it was announced that one of these, the long awaited grammar, was "being prepared." The "immortals," to whom two or three centuries are of slight import, have been preparing it ever since.

Protect Your Children From "Flu," Grippe

A WARNING TO PARENTS!

Flue germs are everywhere today. They reach the system through the nose and throat. Mothers can protect their children in a very simple way.

Take a saucepan of water, place it on a lamp or stove. Add a half teaspoonful of Catarrhozone to a pint of water, which is brought to a boil. Let the steam from the kettle fill the room so that the medicated air is breathed by the child. This germ-killing vapor disinfects the child's breathing organs and kills the "Flu" germs.

Catarrhozone Vapor stops cold, prevents Grippe, relieves Sore Throat, prevents Flu. Safe and efficient. Just as good for adults as for children. If you keep the air in your home disinfected with Catarrhozone Vapor you are well protected from dangerous Flu, Influenza, Grippe, and Colds. All druggists sell Catarrhozone in 50c bottles.

More Purchasing Power

The purchasing power of the people of Canada increased by half a billion dollars during 1928, when revenue from productive industries reached the record total of $6,040,273,905, an increase over 1927 of almost $500,000,000.

Shipping Sets New Mark

New Westminster Exceeds 1927 Record by Forty-five Ships

A new mark in shipping was set at New Westminster during 1928, exceeding by 45 ships the 1927 record of 183. The figure does not include the coastwise shipping, which is handled through the Department of National Revenue. The net tonnage of the ships handled through the harbor commissioners' office was 625,271 tons and the gross 964,300 tons, compared with 482,086 and 776,330, respectively, in 1927.

Exhausted from Asthma.—Many who read these words know the terrible drain upon health and strength which comes in the train of asthmatic troubles. Many do not realize, however, that there is one true remedy which will usually stop this drain. Dr. J. D. Kellogg's Asthma Remedy is a wonderful check to this enervating ailment. It has a countless record of relief to its credit. It is sold almost everywhere.

Built To Auto Design

First British Plane of This Type Put on Market

Britain's first airplane to be built to automobile design has been placed on the market under the name of Simmonds Spartan light plane.

The craft has four wings, which are interchangeable in the same way that the four wheels of an automobile are interchangeable. There also is a spare wing which is carried for emergencies.

The new machine is fitted with a four-cylinder, air-cooled engine of 50-65 horse-power. It recently was tested on a non-stop flight from London to Berlin, 630 miles, in six hours.

Statue for Mrs. Pankhurst

Premier Stanley Baldwin has consented to unveil a seven-foot bronze statute of the one-time suffragette, Mrs. Emmeline Pankhurst, to be erected in Westminster this summer from publicly subscribed funds.

New Brunswick's contribution to Uncle Sam's Yuletide celebration included some 3,000,000 Christmas trees, the greatest number ever shipped from the province.

Minard's Liniment prevents Flu.

Politeness is one of the best investments known. It pays enormous dividends.

ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. *But it's just as important to know that there is only one genuine Aspirin.* The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it is not! Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any drugstore—with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

[illegible]

ADVANCE IN HAIL INSURANCE RATES FOR WEST

Montreal. Substantial increases in hail insurance rates in Alberta and parts of Saskatchewan were decided upon at the annual meeting here of the Canadian Hail Underwriters' Association. Details of the increases remain to be worked out at a further meeting, but it was understood that for most of the province of Alberta the increase in rates will be confined largely to the extreme south, although not to all parts of that district. The increase there would be five per cent.

Reductions will be put in force in many parts of central and northern Saskatchewan. Manitoba is not affected.

This information was given to the Canadian Press by John Wilcox, president of the organization for the coming year. Mr Wilcox said the association was not basing its new costs upon the excessive damage through hail during the past two years but was taking an average for the last 15 or 16 years' operations.

Forty-two delegates representing hail insurance companies in Canada, with some members from Chicago and New York, attended the meeting. The decision to raise rates followed study of a report of a committee of experts who found that over a period of 15 years losses have been so heavy that hail underwriting has been far from profitable.

Accorded Privileges Of Press Gallery

Each Dominion Now Has Press Representative in British House

London. As a means of facilitating the despatch of British parliamentary news to Canada and the other dominions, the principal dominion press representatives in London have now been accorded the privileges of the press gallery at Westminster, similar to those accorded writers for the London papers.

Previously there was only one press gallery ticket for all the dominions together. Each principal dominion representative now receives an individual ticket. It is understood Rt. Hon. L. C. M. S. Amery, secretary for the dominions, personally had a hand in securing this improvement.

Abandons Visit to Europe

Bombay, India. Mahatma Gandhi, Nationalist leader, who hopes to achieve home rule for India within a year, has abandoned his idea for a visit to Europe this year. Writing in the current issue of the newspaper "Young India," he says: "I dare not think of next year. A Danish friend writes to tell me I could usefully go to Europe only as a representative of a free India. I felt the truth of this remark."

Has Remarkable Record

Winnipeg.—John McDougall, veteran sergeant-at-arms of the Manitoba legislature, is in indifferent health at present, and for a second time in half a century may not be well enough to attend the opening of the house on February 11. Last year he was ill too, and it was the first time in 50 years that he was unable to carry the mace on an opening occasion.

World's Largest Theatre Sold

New York. The Hippodrome, the world's largest theatre, has been sold for approximately $4,000,000. Although the purchaser, Frederick Brown, a real estate operator, would not disclose his plans, it was indicated that he had a new project in mind for the site, and that the theatre might be razed.

Villagers Assist Fisherman

Petoskey, Mich. The entire male population of Cross village, breaking a path through towering snow drifts, reached a hospital here bearing Lewis Sweet, 51-year-old fisherman, who reached mainland after a week's battle with jagged ice floes in Lake Michigan.

Will Not Interfere

London. Sir Austen Chamberlain, British foreign secretary, told the House of Commons that the British government has no intention of assisting any of the factions contending for power in Afghanistan. He added that it would not interfere in the internal affairs of that country.

Aid For Civil Aviation

Flying Clubs Will Be Given Thirty-two New Planes This Year

Ottawa.—Thirty-two aeroplanes will this year be given flying clubs by the government it is estimated by flying officials in the national defence department.

Besides issuing two machines to each newly-formed organization, one extra machine is given for each one which the club members purchase themselves. The 16 clubs already in operation are each expected to buy a machine this year.

There are over 150 flying pilots in Canada with seven years' experience in the air, according to figures compiled by the national defence department in connection with applications now being received by the civil service commission for two positions as inspectors of civil aviation.

There is one vacancy at Ottawa and one at Regina. These are additions to the staff occasioned by the development of aviation. At present there are three inspectors. Their duties include the examination of prospective pilots, testing of machines for airworthiness and choice of locations for airdromes.

Doukhobors Found Guilty

Ringleaders in Clash With Police Receive Jail Sentence

Grand Forks, B.C. Eight Sons of Freedom, Doukhobor religious fanatics, were sentenced to serve six months each for obstructing police officers. They were found guilty by John A. Hutton and John M. Donaldson, justices of the peace. The fanatics offered no defence.

The fanatics were arrested and charged following a clash with 11 provincial police officers and 10 specials who sought to arrest Strupnikoff and Weiken, wanted for infringement of the School Act. The Sons of Freedom attempted to prevent the arrest of their leaders, but were overcome by tear gas bombs.

Peter Veregin, Doukhobor community head, reported to have testified in these actions, was engaged in a marketing act trial. He did not figure in the case.

Coast Wants Orient Trade

Would Gain Larger Share for Canada, Says T. S. Dixon

Ottawa.—Canadian boards of trade from the Atlantic to the Pacific are interlocked in such a way as to assure immense benefits for national commerce and fruitful results from their co-operative labor, said T. S. Dixon, president of the Vancouver Board of Trade in an address at the 72nd annual meeting of the Ottawa Board of Trade.

Within the next two years, Mr Dixon declared, Vancouver would lead an expedition of Canadian business men into the Orient in an attempt to further increase the prestige of the Dominion in the Far East and gain a larger share of Oriental trade for the manufacturers and producers of Canada.

Submits Request To League

China Wants to Protect Her People Against Opium Evil

Geneva.—The opium evil was made the occasion for another plea by China for the right to police its own territory irrespective of the nationality of offenders.

Wang King-Ky, chief representative of his country at Geneva, submitted that it was impossible to separate the narcotic and political questions so long as China was not free to protect her own people against the acts of nationals of other powers.

Plans Branch Line in B.C.

Nelson, B.C. Notification to the public of its intention to apply at the coming session of parliament for charter rights to build a railroad link from Kootenay Landing to Proctor, B.C., is announced by the Canadian Pacific Railway in a statutory notice. The notice issued from Montreal under date of January 29 is signed by E. Alexander, secretary.

Carpenter Electrocuted

Winnipeg. William Jardine, 20, a carpenter, was electrocuted at the substation of the Winnipeg Electric Company near Selkirk, Man., when his saw came in contact with a high tension wire.

Would Try New Stunt

Detroit, Mich. Gene Lussier, who dropped over Niagara Falls in a rubber ball July 4 says he will jump off a new 46-story building here for $25,000, with a pair of wings of his own design.

Plan Being Endorsed

National Day of Thanksgiving for Recovery of King Is Urged

Vancouver. A movement emanating in the province of Quebec to hold a national day of thanksgiving throughout Canada for the recovery of his Majesty King George from his recent illness, and which it was stated has the endorsement of Premier Taschereau of Quebec and other prominent men of that province, was whole-heartedly supported by Mayor W. H. Malkin and the Vancouver city council.

Winnipeg.—Endorsation of the plan to hold a Dominion-wide day of thanksgiving for the recent recovery to health of His Majesty King George was given by Mayor Dan McLean of Winnipeg.

Studying Aircraft Device

Dominion Government May Establish Direction Finding Apparatus Service

Ottawa. For the purpose of ascertaining what the United States is doing in the field of direction finding for aircraft by radio, Maj. W. Arthur Steel, one of the senior officers of the signals service, department of national defence, has gone to Washington, New York, and other points, to obtain information for Canada. Direction finding apparatus has been used to advantage in the operation of aircraft in several countries and the Canadian government is considering establishing such a service in the Dominion.

RIVALRY SEEN BETWEEN ITALY AND FRANCE

Toronto.—The Mail and Empire publishes the following special cable from Paris:

A factor in the world naval situation which hitherto has been obscured by Anglo-American discussion of the limitation of naval armaments is the growing rivalry between France and Italy in the Mediterranean, as reflected in their building programs. For the first time much prominence is being given to this subject here and it may fairly be suspected that the British "big navy" party is preparing to counter any suggestions for a naval holiday with the United States by pointing to the danger to British interests in European waters as necessitating more cruiser building.

Hector J. Bywater, well known naval expert in a column article in the Daily Telegraph analyses in startling terms the French-Italian building race and speaks of the Mediterranean as "one of the main arteries of our empire."

"No neutral can hope to conduct business as usual in a zone of active warfare," he finds proceeding to pile up statistics intended to prove his contention. "That France and Italy are now in open rivalry for strategic control of the Mediterranean is the only possible inference to be drawn from recent developments."

SAYS CANADA TOO KEEN

Senator Walsh of Massachusetts is waging a campaign in congress to show the United States the amount of trade which Canada is winning from the republic. He expressed the opinion that Canada was too keen and is rapidly outstripping the United States.

Figures Show Slight Increase

Twelve Per Cent. Advance in Immigration to Canada Last Year

Ottawa. Immigration to Canada continues to show a moderate increase over that of a year ago, the total for nine months of the fiscal year up to and including December being 144,113 compared with 128,924 for the same period in 1927. The increase is 12 per cent.

The total immigration of December amounted to 5,515 compared with 4,566 in December, 1927, an increase of 21 per cent. The month's immigration included 1,476 British, 1,344 from United States, 34 Belgians, 50 Danish, 99 Dutch, 204 Finnish, 31 French, 451 Germans, 44 Norwegians, 75 Swedish, 15 Swiss and 1,499 of other races.

Of the 144,113 immigrants who came to Canada in the last nine months 62,257 were of the farming class and 14,199 were female domestic servants.

London Awaits News

Announcement of Duke of Gloucester's Engagement Expected Shortly

London.—The Daily News said it understands that the engagement of the Duke of Gloucester, formerly Prince Henry, third son of King George, would be announced shortly.

The newspaper said it was believed the duke was engaged to Lady Angela Scott, daughter of the Duke and Duchess of Buccleuch.

The Daily News understood that the announcement had been delayed because of King George's illness.

Appointed Vice President

Winnipeg. R. S. Law, formerly of Claresholm, Alta., has been appointed to the board of directors and to the position of first vice president of the United Grain Growers, Ltd. It was announced here by Hon. T. A. Crerar, president of the company. Mr. Law succeeds C. Rice-Jones, who held the position for the past 11 years and who resigned to enter business in his own right.

CANADIAN IDEAS IN JAPAN

When K. Hashima, superintendent of rolling stock and machinery of the Sapporo district, Japanese Government Railways, was in Canada recently studying the operations of the Canadian National Railways for the benefit of the people of his own country, he was particularly interested in the methods used in clearing snow from the track. In a letter to W. A. Kingsland, general manager of the National system's western region, Mr Hashima expressed his thanks for the co-operation given him by A. H. Eager, general superintendent, motive power and car equipment, Winnipeg, and A. McCowan, assistant general superintendent, car equipment. He went on to describe a new type of snow-fighting machine which he had devised from ideas given him by K. D. McLay, bridge and building master of the Canadian National Railways, Calgary division. The machine, which is the most successful of all the types tried on the Japanese railways, has been named McLay. The plow is seen here in action and the inset is a photograph of Mr. McLay.

Spectators Thrilled By Parachute Jump

Two Winnipeg Airmen Brave Wind and Below Zero Weather

Winnipeg.—Braving a high northwest wind and 15 below zero weather, Flight Lieut. A. Carter and Sergt. Joe Maskell, of the Royal Canadian Air Force, thrilled 300 persons at Stevenson Aerodrome by jumping from aeroplanes with parachutes at a height of 2,500 feet.

The feat is unique in Manitoba and perhaps in Canada, considering the weather conditions.

Carter landed in a clump of trees two miles east of the point where he jumped, and a group of airmen had to rescue the parachute from the branches. Maskell also was carried far afield.

Carter's jump was the 36th of his career. He holds the record for parachute jumpers in the British Empire, having made a leap of 20,000 feet at High River, Alberta, in November, 1925.

Secures Desired Land

Veteran of C.E.F. in Alberta Files on Peace River Homestead

Peace River. After waiting from Friday, January 15 until Monday morning, January 28, G. Turcotte, Falher, was successful in securing the land of his choice, a homestead in the Falher district that had been under lease but recently was thrown open for filing. Ten days of terrible sub zero weather with the thermometer ranging from 20 below during the day and down to almost 50 during the long nights he endured.

Turcotte did not have it all his own way for Corporal McDonald of the mounted police was on hand to prevent disorder. He ordered Turcotte to remove his hand from the door knob so that the door could be opened. Another man named Trudeau was on hand and secured it while the door was opening, but Turcotte was in the most favorable position and squeezed in first.

Parley On Import Preference Likely

But Reports Presented by President Coolidge Not Yet Received

Ottawa. At the department of external affairs, it was stated that the reports presented by President Coolidge to congress on the subject of customs preferences on imports through Canadian ports have not yet been received. No diplomatic representations based on them have yet been made. The United States minister in Ottawa, however, brought the general situation to the attention of Premier Mackenzie King some weeks ago.

As President Coolidge informed the United States senate that diplomatic negotiations would begin with Canada on the matter, it is anticipated that there will be representations in the near future.

TRAFFIC VIA CANADA'S PORTS NORMAL FACTOR

Washington. Discriminatory tariffs against goods imported into the United States via Canadian ports is recommended by only one out of three government departments which reported to the senate on the diversion of United States commerce to Canadian ports. The other two found that the movement of United States imports and exports through its neighbor's ports was caused chiefly by the normal factors of international trade and transportation and nothing much could be done about it except to discuss with Canada through diplomatic channels the possibility of putting United States ports on an equal basis with Canadian ports on imports into Canada.

The majority report which remarks at the outset that Canadians are just as much concerned over the movement of Canadian export grain through United States ports was made by the departments of state and agriculture and the Interstate Commerce Commission. It was unanimous.

The minority report was made by the United States shipping board which operates at a deficit the shipping acquired by the United States government during the war. The tone of the two reports is sharply contrasted. The majority quotes statistics to show that 27 per cent of all Canada's exports travel through United States ports while only [illegible] per cent of United States exports travel through Canadian ports.

CANADA STILL RETAINS HIGH TRADE POSITION

Ottawa.—Canada's position among the leading commercial nations of the world in international trade continues to rank very high. World-wide statistics are not yet available for the calendar year 1928 but for the calendar year 1927 Canada occupied fifth position in import and export trade; second position in exports and total trade per capita; third position in favorable trade balance and first position in favorable trade balance per capita.

Inasmuch as Canada's total trade for 1928 shows an increase of $270,549,000, imports $135,200,000 and exports $135,349,000, her position in international trade in 1928 was well maintained.

During the calendar year 1928 Canada's total trade amounted to $2,596,418,000, compared with a similar trade of $2,325,969,000 for the same period in 1927, the increase, 1928 over 1927 amounting to $270,549,000 or 11.6 per cent. This increase was greater than Canada's total 20 years ago.

The outstanding feature of Canadian trade in 1928 was the enormous increase in her wheat exports. For the calendar year 1928 total exports of wheat reached 365,429,561 bushels valued at $435,767,578, the largest 12 months' period on record. The increase in 1928 over the previous largest wheat export was quantity 71,270,000 bushels, value $132,110,894.

During the year ended December 31, 1928, the duty collected on imports amounted to $192,286,000 as compared with $164,303,000 for the same period in 1927. The duty collected for 1928 exceeded that collected for any calendar year period except for the year 1920 when it amounted to $203,029,000.

Manitoba House To Open February 11

Will Proceed to Take Up Business Without Usual Adjournment

Winnipeg. The Manitoba legislature will go into session Monday afternoon, February 11, at 3 o'clock. An order-in-council fixing this date was signed by Hon. J. D. McGregor shortly after being sworn in as lieutenant-governor.

The house will proceed with the business before it immediately after the formal opening ceremony and the reading of the speech from the throne by the new lieutenant-governor. This will be a departure from custom previously followed.

Will Not Compete

Toronto, Ont. The ladies' high jump which was on the program of the Melrose games at New York February 9, has been cancelled, according to a wire received by Miss Myrtle Cook. The wire said exhibitions were not permitted at the games and that Miss Ethel Catherwood has been notified to this effect. This means that Miss Catherwood will not compete in New York.

Praises Prince for Visit

West Hartlepool, Eng. The visit of the Prince of Wales to the coal fields was praised by Labor Leader Clynes at a meeting here. "I think there is a fine human touch in that act and nothing has brought the throne nearer to the trouble of the poor than that unprecedented act by perhaps the most popular figure in the world."

May Send Minister to States

Washington. Negotiations for the exchange of diplomatic representatives between the United States and the Union of South Africa, were said, at State Department to be under way. South Africa would be the third entity of the British Commonwealth to appoint a minister to Washington, Canada and the Irish Free State [illegible].

Appropriation for Highway

Washington. The [illegible] foreign affairs committee approved a resolution authorizing the appropriation of $50,000 [illegible] the United States to co-operate with Latin-American nations in the building of a Pan American highway. The highway would extend from Canada to Cape Horn.

Unemployed in Germany

Berlin. The official number of unemployed persons in Germany has increased to 2,[illegible]. Unofficial estimates placed the number at 2,750,000.

THE TOFIELD MERCURY

Published Every Wednesday at Tofield, Alberta
W. Worton, Publisher

Week Ending February 9th, 1929

IS LIFE WORTH LIVING?

THIS QUESTION, prominent enough for ages, has been given special significance recently. Two doctors, twin brothers, living in London, England, committed suicide, leaving, so we read, a note to the effect that life was not worth living. These brothers had given the best of their lives to cancer research, time, labor, and wealth; so much so that when many men of their profession were well and comfortably settled in life, these men were without material substance. Consequently, despondent, and faced with poverty, and according to the printed version of the letter they left behind, believing life to be not worth living, they committed suicide.

This old question "Is life worth living?" has been expounded by learned men of different times and places, and one would be egotistical indeed to believe that he could add much more to what has been said and written on the subject. Nevertheless the question is attractive, contains mystery, and is no doubt viewed through the lenses of each individuals personal life experiences.

What scientists tell us about life and its origin, means little to the average person. Whether man originated from a jelly fish or was put on the earth in his present form is little more than of academic interest. What concerns us most, is the ability to procure food when we are hungry, drink when we are thirsty, sleep when we are tired, and mental and physical recreation when we are bored. They must be procurable in order to be able to live. Not that the above mentioned essentials are sufficient to make life complete as we know it to-day in Canada, but one could exist.

The variety of conditions under which the human race has lived in the past and is now living, beggars description. All the way from pole to pole; from frozen wastes supporting a few Eskimos, across the temperate zone giving life to billions, through the equatorial regions with its heat and consequent languor, to again enter the temperate zone of the southern hemisphere and on and on to reach once again the frozen wastes of the south, the different modes of living are innumerable.

But it is all life; that divine spark, that so far, man with all his cleverness has failed to produce. And is it worth living? What does the Eskimo fighting influenza in a lonely igloo amid the snow and ice think about it? Where life is a constant battle with the elements. What does the slum dwellers of New York and London think about it? They, who in a land of plenty are unable to procure sufficient for themselves and their children to eat. What does the savage in tropical areas, a victim of barborous customs think about it? Suffering pain and torture for no other reason than mere custom.

No one can tell what these people think, but all can observe what they do, and with the exception of an odd and unusual case, they all cling to life tenaciously as the dearest thing they possess. If they have any doubts about life being worth living when passing through the period of trial, these vanish when the period is passed and they can look backward and see the fruits of their labors. A life usefully spent is certainly worth living. Livingstone's, Edison's, Pasteur's, Florence Nightingale's and many other lives could not possibly be otherwise. Even though some are living and some are dead, the result of their work has made the lives of millions of others brighter and happier.

And who can prove that the ending of life ends all things? On the contrary, all the evidence, even excepting that of a scriptural nature, which is conclusive, points the other way. A useful life is always worth living, but it rests upon the individual to make his life useful.

Convenient Comfort—
In the Heart of the City

Selkirk Hotel — Jasper Ave. and 101st Street.

WEEKLY NEWS BULLETIN

Issued by Publicity Commissioner, Department of Agriculture, Edmonton, February 2nd, 1929

Provincial Legislative Session Opens

Formal opening of the third Session of the Sixth Legislature of Alberta took place on Thursday afternoon, January 31st. The speech from the Throne read by His Honour Lieutenant Governor Egbert, reviewed the satisfactory progress in many lines of activity made by the province during the past year and referred to a number of important questions on which legislation will be introduced at the present session. The personnel of the legislature is unchanged from that of last year with the exception of the addition of Hector Lang, newly elected liberal member from Medicine Hat.

In view of the numerous important pieces of legislation to be considered it is announced that evening sittings will be commenced at an earlier date than usual in order that the session may not be unduly prolonged. This has been made possible by the change in the end of the fiscal year and the fact that the budget is now available for consideration at an earlier date in the session than in previous years.

Marked Increase in Coal Production

Coal production in Alberta in 1928 reached a new high level when 7,250,000 tons were mined throughout the province, according to figures recently announced by the Mines Branch. Good success is attending the campaign to popularize Alberta coal on the Ontario market and some 30,000 tons have already been shipped east under the $6.75 frieght rate which has been in effect since January 16th. This coal is being well distributed in Ontario and a large number of repeat orders have been received from dealers who state that the Alberta product is in good demand. An extensive advertising campaign is being carried on by Alberta coal operators through the Trade Commissioner's Office in Toronto, and it is expected that this market will be still further extended.

To Form Coarse Grains Pool

Announcement is made from the head office of the Alberta Wheat Pool in Calgary that the directors of this organization have definitely decided to proceed with the formation of a Coarse Grains Pool and that this will be in operation in time to handle the 1929 crop. This development, it is stated, will not necessitate any new selling organization as the coarse grains will be handled through the central selling agency of the Pool. It is pointed out that only members of the Wheat Pool will be eligible to participate in the Coarse Grains organization. While no definite statement is made, it is probable that oats and barley will be handled for pool members under the new arrangement.

Provincial Savings Certificates Popular

That Alberta Savings Certificates are recognised as a sound investment is indicated by the fact that sales during 1928 reached a total of $615,960 over and above all withdrawals. The net purchases during the year were more than double those of 1927. A report for the year by the Treasury Department places the total amount of outstanding savings certificates at $11,264,946.

COD LIVER OIL AND ITS USE

By the Alex. Taylor Hatchery, Winnipeg.

"It has been found that feeding 2 per cent of Cod Liver Oil in the mash of the breeding birds during the winter months, results in a five-fold increase in the anti-rachitic and fat A soluble vitamins.

When chicks are hatched from these eggs absorb the rich yoke into their intestines, they are fortified against rickets, as far as outward symptoms are concerned for the first three weeks.

It pays to give the baby chicks a rich inheritance from their mothers, in their first feed, the yoke. And then, particularly if it is early in the season, go on and feed the chicks a little cod liver oil.

Here is what it does. When a chick is hatched, it has legs but no bone. The best you can call it is cartilage or gristle. Under natural conditions, the sunlight would pour down upon the chicks and the shorter rays, or ultra violet light, would enable the chick to utilize the mineral matter in its food in developing the gristle into bone.

Under present day artificial conditions of rearing, especially early in the season, when chicks are indoors, they can't get the benifit of the sun's direct rays. Feed them as much mineral matter as you will, and their bellies will grow, but their legs won't harden. They get "leg weakness" or rickets. Cod liver oil added to their ration, although it does not contain a bit of lime to make bone, contains the vitamins necessary to enable the body organism of the chick to utilize the food elements in the rest of its ration and build a bony frame-work that is hard and sound to support the growth of the muscles and tissues.

Feed 2 per cent cod liver oil to your breeders this winter and then 1 per cent to your early chicks next spring, and you will have better chicks, less fewer of them and do away with the old bug-a-boo of leg weakness.

A hen can produce up to her capacity only when she is fed so that all parts of the body are nourished.

Here and There

(226)

A skin game.—Two young boys living 50 miles northeast of Edmonton started a coyote farm in 1927 by digging young coyotes out of the ground and confining them in a pen. They got 140 young animals and when their skins were mature sold them for $12 each.

A southern packing plant specializes upon horse meat for shipment to parts of Continental Europe where it is very popular. It has been suggested that the nondescript range horses straying about Southern Alberta be herded for packing purposes. It is a pity someone could not figure out a similar way of consuming some of the old motor cars that are loose on the highways.

Twenty oil burners measuring overall 97 feet in length and weighing 721,000 pounds have been ordered by the Canadian Pacific Railway and will be in passenger and freight service through the mountains this summer. Each of them will do the work of two or more of the lighter locomotives. They are the largest in the British Empire and will revolutionize transportation in the west, it is predicted.

Victoria is having a mid winter golf tournament open to members of the local clubs and to guests of the Empress Hotel and the players won't have to play in mittens and fur coats, either. In the east they have a game called winter golf that they play with bow and arrows on skies or snowshoes, but the golf at Victoria is the legitimate article. The game is played the year round in the equable climate of the Pacific coast.

Unique and luxurious cars, differing from anything operated in this country before will be carried by the two crack trains of the Canadian Pacific Railway, the Trans-Canada Limited between Montreal, Toronto and Vancouver, and the Mountaineer, from Chicago to the Pacific coast, it has been announced. The cars will have bath rooms, valet service lounge and smoking space, and a solarium, with vita-glass windows.

The sea is constantly productive of tales of adventure. A recently told story is that about Commander E. Robinson, O.B.E. of the Canadian Pacific liner Empress of France who turned his ship into the face of a hurricane and went 500 miles out of his course to take aid to injured seamen on a storm tossed Japanese freighter. The great liner waited beside the freighter which had been badly battered by the huge waves and some members of whose crew had been injured, but found it impossible for boats to pass between the two ships to convey a doctor. After waiting for half a day the master of the Japanese ship reported that he could make port, and the Empress of France continued on her interrupted voyage.

Progress Made In Development Of the Hudson Bay Route Shown In Report Recently Published

Up-to-date information on the progress made in the development of Canada's Hudson Bay route is contained in a report recently prepared by the Natural Resource Intelligence Service of the Department of the Interior in co-operation with the Department of Railways and Canals. The objective set on the extension of the Hudson Bay Railway during 1928 was Mile 460, thus bringing the steel within 50 miles of Churchill. Actually the steel reached Mile 462 thus accomplishing all that was expected and leaving only 48 miles to be constructed during 1929 to reach the tidewater terminus.

The mobilization of men and materials and equipment necessary to accomplish the work planned for 1928 on the railway and at the port is dealt with in the report. At the peak of operations during the season it is stated that 3,200 men were employed on the railway. At Churchill the preliminary operations on port development employed 430 men during the season and a feature of the operations was that the work was materially expedited by the use of airplanes which operated between Churchill and the end of steel.

The report points out that the visit to Churchill of Frederick Palmer, eminent British engineer, which resulted in the selection of that port as tidewater terminus, was made in August, 1927. In a little more than a year from the date of Mr. Palmer's report, the railway had been advanced 106 miles from the point at which the Churchill extension leaves the original line to Nelson at Mile 356. In the operations of 1928 the equipment used on the Hudson Bay Railway work included three steam shovels, a track-laying machine and 12 locomotives.

The past summer was a very busy one at Churchill in the construction of temporary docks and the commencement of permanent construction. During the navigation season some 16,000 tons of material sent in by sea from Halifax and Sydney were unloaded at the new port and the dipper dredges, "Churchill No. 1" and "Churchill No. 2," built at Montreal especially for the work, appeared on the scene as well as the hopper barge "Chesterfield." [illegible]

Up to March 31, 1928, there had been expended on the work at Churchill $697,800 and during the present fiscal year to Nov. 30 there had been a further expenditure of $1,251,000 making a total of $3,452,[illegible]. The expenditure on the Hudson Bay Railway up to March 31, 1928, is given as $30,780,[illegible] [illegible]

The development of the ocean terminals will account for an expenditure of many millions more and other work in the development of Canada's northern transportation route includes the establishment of modern aids to navigation in Hudson Bay and Strait. [illegible]

being selected and these will include direction-finding devices which will be of invaluable assistance to navigators in those northern waters.

The report on "Progress in Development of Canada's Hudson Bay Route" reviews the history of the development of the Hudson Bay transportation scheme and includes a consideration of its economic aspects and of the mileages involved in the new rail and water route from various centres in Western Canada to Liverpool. The report in mimeographed form is available on application to the director, Natural Resources Intelligence Service, Department of the Interior, Ottawa.

Canada's Vast Territory

Hard to Visualize Distance One May Travel Within Dominion

The Free Press of London, Ont., says: "It is really staggering when one contemplates what immense distances one may travel in one direction and still remain on Canadian soil. Consider, for instance, the distance from London to Prince Albert and from Prince Albert to Peace River, and the sparsely-settled territory. The country is naturally eminently suited to agriculture, particularly to the growth of Canadian hard wheat, for which there always will be a greater demand than supply. Experiments are now being conducted that will produce a swift-ripening wheat to beat the early frosts. Immense timber resources also has the northwest; it is rich in minerals and has great undeveloped water power; in fact, ready at hand are the materials for a new section of Canada.

Pool Legislation

Full Protection For the Grower Must Be Assured

Following a protest by C. E. Gregory, who attended a meeting of the private bills committee as legal representative of "a group of growers," Hon. T. C. Davis, attorney-general, announced in the Saskatchewan legislature, that it was the intention of the government not to declare law that part of the Wheat Pool incorporation bill that would limit the time for legal action to one year after the adoption of the report of the pool delegates on any one year.

Mr. Davis said that the amending clause would be included but would not be acted upon until such time as it had been referred to and approved by a meeting of the Pool delegates. Other sections that bring about retroactive legislation will stand in the original amending measure. By a later clause in the amending bill and one considered by the private bills committee, the retroactive element would not in any event apply to actions for accounting and for damages that might be before the courts or pending.

Mr. Davis admitted the Pool should not be subjected to a series of vexatious legal actions. But he declared, too, that while as full protection as possible should be afforded the Pool, the grower was also entitled to just as full a measure of protection. The legislation asked for, he claimed, was "dangerous." Nowhere, he said, could there be found in law a limitation to the time an action for accounting could be brought against a trustee and the Pool in handling the farmers' wheat merely acted as trustee for the farmers. If the Pool handled the property properly there was nothing to fear, and no need to place a limitation on time an action could be started.

Considered Desirable Forage

Mixture of Peas With Oats a Success If Properly Sown

(Experimental Farms Note)

Pea and oat mixtures are commonly grown and considered desirable forage in the older parts of Canada. In the west, however, they are grown very little, partly because less stock is raised and partly because many attempts to grow a mixture have proved failures. Various mixtures and methods of sowing have been tried out at Southern experimental stations and this article embodies results derived from these tests during the last five years.

Three varieties of peas and two of oats have been used in mixtures and the most desirable combination we have found to be Victory oats and Mackay peas. Both are strong, tall growing, and mature at about the same time. This allows for harvesting at the best stage for forage, which is when the oats are turning color and the pods are well filled with peas.

Mixtures and methods of sowing used were: 25, 50 and 75 per cent. peas mixed with oats and sown together. Peas and oats were also sown in equal amounts separately the peas being seeded one week and two weeks before the oats. Where mixtures were sown the drill was set at four bushels of oats per acre. Mackay peas and Victory oats were also sown alone for purpose of comparison.

Peas sown one week and two weeks before the oats and the 75 per cent. mixture of peas yielded more cured hay than either oats or peas alone. Where 75 per cent of peas were sown with the oats the percentage of pea vine at harvest was about 40, where peas were sown one week earlier than the oats the percentage of pea vine was 60, and where two weeks earlier, 70 per cent. The other mixtures yielded less than peas or oats alone and contained a small percentage of pea vine at harvest time. Sowing peas one week before the oats is possibly the best method of insuring a crop with a fair amount of pea vine each [illegible]

Channel Tunnel Scheme Between England and France Has Once More Been Revived

An informal poll of the British House of Commons by Sir William Bull is said to show that an overwhelming majority of the members favor the many-times-suggested English Channel tunnel.

An even more fascinating proposal than the 60-year-old project for the tunnel, also now under discussion in England, is a 21-mile channel bridge. From it travellers who have suffered the tortures of channel sea-sickness could laugh at the churning waters that caused them misery.

A channel bridge scheme was outlined 40 years ago. Competent engineers claim such a structure feasible.

But British military strategists arguing for national security, have violently opposed the bridge project as well as the more practical tunnel through all the decades of discussions.

The question to be decided is whether the great war altered England's isolation as a tight little island. Those who favor the tunnel say Britain is directly open to attack from the air and to siege by submarine. If they can convince the military strategists of this, the tunnel project will at last enter the field of practical politics.

Political rather than engineering difficulties always have blocked the channel tunnel.

A channel tunnel, by cutting out the steamer, would save an hour and a half on the trip from London to Paris.

France never has opposed the project, for with traditional enemies just across long frontiers, an undersea tube which could easily be blocked or even destroyed in case of war presents no terrors.

Commercial companies exist both in England and in France to carry out the tunnel scheme, the cost of which is estimated at $150,000,000.

Planes Return From North

Machines Cover 5,000 Miles on Search for Minerals

After an epoch-making flight into the barren lands, where air trails were blazed across the bleak wastes of the sub-Arctic in an aerial search for minerals, two cabin aeroplanes of the Dominion Explorers, Ltd., were brought to Winnipeg from The Pas by Capt. B. W. Broatch and Capt. S. McMillan.

While in the north the 'planes were in charge of Capt. Charles Sutton, former Royal Air Force aviator and mail pilot on the Cairo-Bagdad route, and Captain Broatch, pioneer of the air trails of the frontiers of Canada. They made their base at Mistake Bay, about 120 miles south of Chesterfield Inlet.

The 'planes were taken into the north country by Captains Sutton and Broatch early in the summer, flying the machines in a long hop from New York to Hudson Bay. Two Moth 'planes also were used by the exploration party in the barren lands.

During the season the cabin machines covered more than 5,000 miles between them without mishap. Many of the flights over the barrens were beset with dangers, but the pilots dared the hazards of an unknown land, immeasurably aiding in the quest of rich minerals.

The main party of the expedition came south some weeks ago, but will return to the barrens in March.

Jap Living Standard Low

Large Per Cent of Workers Receive Less Than Fifty Dollars Monthly

That the living standard of most Japanese is still far below that in western nations is emphasized in a report by the ministry of finance. These figures show that 92 per cent. of the wage earners of Japan receive less than $50 a month. There are 12,000,000 registered families in Japan, and in only 6 per cent. of these is the total income between $50 and $200 a month. The percentage of those getting more than $200 a month is 1.3.

Should Procure Oat Seed

Farmers of Alberta are being advised by the Provincial Department of Agriculture to make the necessary provision for securing the supply of oats for seed which they will require for their 1929 crop. The effects of frost in a number of districts are reflected in a reduction in the germinating quality of a great many of the oats threshed.

Safety Device For Miners

Copper Diggers in Mexico Wear Steel Head Protection

A United States bureau of mines engineer reports, following a recent visit to one of the big Mexican copper diggings, that the latter company permitted no one, miner, manager or visitor, to go underground unless he wore a steel head protection. The company furnishes the helmets to the men at 60 cents each and replaces all damaged ones free of cost. On one occasion a hunk of ore weighing 67 pounds fell through the top logging, a distance of four feet, and struck a miner squarely on top of the head. The steel hat was badly dented, but the man was uninjured, save for a slightly sprained neck. The company has on exhibition at the mine head a collection of several hats, all badly dented, that represent each a miner's life saved.

Sale For Worthless Horses

Montana Packing Plant Will Require Seventy Head Daily

Surplus range ponies which now are more or less worthless, may find a market at the horse meat packing plant just opened in Grand Falls, Montana. Southern Alberta has hundreds of nondescript range horses roaming the prairies, eating up valuable grass and the Great Falls plant may be in a position soon to handle many of these animals for it will require 70 head daily. The output will be shipped to Continental Europe where horse meat is a staple commodity.

Mendicancy De Luxe

Young Englishman Simulating Palsy Collected Large Sum Daily

In the opinion of G. K. Chesterton, complete social equality in England will not be achieved until a costermonger may wear a monocle without exciting remark. It would be interesting to have his comment on the discovery by the police of a professional beggar with a valet. A young man, only 23, he was busily engaged in putting Mr. Ford's doctrine into practice and spending his easy earnings in ways which he thought to his own advantage when the authorities evinced an acute curiosity concerning the source and extent of his finances. A country house, with completely equipped billiard room, is another of his luxuries. His income produced by simulating palsy, has amounted to as much as $100 in a day. Subway travelers, observing his pathetic figure, have been deeply touched—for sums from 10 cents upward. The interruption of this enterprising mendicant's activities, just at the threshold of the prosperous holiday season, must have been especially bitter.

CORNS
Relief in 2 Minutes

Just a drop or two of Putnam's Corn Extractor, and the pain goes away. Relief is almost instantaneous. Removing corns with "PUTNAM'S" is so easy, so sure, so painless—thousands use this wonderful remedy and say it is the best. Don't suffer any longer, use Putnam's Corn Extractor, the one sure relief for sore corns. Sold at every drug store.

Live Stock Prize Winners

Saskatchewan Breeders Won 160 At Fairs During Last Year

According to a compilation of the Live Stock Review of the Provincial Government Department of Agriculture, live stock breeders of the Province of Saskatchewan won 160 prizes in 1928 at the following fairs: The Royal Winter Fair at Toronto, the International at Chicago, and the annual fairs at Ottawa and Guelph. There were 8 grand championships, 4 trophies, 2 reserve grand championships, 10 senior and junior, 7 reserve senior and junior, 2 Canadian bred and reserve Canadian bred, 21 firsts, 27 seconds, 33 thirds and 34 others. At the Royal, 102 prizes were taken, 24 at the International, 26 at Ottawa and 8 at Guelph.

New Brunswick Settlers

Five Hundred British Families to Be Placed in Province

One hundred British families were placed on farms in New Brunswick [illegible] settlement plan which completes the quota for that year. The scheme is being continued until 500 families have been located in this province. The farms are provided by the New Brunswick government. Loans up to £300 are made by the British government and the settlement arrangements are under the supervision of the Dominion government. Repayments extend over 25 years with interest at 5 per cent. per annum.

LONG SLEEP MAKES BABY HAPPY AGAIN

"Our baby kept waking us several times a night, until we started giving him a little Castoria after his last nursing," says an Iowa mother. "He slept soundly from the first night and it made him look and feel worlds better." Baby specialists endorse Fletcher's Castoria; and millions of mothers know how this purely vegetable, harmless preparation helps babies and children, with colic, constipation, colds, diarrhea, etc. The Fletcher signature is always on the wrapper of genuine Castoria. Avoid imitations.

Vancouver Port Improvements

The Vancouver Harbord Board is understood to be seeking federal permission for launching a construction program involving $5,000,000 of port improvement. The proposed works include a deep sea pier, the first unit of a cold storage plant, a coastwise pier and extensive additions to the present grain storage capacity of the port.

Searching For Sunken Island

California Man Starts Fantastic Cruise Because of Dream

A "dream island," sunk in the Pacific ocean off the California coast, is the destination of a fantastic cruise headed by B. M. Bramley, paving contractor, who has bought the steam yacht Peary from Donald B. MacMillan, explorer, for the expedition.

Bramley's island lies under 20 feet of water, where it was first revealed to him in a dream while in Cleveland. So vivid was his dream and so inviting was the prospect of 20th century exploration and discovery in seas sailed for centuries by ships of every nation that Bramley set out in search of his island while in California.

A ship was chartered and he made soundings for days without success. He gave up the idea and was about to return when persistent promptings to find his "dream island" caused him to charter an aeroplane for further search. He found it, plainly visible from the cockpit, he said, in 15 or 20 feet of water.

Now he means to build a breakwater about the place, pump sand from the bottom of the sea to make new land, and erect thereon a fishing and outing paradise.

How Best to Use Vicks VapoRub After the Flu

Late Winter Colds Are Doubly Dangerous This Year; Don't Let [illegible]

AVOID PNEUMONIA OR A SECOND ATTACK OF FLU

If you catch a fresh cold, don't keep it overnight. If possible, go home and go to bed. Take a laxative and a hot lemonade, apply hot wet towels over throat and chest until the skin is thoroughly reddened. Then rub vigorously with Vicks. Spread on thickly and cover with warm flannel.

Leave the bed-covering loose, so that the vapors released by the body-warmth, may be freely inhaled. At the same time, Vicks acts through the skin like a poultice.

Repeat this treatment every four hours, eat lightly, and stay in bed until the cold is broken. Complete rest helps the body throw off the cold more quickly.

Mothers especially appreciate Vicks for the children. As it is applied externally, it can be used freely and often, without upsetting delicate digestions, as too much "dosing" is so apt to do.

Skipping Motor Age

China Is Now Turning Her Attention to Aviation

China, if the signs are read aright is about to "jump" the automobile age and pass direct from the bullock cart and railroad to the aeroplane and all that it embraces. This is not to say that motor car manufacturers may not find a lucrative field in the 18 provinces which comprise China proper, for the automobile is making inroads there; but it is almost certain that before the motor vehicle has become to the east what it has become to the west, aviation will have found acceptance as a common means of conveyance.

Miller's Worm Powders will eradicate the worm evil that bears so heavily on children and is believed to cause many fatalities. They are an acceptable medicine to children and can be fully relied upon to clear the food channels thoroughly of these destructive parasites and restore the inflamed and painful surfaces to healthfulness. They are an excellent remedy for these evils.

An Eastern Saying

He who knows not, and knows not that he knows not, he is a fool—shun him;

He who knows not, and knows that he knows not, he is ignorant—teach him;

He who knows, and knows not that he knows, he is asleep—awake him;

He who knows, and knows that he knows, he is wise—follow him.

The longest telephone call in the British empire is now from London to Vancouver, a distance of 7,000 miles. The charge is about $15 a minute.

SUNDAY SCHOOL LESSON

FEBRUARY 10

REPENTANCE AND FAITH

Golden text: Repent ye, and believe in the gospel. Mark 1.15.

Lesson: Isaiah 1.10-20; Ezekiel 18.30-32, 27-32; Mark 2.1-12; Luke 3.1-14; 15.11-24; Acts 2.22-38; Hebrews 11.1-10.

Devotional reading: Psalm 27.1-5.

Explanations and Comments

Jesus Is Sovereign and Messiah, Acts 2.14-36. Peter is speaking to Jews, and his first object is to prove that Jesus fulfilled Old Testament prophecies and expectations in regard to the Messiah, hence he tells them (verses 15-21) that the events of Pentecost which had so amazed them are but the fulfilment of Joel's prophecy (Joel 2.28-32), that at the coming of the Messiah God's Spirit would be poured forth, and old and young, men and women, bond and free, would see visions and speak divine truths.

Then Peter takes up his great theme that Jesus is the Christ, and gives three proofs. First, there are the miracles which his hearers had themselves witnessed. Second, there is the resurrection, of which they all are witnesses. God had raised Jesus from the dead to higher life and wider power. Third, there is the pouring forth of the Holy Spirit at Pentecost, which they have seen and heard: Jesus still lives and cares for His followers, for it is He who has sent the Spirit. Furthermore, the resurrection and exaltation fulfil a prophecy of David, as given in Psalm 110.1:

The Lord said unto my Lord, sit thou on my right hand,
Till I make thine enemies the footstool of thy feet.

Two different Hebrew words for Lord are used in the first line, and the meaning is, Jehovah said unto the Messiah. David could not have been speaking of himself, for David did not ascend into the heavens. "Sit thou on my right hand" means, Be partaker of the divine glory and dominion. "Till I make thine enemies the footstool of thy feet" is an expression denoting complete victory, which originated, no doubt, from the ancient custom of conquerors putting their feet on their enemies' necks.

Then comes the climax of Peter's sermon: "Let all the household of Israel therefore know assuredly that God hath made him both Lord and Christ, this Jesus whom ye crucified."

A Real Literary Find

The New York Times says that one of the greatest rarities in United States literature, a first edition of Edgar Allan Poe's "The Murders of the Rue Morgue," has been found in a pile of old books which a second-hand dealer bought for a trifle.

Before news of the discovery became public, however, the volume was bought for $25,000 by a New York book collector.

"Are there any questions?" "Yes, sir. How do you calculate the horse power in a donkey engine?"

COMPLEXION IMPROVED ... QUICKLY

Get rid of that pasty, sallow, blemished complexion! Instead of spending many dollars on fancy creams and skin lotions, buy a 25c pkg. of Carter's Little Liver Pills and remove the constipation poisons. Your skin will be quickly cleared, and your health improved. All Druggists 25c and 75c red pkgs.

CARTER'S LITTLE LIVER PILLS

Last Word In Cruisers

Germany's Latest Ship Makes Product of Other Countries Obsolete

According to the description which Hector C. Bywater, the Baltimore Sun's special correspondent gives, the new German armored cruiser Ersatz Preussen is a triumph of concentrated power. Keeping within the narrow limit of 10,000 tons for armored ships imposed upon her by the treaty of Versailles, Germany has constructed a ship which has the fighting effectiveness of a dreadnought, the speed of a cruiser and the hitherto unheard-of cruising radius of 10,000 miles. In addition, the new cruiser has other novel features which add immensely to its strength, and altogether it represents a production that tends to make the latest ships of other countries immediately obsolete.

NO MEDICINE LIKE BABY'S OWN TABLETS

For Either the Newborn Babe or the Growing Child

There is no other medicine to equal Baby's Own Tablets for little ones whether it be for the newborn babe or the growing child the Tablets always do good. They are absolutely free from opiates or other harmful drugs and the mother can always feel safe in using them.

Concerning the Tablets, Mrs. John Armour, R.R. 1, South Monaghan, Ont., says: "We have three fine, healthy children, to whom, when a medicine is needed, we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home where there are young children."

Baby's Own Tablets are a mild but thorough laxative which regulate the stomach and bowels; banish constipation and indigestion; break up colds and simple fever and make teething easy. They are sold by medicine dealers or direct by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Alberta's Farm Wealth

The Calgary Herald says that in 1906 the Province of Alberta had a [illegible] $50,000,000, while in 1927 it had jumped to $226,161,406. And while it produced about 6,000,000 bushels of wheat in the former year, in the latter it yielded 162,000,000 bushels. We wonder what 1947 will show!

Chemists are now trying to make artificial cotton from wood fibre.

FOR SALE—Fully equipped farm of seven quarter sections in the Leader district. $8,000.00 will handle; balance [illegible] crop payments. Owner retiring. Apply to H. W. Kesten, Leader, Sask.

THE CRIMSON WEST

— BY —
ALEX. PHILIP

Published by Special Arrangement With Thomas Allen, Publisher, Toronto, Ont.

CHAPTER XIII Continued.

"Isn't it beautiful?" He indicated with a sweep of his arm the lake, the wooded hills and the glittering glaciers lifting their heads high to the sparkling firmament. He turned to find his companion standing with downcast eyes.

"Don't you like it?" he asked, a trifle resentfully.

Janet raised her head slowly. The limpid depths of the big brown eyes were soft and languorous in the half-light, the full red lips were dewy and tremulous, the peaceful light of the moon shone upon her radiant upturned face, giving it an ethereal [illegible].

"It is wonderful," she breathed.

Involuntarily he moved closer. What was this inner urge? Love—feeling—emotion, or, it might be, passion?

Laughter and voices came from the trail above. Douglas with several of the visiting party emerged into the white light of the moon. Douglas called his sister's name and Janet and Donald moved up the hill to join them.

CHAPTER XIV

A week before Dominion Day men began applying for leave of absence until the exodus depleted the crew to such an extent that it was deemed advisable to shut down for a week. Donald turned to Gillis as he saw the whole crew of "redshirts" pile tumultuously on the train.

"How often do the men quit like this?" he asked rather irritably.

"Every holiday," replied Gillis.

Donald pondered a moment.

"That means that we may lose a week for Labour Day."

"Very likely."

"Jack, do you think we could keep them here if we held some sort of celebration at the lake?"

"I believe we could," responded Gillis warmly.

"We'll do it then," declared Donald. "We've so many orders ahead that this lay-off may force us to run a night crew."

"Did you spend all your dough, Blackie?" asked Gillis when the "redshirts" arrived back from town.

"Me and Hoop-la spent about two hundred bucks, but we had three hundred dollars' worth o' fun. We ain't got enough money to buy a hummingbird a pair o' leggin's, but we sure had a helluva good time, so we ain't worryin'."

"S'pose you bought them new boots?" inquired Gillis.

Blackie forced a laugh. "Goin' to git them next time, Jack," he continued moving closer to his big boss; "say, Jack, you know that I send twenty dollars to my mother back east ev'ry month. I—I——"

"All right, Blackie," said Gillis gently, "I'll advance it to you."

"Thanks, Jack, you're a good pal," commended Blackie in a relieved tone.

Donald and Gillis walked down the hill to inspect the logs in the boom, and as they walked Gillis indulged in some pointed observations. "You know, Donnie, that these loggers are game guys to come back after spendin' all their money and say: 'We had a good time, so we ain't worryin'.' The man ain't human that won't worry after spendin' in a few days the money it's taken him six months to earn swingin' an axe an' draggin' a saw. Still, they hide their remorse under a grin and tell of what a good time they've had. So many people think that loggers spend all their money for booze. 'Tain't so. That gang of mine give away about half their money to bums around town. I have seen Blackie give away twenty bucks at a time."

As they passed the high-rigger's little cabin, Gillis poked his head through the door. Blackie was absorbed in the task of sewing a patch on a pair of worn boots. A mournful wind blew querulously around the cabin.

"Say, Blackie, do you know what that wind is saying?"

Blackie grunted a negative.

"Here's what it's sayin'," said Gillis as he puckered his lips: "O-o-o o-oh! Where has your summer wages gone! Oh, where has your summer——"

Gillis dodged back as a boot came whizzing past his head.

Midsummer brought an epidemic of labor disturbances throughout the Province. A radical organization seized on a time when work was plentiful and labor scarce to spread their insidious propaganda through the camps. Railroad construction in the interior had been seriously interfered with, and in many cases there had been violence and bloodshed.

Two agitators arrived at the Summit Mill, and the next day several of the men—including Hand and Blackie—did not appear when the whistle blew. Gillis found them in Blackie's cabin in a half-drunken condition. That afternoon Renwick ordered the two strangers off the premises and discharged Hand.

Hoop-la begged successfully for leniency toward his erring pal. "You know how booze affects Blackie, Jack," he pleaded.

Donald became aware of a changed bearing on the part of many of the men. Sullenness had fallen upon them; discontent manifested itself, as well as insubordination. That afternoon spikes driven in the logs wreaked havoc with the saws and forced a partial shut-down.

A committee of four men waited on Renwick and presented an ultimatum. They demanded a heavy increase in wages, or they would call for an immediate cessation of work on the part of the men they represented. Renwick promptly refused. In 15 minutes every man in the mill except the clerical staff, the mechanics and the engineer, walked out. In the woods only Gillis' "redshirts" remained at work.

The strikers moved up the track and made camp on a point of land on the lake shore. That night the door of the commissary was pried from its hinges and a quantity of food stolen, and the night watchman put out a fire of incendiary origin.

Renwick, while returning from the power house, was shot at twice from ambush. He wired his resignation to Robert Rennie, and in terrified haste packed his belongings and left on the next train. An hour later the agent brought Donald a telegram:

"Donald McLean,
"Summit Mill.

"You are promoted to position vacated by Renwick. Refuse strikers' demands. Ship at Squamish Oriental order white pine. Utmost importance lumber loaded within week. Use every means in power to keep plant operating.

"Robert Rennie."

He passed the message to Gillis. The big man turned and grasped Donald's hand in congratulation.

"We'll get that order out on time or bust," declared Gillis grimly.

Donald distributed firearms among his loyal men, and one-half the crew patrolled the plant while the others slept.

Donald had been up the greater part of the night, and at Gillis' earnest request he went to his cabin near midnight. As the door closed behind him, Connie, with her rifle resting in the hollow of her arm, rose silently from behind a tree in the darkness of the hillside and [illegible] on moccasined feet from stump to stump. Unseen she reached the corner of Donald's [illegible] she sank to the ground with the [illegible] slow grace of a nesting bird.

The Cheakamus Mill, robbed of man-power, was forced to cease operations. At [illegible] Mill work went on with such speed as in the situation Donald was able to induce in the men, who were on edge. To him it seemed that they were working on top of a powder mine that might go off at any moment. He discovered in himself a faculty to handle men and to raise them to a fever pitch of enthusiasm, not that the B. C. logger is a hard man to lift to the fighting point. His fight against great odds had gained the sympathy of the loyal—a sympathy and respect that money could not buy. Gillis' gang, with the exception of "Blackie," remained fervently faithful.

Toiling in the hot sun, nearly blinded by sweat, singing lustily, this gallant crew worked their 12 hours without a murmur of complaint. Donald lived on the job, ate on the job, and all day long he drove his men even as he drove himself. His rest consisted of such fitful snatches of sleep as he could steal between his rounds of the night guards.

The first move of the strikers was not of open violence. The haul-back on two of the donkeys broke without apparent reason, one of the big saws had been tampered with, Wilkinson reported two fires of incendiary origin, and also that an attempt to dynamite the power-house had been frustrated.

On the third morning Hand, at the head of a mob of 50 men, made a swift descent on the lumbering operations. It might have been successful if Donald had not expected something of this kind and set efficient watch.

The invaders came down the track in a solid body, armed with cant-dog handles, pick axes and clubs, and thirsting for battle. At Donald's quick shout of warning his men dropped their tools and came on the run to form in a compact body behind him.

"Don't use your guns unless you have to," he warned, as he noticed several of them flash their revolvers.

Donald climbed quickly to the top of a large stump. In his left hand he held a stick of dynamite with fuse attached; in his right he held a match close to the dangling fuse. "Men!" he cried in a determined tone, "if you move forward one step I will throw this."

(To Be Continued.)

Young Doctor—"Just think! Six of my patients recovered this week!"

Old Doctor—"Serve you right. You spend too much time at the club!"

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Dairying In Holland

Industry Governs Economic Life, Says Canadian Trade Commissioner

The dairying industry is the backbone of Dutch economic life, writes J. C. Macgillivray, Canadian trade commissioner [illegible], in the Commercial Intelligence Journal. There are 140,000 hands employed in milch cattle breeding alone. In addition to these figures there are the employees of over 900 butter and cheese factories and the persons engaged in the distribution of the yearly production of [illegible],000 kilos of milk and its derivatives.

Holland is the largest exporter of cheese in the world. The Dutch dairy factories may be classified as co-operative and non-co-operative. Of the former there are 617, divided as follows: Butter factories, 243; butter and cheese, 140; cheese only, 50; milk products only, 17; butter, cheese and milk products, 149. For the non-co-operative factories these figures are, respectively, 17, 43, 4, 51 and 107, making a total of 210.

Recipes For This Week

(By Betty Barclay)

Beef and Pumpkin Left-Over

2 cups left-over beef roast, chopped fine.
1 cup cooked pumpkin.
2 tablespoons sugar.
½ teaspoon salt.
4 small crackers, rolled fine.
1 egg.
½ cup milk.
¼ teaspoon cloves.
2 tablespoons butter.

Mix all together and heat. Pour into greased baking dish, dot with [illegible].

Chicken a la King

½ green pepper, shredded.
½ pound mushrooms.
3 tablespoons butter.
6 tablespoons flour.
2 cups evaporated milk.
2 cups chicken broth.
Salt.
Pepper.
3 cups cold chicken, diced.
½ pimiento, shredded.

Cook [illegible] and mushrooms, if they are raw, slowly in butter 5 minutes. Cover while cooking. Remove mushrooms and pepper from fat, add flour, milk, broth and seasonings. Cook 5 minutes over a low flame, stirring to keep smooth. Add chicken, mushrooms, pimiento and pepper and reheat in double boiler to prevent curdling. Yield: 8 servings.

A New Explanation

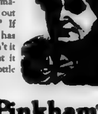
Policeman—"How do you account for having all these things in your pockets?"

Suspected Person—"Well, you see, constable, we ain't got no sideboard at home."

The chief products of the Cape Verde Islands are coffee, hides, and millet.

400,000 Women Report Benefit
by actual record

"Have you received benefit from taking Lydia E. Pinkham's Vegetable Compound?"



A questionnaire enclosed with every bottle of medicine has brought, to date, over 400,000 replies. The overwhelming majority—in fact, ninety-eight out of a hundred—says, "Yes." If this dependable medicine has helped so many women, isn't it reasonable to suppose that it will help you too? Get a bottle from your druggist today.

Amateur Discovers Comet

Find Was Confirmed by Cape Town Union Observatory

An amateur astronomer living at Rosebank, a small community near Cape Town, South Africa, distinguished himself recently by the discovery of a new comet. His "find" was confirmed immediately by officials of the Union Observatory in Cape Town. The comet could not be seen with the naked eye. It travelled slowly, and had no tail. The astronomers of the observatory plan to name it the Forbes comet, after its discoverer, and as encouragement to amateurs.

Canada's Silk Industry

Latest Report Gives Gross Value as About Ten Million

In the past 11 years the silk industry of Canada has increased 58½ per cent. in the number of establishments, 281 per cent. in number of employees, 496 per cent. in salaries and wages, and 308 per cent. in gross value of products. Since 1924 the capital investment has increased from $3,744,603 to $32,227,816 in 1927. The annual gross value of the Canadian silk industry is nearly $10,000,000, according to the latest available figures.

Announcers of the British Broadcasting Company take singing lessons regularly to help them polish their voices for speaking into the microphone.

Husband (fiercely)—"I'll show you who's running this house."

Wife—"You can't. It's her day out."

Little Helps For This Week

When He giveth quietness, who then can make trouble. Job 34.29.

Let Thy mercy's wings be spread
O'er me; keep me close to Thee
In the peace Thy love doth shed
Let me dwell eternally
Be my All, in all I do
Let me only seek Thy will
Where the heart to Thee is true,
All is peaceful, calm and still.
—A. H. Francke.

All the peace and favor of the world cannot calm a troubled heart, but where the peace is which Christ gives, all the trouble and disquiet of the world cannot disturb it. All outward distress to such a mind is but as the rattling of the hail upon the tiles to him that sits within the house at a sumptuous banquet.
—Archbishop Leighton.

Agricultural machinery and petroleum products shipments were unusually heavy in 1928. Approximately 3,000 reaper-threshers were in use in Saskatchewan and, in most cases, were reported satisfactory.

WINDOLITE
The Improved Glass Substitute

MADE IN ENGLAND

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A [illegible] yard of WINDOLITE weighs about 14 ozs., while [illegible] yard of glass of ordinary thickness weighs [illegible] to 130 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price $1.50 Per Square Yard, f.o.b. Toronto.

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer, Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays so that by using glass we are artificially excluding those vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle enabled for the first time to have healthy light instead of darkness in their [illegible].

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

Use WINDOLITE and let

ANNUAL MEETING CANADIAN BIBLE SOCIETY

The annual meeting of the Canadian Bible Society, North Alberta Auxiliary, will be held in First Baptist Church, Edmonton, on Thursday, February 7th, at 8 p.m. The speaker will be Rev. H. A. Alderwood L. Th., Rector of the Parish of St. James, Saskatoon, and formerly Secretary of the Bible Society for North Alberta.

Mr. Alderwood will repeat his address over C.J.C.A. on the following evening, Friday, February 8th, between 8.15 and 9 p.m. Tell the news to your radio Bible Society friends.

CURLING

The Edmonton bonspiel holds the centre of interest these days. Tofield is represented at this the premier curling meet of the province, by a rinked skipped by Geo. McLaughlin. The personnel of the rink is as follows: Messrs. Calvert, Skitch, J. Lee and McLaughlin.

—O—

On Monday the Tofield annual mixed bonspiel will commence. Arrangements are now being made for this important local event.

LOCAL AND PERSONAL

Born.—At Lamont, to Mr. and Mrs. Lovell, on Tuesday, a son.

Born.—To Mr. and Mrs. Joe Numeta, on February 1st, a daughter.

Born.—To Mr. and Mrs. M. Steflegyn, on February 5th, twin girls.

Born.—To Mr. and Mrs. A. Worobetz, on February 9th, a daughter.

The W.M.S. of the United Church Will meet with Mrs. McCauley on Thursday, February 21st, at 2 p.m.

The Holy Trinity W.A. have decided to postpone the tea and sale of home cooking and rummage sale advertised for Saturday, February 16th, until a later date.

The United Church Ladies' Aid St. Valentine Tea and Sale of Home cooking advertised for February 15th, has been postponed until March 15th.

Mrs. A. Ellis of Edmonton was the guest of Mrs. Lane during Mr. Lane's absence in Winnipeg.

Mr. Stutzman returned to Illinois, U.S.A., last week.

Miss Polly Napier spent Sunday in the city with Mr. and Mrs. Napier.

Mr. and Mrs. Ross and Miss Lucill Gray motored to the city last Friday.

Mr. and Mrs. J. W. Chapman spent Tuesday in the city.

The Tofield branch of the C.G.I.T. girls put on their concert at the Kingman hall on Friday night last. The presentation was a success, but the journey home was replete with hazards.

Mrs. Crawford Baptiste left for Lamont on Saturday to attend the funeral of her brother-in-law, Mr. Alex Hackett of that place. Mr. Hacket he been an invalid for the past five years, but death came quite unexpectedly at the last.

U.F.A. & U.F.W.A. ANNUAL WHIST DRIVE SOON

Those who have attended previous U.F.A. and U.F.W.A. whist drives held in Tofield do not need to be reminded that this is one of the premier social events of the year. Commencing four or five years ago, each year this annual event has gained in popularity, and last year every available seat was taken.

The committee in charge is making careful provision for their guests and this coming drive, which will be held next Tuesday, promises to eclipse all others in attendance and popularity.

The ladies are supplying a bountiful lunch which will be served towards midnight.

CURLING

Up to time of writing the Tofield rink participating in the Edmonton Bonspiel, skipped by Mr. Geo. McLaughlin, is in the finals of the Eaton Cup; in the eights of the Bank of Montreal. The rink is also in the King Edward and Emery competitions.

The mixed bonspiel at Tofield is going along smoothly with many rinks playing each night. There are 27 rinks entered in the various competitions. The prizes are on display in Brace's window.

It has ben said that Dr. Law is considering asking that total points be counted in this bonspiel instead of games won. Let's see a quarter of a century to start with. Nice going Doc.

The draws are in the hands of Geo. Agnew, who is attending to details with his usual splendid efficiency.

IT'S UP TO YOU AND YOUR FRIENDS

During the month of March we are cutting down our prices on regular shows to:—

Adults, 40c., including tax, instead of 50c.

Students, 25c., including tax, instead of 30c.

Children, 10c., including tax, instead of 15c.

If you people would like these prices to continue after the first of April, you must patronize the show, otherwise after the end of March the prices will come back to the present admissions. Our receipts at the wicket must continue to be as much during March, as the average month's receipts at the present prices. If receipts do not compare favorably with other months then our prices must go up again. Your continued patronage will keep the price down, so "It's up to you."

A. FRANK WOOD,
Manager, Variety Theatre.

HOCKEY

On Saturday afternoon last the Edmonton Acmes journeyed down to Tofield to play a game with the locals. The two teams were well matched as regards speed and weight, but if anything, the visitors had a slight edge.

From the faceoff it was plainly seen that it was going to be a close affair. In the first few minutes of play, Tofield scored a neat counter, Whyte twining the disc on a pass from W. Worton. Edmonton then speeded up and soon tied the score. There was no further scoring in this period and the teams went to their dressing rooms with the score a tie.

The second period opened fast and furious, both teams displaying some nice combination. Edmonton scored when one of their forwards was left unguarded and he gave Bowick in goal no chance to save. The visitors scored once more on a three man rush. Then Les Glover, making one of his famous rushes up the ice, scored from a close in shot. This period ended with the score standing 3—2 for Edmonton. The third period found Tofield stepping on the gas and when the smoke had cleared away they had run in no less than six goals to Edmonton's one. From the face off Sid Worton beat the Edmonton goalie with a long shot and followed this up later with another from close in. Whyte then scored on an individual effort. Tofield on a three man combination play scored another, W. Worton netting the rubber. He followed this up with another when he checked an oncoming Edmonton player and scored from a close in shot. The period ended with the score Tofield 8, Edmonton 4. During this rest Edmonton claimed they scored a goal which was not counted; this goal was given to them bringing their total to 5.

The fourth and last period found Edmonton desperately trying to tie the score and they only fell short by one goal. This period was easily Edmonton's, Tofield content with playing defensive hockey. Edmonton got three goals this period and Tofield one. The period ended with a one goal lead. The final score being 9—8.

Mr. Clutterham handled the bell to the satisfaction of all.

Harry Bowick, Tofield's diminutive goalie, has lost none of his skill in goal tending during his recent illness, and he smothered a number of shot that were ticketed for the net.

The visiting team were entertained at supper by the home team, and to a social hour at the curling rink after supper. The home club wishes to extend its thanks to the girls who helped to entertain the Edmonton boys at the social hour.

The junior hockey team (Beavers) played at Ryley on Sturday last, Ryley winning by a small margin.

On Monday, the Ryley Trail Rangers played the Tofield Trail Trail Rangers on local ice. Ryley won the game by a score of 4—0. Unfortunately there was no newspaper fellow around when this game was played, hence the report of it is altogether too scanty.

THE FIRST ROBIN

That peeps his cheery song of spring flowers and pleasant roads at you from fence corner or tree top will make you wonder if the old bus is all O. K. for a spin through the country.

We've been playing "robin" all winter and quite a number have brought their cars in to be tuned up for Spring.

Have you? Don't wait until spring is here and then expect to get it done in a hurry. There are too many folk who do that, and a real rush is the result.

DO IT NOW. You'll be glad you did when the first robin greets you.

"Drive in and see for Yourself"

TOFIELD GARAGE

BARDO NEWS

The Ryley choir motored to Bardo on Sunday afternoon and gave their Christmas Cantata and other numbers. The concert was specially rendered and gave great pleasure to all those present.

Miss Martin spent the week-end with friends in Tofield.

Sunday evening guests at Mrs. O. Brecken's were Mr. and Mrs. I. B. Moen and family.

Visitors from Tofield to hear the Cantata were Mr. and Mrs. S. Johnson and Mr. and Mrs. P. Haugen.

B. M. Anderson's entertained to supper on Sunday evening, Mrs. M. Finseth, Bennie Finseth, the Misses Ida and Mabel Assmo, Mr. and Mrs. P. B. Anderson, Mr. and Mrs. Konrad Finseth and family, Miss Myrtle Rude, Mr. and Mrs. Hendrickson and family.

J. Jevning went to Edmonton on Monday. He is staying for a few days.

Our little friend Evelyn Stauffer has been ill with the chicken pox. Her friends wish for her a speedy recovery.

We are glad to know that the little Johanson baby who was very ill for a couple of weeks or more is greatly improved.

There will be services in the church by Rev. Bjelde on Sunday morning and Y.P.S. in the evening.

B. Anderson left for the coast a short time ago.

Mr. and Mrs. S. Johnson visited with E. Rude and family on Sunday.

Mr. and Mrs. A. Haukedahl entertained Mr. and Mrs. P. Haugen to supper on Sunday evening. Visitors later in the evening were Mr. and Mrs. A. Kindley and family.

Mr. Frolland, president of the Inner Mission Society of Camrose Circuit held meeting at M. Hagen's on Tuesday evening and at P. B. Anderson's on Wednesday evening.

Quite a number from this community attended the tractor school on Tuesday.

LAKESHORE

Mr. and Mrs. T. R. Murray and family were visitors at the R. Burchard home on Sunday afternoon.

Friends of George Abernethey will be pleased to hear that he is convalescing nicely and expects to be home in a few days.

Mr. and Mrs. H. Eaton were visitors at the Henry Teideman home on Sunday. They also called on Mr. and Mrs. N. Noland.

Mr. and Mrs. J. H. Johnston and daughters were guests of Mr. and R. C. Phillips on Sunday.

Miss Ardis Wood entrained for Edmonton last week where she expects to stay some time.

The meeting re the advisability of building a new school was very well attended. No definite steps were taken in the matter but a number of ratepayers seem to feel that a new building would be advisable at the same time the increase in taxation would be so slight as to be negligible was clearly shown.

Emil and Bennie Tiedeman visited their friends the Phillips' boys on Sunday.

A very enjoyable dance was held at Community Hall on Friday evening. There was a good attendance and all report a splendid time. The Lennie boys supplied the music.

Mr. and Mrs. B. M. Anderson and Mr. and Mrs. Geo. Hendrickson motored to Edmonton on Monday, returning Tuesday evening.

On Tuesday evening a little party of friends and relatives met at A. Steen's to celebrate his birthday, and also that of Axel Kindley. A jolly little lunch finished off a very pleasant evening.

Mr. and Mrs. H. Hendrickson left last week for their home at Armena, after a two week's visit with the latter's father, Mr. Moen and family.

The Ladies' Aid met at W. Simonson's on Wednesday of last week. The next meeting will be held on Feb. 20th, at the home of Mrs. P. B. Anderson.

COMING! ... "When Smith Stepped Out"

A Farce Comedy, Augmented by Mrs. J. L. McPherson, Elocutionist, and The Ryley Concert Orchestra

To Be Shown Tuesday, February 26th, by Arrangement With The Tofield Hockey Club

STORY OF THE PLAY

If there is a moral in this sprightly comedy, its this, that it is dangerous to out for a walk in the evening with a loaded revolver in one's pocket. George and Nellie Smith, a newly married couple are leading a happy uneventful life until his Uncle Bill arrived from Australia to pay them a visit.

Uncle Bill is a rich old bachelor who following the doctor's orders, always steps out for a walk in the evening. He is rather absent minded, almost invariably putting on the wrong hat if there is more than one about, and on this particular evening, he leaves his watch on the dresser and carries an automatic in his pocket. George warns him against it, but there are holdup men in the town and Uncle Bill does not believe in taking any chances.

Now Nellie's sister, Muriel, is "keeping company" with a young man named Bob, and he and Uncle Bill have never met. Coming over to call on Muriel that evening, Bob meets Uncle Bill on the dark street and borrows a match. Walking on a few steps, Uncle Bill feels for his watch and cannot find it and at once suspects that Bob, whom he doesn't know, must have picked his pocket. He runs after him, levels his gun and say "Gimme that watch." Bob, thinking he is held up, hands over his watch. In his excitement Uncle Bill loses his hat and after vainly searching for it, returns home. For certain reasons Bob tells no one of his loss but Muriel, and they have gone to notify the police, when Uncle Bill returns home hatless and out of breath. He then discovers he has left his own watch at home and has robbed an unknown man.

Right here the plot become rather complicated. Uncle Bill confides in George, his nephew, and between them they keep that stolen watch on the move. A detective has found Uncle Bill's hat and the manner in which he and George keep him away from the stolen watch is a lesson for crooks. It isn't only the detective's clutches that Uncle Bill has to dodge—there is a designing spinster who lives next door and is desperate for a husband. She is simply going to get Uncle Bill or die in the attempt. To make matters worse Nellie has become suspicious of Uncle Bill and believes him to be an impostor and is after their money.

Through all the excitement and third degrees, however, the love affair of Bob and Muriel runs smoothly along and sure enough just about the time Uncle Bill is on his way to the police station their engagement is announced. Uncle Bill learns that Bob is the owner of the watch and in a hair line finish manages to get the stolen watch back into Bobs pocket before he has to spend a night in the cell. Nellie, however, still believes Uncle Bill is a dangerous man and an impostor and is all packed ready to go back "to home and mother," when Uncle Bill proves his innocence and identity and invites them all to HIS party.

CAST

Uncle Bill, L. Campbell; George Smith, L. Goodall; Mr. Keene, detective, P. Lagerquist; Bob Stanley, C. Lee; Mrs. Smith, Mrs. L. Campbell; Muriel, Miss H. Ness; Miss Winslow, Miss B. Sterling; Hilda, maid, Miss B. Lyrl.

Education and Leisure

It has long been the boast of Western Canada that its people are intensely interested in education. With pride the people have drawn attention to the fact that in towns and villages the most outstanding structures are the schools, while the vast expanse of prairie has been dotted with rural schools, the number of which in the three prairie provinces now approximates closely to ten thousand. These thousands of rural and village schools, larger public and high schools in the towns, still larger schools, collegiate institutes and colleges in the cities, and the three Provincial universities, are but the visible expression of the determination of the people of the West that the children of this and future generations shall not only thus be "prepared for life," but that they shall come to realize that education is life, inasmuch as it is both the accompaniment and the experience of life.

It is said that education is entering upon a new era. No doubt it is, because in this changing world we are always entering upon new eras, and education must do likewise. The basic aims, the great objectives of education abide. Methods change and the setting varies, but it remains true that health is fundamental, the tools and technics of learning are necessary, citizenship is inescapable, service is a radiant star, home is a great joy, leisure is liberty, and character is humanity's highest good.

Education is not confined to school and college. It does not even begin there, and certainly it does not end there. School is but a means to an end. Through it certain knowledge is imparted, but if that were all our schools would be a dismal failure. At best, schools in imparting knowledge give us tools to use, and, to some extent, train us how to use those tools and others which we will acquire as we journey through life. But education is not passing examinations from one grade to another, or the attainment of degrees. Education is a training of the mind ... to enable us to meet all the joys and pleasures, the pains and sorrows, the duties and responsibilities, the vicissitudes of life, and put them all to the highest possible use.

An educated nation, it has been said, is one that has learned to pursue its interests to the point of a true and catholic culture, to penetrate its inquiries until it has come at truth, and to discover that every man has a contribution to make to the great society in the service of which he finds freedom.

Five or six years ago the National Council of Education held a great and noteworthy conference in Toronto, the theme of which was "Education and Life." In April next, it will convene another conference in Vancouver, with the general scheme of its programme "Education and Leisure." The subjects for discussion by noted speakers and authorities from all parts of the world include Literature; The Moving Picture; Music and the Drama; The Radio; Organized Play; Recreation; Hobbies and Handicrafts; Health in Relation to Leisure.

Life is divided into hours of work, and hours of leisure. It has, however, become customary to consider education almost wholly in terms of work, and little thought has yet been given to education in its relation to leisure. The Lord Chief Justice of England, recently said that "second only to drink, the real cause of crime is the difficulty of finding healthy recreation and innocent amusement for the young." The free hours of a large proportion of youths and adults are occupied with harmful and ... pleasures. We must realize that it is when the young are idle that they form the habits which may later ruin their lives.

Modern machinery which is steadily displacing man in the production of ... materials is producing an ever increasing number of leisure hours. Education in the present and future must concern itself with the promotion and enhancement of interests to occupy the leisure of both the child and the adult. There must be interests which education alone can give if men are to gain the faculty of using leisure easily, happily and fruitfully.

Such interests can be found in good literature, in music, in useful arts and handicrafts, in organized health-giving play and recreation. Organized games provide education in self-control. To "play the game" is instinctive in youth; developed to its fullest, this natural gift becomes an asset of great national worth and importance in the evolution of a high type of citizenship.

Labor unrelieved by recreation produces fatigue and fatigue produces hate, lawlessness and despair. Recreation undirected, unregulated, ... produces vice, degeneration and helplessness. Play is the natural expression of all the inborn instincts. When a man is natural and at his best it is his spirit that plays.

Parents and teachers must give greater heed to the trend of these modern days and devote greater and close attention to the encouragement of proper use of the leisure hours of the children under their care.

Using Radio To Send Fingerprints

Experiment Tried At Scotland Yard Is a Success

Experts at New Scotland Yard are carrying out experiments in the transmission by wireless, of the photographs and fingerprints of criminals.

Remarkable success has already attended their efforts, and Viscount Byng of Vimy, the commissioner, and various high officials who have seen the results, have expressed their approval of the venture.

This application by the police of the latest outcome of electrical research, will, in time, have effects of far-reaching importance in the prevention and detection of crime, and the thwarting and capture of criminals.

At present the description of a wanted man is sent either by post or telegraph, to various police forces, and frequently the details are of a somewhat vague character; but, however informative a description may be, it obviously lacks the completeness of a reliable photograph, and it does not convey the vivid mental picture which is so helpful to every policeman.

One photograph with which an experiment was made, was that of a criminal named Browne, who murdered Police Constable Gutteridge, and the transmission was so good that the wirelessed picture was easily identified. Fingerprints of famous criminals have also been transmitted with equal success.

It may be a long time before there is a chain of police wireless stations in England, but officials are certain that they can already transmit to stations in America and on the continent, and thus supply the authorities of various countries with the photographs and fingerprints of fugitive gangs of international thieves and others whose arrest is desired.

Need Continual Warning

Public Seem to Forget Menace of Level Crossing

While the ideal thing would be to eliminate every level crossing in the country—and steps toward that end are being taken—it will be many years before this menace to public safety is a thing of the past. In the meantime the public must be continually warned.

If every person would get it firmly fixed in his mind that each level crossing is dangerous and that each one must be so regarded when approaching it, the death toll from this source will be materially reduced. Motorists cannot afford to fool with level crossings.

RHEUMATIC PAINS DUE TO THIN BLOOD

Relief Comes Through the Use Of Dr. Williams' Pink Pills

The most a rheumatic sufferer can hope for in rubbing something on the swollen, aching joints is a little relief, and all the while the trouble is becoming more firmly rooted. It is now known that rheumatism is rooted in the blood, and that as the trouble goes on the blood becomes still further thin and watery. To get rid of rheumatism, therefore, you must go to the root of the trouble in the blood. That is why Dr. Williams' Pink Pills have proved so beneficial when taken for this trouble. They make new, rich blood which expels the poisonous acid and the rheumatism disappears.

There are thousands of former rheumatic sufferers in Canada, ... and strong, who thank Dr. Williams' Pink Pills that they are now free from the aches and pains of this ... trouble. One of these, Mrs. W. F. Tait, McKellar, Ont., who says:—"I am one of the willing ones to tell you of the great benefits I ... Williams' Pink Pills. After ... in bed for seven weeks suffering untold agony with inflammatory rheumatism, relief finally came through the use of this medicine. I could not move in bed only as they lifted me, and I could not sleep when opiates were ... The medical treatment I was taking seemed of no avail. Then I was advised to try Dr. Williams' Pink Pills, and soon I began to get relief. ... [illegible]

NEW LEGISLATION ANNOUNCED IS NOT EXTENSIVE

Ottawa, Ont.—The speech from the throne with which His Excellency the Governor-General opened Parliament, consists largely of a review of the activities and accomplishments of the Government since the close of the last parliamentary session.

New legislation announced is not extensive. Amendments to the Dominion Elections Act, to the Companies Act, the Fisheries Act, the Narcotic Drug Act, and the act respecting technical education are pieces of new legislation to be forecast.

The speech also states that Parliament will be given an opportunity to approve the multilateral treaty for the renunciation of war, as well as the treaty providing for preservation of the scenic beauties of Niagara. Amendments to the Railway Act, which will grant to the railway commission powers of investigation of affairs in relation to subsidiary concerns and with respect to the issue of capital stock will be introduced.

One of the most important announcements connected with the speech is that legislation to provide for a general pensions scheme for the benefit of Canadian National employees will be brought down.

The speech expresses thankfulness for the recovery of His Majesty, refers to the "unprecedented prosperity" of the Dominion, draws particular attention to the development of the mining industry, and suggests further legislation to implement recommendations of the Fisheries Commission. It states that plans are in progress for construction of the national research laboratories.

Seeking Right To Control Property

Shareholders Of Grand Trunk Railroad Lodge Petition With Government

Ottawa, Ont.—The shareholders of the Grand Trunk Railroad are seeking the recovery of their right to control the railway property, now an integral part of the National Railway system, or fair compensation for their shares.

To this end they have lodged a petition of right with the government at Ottawa, claiming a fiat to sue the Dominion of Canada for the restoration of their property.

The par value of the shares held by the shareholders amounts to about $180,000,000, and presumably the alternatives before the government, if the ... was successful, would be either to pay these shareholders $180,000,000 or to surrender the Grand Trunk lines.

At the moment none of the ministers or deputy ministers concerned in this matter will discuss it.

Not Delaying Treaty

Suggestion That Canada Is Holding Up Arbitration Pact Is Denied

London, England.—The suggestion that Canada is delaying the arbitration treaty between Britain and the United States, was stated in authoritative quarters here to be groundless.

The reason for the delay is that Britain and the United States are anxious to get the Kellogg pact, upon which they have been concentrating for some time, out of the way first, but the conclusion of the arbitration treaty is expected before long.

Observations were received from Canada a few weeks ago, and the other Dominions have also sent their views.

Alberta Keeps Own Police

Province Prefers Not To Make Change In System

Edmonton.—The Alberta Government will not accept the offer of the Dominion Government, that the Royal Canadian Mounted Police shall take over the policing of this province from the existing Alberta provincial police force.

This much was made evident by Premier Brownlee in the legislature, and he gave as his reason the same reason that the Federal Government gave when they refused to remove the R.C.M.P. from the province—that they intended to have their own statutes enforced by their own police.

Radio For Peace River

Premier Brownlee Outlines Year's Plans For North Country

Edmonton, Alta.—Short-wave radio stations to link ... points in Alberta's north, pending the carrying of telegraph communication to such points; an intensive search for water in areas where water is scarce, three survey parties on soil surveys, and a survey party to examine the pre-Cambrian Shield in the northeast of the province for mineral possibilities, are among plans for the Peace River country this year, Premier Brownlee told the Alberta legislature.

FRANCE WILLING TO RENOUNCE PENSION RIGHTS

Paris.—A determined effort to ... sure the economic rehabilitation of Europe will be made when the international committee of experts on reparations begins its sessions here.

Statement that France would waive nearly $6,000,000,000 in pension rights granted her by the Versailles Treaty, indicates that a conciliatory spirit will be shown to promote solution of the tremendous financial problem left by the world war.

The treaty provided that Germany must pay the French pension bill, estimated to be 150,000,000,000 francs. France, it was understood, would demand from Germany only restitution for damage done to French property and a sum equivalent to the French war debt to the United States and England.

The problem of the experts is to determine how much Germany can pay without being crippled, and how many years she should be allowed in which to pay it. The exact total of reparations never has been fixed and it has become obvious that Germany never could pay the staggering total which the Allied nations would like to get—about $30,000,000,000.

Economic experts point out that Germany cannot be stabilized economically or industrially until she knows definitely how much she has to pay and can regulate finances accordingly.

War debts will be treated as a corollary by the European experts whose governments, in effect, hold that their debts to the United States must be paid out of German reparations. ... [illegible]

FORMS FINANCIAL BUSINESS

C. Rice-Jones, who, until recently, was vice-president of United Grain Growers, has gone into the financial business in Western Canada, and has established his own company, C. Rice-Jones and Co., Limited. To devote himself to this business he has resigned from the Vice-Presidency and from the Board of United Grain Growers, thus severing a connection which has continued during many years.

Prior to 1917, he was President and General Manager of the Alberta Farmers' Co-operative Elevator Company. He helped to bring about the amalgamation of that Company with the Grain Growers Grain Company to form United Grain Growers' Limited, and since 1917 has been first vice-president of the amalgamated company.

He has many friends in all the Western Provinces, and in addition is well known in financial centres. Mr. Rice-Jones has established connections with financial houses in Toronto, Montreal and New York, and is completing an organization of representatives in western towns and cities.

C. Rice-Jones and Co., Limited will be located in the Curry Block, Winnipeg, where a general investment service will be given on stocks and bonds, and, in addition, the company will participate in the underwriting of new issues of securities.

Ottawa Athlete Killed

Plane Crashed During Solo Flight At Camp Borden

Ottawa.—J. G. "Jerry" Ault, prominent athlete of this city, died as the result of injuries sustained at Camp Borden when the plane he was flying crashed. Mr. Ault, who was training for a pilot's certificate, was on a solo flight when his machine went into a tail spin.

A court of inquiry will be held at Camp Borden to determine the cause of the accident.

Succeeds Late Major Bell

Ottawa.—The appointment of R. A. C. Henry, director of the bureau of economics of the Canadian National Railways, to be deputy minister of railways, succeeding the late Major Graham A. Bell, has been announced by the prime minister. Mr. Henry takes up his departmental duties with the same salary as his predecessor, $10,000 per annum.

Mercant tonnage launched in the United States was only slightly more than half the 179,218 tons aggregate for 1927, but Great Britain and Ireland gained 18 per cent. and all other countries combined 32 per cent.

AIR SURVEYS FOR LAST YEAR BREAK RECORD

Ottawa.—The pre-eminence of aerial surveying for mapping Canada on account of great speed combined with a wealth of detailed information was the keynote of the report of the Aerial Surveys Committee presented by B. W. Waugh, D.L.S., to the annual convention of Dominion Land Surveyors. Although aerial surveys were inaugurated in Canada only seven years ago, they are rapidly becoming a most popular method of mapping was the statement of the committee.

During last season, which was a record for Canadian operations, 66,142 square miles of territory were photographed by vertical and oblique photography. In Nova Scotia 2,270 square miles were photographed. In New Brunswick, 826; Quebec 12,2??; Ontario 17,000; Manitoba 7,635; Saskatchewan, 11,000; Alberta, 4,000, and British Columbia 4,664. Altogether, 100,127 photographs were taken, said Mr. Waugh.

TOWNSITE PLANS FOR CHURCHILL ARE DISCUSSED

Winnipeg, Man.—Townsite plans for the Port of Churchill on Hudson Bay, it is understood were considered when Col. A. E. Dubuc, D.S.O., chief engineer of the department of railways and canals, Ottawa, met Hon. D. G. McKenzie, provincial secretary and minister of mines and natural resources, here.

Colonel Dubuc arrived on what he said was a rush trip to the city and shortly afterward was joined at the Fort Garry Hotel by Mr. McKenzie. Neither Colonel Dubuc nor Mr. McKenzie would state what their purpose was, but it was authoritatively stated that the subject of their discussion was the townsite at Manitoba's seaport.

It is understood that the question of the port's townsite has been under consideration at Ottawa and Winnipeg for some considerable time.

About the last official pronouncement about it came from Major Graham Bell, the late deputy minister of railways, in August, 1927. At that time he said, "I wish to warn all prospective purchasers that there is no land or town lots for sale in the vicinity of the proposed harbor site."

ADVERTISE FOR SUCCESS!

TOFIELD LOSES TO RYLEY

Losing its first game on local ice in two years Tofield went down to defeat at the hands of Ryley on Monday night. The game was a listless and dull affair, owing to some of the players having bad colds and other injuries received in the previous game with Edmonton. There was no score until within three minutes of the end of the first period when Sid Worton caught the Ryley goalie napping with a long shot. This put the locals one goal up. This period ended with the score 1—0 for Tofield.

The second period had been underway about five minutes when Sid Worton scored from close in a shot that gave the Ryley goalie no chance. Ryley then settled down to business and very soon evened up the count, only to drop behind again when Lee Glover for the locals broke into the scoring column. The period ended 3—2 for Tofield. The third period saw Ryley on the offensive, but Tofield scored first, W. Worton scoring after picking up a loose puck. Ryley then came back strong and tied up the score making it 4—4. With three minutes to go, Glover was penalized for three minutes, which meant to the end of the game. With thirty seconds to go Ryley scored thus winning by 5—4.

Bud Hannan refereed the game.

PUTTING "YOU" INTO "YOUTH"

Some few years ago a movement was begun through the united efforts of the Protestant Churches of Canada to form a program for the development of the teen age boys and girls of our country. It began in a small way, but during its short life has increased to such an extent that few have not heard of, and many are intimately concerned with the Canadian Standard Efficiency Tests (C.S.E.T.) for boys and the Canadian Girls in Training (C.G.I.T.) for girls.

To carry on such fine work there are needed funds. These are raised annually by a drive held all over the province during February of each year. This year in Alberta $9,000 is required by the Alberta Religious Education Board. This money is spent for camp promotion, conferences, the Boys' Parliament, Father and Son and Mother and Daughter programmes, the promotion of National Athletic contests for boys, and for the salaries of those who carry on this work.

During the next week the boys of the Beaver Trail Rangers group of C.S.E.T. in Tofield will call on many of you and we ask you to give them your support. They will be selling "stars" or "shares" in this great work and by helping them you will be "hitching your dollar to a star—a star which is leading to better boyhood and girlhood in Canada.

TRACTOR SCHOOL WELL ATTENDED

The Rumley Oil Pull Tractor School held at the Variety Theatre on Tuesday was well attended by farmers from far and near, there being well over one hundred present. The school took the form of lectures accompanied by actual demonstration and moving pictures of the different working parts of the Rumley tractor. Oiling, transmission, cooling and various other functions of the tractor were shown by unique moving pictures, which in many cases were easier to understand than the actual demonstration. Swift and Emery who arranged for this school gave away a number of cans of oil.

Here and There

(233)

Large cargoes of wheat are being shipped to Japan and the Orient through Vancouver these days. It seems like sending coals to Newcastle to send flour to "The Flowery Kingdom."

Some foundation for the old nickname "woolly" west is found in the report that Alberta's wool output for 1928 amounted to 3,082,151 pounds. Altogether the Dominion produced over eighteen and a half million pounds.

Steel is replacing wood in freight service on the Canadian Pacific Railway as 7,500 box cars now on order for the company will be of steel construction. They will have a capacity of about 2,000 bushels of grain and a load of 120,000 pounds.

Fur-farming is developing many branches, one of the most recent being the organization in Manitoba of the Manitoba Muskrat Breeders Association. The body plans to study muskrat breeding conditions and to investigate all phases of the industry.

In a recent speech at Kitchener, Ontario, E. W. Beatty, chairman and president of the Canadian Pacific pointed out that the average freight rate per ton per mile in Canada is about 6¼ per cent lower than in the U.S., and that the average of Canadian grain rates is 40 per cent lower.

Necessity Of Sowing Pure Seed If Grower Expects To Secure Highest Returns From His Farm

While admitting the importance of high fertility and good cultivation as essential for a good seed-bed, let us not forget the importance of sowing good sound seed, pure as to variety, free from weed seeds, of high vitality, and which has been treated for smut.

The time never was more opportune or more ripe for the necessity of sowing pure seed than it is today.

With the ever-increasing weed problem, and the multiplicity of varieties that are on the market, the time is at hand when we must sow pure seed, if we expect to reap the highest returns from our farms.

The wide-awake farmer does not wait until the last minute to prepare and clean his seed, and will always be found ready when seeding time arrives, to sow seed that has been cleaned, of good germination, and which has been treated for smut.

The practice of the Morden Experimental Station, in regard to seed grain, is to clean all grain intended for seed purposes shortly after freeze-up and to forward two-pound samples to the Dominion Seed Branch, Winnipeg for grading and germination test.

With the long winter days, when the farmer has ample time to spare, why not crank the little gas engine, start the fanning mill going, get the seed grain ready, and be prepared [illegible]

Influence Of Sunlight

Experiments Show Pigs Being Outside Take Less Feed

In recent hog swine feeding tests one of the important observations made was the effect of sunlight on nutrition. Those pigs that were fed out in the open made about the same daily gain as the ones fed inside. But they did it on less feed, states a writer in Live Stock Markets.

The pigs fed inside required an average of 425 pounds of feed for each hundred pounds of gain to reach a weight of 225 pounds, while those fed in the sunlight reached the same weight with only 394 pounds of feed for each hundred pounds increased weight. The outside fed pigs made $1.68 more per head over feed costs than did those fed inside.

John M. Evvard, in charge of the experiments, thinks sunshine was responsible. He is convinced of this because the outside fed pigs did not do nearly so well during the early part of the feeding season when the days were short and cold. After the days became longer and more mild, there was a marked improvement in gains.

The conclusion is that probably in midwinter, it is well to feed pigs inside. They should, however, have alfalfa hay as a source of vitamins D to take the place of the sun's rays. [illegible]

Practical Results Are Obtained From Research Work Done In The British National Museums

Make Good Hay Crops

Tests Made With Oats and Barley Were Successful

Oats and barley, when the varieties are carefully selected, make very good hay crops. At the Rosthern, Saskatchewan, Experimental Station five varieties of oats and one of barley were tested and the results of the test have been published in the report of the station for 1927, published by the Department of Agriculture at Ottawa. The varieties of oats tested were Banner, Victory, Gerlach, Gold Rain and Liberty. Each variety was cut at the time of heading out, then two weeks later and again when turning. The crops cut at the turning period made a rich hay on account of the high percentage of kernel. The straw at this stage was also quite palatable. The crop cut at this stage also gave the highest yield of cured hay. Banner gave the best returns, though Victory, Gerlach and Gold Rain were also high. In the average of three cuttings, Gold Rain, Victory and Banner showed good returns and proved their suitability for annual hay purposes. In a three-year average of all cuttings Gerlach was the highest yielder, though the difference in its favor was only slight. Liberty, though a light yielder, produced the finest quality of hay. [illegible]

The Natural History Museum, South Kensington, the Science Museum in Exhibition Road, the Museum of Practical Geology in Jermyn Street, and the Royal Botanic Gardens, with the Herbarium and Museums at Kew, are four great scientific museums in the London area maintained solely or chiefly from public sources. Each has its visitors of the sightseeing kind. Each has its clientele of serious specialists who visit the collections with a defined purpose, and who know something of the continuous research that lies behind the public exhibitions.

These museums however, and their trained staffs have an immediate practical utility, on which stress is laid in the Interim Report of the Royal Commission on National Museums and Galleries, because they are an invaluable and not sufficiently recognized agency in the development of industry and of industrial enterprise. A much larger part of the time of the staff than is generally understood is occupied not merely by curating and abstract research, but in studying and advising on problems of immediate practical moment.

WORLD HAPPENINGS BRIEFLY TOLD

Moved Large Tree

White Oak At Wetaskiwin, More Than Hundred Years Old

An unusual feat of tree moving has been performed at Wetaskiwin by George Wilde-ley. A large white oak, estimated to be more than a hundred years old, standing in the middle of the driveway in front of this district was the property of the late Frank Hedley Holmes and they were located at the corner of the lot on which the Methodist church now stands. Mr. Holmes, a pioneer of Wetaskiwin, died in 1927.

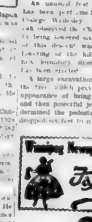
Captain Isaac Tate, the subject of a large excavation was due under the supervision of being on a pedestal. A frame building of proper height was then erected over the pedestal, and the tree was lifted by means of water jacks. A platform was built around the pedestal, and the tree was lowered into its new position. The whole job took about two weeks. The tree is 21 feet 6 inches in circumference at the base, and has a spread of 75 feet. It is believed to be about 150 years old.

Does Not Always Require Intelligence

Automobile Proves to Mathewsville Powerful Stimulant to Ignorant Persons

The gift of transportation does not, according to a writer in Mathewsville, indicate a high order of intelligence. A famous example of this principle "Bingo" Mathewsville's chief of police, who has been in receipt of 2,187 traffic tickets since 1923, and has 1,826,526 to his credit.

The latest addition to the list of Bingo's victims is Negro Alec Corn in Virginia, who was arrested for driving a motor car while intoxicated. His century investigations in simple arithmetic. Imagine Isaacks again who could multiply four figures by four figures in his head. Imagine a skilled operator could perform the feat with a machine, and imagine an imperfectly educated peasant from Piedmont. He could also give the product of any two numbers between 1 and 1,000 in less than forty seconds. Imagine Wallis, the Oxford mathematician, who could extract the square root of any number of 20 figures in a minute. Imagine Colburn, who could do the same thing in his head. Imagine Inaudi again who could multiply four figures by four figures in his head and give the product of any two numbers between 1 and 1,000 in less than forty seconds. Imagine Wallis, the Oxford mathematician, who could extract the square root of any number of 20 figures in a minute. Imagine Colburn, who could do the same thing in his head.



To Prevent "Flu"

INFLUENZA GERMS FIRST ATTACK THE NOSE AND THROAT

Dangerous germs which lodge in the breathing give you Grippe, Flu or Influenza. You can prevent these germs if you cleanse your nose, mouth and throat with Listerine. When the healing vapor of Catarrh comes in inhaled it dissolves the thick mucus which destroy every vestige of germ life.

Protect yourself against "Flu" by using Listerine every few hours. In a few moments cleans the nostrils, takes away the odor of the bodies. All the irritating mucus in the nose and throat is dissolved and killed, and gives you a headache and makes you cough it up. Disinfects and cleans it all away.

For Influenza, Catarrh, Nose Colds, Irritable Throat, you will get prompt and effective relief from Listerine. Carry the Inhaler in your purse or pocket, etc., and frequently. Complete outfit $1.00. Sample size 50c at all dealers.

Safe Fractured Arm By Radio Instructions

Operator in Arctic Gets Medical Advice From Ottawa

Receiving medical instructions flashed 1,700 miles into the Arctic by wireless, and setting a fractured arm were in the accomplishment of G. Hodson, radio operator at Hope's Advance, in the Hudson Strait. The story is told in a series of cryptic messages between Hodson, at the range-finding stab in the north and the short wave station of the Department of Marine at Ottawa.

Preceding his first message by Flash Medical Holmes said that H H Hall, a fur trader, suffering from an elbow injury, had succeeded in reaching Hope's Advance from Disana Bay by dog sled. First aid had been supplied, and he asked that a diagnosis and instructions for treatment be rushed back.

Within 30 minutes F Wordrow of the Trail Radio Station had obtained the required help from Dr. J. J. Hagarty of the Department of Health. In the hourly station in the north the operator succeeded in passing a confession and setting the fracture in splints. His last message indicated that his patient was progressing satisfactorily.

Mothers Warned Of Colds That Follow the Flu

Attack Weakened System and Pave Way for Pneumonia, Due to Use of Influenza

HOW TREATED EXTERNALLY

Physicians advise that the chief danger from influenza is after influenza. Then, more than ever, cold is to bring the weakened system may lead to bronchitis, pneumonia, or a severe throat infection may set in. This is especially true of children.

Flu, the doctors say, is the first thing to do when cold comes, don't let the cold keep it settle in the chest, throat and chest at first sign of a cold. Apply externally. Vicks can be used freely even on the youngest child with no fear of upsetting a delicate stomach.

Vicks acts two ways through the skin and vapors; it is to check the cold and avoid serious complications, and, of course, it is just as good for adults.

Four European Tours

C.N.R. Completes Arrangements for Personally Conducted Trips This Summer

Tourists are being served, and Britany and France are being brought into by a number of Canadians who are looking forward to a tour of Europe this summer. Everything as it is in the season, the Canadian National Railways have already announced the completion of arrangements for their four annual personally conducted European tours. The Canadier, Vancouver, Toronto, Montreal on July 5, and from the word "Dart" will be on hand to look for the school-teachers and others who are to be the guests on board.

Motor journeys through England and Scotland will take ten places; Switzerland, Italy, Rhine, Germany, Holland, Belgium, Paris, Normandy, Holyrood, Abbotsford, Warwick Castle, Stratford-on-Avon, Oxford, Hampton Court, Bisley Camp. There will be a steamer trip on Loch Lomond, a visit to the Trossachs, and days in Glasgow, Edinburgh and London. Then there will be a long stay in Paris and a journey to Versailles and to the battlefields.

There is to stay in Europe, long it will visit Brussels, and Cologne, Switzerland, and the travellers will have great delight will have the day of going down into Italy Milan, Venice, Florence, Rome, Genoa and a New and Mexico.

The first tourist manner the on the Canadian Pacific Railway will be on the 10th of July, and the last on the 31st of August. There will be three tours in August.

The Mass Purpose Oil.

Dodge, the business man, has been one of more for life. The mass of electrical. The oil that cuts, brings, saves, heals, the pains of rheumatism and backache, sore throat and chest. Hundreds are Pedlar Oil. Largely used—effective and soothing as an Hot massaged and are equally valuable in the bandaging of this fine old remedy which has made thousands of firm friends during the past fifty years.

Transforming Palestine

A powerhouse is being erected on the River Jordan a few miles below the Sea of Galilee. The river drops 2,000 feet in 100 miles. Automobiles, electric lighting and steam railway trains are working a transformation in Palestine.

SUNDAY SCHOOL LESSON

FEBRUARY 17

PRAYER

Golden Text: "If ye abide in Me, and My words abide in you, ask whatsoever ye will, and it shall be done unto you." John 15:7.

Lesson—Genesis 18:22-33, Exodus 32:31, 32, Nehemiah 1:4-11; Daniel 6:10; Matthew 6:5-13, Luke 18:1-14; John 17:1-26; 1 Thessalonians 5:17; 1 John 5:14,15.

Devotional Reading: Psalm 121.

Explanations and Comments.

Prayer Should Be Sincere. Mt. 6:5-8.—And when ye pray, ye shall not be as the hypocrites, for they love to stand and pray in the synagogues and in the corners of the streets, that they may be seen of men. It was the favorite attitude of righteousness. The hypocrite coveted, not the righteousness itself.

"To be seen of men is, after all, one of the most insidious temptations to human comfort. Some people go into religious extravagance simply to be seen of men (v. 5), and the average person would rather be seen to have certain qualities than actually to possess them." H. R. Reynolds.

"Verily I say unto you, "They have received their reward," said Jesus in regard to the hypocrites. The Greek word translated "received" means "received in full," and in the commercial language of papyri, to have received the full reward which they sought; they have gotten all from men, and this was what they desired, and they have no claim whatever to any further reward.

"Nor will he in these late times" Whose prayers are out stones."

But thou, when thou prayest, enter into thine inner chamber, and having shut thy door, pray to thy Father which is in secret. The inner chamber with closed door is the place where we are alone with God. For Nathanael it was under the fig tree, for Peter it was on the housetop. Jesus himself found the wilderness side and the garden for His communing with God. "When thou prayest, thou shalt not be as the hypocrites are; for they love to pray stand and pray in the synagogues and in the corners of the streets, that they may be seen of men. Verily I say unto you, They have received their reward. But thou, when thou prayest, enter into thine inner chamber, and having shut thy door, pray to thy Father which is in secret; and thy Father which seeth in secret shall reward thee openly."

Use Not Vain Repetitions. Mt. 6:7.—But when ye pray, use not vain repetitions, as the heathen do: for they think that they shall be heard for their much speaking. Jesus himself spent whole nights in prayer which He elsewhere commands; but He is emphasizing the heart of sincerity which private prayer affords.

And thy Father who seeth in secret shall recompense thee openly.

General William Booth started the Salvation Army standing on a soap box outside a saloon in the East End of London.

A Remedy For Earache.—To have the earache is to endure torture. The ear is a delicate organ and few care to deal with it, considering it "out of bounds." Dr. Thomas' Eclectric Oil offers a simple remedy. A few drops on a piece of soft medicated cotton and placed in the ear will do more relieving pain.

Business Is On Good

Four million nights of flying were recorded during 1931 by the French channel fleet of the Imperial Airways. Since 1921 the company's fleet has carried more than 97,000 passengers and 4,000 tons of freight between London and the continent of Europe.

Once when mother spoke of reducing she meant exercise.

THINNESS

Over-thinness is detrimental to a child's progress in growth and health.

Scott's Emulsion

of vitamin-rich cod-liver oil is a body-building food and tonic that overcomes thinness and helps build up a sturdy body.

Scott & Bowne, Toronto 20-32

Preparing For Air Service

Aerodrome Are To Be Built In South African Jungle

Jungle aerodromes are being laid out in Africa in preparation for the air service from Cairo to Johannesburg. Thousands of trees have had to be felled and their roots dug up to provide landing spaces. Ant-hills have been, in many places, removed by hand, as no other means were available. Some of these were over 20 feet in height. Experiments in lights are to be made next summer as a preliminary to the regular service. The whole journey of 5,000 miles will take five or six days instead of two months by existing means of transport.

Mothers Warned Of Colds That Follow the Flu

Attack Weakened System and Pave Way for Pneumonia, Due to Use of Influenza

HOW TREATED EXTERNALLY

Physicians advise that the chief danger from influenza is after influenza. Then, more than ever, cold is to bring the weakened system may lead to bronchitis, pneumonia, or a severe throat infection may set in. This is especially true of children.

Flu, the doctors say, is the first thing to do when cold comes, don't let the cold keep it settle in the chest, throat and chest at first sign of a cold. Apply externally. Vicks can be used freely even on the youngest child with no fear of upsetting a delicate stomach.

Vicks acts two ways through the skin and vapors; it is to check the cold and avoid serious complications, and, of course, it is just as good for adults.

ECZEMA IN RASH ON HANDS

Troubled For Three Years. Healed by Cuticura.

I was troubled with eczema on my hands. I suffered for three years. I tried many remedies but found no relief. I saw Cuticura Soap and Ointment advertised and sent for a free sample. I got relief from it in a few days and after I had used Cuticura three months I was healed." (Signed) Miss Beatrice Adam, Hope, Que.

Use Cuticura Soap, Ointment and Talcum for daily baby purposes.

Cuticura Soap 25c. Ointment 25c and 50c. Talcum 25c.

PRAYER

Golden Text: "If ye abide in Me, and My words abide in you, ask whatsoever ye will, and it shall be done unto you." John 15:7.

Lesson—Genesis 18:22-33, Exodus 32:31, 32, Nehemiah 1:4-11; Daniel 6:10; Matthew 6:5-13, Luke 18:1-14; John 17:1-26; 1 Thessalonians 5:17; 1 John 5:14,15.

Devotional Reading: Psalm 121.

Explanations and Comments.

Prayer Should Be Sincere. Mt. 6:5-8.—And when ye pray, ye shall not be as the hypocrites, for they love to stand and pray in the synagogues and in the corners of the streets, that they may be seen of men. It was the favorite attitude of righteousness. The hypocrite coveted, not the righteousness itself.

"To be seen of men is, after all, one of the most insidious temptations to human comfort. Some people go into religious extravagance simply to be seen of men (v. 5), and the average person would rather be seen to have certain qualities than actually to possess them." H. R. Reynolds.

"Verily I say unto you, "They have received their reward," said Jesus in regard to the hypocrites. The Greek word translated "received" means "received in full," and in the commercial language of papyri, to have received the full reward which they sought; they have gotten all from men, and this was what they desired, and they have no claim whatever to any further reward.

"Nor will he in these late times" Whose prayers are out stones."

But thou, when thou prayest, enter into thine inner chamber, and having shut thy door, pray to thy Father which is in secret. The inner chamber with closed door is the place where we are alone with God. For Nathanael it was under the fig tree, for Peter it was on the housetop. Jesus himself found the wilderness side and the garden for His communing with God. "When thou prayest, thou shalt not be as the hypocrites are; for they love to pray stand and pray in the synagogues and in the corners of the streets, that they may be seen of men. Verily I say unto you, They have received their reward. But thou, when thou prayest, enter into thine inner chamber, and having shut thy door, pray to thy Father which is in secret; and thy Father which seeth in secret shall reward thee openly."

Use Not Vain Repetitions. Mt. 6:7.—But when ye pray, use not vain repetitions, as the heathen do: for they think that they shall be heard for their much speaking. Jesus himself spent whole nights in prayer which He elsewhere commands; but He is emphasizing the heart of sincerity which private prayer affords.

And thy Father who seeth in secret shall recompense thee openly.

Live-stock Industry Prosperous

The livestock industry of Alberta has responsible for a production of $8,775,352 in 1930, according to D. A. McKenzie, Commercial representative The livestock industry is enjoying a measure of prosperity which should encourage those engaged in this branch of agriculture to face the future with confidence, he stated.

FOR MOTHERS OF YOUNG CHILDREN

Mothers are quick to praise anything which brings health and comfort to their little ones. Any mother that will make the baby well and keep him well will always receive hearty recommendation from us. That is why Baby's Own Tablets are so popular. Thousands of mothers throughout the country, not only use them for their own little ones but are always delighted to be able to recommend them to other mothers. Thousands of mothers have found Baby's Own Tablets to be without equal in relieving their little ones of any of the minor ailments which arise out of a disordered stomach and bowels. Baby's Own Tablets are mild laxative easy to take but thorough in action. They banish constipation and indigestion, break up colds and simple fevers, expel worms and make the teething period easy The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Reduce the Acid

Sick stomache sour stomache and indigestion usually means excess acid. Your stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour.

Phillips Milk of Magnesia neutralizes many times its own volume of acid. Since it is inorganic, it does not gas. It has remained the standard with physicians everywhere.

Take a spoonful in water and your stomach gas will promptly end in five minutes. Then you will always know what to do. Crude and harmful medicines will never appeal to you. Do prove this for your own sake. It may save a great many disagreeable hours.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acidity. Each bottle contains full dose—any druggists.

CHAPTER XIV.—Continued.

To bolt and bar the door, Donald, He don't dare do it. Rush him."

But the mob did not obey their leader's order. Instead, they gazed in pale face and turning black eyes were sullenly evidently that he made no idle threat. Donald saw the big hand of his foreman steadying to the butt of the heavy club that hung at his side. "Keep cool, Jock," he begged; "don't start anything."

For Sergt Colin had been without hesitation. "Stand back, men," he ordered. "By G—— I would like to take a crack at him," he said in a voice that is with rage.

The hostile crowd did not advance; rather they drew together in sullen groups, they lay or sat on the ground in attitudes of dejection or of derision at Donald's fruitful error.

Donald's nerves were on edge. At any moment there might be a pocket battle with loss of lives. He studied the faces of the strikers to see how many were from his crew and was surprised to recognize fully six of his men. He saw "Blackie" in the rear of the crowd and called to him. "Come here, Blackie!" he ordered.

The man hesitated, then slouched forward with his head down. He was a powerful man, but of a sullen disposition and subservient to the will of stronger men.

"Look here, Blackie," Donald began in a high clear voice, "I would like to know why you, who I thought was a friend of mine, have joined with this crowd of strikers to make trouble for me. Why don't you speak up like a man? Are you ashamed of what you are doing?"

"I don't know," came over Colin. "I never thought Blackie would go such an one. I'll swing his if—each when I catch him in town!" he added bitterly.

Donald heard a slight movement behind him and turned to see Connie standing with her rifle in the crook of her arm.

"Dead Innocent Connie, you shouldn't be here!" he exclaimed.

Connie's face bore traces of weariness and apprehension. For three nights she had stolen softly away from her cabin on the hillside to the hidden outside the camp. By night she had kept up a worry vigil, ever on the alert, in the fervent she had him behind a stump on the hill with eyes on Donald's tall figure wherever it moved. Her father's rifle ready for instant action. Hand she had seen that dusky hand lately rimmed him when he stepped forward to urge his men to charge. At that moment Connie's dusky rifle was aimed at his heart.

"Not much you shouldn't, sure, Connie!" said Donald, firmly, but kindly

Connie lowered her eyes to her accustomed foot, that was weaving patterns in the dry soil, and shook her small head obstinately.

"Why do you wish to stay?" he asked.

She patted the stock of her rifle. "I want to help you."

Donald looked down at the weary little figure. He stepped down from the stump, keeping a wary eye on the belligerent strikers, and came to her side. "Connie," he said softly, "you are a dear, brave little girl, but you must get away from this place as there may be serious trouble here. Remember," he entreated, resuming out a hand to stroke her shining head.

Connie's face paled quickly, and she shrank from the caress. Her dusky eyes, fixing his with intensity, held his display of tenderness brought a sudden rush of tears to her eyes. But she made an move to leave the scene.

Finding that he could not shake Connie's determination to stay Donald returned to the vantage point of the stump. "Jack," he said turning to his big foreman, "I am going back to camp. I want you to keep your men. If I am any judge of human nature about half of them if they are given their fees will welcome the chance to go back to work. They are being dominated by Hand."

Colin shrugged his shoulders. "Do what you think best," he said.

Donald passed the dynamite to Colin and stepped forward with his arms extended, palms upward. The crowd moved uneasily. Hand came slowly to his feet, his small eyes narrowed with suspicion.

"What's up?" he growled.

"Men," Donald began in a high clear voice, "I would like to say a few words to you that you will grant me. I have practised tactics. Blood-shed and bloodshed means I have no desire to reduce your exorbitant demands. Personally, I have no choice in the matter; there is no other course for me to pursue. In spite of your interference we will continue working with the few men who have remained loyal. I will ask for police protection only as a last resort. I appeal particularly to the men who worked for me here at this camp. Is there one of you who can truthfully say that you were not actually receiving more than the average wage for your labor? Is there one of you who will not admit that the general equipment for your comfort is unequalled in any camp in British Columbia? You are making a mistake, men," he went on in a pleading tone, "a mistake you will be sorry for later, for you will be blacklisted in every camp in the country. Go back to work, and I promise you there will be no ends against you. That's all."

Donald walked back to Connie's side. The men had not moved to extend a helping hand—at once —Tuesday Connie.

Hand turned to the wavering crowd. "To hell with him and all capitalists!" he snarled. He turned to shake a huge fist at Donald. "I'll threaten us, do you? You d——" The epithet that came from his

FLU Germs Breed In the Throat.

First Appear As A Common Cold, But Gain Tremendous Headway In His Throats

SOME SIMPLE PRECAUTIONS AGAINST INFLUENZA

Simple precautions taken now will enable you to fight threatened "Flu" which is ravaging rapidly through the whole country. The germs of Influenza first appear as a common cold, but gain through the mouth and throat. Keep the throat healthy and you go a long way towards stopping the trouble. An effective means of prevention is to gargle the throat three or four times daily with Nerviline. Half a teaspoonful of Nerviline in water makes a most efficient gargle. The germ-killing properties of Nerviline quickly destroy any bacteria in the mouth or throat. If the chest is sore, if the throat is hoarse, if you have a cough—be sure to rub the neck and chest with Nerviline. Every drop of it will rub in, and out will come the congestion.

If course it is absolutely necessary to house-clean the system with Dr. Hamilton's Pills which stimulate the eliminating organs, and rid the system of disease-breeding germs. The combination treatment of Nerviline and Dr. Hamilton's Pills will give prompt and entirely satisfactory results.

Christie's ARROWROOT

Recipes For This Week

(By Betty Barclay)

GRAPE MOLD

3 tablespoons gelatt-cooking tapioca.
½ teaspoon salt.
1 pint hot grape juice.
½ cup sugar.
½ cup shredded pineapple.
1 cup unsweetened marshmallows (if desired).
6 egg whites.
Lady fingers or strips of sponge cake.

Cook tapioca and salt in the hot grape juice in a double boiler 15 minutes, stirring frequently. Stir in sugar. Remove from fire and add pineapple. When partially cooled, stir in the marshmallows (if desired), and fold in the stiffly beaten egg whites. Arrange split lady fingers around a mould of a glass bowl or around individual shortcake glasses. Pour mixture and chill. Serve with whipped cream. Lady fingers or sponge cake may be omitted.

MACARONI WITH OYSTERS OR FISH

2 cups macaroni.
½ teaspoonful salt.
1-6 teaspoonful pepper.
3 tablespoonfuls butter or a substitute.
1 pint oysters.

Cook the macaroni until tender in boiling salted water; drain, then season with the salt, pepper and butter. Oil a baking dish and put a layer of the macaroni in it, then a layer of oysters which have been carefully picked over, more macaroni, more oysters, and so on until the dish is full. Pour the liquor from the oysters over the top (here should be a cupful of this liquor if there is not enough make up the deficiency with milk. Bake twenty minutes in a moderate oven 350 degrees F.—and serve with tomato catsup.

Macaroni must never be cooked longer than they were twenty years ago, according to an orthopedic surgeon. In other words, all has been trying to fill man's stores

The Carnival Of Stains

Much of It Is Unnecessary and Could Be Eliminated

The high peak of street noises has been reached as gradually that many persons have not fully appreciated what they are enduring, others to inflict upon them and have not stopped to consider whether, in fact, the various components that make up the existing pandemonium are really necessary and unavoidable. Such new addition has been accepted with astonishing complacency. The unmuffled motorcycle, the blatant, the heavy lorry, the airplane, the steam tractor and the pneumatic drill, have been tolerated in turn. Each of these noisy inventions has been turned loose without let or hindrance and people have ceased to marvel at them or to wonder what diabolical invention engineering science will thrust upon them next.

Sore Corns Drop Off If You USE "Putnam's"

When you notice any sign of callous on the feet or toes—that's the time to paint on a few drops of PUTNAM'S CORN EXTRACTOR. The pain, and you prevent corns. No matter if the corn is hard or soft, it has no top or bottom the toes. Painless and will remove it without pain. Insist on PUTNAM'S CORN EXTRACTOR. It does the work—and costs not the corn, quickly and without pain.

A Clever Idea

The Durham Chronicle tells of a young man who visited a store in that town, purchased three dozen eggs on credit, took them to another store and sold them and used the money to buy eggs at the first store. This is probably the first instance of a thirty-six hour automobile.

The Minister's Lament for the Flu

May Be the Reason

WINDOLITE

MADE IN ENGLAND

The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer is well and abundant and costs nothing.

Medical research has definitely proved that from the point of view of Health and Hygiene the most effective means to obtain the Ultra-Violet rays is through the greatest power for the prevention and cure of disease and ill-health.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are actually shutting out vital health-giving rays. Therefore the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is the most effective substitute for glass, that it freely admits the Ultra-Violet rays and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized purchasing gives a new stimulus to poultry breeding, increasing the egg laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent sunlight. It makes light but strong windows for cattle sheds, dairy stables and poultry houses, breeders and all out buildings. It is economical, unbreakable flexible and easy to fix. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitoriums, motor-boats, cabins, cowrings and greenhouses. It keeps out cold —will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. **WINDOLITE** is supplied in rolls any length but in one width of 36 inches only. A square yard of **WINDOLITE** weighs about 16 ozs., while a square yard of glass of ordinary thickness, weighs about 13lbs to 14lbs each. The improved **WINDOLITE** requires no framework. **WINDOLITE** is made in England

Little Helps For This Week

"Give us this day our daily bread." Matthew vi. 11.

Monday, July: From hour to hour Lord, I need Thy saving power, Not to smile through every trial Not to blame tonight's repress How I long for help to feel: Give today Thy daily bread

Every moment hold my hand: Without Thee I cannot stand, Keep my feet in the place to tread: Day by day I must be led

In before me all the way; Give me daily bread today!

—Miss Terry Cooke

What is this bread, O my God? It is not merely the support which Thy gracious goodness supplies to the exercise of life. It is also the nourishment of truth which Thou givest each week to be used at home or to some other ritual definite, giving it vigor, stature, making it grow in faith. Then does renew it every day. Then grows within and without precisely what the soul needs for the advancement in a life of faith and renunciation. Give us whatever bread we may need day is my daily bread, provided I do not refuse to take it from Thy hand or from those of others.

The West and Its Natural Resources

The question of the transfer of the public lands and natural resources of the West by the Dominion to the three prairie provinces is once again very much to the fore. Ever since the provinces of Alberta and Saskatchewan were formed, in fact, to some extent ever since Manitoba was created a province there has been a demand on the part of the Western provinces that they should be placed in a position of equality with the older provinces in the matter of ownership and control of the public domain.

Fortunately the question has now passed out of the realm of partisan controversy because all political parties, Liberal, Conservative, Progressive, at Ottawa as well as in the Prairie Capitals, are agreed that the [illegible]. Not only so, but the Governments of the Eastern Provinces have waived the objections so long urged by them. It is now only a question of reaching terms acceptable to the West on the one hand, and the rest of the Dominion on the other hand.

Negotiations are now under way with all three prairie provinces. In the case of Manitoba agreement has been reached with the Dominion to the extent that a Commission is now engaged in studying the whole question of terms. Negotiations with Alberta reached the point of an agreement being actually signed between the two Governments, but later Ottawa proposed to insert a provision relative to the school lands which was unacceptable to Alberta, and the agreement was not proceeded with. Ottawa has since modified its position and an early settlement of outstanding differences seems likely.

Saskatchewan's position is somewhat different from that of the other provinces. Whereas Alberta is rich in coal, oil and other resources apart from lands and recent discoveries have revealed a Flin Flon and [illegible] in Manitoba, Saskatchewan's mineral wealth is yet to be proven.

Furthermore, Saskatchewan's chief wealth has been found in its agricultural lands and to a large extent these have already been disposed of by the Dominion with the result that there is not as great wealth to be handed over by the Dominion to Saskatchewan as exists in the case of the other two provinces. Saskatchewan, therefore, has a stronger claim for compensation for lands alienated under Dominion administration for the general benefit of all Canada. However negotiations are in progress.

The sooner all these questions are finally settled and the Western provinces placed in control of their lands and resources the better. [illegible]

German Gives Successful Demonstration Of His Fireproof Invention

A paper that [illegible] has been discovered. The German inventor, Mr. Franz Franck, gave a demonstration recently. He took a sheet of ordinary newspaper, crumpled it into a ball, and wrapped this highly combustible object in a sheet of his fireproof paper. Thus protected, he held it for a few minutes in the flame of a laboratory blast lamp hot enough to melt a glass window-pane. Not only did the fireproof wrapping survive, but the ordinary paper inside was not even scorched.

NERVOUS INDIGESTION AS A RESULT OF FLU

A Severe Sufferer Overcame This Trouble By Taking Dr. Williams' Pink Pills

No ailment of recent years has proved so treacherous as has the Flu. The disease itself is bad enough but the after effects is where the real danger lies. The Flu leaves behind it a weakened body, impoverished blood, shattered nerves and an impaired digestive system. Too much stress cannot be laid on the importance of rebuilding the blood and strengthening the nerves during convalescence. Until the blood is built up there can be no recovery of health and strength. The one sure blood-builder is Dr. Williams' Pink Pills. Start a treatment of them today and see how soon you show signs of robust health again.

Among the many victims of the terrible Flu epidemic of 1919 was Mrs. Irving Maxwell, of Bancroft, Ont. [illegible]

To Develop Home Art Industries

Canadian Handicraft Guild To Hold Exhibition In Regina

The Canadian Handicrafts Guild, whose object is to encourage, revive and develop home art industries throughout Canada, will hold an exhibition in the Saskatchewan Hotel, Regina, March 20 to 23rd, 1929. The exhibit will be open to anyone free of entry fee or charge who is skilled in making hand work, basketry, embroidery, knitting, laces, leather work, metal work, pottery, quilts, rugs, sewing, weaving, wood work, etc. Everything, however, must be handmade.

The object of the Guild is to preserve the knowledge and skill possessed by our people and to encourage industry and thrift in the home of the public, making their work profitable and honourable by means of exhibiting the products of their skill and to keep records in order to prevent the extinction of any arts or crafts. The Guild will undertake to sell any exhibits that are sent in but every person should, of course, put his or her price on the article.

One feature of the exhibit will be to educate the public to the value of good handwork, so that a demand may be created for these handcrafts thereby enabling our people to find their interesting and artistic work at home remunerative.

This is the first exhibition that has been held in Saskatchewan but in other provinces successful exhibitions have been held in which the sales have gone as high as $50,000.

Anyone interested in any way should communicate with the Secretary, Canadian Handicrafts Guild, Saskatchewan Hotel, Regina, and any information will be cheerfully furnished. The Guild is not a profit-making institution, (there are no entrance fees), but is out to help others help themselves. No time should be lost, therefore, in writing at once to the secretary for information.

ASPIRIN

ANGLO-AMERICAN FRIENDSHIP TO BE SAFEGUARDED

London, Eng.—It was learned in well-informed circles that proposals for a new approach to settlement of the disarmament problem may be made by the British government to the United States in the near future.

There were definite indications of a feeling in British government circles that an entire new system of approaching the disarmament question was needed. It was understood that this attitude would be applied to all armament problems that are not already regulated by treaties.

It was stated that a new method of solution would be sought in an effort to safeguard Anglo-American friendship and allay suspicion and misunderstanding in both the United States and Britain.

Past attempts to arrive with mathematical precision at a parity of naval strength, matching ship for ship, and ton for ton, is now viewed by an increasing number of British officials as having been the chief obstacle to an armament agreement between Britain and the United States. They have been able to see little indication of the possibility of agreement on an equality basis. Therefore they are now considering what other method can be used for the solution of the problem and they seek specially one which would be based largely on mutual confidence and goodwill.

The influential Britons who have been trying to shape this government's United States policy so that it would lead toward conciliation of all difficulties, have been [illegible] away from any action that might involve disputes on technical questions. They have feared that such questions would arouse public resentment [illegible] sides of the [illegible].

Changes In Wheat Marketing To Be Demanded By Western Members

Ottawa.—Drastic changes in the methods of marketing wheat are being demanded by the members from the prairie provinces and these demands will find their echo in the house this session from both Liberal and Progressive members.

When Robert Gardiner, Progressive leader, in the House the other evening demanded the resignation of the present board of grain commissioners and the establishment of a new board of five to administer the Canada Grain Act, he expressed the views of many in the prairie provinces. Yet the Liberals are asking for more.

Before the present session is far [illegible] be a demand for some means to prevent mixing at the terminal elevators, for changes in the personnel of the board of grain commissioners and for action in the direction indicated in the report of the agriculture committee last session regarding the establishment of protein content as the chief measure of the market value of wheat.

Large Butter Consumers

Canadians Use More Butter Than Any Other Nation

Vancouver, B.C.—Canadians are the largest consumers of butter in the world, declared Dr. J. D. Ruddick, Dominion Dairy Commissioner, in addressing the Western Canada Dairy Convention here on "Dairy Progress in 1928." Their annual per capita consumption, he put down at 27 pounds to which must be added 3½ pounds of cheese. Increased home consumption, according to Dr. Ruddick, had led to a large drop in butter exports and in this connection he referred to the huge consumption of dairy products by the automobile tourists [illegible] pounds of butter every year.

Trapped In Burning Cabin

Neighbor Unable To Effect Rescue Of Three Prospectors

Sioux Lookout, Ont.—Trapped in flames in their tiny cabin, three prospectors lost their lives at the narrow Woman Lake Portage, according to word reaching here. With them perished their four dogs which were chained to the outside of the building.

The three victims were Tony Tyrell, and men named Gougan and Vlegt.

No word is yet available as to where the three came from. Terrified barks of the dogs roused R. F. Dynes, sleeping in a shack some distance. He rushed outside to see the cabin in flames but found it impossible to effect a rescue. He could not even get near enough to release the still living dogs.

Word of the tragedy was brought out by aeroplane.

WILL MAKE BID FOR LARGE AREA IN FAR NORTH

Ottawa.—While cabinet ministers and western members of Parliament will not discuss, openly, the announcement that Premier J. G. Gardiner, of Saskatchewan, will seek a vast extension of the area of that province when he comes here to confer with the Dominion Government there is the keenest interest in his proposition.

[illegible]

A CRUISE OF CONTRASTS

[illegible]

May Require Aid Of British Parliament

To Smooth Out Difficulties In Connection With Manitoba Act

Ottawa.—The possible necessity of invoking the legislative machinery of the British Parliament to smooth out certain difficulties of certain lands in Manitoba, was raised by R. W. Craig, counsel for the province, at a session of the Manitoba natural resources hearing.

Mr. Craig, during the course of his argument, pointed out that the British Parliament had passed the Manitoba Act of 1870 and provision had been made whereby it could not be changed by the Dominion parliament.

It might be necessary in order to change the present financial terms between the provinces and the Dominion, to have the British Parliament validate such change by statute, Mr. Craig declared.

Historical authorities were quoted and precedents cited by Mr. Craig in support of his contention that the Dominion's interest in the provincial lands were primarily of legislative jurisdiction and did not involve proprietary rights.

FOUND—Between town and Geo. Cookson's corner, a black gauntlet. Owner can have same by proving property.

STUD AND HEARTH

"And he will never see the thrown, nor the young lambs jumping in the fields, nor the birds when they sing," said he; can't earth on the floral Oh, my boy! my boy!

A blind baby—what a tragedy in the lives of parents, when the direct verdict is pronounced! To the child who lives in perpetual night, the contribution of all he has lost is happily withheld in its entirety. He has never seen.

To the individual who has once seen and enjoyed the wonders and beauties of this world, blindness is a deprivation of half the humanity to live.

"A million dollars to anyone who will restore my sight." Once said a prominent financier face to face with blindness. But it was too late. No one could restore the vision that was lost. The stores have refused to see in our eyesight and how careful we should be to keep our eyes in good condition.

The eyes are connected with other parts of the body. Hence the cause of many eye troubles is not in the eye itself, but some other organ. On the other hand, poor eyesight may cause illnesses in other parts of the body. Hence when the eye trouble is corrected, the health improves.

Frequently if a child is backward in a school, or if he does not stand or sit straight, it may be because his eyes are causing the trouble. Children as well as adults may have bad headaches or eyestrain. An eye specialist should be seen. If eye trouble is found and proper glasses worn, the headaches disappear and the general health improves.

Keeping the sight in a most important thing. All children before going to school, should have a complete examination. Parents should give some time to testing of the eyes. Glasses should be worn if necessary, so that the child starts school free of a serious handicap.

Further information may be had from the Canadian Red Cross Society, 407, Civic Block, Edmonton, Alta.

TRAGIC DEATHS AT MANOLA

AEROPLANE AGAIN VICTORIOUS IN RACE AGAINST TIME

MANOLA FAMILY RECEIVES AID

Three Manola people were given aid Saturday afternoon, when Capt. "Wop" May and his Commercial Airways aeroplane carried a doctor, a trained nurse and 200,000 units of anti-toxin to the relief of a diphtheria stricken family who were marooned by snow blocked roads under farm near Manola.

Mrs. E. H. Redlin, the wife, and Keith, the four-year-old son of the Manola farmer, were dead, and Mr. Redlin sat his own children, aged six and a girl of three—were critically ill when the call arrived via the air route. The family's plight became known when a message called on Friday night, after which a telephone message was sent to Dr. A. M. Crawford at Wetaskiwin, the provincial department of health was communicated with, and "Wop" May and his aeroplane were pressed into service.

Cut off by snow-blocked roads and some distance from the farm of Mr. Redlins, were all attended by diphtheria in some time on Thursday.

By Friday afternoon, the mother and Keith were dead. The father and his surviving children—an eight-year-old boy and a three-year-old girl, were isolated, dying alone. No one knew of their danger. There is no phone to the Redlin farm; the heaviest snow fall of the winter had shut them off from their neighbors.

Aid Speed

A chance visitor at the home on Friday night saved the situation. Word was sent to the nearest town by phone, and a message relayed to Dr. Crawford. The latter received the message by wire; sending in a call for the provincial department health at Edmonton. Supplies were sent on by Dr. M. E. Rorr, deputy minister of health, and the serum shipped out of anti-toxin. "Wop" May was called. He agreed instantly to fly to Wetaskiwin with the anti-toxin and a trained nurse.

Despite the hazard of the undertaking—landing on strange land—and the fact that he had only flown in a snow storm once before, Capt. May climbed into the cockpit of his machine for a 200-c-mp. The wheels were removed from the Commercial Airways Lockheed-Vega which "Wop" and Vic Horner recently flew up into the Mackenzie, and the machine was equipped in taking off from Great Falls, Montana, on the way north were attended to the machine.

Dr. Rorr had already secured the services of John D. Kenwyn, graduate nurse from the University hospital, and despite the fact that she had never been in an aeroplane in her life, she was ready to fly north with "Wop" at 1 p.m. Saturday.

Canada's Aggregate Trade Shows Remarkable Increase In the Last Fourteen Years

Each recurring year comes as a call for personal and national stock-taking. The first concerns the individual personality, the second is the concern of every patriotic citizen. So it is not unwise to consider the position of Canada on her material side and as occupying a place in the world economy out of all proportion to the ratios her population bears to that of the principal countries that are her competitors in the open markets of the world. At the end of 1927 the Dominion reached 9th in the volume of her imports, exports and general trade, yielding rank in these respects only to the United Kingdom, United States, Germany and France, all nations of greatly larger population. Following Canada, in the order of their trade aggregates, come British India, Japan, Italy, Argentina and the Netherlands.

That Canada should occupy so honorable a position in the trading roster of the world is a matter of legitimate pride, heightened by the rapidity of the Canadian expansion. In 1913, the year before the war, Canada ranked only eighth in the volume of her import trade, tenth in the volume of her exports, and ninth in aggregate trade. The Dominion's rise to fifth place is compressed within those less entirely within the war and post-war periods and is both remarkable and, probably, unparalleled in trade history. Moreover, it is even more surprising when it is kept in mind that Canada still numbers less than 10,000,000 people, and that her increase in population has been relatively slow. Because of this the Dominion shows a much higher place when the point of view is restricted to per capita trade.

In the last complete calendar year before the outbreak of war, Canada reached the 20 dollar per capita mark among the countries of the world in export trade, but in 1927 had reached second place, out-ranked by New Zealand alone. In import trade Canada reached seventh per capita in 1913, rising in 1927 to fifth. In aggregate trade per capita Canada moved from sixth place to second in the same period, being excelled by the much smaller Dominion, New Zealand. Taking the visible trade balance Canada held third place in 1927, following the United States and British India, but on a per capita basis, the Dominion was fifth of the world.

Canada's fiscal year ends March 31, and for the last complete year to that date in 1928 her aggregate trade was returned at $2,333,509,951. This represents an increase in fourteen fourteen years of $4,340,453,565, or 114 per cent. Imports alone has increased from $982,702,382 to $1,067,117,320 by $382,053,386, or 57 per cent. Exports have increased from $283,282,857 to $1,266,732,564 by $983,449,707, or 348 per cent. The value of Canadian trade continues to increase, further increments being recorded in the present year. Comparing the aggregate for the 12 months ended July last with the previous corresponding twelve months, an increase is shown of over 5 per cent, both imports and exports being appreciably greater.

Business Is Increasing

The Manitoba Cordage Company reports a year of successful progress, a crop of approximately 1,300 acres of hemp was planted during the year as compared with 800 acres planted in 1927. Four hundred acres of hemp were grown at Rhein, Saskatchewan. Manufactured products are meeting with a favorable reception and a gradually increasing business is being done.

Self-defence is the closest of all laws and the reason why lawyers did not make it.

Mexico produced almost 25 per cent. of the world's oil in 1929.

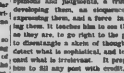
Men Of University Training

When Properly Applied Is In Most Valuable Asset

"A university training is the great ordinary means to a great but ordinary end; it aims at raising the intellectual tone of society, at cultivating the public mind, at purifying the national taste, at supplying true principles to popular enthusiasm and fixed aims to popular aspiration, at giving enlargement and sobriety to the views of the age, at facilitating the exercise of political power, and refining the intercourse of private life.

It is otherwise which gives a man a clear, commanding view of his own opinions and judgments, a truth in developing them, an eloquence in expressing them, and a force in urging them. It teaches him in one charge so they are, to go right to the point to choose aright a skein of thought, to know what is essential, and to discard what is irrelevant. It prepares him to fill any post with credit, and to master any subject with facility. It shows him how to accommodate to others, how to influence himself into their state of mind, how to bring before them his own, how to come to understanding with them. John Henry Newman.



Clue of Cut Flowers

Flowers send to taken care of by the purchaser. When you open a box of cut flowers from the florist's the stems have air in them. So it is not enough that you put the flowers immediately into a vase of water, cut off about half an inch at the end of the stems and immerse the stems in warm water till the flowers are up to their necks in the liquid. Then the water passages will soon be filled and the flowers are ready for the vases.

Memorial For Pioneer

Mona Lakebridge, Alta., a monument consisting of a stone cairn has been erected to commemorate the discovery of a coal mine and the pluck of its finder, Nicholas Sheran was a pioneer of 1877. He was made of stern stuff, for his market, Fort Benton, was 200 miles away. To cart the precious fuel to his market he employed bull teams, and many weeks of hardship and toil it must have taken him.

Fleeing the Blues

"Do you claim that your wife dragged you down to this awful plight?"

"Yes, lady, she's the cause absolutely."

"And how did she ruin you?"

"Well, it's kidna this. I got 'em three good jobs and she lost them all by her 'igh-minded urges."

Bedridden Chic

Is individuality and wearability will appeal to the thrifty woman who chooses practical daytime clothes. The complete cut of bodice and vest makes it quite suitable for women of average full figure. The two-piece skirt cut on conservative lines is just slightly flared. The crushed girdle to give smooth hipline is shirred at right side with each end attached under closing at left side. Style No. 389 chooses sheer woolen with faille crepe vestee. Printed sheer velvet, crepe satin, matelasse, flat silk crepe and wool crepe are suitable fabrics that can be worn for shopping or afternoon. For the 36-inch size 5¼ yards of 40-inch material with ¼ yard of 35-inch contrasting is sufficient to copy it easily. Pattern designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. Price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully

Canada's Copper Production

Government Report Indicates Large Increase In This Commodity

Within five years Canada will produce approximately 200,000 tons of metallic copper annually, or enough to meet the present consumption of the Dominion's industries utilizing this metal, according to present indications and calculations of experts of the Mines Branch of the Department of the Interior, upon a basis of minimum production of newly-developed mines in the Dominion.

Under existing conditions the bulk of the copper thus produced would be refined in the United States and brought back to Canada. This would be the case, at least, until the establishment of a smelter at some suitable point where it could refine the production of Canada's eastern mines and the re-opening of the huge smelter at Trail, B.C., which has been closed since the tailing off of its supply of copper ore from the Consolidated holdings at Copper Mountain, now shipping to Tacoma, Wash., for smelting purposes.

Believe Grassland Route Most Logical

Only solution To Problem Of Trans-Atlantic Airplane Travel Says Sir Hugh Allen

Prof. W. C. Hobbs, of the University of Michigan, who is laying tentative plans for a fourth expedition into Greenland, believes that the only satisfactory solution to the problem of trans-Atlantic airplane travel lies in the Greenland-Iceland route.

"More safety is the primary factor in stepping out a regular air route the northern route across Greenland and Iceland is the only one which offers a solution to the problem," Prof. Hobbs says.

"Weather conditions and winds in the far north are much more favorable than those encountered along the traditional ship lanes to Europe and the water jumps much shorter and less perilous.

Use of Reindeer

"Supplementary to the airplane service I would establish a route by reindeer sled, using the Eskimo as guides. The reindeer is the only animal that can live and thrive on the scanty vegetation of the frozen north. Its flesh is delicious and nutritious, and its skin makes the warmest clothing known. Reindeer sleds could be used to carry mail and supplies to the Eskimo villages, and the natives could be employed as guides and drivers.

Diet of Reindeer

"The reindeer feeds on the moss that grows on the rocks and on the lichens that grow on the ground. Its hoofs are broad and flat, enabling it to travel over the snow without sinking in. Its nose is so constructed that it can scrape away the snow to get at the moss underneath. Its antlers are used for the same purpose.

Food Supply

"The reindeer could be used as a food supply for the natives and explorers

Another British Stronghold

Harbor At Malta One Of World's Greatest Naval Stations

The island and harbor at Malta, under British management has been converted into one of the greatest naval and cooling stations in the world. In strength and impregnability it is said to now rival the famous rock of Gibraltar.

The old fortifications were useless against attack of modern aircraft, and the British have completely altered the naval batteries and land defences of the islands. Today they are among the most formidable in the world.

A large military and civil airdrome has been constructed at Hal Far making another link in Britain's world-wide system of air communication. A floating dry dock, capable of accommodating the largest vessels in the world, as well as new refitting yards, large magazines and many other improvements have been completed.

Malta is the headquarters of the British Mediterranean fleet, probably the most powerful flotilla of warships afloat and is also one of the most important ports of call in the world. It lies midway between Gibraltar and Port Said. Although in area Malta is three times the size of Manhattan Island it has only one-tenth the population of the Borough of Manhattan. The last census showed less than 225,000 inhabitants.

ENDURANCE

WRIGLEYS after every meal

SUNDAY SCHOOL LESSON

FEBRUARY 21

CHRISTIAN GROWTH

Golden Text: "But grow in the grace and knowledge of our Lord and Saviour Jesus Christ." 2 Peter 3. 18a.

Lesson: John 1.40-42; Matthew 14. 25-18; John 21. 15-19; Luke 2.40, 52; Ephesians 4.11-16; Philippians 1.9, 9-11; 3.12-16; Colossians 1.9-11; Hebrews 6.1-3.

Devotional Reading: John 15.1-8.

Explanations and Comments

Becoming a Follower Of Jesus, John 1.40-42. After a day in the company of Jesus (read verses 35-39), Andrew sought his brother and told him that he and John had found the Messiah. Messiah (Hebrew) and Christ (Greek) mean "The Anointed One." Hebrew kings were anointed with oil when given their office, and the Spiritual King was thought of as The Anointed, The Chosen One of God, until The Anointed, the Christ, became the name by which he was designated. Then Andrew brought Peter to Jesus.

The nearer another is to us, the greater our responsibility for him. Our own brothers and sisters know us better than do those outside the family circle; they know our faults and failings, and therefore we shrink from talking to them about our spiritual experiences. It may require courage to do this, but our Christianity is shallow if we cannot do it.

As He looked upon Andrew's brother Jesus said, Thou art Simon the son of John, thou shalt be called Cephas. Cephas, the Aramic name, and Petros, Peter, the Greek name, mean "a stone," a detached piece of rock. Jesus knew Peter was too impulsive to be reliable; but he also knew that he would become the rock on which he would one day build His church (Matthew 16.13-19). "In a gallery in Europe there hang side by side Rembrandt's first picture, a simple sketch, imperfect and faulty, and his great masterpiece which all men admire. And so in the two names, Simon and Peter, we have first a rude fisherman, the man as he was before Jesus began his work on him, ..."

CHAPTER XIV.—Continued.

Hand stripped to the waist. Connie's eyes rested on the mighty frame of this huge blond, the bunched and rippling muscles, the great chest covered with a mat of thick hair and the enormous limbs. Her glance then turned and roved to the man who was to fight for her honor. Donald's eyes were like burning coals. His face had regained its color, but was contorted with a passion that made him seem unnatural. Yet he appeared a mere stripling in comparison to his burly antagonist.

For a moment Connie became a primitive woman. She felt as though she could rend and tear. Her eyes darted blue lightings of wrath toward the man who had insulted her, and her small hands clinched in impotent fury. Her nails cut into her palms as she exercised every ounce of self-control to keep from screaming aloud. Donald was fighting for her. She caught her breath in a quick tab. Her heart was beating with alternate throbs of joy and fear. A sudden fit of trembling seized her, and her head felt light and giddy.

...his feet. Whirling quickly as the foreigner came toward him, he sent in a volley of blows to his opponent's face. Hand staggered, but did not fall. His lips were cut and bleeding; his nose was broken; and he spat out several broken teeth. Any one of the blows landed was sufficient to send an ordinary man down for the count, but still the gargantuan giant came on.

In and out Donald flashed, his arms moving like steel pistons. Hand could not keep away from the punishing left hand of his lighter opponent. Men not trained in the science of boxing have no punishing power in their left hand, but depend solely on their right. Such was the case with Hand. His style did not vary for a moment. With head lowered between his powerful shoulders he would bore in, swinging wildly in the hope of landing a lucky punch, or striving to get a hold on his adversary. Donald's hand kept beating a tattoo on his rock-like jaw, but still Hand came forward, slowly and relentlessly as a steam-roller.

Crowding Donald back to the line of tense spectators, Hand rushed him into the scattering crowd and seized him in a rib-cracking embrace. Donald broke the hold, but not before the brute had butted him over the eye. With the blow Donald's senses reeled and the blood gushed from a wide gash on his brow. A blow from the foreigner's big fist ... caught him over the heart and ... him staggering to his knees. With a curse the big man came after him.

Andy shouted hysterical words of advice.

Teeth and Health

Issued by The Canadian Dental Hygiene Council and Published by The Saskatchewan Dental Society

GINGIVITIS

Meaning what?

It is—a suffix, implying inflammation and gingiva—the soft tissue immediately encircling the tooth.

This, then, is an inflammatory condition of the gum tissue, adjoining the teeth.

Consult your mirror. Notice how snugly these tissues hug the tooth surfaces in health, filling the interstices and guarding the supporting structures from injury and disease.

Now you will have observed that the gingivae are not attached to the tooth surfaces for a short distance down and hence, are "free", also, that their color in health is a lustrous pink.

But the inflammation appearing you have a rush of blood within and soreness develops, so that you readily perceive that they are far from the state of health.

Now what might cause this?

It may be that some body disturbance is accountable. General ill-health, diseases of organs or glands concerned in body welfare such as diabetes, or run down nervous system may lead to this disorder.

Among the more positive causes, filth and tartar no doubt play a part, the wedging of food between teeth with faulty contacts, and disease producing organisms are all held responsible.

If, for any reason, there is a slight opening between two teeth, food which is tough and stringy will be crowded into the space and cause pressure upon the underlying tissue. A single such occurance may do but little harm provided the food is promptly removed, but where there is this repeated pressure and irritation the tissue is inflamed much of the time. Similarly the crowding of "tartar" upon these tissues or repeated injuries from whatever source will set up this process.

Sun Is Ordinary Star In Scale Of Brilliancy, Says Astronomer

The sun is a very humble unit amid the great stellar population according to A. S. Eddington, the astronomer. It is, he says, a very ordinary star about midway in the scale of brilliancy.

... this apparently favored position is discounted by the fact that the star cloud itself is placed very eccentrically in relation to the galactic system (the Milky Way), being in fact near the confines of it. We cannot claim to be at the hub of the universe.

Little Helps For This Week

Simple Precautions Against FLU

Sore Throat — — The Danger Signal

Health Authorities Point Out The Necessity Of Treating The Simple Cold At Its Beginning

Nearly every case of "Flu" starts with a simple cold. At first the throat is sore—often just a little hoarse—soon the infection goes lower—then the chest is affected. A safe plan is to gargle the throat three times daily with "Nerviline"—this will keep the throat free from germs. If there is any sign of tightness in the chest, rub on Nerviline—every drop will penetrate deeply—congestion will be relieved, the cold will break up quickly. Many a dangerous case of "Flu" can be avoided by this simple precaution.

Of course it is always wise to take some relaxing medicine, and for this purpose immediate results will be secured from Dr. Hamilton's Pills—they purge the system of impurities and carry off a lot of disease-breeding waste.

This combination treatment of Nerviline and Dr. Hamilton's Pills is very effective for Grippe, Influenza, Bad Colds, etc., and can be relied upon to give very satisfactory results.

THE NEW CHEVROLET

Motorist and would-be motorists are flocking to the showroom of Mclaughlin Hardware Co., Ltd., at this year, has signed a wheel pool Tofield, to see the first of the new contract six-cylinder cars. Ever since the new model went on display several visitors have commented favorably on its remarkable performance, which is so exemplified by those cars in the possession of the four.

Mr. McLaughlin, of the local dealership, expressed himself enthusiastic over the great interest being shown in the new car, stating that he made an investment of more than $100,000 in the change from [illegible] to the new Chevrolet, and that the investment would be justified in the public's appreciation of the greater value they are enabled to secure. The one wheel to many or not Pool members can direct their [illegible] in our showrooms in the heart of [illegible] years. For purchasing [illegible]

It was pointed out that to change [illegible] member had relinquished their right [illegible] when he signed a Pool contract. M. [illegible] Mr. Porter, Alberta Pool solicitor [illegible] maintained that the Pool farmer had [illegible] himself of this right [illegible] under the Canada Grain Act. [illegible]

Mr. McLaughlin, "but [illegible] has been described as [illegible] the industrial transformation [illegible] accomplished. We are [illegible] Pool supplies at [illegible] result of the acceptance [illegible] on the night of Friday, January 25th [illegible] of the new car.

WHEAT POOL NEWS BULLETIN

T. Cleveland of Dalmeyer, who [illegible] the advancement of round over 30,000 bushels of wheat [illegible] has signed a wheet pool [illegible] for the first of the new [illegible] six-cylinder cars. Ever since the new [illegible]

When the two cents per bushel [illegible] payment came into effect [illegible] on January 10th, the receipts at [illegible] these sites in the Alberta Pool elevators showed double [illegible] for a considerable period, [illegible] records a big wave received for same [illegible] Several of meetings have been held [illegible] by Alberta Wheat Pool field service [illegible] men throughout the Province. Every [illegible] phase of the Pool movement is open [illegible] for discussion at these meetings.

Great interest was taken in the [illegible] held by the Grain Commissioners, on the question as to whether [illegible] or not Pool members can direct their [illegible] through line elevators to Pool [illegible] terminals. A. A. McGillivray, solicitor [illegible] for the grain dealers, held the Pool [illegible] member had relinquished this right [illegible] when he signed a Pool contract. M. [illegible] Mr. Porter, Alberta Pool solicitor [illegible] maintained that the Pool farmer had [illegible] himself of this right [illegible] under the Canada Grain Act.

F. B. Ramsay, manager of the Canadian Wheat Pool, was in Calgary [illegible] on the industrial transformation [illegible] accomplished. We are [illegible] Pool supplies at [illegible] result of the acceptance [illegible] on the night of Friday, January 25th [illegible] of the new car.

Numerous favorable comments on [illegible] "The Shepherd of the Hills", the [illegible] presented by local talent in the show rooms, and with the Junior C. G. I. T. was much [illegible] We have had a demonstration [illegible] enjoyed by those attending. It was [illegible] for the convenience of the [illegible] good picture and entertainment [illegible] though the house was comfortable [illegible] the seats were just a dollar or [illegible] behind. This was made up by [illegible] Manager and an even [illegible] break was made.

UNUSUAL STUNT OF SEA IN FILM

"A Girl in Every Port." The same bill should be enough to explain the unusual turn about the first name of a young sailorette. The title of the new will be seen at the Variety Theatre on Saturday night. "A Girl in Every Port," is one of the most unique and, at the same time, one of the most thrilling pictures of the year now screened. Victor McLaglen, the Captain Flagg of "What Price Glory," is featured as "Spike Madden," the mate. Supporting him are Robert Armstrong, the popular in the stage play of "In Zat Se" and eight of the most popular, beautiful and talented of the present motion picture actresses who are featured players.

The story deals with the romantic adventures of a lusty first mate in the various ports of the world which his ship touches. It takes the audience through the tainted streets and the queer cafes haunted by the sailor, when they go ashore in ports of call. In each port there is a girl who, of course is carefully noted in "Spike Madden's" log.

Howard Hawks, who has several original and unique productions to his credit, directed the production for Fox Films.

DOMINAH

Mrs. Hardie of Lamont is visiting her daughter, Mrs. P. Dalkowsky for a couple of weeks.

Mr. E. Olsen has been taking treatments at the Lamont hospital for the last two weeks.

Mrs. Friesen and children of New Norway visited with Mr. and Mrs. A. Lang for a few days.

Mr. and Mrs. C. B. Shubert visited with their daughter, Sister Shubert of Camrose on Saturday.

Mr. and Mrs. W. Jardie and Mr. and Mrs. W. Maslinich visited with Mr. and Mrs. E. Erickson on Sunday.

TRACTOR SCHOOLS

INTRODUCTION

A tractor school held by the Hart-Parr Tractor Company by arrangement with F. G. Bell, was held at the Variety Theatre Wednesday. There was a good attendance and much interest shown.

LOCAL HOCK WINS T. EATON TROPHY AT EDMONTON BONSPIEL

The rink, skipped by Mr. G. McLaughlin, was the T. Eaton trophy at the Edmonton bonspiel last week. The trophy, which is an elegant cup can be seen at the McLaughlin Hardware Store. In addition to the cup handsome prizes were awarded.

The following is the personnel of the rink. Messrs. Calvert, Shiels, J. Lee, Geo. McLaughlin (skip). The rink also won third prize in the visitors competition.

(Continued from inside page.)

Mr. Ed. Lee, of Tofield, with the Commercial Airways machine made Westlock in thirty more than 20 minutes. A landing was made on the edge of the town and Dr. Crawford got into the Lockheed-Vega. Again "Wop" took the air. He landed in a field, 200 yards from the Bellhouse.

—Edmonton Journal.

The Devil Takes The Hindmost

The man who waits until the last minute for anything is always at a disadvantage. To that man there always comes a time when he wishes he had been more prompt. This applies particularly to the man in business that requires work done on it to make it road worthy for Spring driving. Now is the best time to have this work done, before the spring rush commences. We can now promise absolutely prompt service, expert workmanship, and moderate charges This time by the fireball and be one of the early birds.

Third event: first, J. G. Johb; second, Dr. F. F. Law; third, S. Yake bouski; fourth, C. Hobson.

A BIRTHDAY PARTY

On Thursday evening the 21st a birthday party of about 15 friends gathered at at the white drive held in Tofield last. The home of Mr. and Mrs. Thos. J. Coombs. The two consolation prizes were brought home to the district by Mrs. Coombs.

A wonderful turkey with all the trimmings and many other good things was set before the hungry guests. After supper R. W. Pruett presented a gift to Mr. Coombes, and addressed to them the sentiments of deep respect in which they were held by all their many friends, wish ing them both a long and happy life. The party then retided down for the evening, some playing cards, while others indulged in both the light and heavy steps to the strains of a beautiful orchophone.

At one time the party was thrown into consternation by the entrance of a hold-up man who however, was complimented with by being given refreshment.

Mr. and Mrs. Sellel caused upset less hilarity after slipping quietly out and return in most unusual costume.

The enormous turkey successfully resisted the strenuous efforts of the guests to dispose of it, the bird being tenderly attached several times by Walter Bellamy, and during last seen he was putting the bones in his pocket.

To top the climax a beautiful cake with 60 candles entered, and shortly afterwards the party broke up in the early hours of the day after.

PARK'S COMEDY WELL RECEIVED

The farce comedy "When South Stepped Out," presented by the Ryley Dramatic Club at the Variety Theatre, Tofield, on Tuesday night last, was well received and the evening can be rightfully termed a complete success.

The players from Ryley mostly endorsed over and deserve much credit for their persistent efforts to get here. They were stalled by snow drifts time and time again and only arrived just in time to get into the play.

The attendance was good, considering the fact that cars are not running very good. Additional chairs had to be procured and the house was then came out on the right side of the ledger on the undertaking.

The play was exceptionally well carried out all artistes did their work splendidly. Mr. Campbell as Judy Bill," had the leading part and acted it to perfection. Mr. Goodall as Mr. Smith was also an outstanding performance and played the part well. Miss B. Sterling as Miss Smith, Mrs. H. Nye as Mrs. Bill and Miss B. Lyel as the French maid presented their parts splendidly. Clifford Lee as Bob Stanley made a good lover, and Mr. P. Lager as the detective Keene, was realistic enough, even for Chicago.

The Ryley orchestra, though bad-

THE FIRST ROBIN

That perps his cheery song of spring flowers and pleasant reads at you from fence corner or tree top will make you wonder if the old sun is all O. K. for a ride through the country.

We've been playing "robin" all winter and quite a number have brought their cars in to be tuned up for Spring.

Have you? Don't wait until spring is here and then expect to get it done in a hurry. There are too many folk who do that, and a real rush is the result.

DO IT NOW. You'll be glad you did when the first robin greets you.

"Drive in and see for Yourself"

P. M. MAUGEN — PROP.

KETCHAMOOT

A Ketchamoot was well represented at the white drive held in Tofield last week. The home of Mr. and Mrs. Thos. J. Coombs, by invitation, it being Mr. Coombs birthday.

We are sorry to hear that Mrs. Geo. Francis is a patient in the Lamont hospital.

Mr. and Mrs. Frank Sloupe entertained a large crowd of friends to a whist drive at their home on Friday night.

Mr and Mrs. S. Widman entertained a few friends to a card party on Thursday evening.

Mr. A. J. Widman was able to return home from the hospital Friday.

A pleasant evening was spent at the Shiloh home on Friday evening of last week. In spite of the worst day of the winter, many turned out to the basket social given by the ladies of the M.A.S. Many pretty baskets were brought and auctioned off. At the close of the evening, radio entertainment was enjoyed during the party part also games and a short program. Miss Carlisle was on hand with the second edition of the Ketchamoot "Toll it all." A social time was spent during the refreshment hour and the evening added $25.00 to the church funds.

AMBIC CREEK

Mrs. E. A. Moon returned from Edmonton on Wednesday, where she had been visiting Mr. Moon who is in the hospital there. Mr. Moon underwent an operation last week and is now getting along as well as can be expected.

Lars Overgard who has been working for P. O. Moline for some time was compelled to undergo an operation for appendicitis at the Royal Alexander hospital. He is getting along nicely and expects to be well and ready for spring work.

Miss Chris Asmebo, who has been working at the Old People's home in Bawlf every last summer, returned home last week.

Mr. and Mrs. A. Patterson held a social evening for the young people last Saturday night. Quite a crowd gathered and everybody had a good time. A beautiful lunch was served at midnight and everyone went home happy.

Some Gospel meetings are being held in the school house every other evening for the past week, and in the afternoon on Sunday. We understand they are to continue this week.

Mr. A. Fitchon visited the city last Friday, returning on Saturday morning

John Wilson returned last week from Buffalo Lake where he has been during this winter

Mr. and Mrs. Paurson and daughter, Emelie, visited at the Asmo home last Sunday.

Mrs. P. O. Fhuten and Gunvald visited at the I. H. Olsen home last Sunday.

Mr. M. Anderson, the oldest son of W. Anderson, arrived from the States about a week ago. He is now assisting at Patterson's with grain hauling.

Mrs. Welch of Sheets is at the Royal Alexander hospital with heart trouble.

TOFIELD LOSES TO EDMONTON ACMES

On Saturday night Tofield hockey team journeyed to Edmonton to play a game of hockey with the Edmonton Acmes. The result was a win for Edmonton, the score being 7—4. Both teams started at a fast clip and Edmonton soon scored from a shot outside the defence. Edmonton followed this up with two more both being long shots, while all Tofield could get was a goose egg. Play was very rough, both teams resorting to stiff body checking. The first period ended with Edmonton three, Tofield 0. The second 4—1 for Edmonton and the third 7—4 for Edmonton. Ted Parslo refereed the game.

Tofield depleted by sickness, made good and received hearty applause from the audience

Here and There

Feb. 25th
In 1921 the Canadian Parliament paid $2,000 000 from freight receipts on loss and damage claims. In 1928 it paid $700 000 — a saving of $1,300 000 although a 10 per cent increase in the gross freight revenue had increased by 21½ per cent. Better freight handling did it.

The monument and most of the carving of the Royal Vault Mausoleum at Frogmore, Windsor, and there appears no reason why it will not be a great building for a long time to come, travelling public by June 1. The tomb is the largest and finest in the British Empire.

Some idea of the world wide area over which the Canadian Pacific operates may be gathered from the fact that in making out its monthly report it is necessary to have 15 wire different foreign currencies in dollars in order to get an accurate result in Canadian money.

Wireless is now being used to aid in the production of forests against fire The Ontario Provincial Air Service planes are equipped with the latest apparatus with a radius of 400 miles, so that the headquarters may be readily communicated with and immediate steps taken upon the discovery of an outbreak.

LAKESHORE

Mrs. Firth and daughters Gwenn and Patsy visited Mr. and Mrs. T. E. Murray over Saturday and Sunday.

Mr. and Mrs. T. E. Seale spent Friday evening at bridge with Mr. Dorothy Walker and George Abercrotby at the home of Mrs. Walker

Mr. S. Bethel returned home on Thursday last from Lamont where he has been in the hospital for the past six or seven weeks.

Mr. and Mrs. T. A. Jones were Sunday visitors at the Lester Noland home.

A very enjoyable whist drive was held at the home of Mr. and Mrs. J. H. Johnston on Thursday, February 14th. Five tables were played Miss Pearl Grey was successful in winning ladies first prize and her sister Edna got the consolation. Mr Calin Lester won gent's first prize and his brother Bob won the consolation. A dainty lunch was served at midnight after which the Lester boys entertained with music

Mr. and Mrs. T. E. Murray and their house guests were callers at the Sherbeck home on Sunday afternoon.

Miss M. Wood spent a day or two last week visiting at the Abercrotby and Walker homes.

Mr. and Mrs. R. C. Phillips spent Friday evening visiting Mr. and Mrs. Lester Noland

Owing to the illness of Dr. Law, the vaccination of the school children which was to have been done last Thursday had to be postponed indefinitely.

KINGMAN

H. Lorenbin of Winnipeg, has been visiting with Mr. and Mrs. P. Rodensky for a few days.

E. Johnson returned to Grande Prairie after spending the last three months with his parents, Mr and Mrs. A. Johnson.

A. Bartunec and P. Rodenesky were business visitors in Edmonton on Wednesday

Edwin Jones returned on Tuesday from the Lamont hospital where he has been a patient for two weeks.

T. W. Widsman shipped a carload of cattle on Tuesday.

Oscar Thompson and son Oliver, Mrs. Ed. Thompson and Ida visited in Edmonton a couple of days last week.

Josie Thompson is spending the week end in Camrose

Mr. and Mrs. W. Jardie and Mrs. E. Erickson visited with Mr. and Mrs. O. Bray of Camrose on Saturday

Mrs. Chas. Lindberg visited with Mr. and Mrs. R. McIvih on Sunday

Mr. and Mrs. W. Simonson and Mr and Mrs. C. R. Bychert visited with Mr. and Mrs. A. Burrows on Sunday

John L. Standfor is a patient at the St. Mary's Hospital

Miss Ray Reeden and H. Sorrenin are visiting in Edmonton for a few days.

Power and Its Dangers

[illegible] ages man has striven for power, and yet more [illegible] story of creation we learn that man was given power and dominion over the beasts of the field, and thus early in his career [illegible] power over all the forces of nature. From that time [illegible] with ever increasing eagerness and energy man has [illegible] for power.

[illegible] Alexander the Great that, having conquered the then [illegible] for more worlds to conquer. Egypt under the [illegible] the Caesars, Carthage, Greece, all the great empires [illegible] past strove for power and, having attained it were ultimately [illegible]. The same was true of Napoleon, and in the lifetime of [illegible] has again been proven in the case of the ex-[illegible].

[illegible] the history of Britain during the last one thousand [illegible]. The British Empire is today the most powerful [illegible] in the world. It has gone on from strength to strength and [illegible] the autocratic use of its power but, by a [illegible] voluntarily relinquishing powers which it en-[illegible] and colonies raising their status conferring [illegible] them on terms of equality with itself. [illegible] Britain's history was when it did not pursue [illegible] to impose its will upon the thirteen American [illegible] of gaining or retaining power it lost it. [illegible] forgotten by British statesmen.

[illegible] increase but exercised unwisely and auto-[illegible]. This is just as true in the case of indi-[illegible] as it is in the case of rulers, govern-[illegible]. It is especially true of monopolies of all kinds, and [illegible] and do make use of their power unfairly and [illegible] has developed such a large body of public opinion favor-[illegible] ownership and operation of all services which [illegible] monopolistic as, for example, railways, tele-[illegible] electric [illegible].

[illegible] Western Canada the C.P.R. enjoyed a monopoly [illegible] rather autocratic, perhaps in those days it had to [illegible] was wise and far-seeing, and, in later years, using [illegible]

[illegible] power to be [illegible] managed in their own interests.

[illegible] corporations and associations generally, [illegible] memberships and the accumulation of great [illegible] such power, as already stated, wisely employed, [illegible] greater power and influence. But here too, [illegible] of danger. There may arise a demand by some to use [illegible] and in other ways than was originally intend-[illegible] to exercise that power in other fields. To do so is to invite [illegible] history proves, the masses of the people will not [illegible] in such exercise of power, the power itself will be lost.

Rights Of Grain Growers

Courts May Determine Matter Of Designating Grain Terminals

[illegible] refer to the courts in order [illegible]

[illegible] structions issued to the board of grain commissioners by Hon. J[illegible] Malcolm, minister of trade and commerce. The minister endorsed the suggestion of the board that such [illegible] and that the [illegible] incurred be borne by the board. In this way it is hoped to [illegible] the difficulties that have [illegible] situated with regard to the [illegible] relations entered into by [illegible]:

(a) The farmers and their [illegible] pools, and

(b) The pools and the grain trade.

Pending the outcome of this it is not expected that any action will be taken by the government along the lines of abolishing the board of grain commissioners, as suggested in various resolutions passed by a number of farmer organizations.

It is estimated that a person at the height of 5,000 feet can see approximately 90 miles on a clear day.

A Health Saving Reminder

Don't Wait until you get the Influenza

USE

Minard's Liniment

At the first sign of it. Its Healing Qualities are Amazing. THE OLD RELIABLE.

No Time For Train Travel

Lindbergh Finds Airplane Best Way To Get Around

When Col. Lindbergh set out in the first week in February in a flight to inaugurate the air mail service between Florida and the Canal Zone, he was asked how long it had been since he had travelled in a railroad train.

"More than a year and a half—before I flew to Paris," he replied.

Since he learned to fly, Col. Lindberg, up to the time of the Florida-Panama flight, had covered 270,000 miles in flight. This distance is equal to about eleven times the circumference of the earth. The time he had spent in the air totaled 3,000 hours or about four months off the ground. In 1928 he was 800 hours in the air, or more than thirty-three days. In this time his flights totaled 65,000 miles.

"I wouldn't have time to go so many places if I didn't fly," he said.

Toes Made Comfortable
Sore Corns Removed

Quick, safe relief is almost instantaneous if you apply PUTNAM'S CORN EXTRACTOR. Shoes won't pinch or hurt. One single drop of Putnam's stops the pain. A few applications make the corn dry up and drop off. Putnam's Corn Extractor gives satisfaction. Thousands use it every day. Get a bottle from your druggist. Refuse a substitute for "Putnam's," the one sure relief for sore corns.

Effective Talk

If we had talked of preparing for peace in time of peace as long as we have of preparing for war in time of peace, the nations of the world would not be laboring, as they now are, under the burden of billions in taxes every year for armament.

AFTER EFFECTS OF DREADED INFLUENZA

Overcome By the Use Of Dr. Williams' Pink Pills

Throughout Canada influenza prostrates thousands of busy men and women every winter, wrecking their health and leaving behind numerous serious ailments. It is the after effects of influenza that cause such widespread misery. Here is the reason. Influenza impoverishes the blood; shatters the nervous system and renders its victims liable to rheumatism, indigestion, neuralgia and other nervous disorders. You can avoid the influenza by keeping the blood rich and pure with Dr. Williams' Pink Pills, or if because you have not recognized your blood weakness the trouble fastens its fangs upon you, its disastrous after effects can be driven out by the same remedy. Dr. Williams' Pink Pills increase and enrich the blood, feed the starving nerves and thus impart new health and strength to enfeebled men and women.

Here is proof of the power of Dr. Williams' Pink Pills to banish these disastrous after-effects of influenza. Mrs. W. J. Radford, R.R. 5, Belleville, Ont., writes:—"I can recommend Dr. Williams' Pink Pills because they put me on the road to health after other medicines had failed. I was in a bad condition [illegible] an attack of influenza and my friends thought that I would never get well. I tried remedy after remedy without relief till my mother begged me to try Dr. Williams' Pink Pills and got me a supply. I began using them and before they were all gone I could see they were helping me so my husband bought a further supply. I continued taking them for some time and they fully restored my health. Naturally I am always ready to recommend them to other sufferers and I never lose an opportunity to do so."

You can get these health-renewing pills through any dealer in medicine or by mail, post paid, at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Wife: Henry, I'm going to give this blind man a penny. He said, "Spare a copper, pretty lady."

Henry. Go on, then! He's blind all right.

HELPED DURING MIDDLE AGE

Woman Praises Lydia E. Pinkham's Vegetable Compound

Sarnia, Ont. "I am willing to answer letters from other women, to tell them the wonderful good Lydia E. Pinkham's Vegetable Compound did me. I cannot be thankful enough for the benefits I received during the Change of Life. I do housework and my troubles made me unfit to work. A friend advised me to try the Vegetable Compound. I felt great relief at once, began to regain my appetite, and my nerves got better. I will recommend your medicine to all with troubles like I had." Mrs. Jenny Bagnoni, 162 N. Christina St., Sarnia, Ontario.

Anchored In the Air

Chicago Aviator Kept Plane Motionless For An Hour

It is not unusual for a dirigible to hover over a spot for considerable time. But an aviator at the municipal airport at Chicago, recently kept a plane in the air virtually motionless for an hour. There was a 60-mile gale blowing. The aviator headed into it. He throttled his motor in such a way that the pull of the plane going forward just balanced the pressure of the wind driving it backward. The result was precisely no progress in either direction.

The experiment was interesting but it probably solves no problems, since a stiff wind is not always available for hovering purposes. Some day, however, there will doubtless be developed a device which will enable planes to stay in the air while virtually motionless. That will mean a long step toward safety.

Dread Of Asthma makes countless thousands miserable. Night after night the attacks return and even when brief respite is given the mind is still in torment from continual anticipation. Dr. J. D. Kellogg's Asthma Remedy changes all this. Relief comes, and at once, while future attacks are warded off, leaving the afflicted one in a state of peace and happiness he once believed he could never enjoy. Inexpensive and sold almost everywhere.

Recipes For This Week

(By Betty Barclay)

DATE GEMS

- 1 cup flour.
- 5 teaspoons baking powder.
- ½ teaspoon salt.
- 1 cup graham flour.
- 1 cup chopped dates.
- 1⅓ cups milk.
- 2 tablespoons melted butter or other fat.

Sift flour, baking powder and salt together. Add graham flour and dates and mix thoroughly. Add milk and butter slowly, stirring constantly. Pour into greased muffin pans and bake in moderate oven 25 to 30 minutes. This makes 12 muffins.

LAMB STEW BOKARA

- 2 pounds lamb breast.
- 1 tablespoon butter.
- 2 cups canned peas or diced celery.
- 2 cups finely diced carrots.
- 4 medium onions, chopped fine.
- 2 cups cooked rice.
- 1 tablespoon minced green pepper.
- 1 cup nectars raisins.
- Soup stock.
- Salt and pepper.

Cut lamb in small pieces, remove fell (pink membrane), and simmer in slightly salted water until tender. Place with other ingredients in baking dish, add soup stock to cover, and salt and pepper to taste. Cover and bake slowly until vegetables are tender. Stir frequently and add more soup stock as needed. Serve very hot.

A Seasonal Occupation

Lady: "What is your trade?"

Beggar: "I'm a picker, ma'am."

Lady: "A picker? Tell me, what do you pick?"

Beggar: "Well, ma'am, it goes according to the seasons. I pick strawberries in July; in August I pick hops; in September I pick pockets, and the remainder of the year I pick oakum!"

What He Must Know

A young farmer can get along very well without a knowledge of Latin or Greek, but to succeed he must know something of soils, of pests, or fungous diseases and a dozen other subjects that confront him every day. Education is necessary, but not the kind that education speaks of as disciplinary; hard knocks and adversity will accomplish that.

If one be troubled with corns, he will find in Holloway's Corn Remover an application that will entirely relieve suffering.

A race of people in India believe that all elephants have two trunks, three eyes and ten legs in the land to which elephants go after death.

Minard's Liniment for the Grippe and Flu.

Harnessing the Churchill

Most Northerly Hydro Development On Large Scale In Canada

There is more than a touch of romance in connection with the announcement that early next month the first electric power will have been developed and will be available for use on the Churchill River. The Hudson Bay Mining and Smelting Company has an initial development of 2,000 horse-power almost completed to be used in connection with the work of bringing in the larger development of 40,000 horse-power which is required for the operation of the mine and smelter at Flin Flon.

There is little doubt but that this is the most northerly hydro development in Canada, at least in a major way. Island Falls, where the Churchill is being harnessed, is 450 miles north of Winnipeg. A few years ago anyone who suggested that by 1929 the waters of the Churchill would be producing electrical energy would have been looked upon as a visionary dreamer. That it has already come to pass is another proof of the striking rapidity with which the north country is being opened up. The dark waters of the Churchill, suggestive of fur traders, canoe brigades, trappers, and the magic mystery of the north, are being turned to the prosaic task of making wheels go around.—Manitoba Free Press.

World's New Weather Bureau

Stations In Antarctic Planned By Sir George Hubert Wilkins

Twelve meteorological stations in the Antarctic regions are planned by Sir George Hubert Wilkins, explorer, to supply weather forecasts for all the world.

Wilkins announced the meteorological stations when he stopped at Talcahuano, Chile, en route to New York after three months in the Antarctic.

The first station will be established at Deception Island when he returns there next November, Wilkins said.

While in the Antarctic zone Wilkins said he discovered a tract of land which is not a peninsula of the supposed Antarctic continent but a series of islands. Wilkins said he also discovered 1,000 miles of coast in the district west of the Weddel sea and was able to correct many geographical errors.

Air Force Extends North

Royal Canadian Air Force To Build a Station At Pelican

The Royal Canadian air force is to build a station at Pelican to form another link in the communication lines used in the north to co-ordinate the operation of forestry patrol planes and machines used in photographic surveys.

The air force already has stations at Cormorant Lake and Norway House, and are building three more this winter. One is at Berens River, on the east side of Lake Winnipeg; one is at Lac La Ronge, north of Prince Albert, and the third is at Pelican Narrows. Ten tons of materials are being sent into Pelican for construction of the station.

AFTER ALL There's Nothing To Equal Zam-Buk FOR THE SKIN!

Fine Cough Remedy

Druggists' Will Observe Buckley's Cough Mixture Week

The week of February 25th to March 6th, is being observed by the retail druggists of Canada as "Buckley's Cough Mixture Week."

This week has been arranged by the Retail Merchants' Association of Canada and the Provincial Boards of the Retail Merchants' Association, in co-operation with Messrs. W. K. Buckley, Limited, the manufacturers. This product has been on the market for many years and because of its rapidly increasing favor with Canadians during the last few years, "The Week" is being featured this season to focus additional attention on this fine cough remedy.

A Prime Dressing For Wounds.—In some factories and workshops carbolic acid is kept for use in cauterizing wounds and cuts sustained by the workmen. Far better to keep on hand a bottle of Dr. Thomas' Eclectric Oil. It is just as quick in action and does not scar the skin or burn the flesh.

Alberta Potato Growers

A New Market Is Opening Up In the Southern States

Southern Alberta potato growers have a new market opening up in the southern states, according to M. L. Freng, district agriculturist, who pointed out that while Montana was quite a source of supply in this direction, the south was beginning to look to Alberta for first class certified potatoes. An organization has been formed in Edmonton to foster this trade with the aid and approval of the Provincial Government.

Use Minard's Liniment for the Flu.

A "Tramp" Aeroplane

A "tramp" aeroplane has successfully undergone its trial flights in England. Having a spacious cabin resembling a railway luggage van, the huge machine can be used as a freight carrier, for the transport of troops, or as a long-distance bomber.

RICKETS

Children with weak bones or poor dentition receive great benefit from the use of

Scott's Emulsion

It is wonderfully pure, vitamin-rich cod-liver oil and helps build a strong, healthful body, sound bones and teeth.

BRITISH PLAN TO BRING SETTLERS TO PEACE RIVER

Toronto.—The Toronto Star publishes the following special dispatch from Ottawa:

A statement published in the London Daily News to the effect that the British Government is training miners to cultivate a seventy million acre tract in the Peace River country lifts the veil from one of the most ambitious colonization and development programs yet visualized for Canada.

Officially the Canadian government has no direct responsibility for the scheme. For the past three years or more financial interests of international prominence have been dealing with details of a project which embodies not only agricultural development of more than 70,000,000 acres in northern Alberta and the northwest territory immediately to the north of the Peace River, but takes into account exploitation of natural resources, oil, minerals, timber, water and power, etc., on a scale unprecedented.

It was known that the general colonization plan had been placed before the governments of several countries, but the declaration that the British Government has actually started prospective settlers upon a course to prepare them for coming to the area suggests that the general proposition has advanced further than was believed. Britain and Scandinavia are the sources from which it is hoped to derive the major settlement.

The general plan includes railways, highways and the extension of Alberta boundaries to bring in the territory for some 160 miles north of Peace River.

Will Help Marketing Of Empire Products

Chair Of Imperial Economic Relations Established In London School

London, Eng.—The Empire Marketing board has made a grant to the London school of economics to enable the establishment of a chair of Imperial economic relations. The board considers the progress of improvements in marketing of Empire products depends not merely on development of biological sciences, which have already received considerable encouragement from the board, but also upon scientific study of the many economic problems which confront those engaged in active development of Empire trade.

The new chair will provide an authoritative centre for the study of such problems and should also increase the study of trained economists qualified to undertake practical economic research along lines calculated to benefit directly the marketing of Empire products in the United Kingdom.

Quota System For Canada

Advocates Restriction Of Immigration To the Dominions

Ottawa. A quota system for immigrants entering Canada is advocated by Hon. J. W. Edwards (Conservative, Frontenac-Addington).

Dr. Edwards, in a resolution placed on the order paper of the House of Commons, seeks approval of his opinion that "immigration to the Dominion of Canada should be restricted by the adoption of a quota system which, however, shall not be applied to the British Isles and the United States of America and from which certain specified countries may be practically exempt."

Ratifies Sale Of Railways

Edmonton. After a debate lasting through one afternoon and part of another, the provincial government-owned railroads of Alberta passed into the control of the Canadian Pacific and Canadian National railroads and the Alberta legislature lost one of its greatest bones of contention.

Lady Heath Given License

New York. Lady Mary Heath, the British aviatrix, has received from the Department of Commerce the first aviation mechanic's license ever issued to a woman. She also got her transport license.

Lady Lodge Dead

Salisbury, Eng. Lady Lodge, wife of Sir Oliver Lodge, the noted scientist and research worker in physical fields, died recently at their home near here. Sir Oliver was at her bedside.

Starts New Exploration Flight

Byrd Expedition Reports Important Discoveries At South Pole

New York.—The New York Times, The St. Louis Post-Dispatch and their associated newspapers have received a delayed dispatch from their correspondent with the Byrd Antarctic expedition telling of a new exploration flight begun by Commander Byrd over King Edward VII. Land to the south of the mountains he discovered recently.

The flight was being made with two 'planes, a Fokker in which were Commander Byrd, Bernt Balchen, pilot, and Lloyd Berkner, radio operator, and in the other Captain Parker, Harold June, pilot and navy radio operator.

The correspondent's brief dispatch was sent by dog team from Little America, the Byrd headquarters ashore, to the barque City of New York at the ice barrier, for transmission by wireless.

At the time it was sent the correspondent reported wireless messages coming from the 'planes showed that the flight was still in progress and already had been productive of important discoveries, which would be made known when the 'planes returned to their base.

Require More Radium

Small Supply Handicaps Toronto Doctors In Cancer Treatments

Toronto.—Effectual treatment of cancer in Toronto, other than by surgery, is materially retarded by the small supply of radium available, declared Dr. Herbert A. Bruce, professor of clinical surgery, University of Toronto, in the course of a paper delivered before members of the Academy of Medicine.

Toronto's whole supply of radium, the speaker said, consisted of the small amount of one-half gram, or about $30,000 worth. The least amount necessary to successfully carry on a battle against the disease would be two grams, he added.

He suggested collecting a $500,000 fund which could be used for the purchase of nine grams, an amount sufficient to enable local surgeons to effect many more cures in cancer than is now possible.

Suggests C.P.R. Branch Line Into The Pas

Move Launched By Head Of Ross Navigation Company

The Pas, Man.—A move to have the Canadian Pacific Railway build a line into The Pas, was launched here, when Harvey Weber, president of the Ross Navigation Co., and president of Transports, Limited, urged the Rotary Club to take the initiative.

Mr. Weber advocated asking the C.P.R. to build down the Carrot River Valley to The Pas, and secure joint running rights over the Hudson Bay Railway. He declared numerous prairie towns south and west of here served exclusively by the Canadian Pacific Railway would thereby get one through freight rate to Churchill instead of two rates.

Supplies For H.B. Terminals

House Told $210,570.38 Was Spent In Halifax During 1927

Ottawa.—A sum amounting to $210,570.38 was spent in Halifax by the department of railways and canals and the department of marine and fisheries in 1927 in connection with the activities in Hudson Bay. This was disclosed in a return tabled in the House of Commons in answer to a question by W. A. Black (Cons., Halifax). It was shown that the railway department spent $30,336.96 with Halifax firms for supplies on account of the Hudson Bay terminals. The marine department bought $40,721.90 worth of materials from A. B. MacMillan for the Hudson Straits Expedition, and $139,511.43 worth from other firms in the way of supplies.

May Get Permit

Washington.—Bert Acosta, whose pilot's license was revoked by the commerce department last June, may be granted a new permit, but cannot use it until April 15. Acosta conferred here with assistant secretary of commerce MacCracken, and was advised to appeal to the department for withdrawal of two $500 fines for violation of air regulations and then take a new examination for a pilot's license.

Irish Minister To Germany

Dublin, Irish Free State. The first minister of the Irish Free State to Germany will be Prof. D. Binchy. He is a member of the faculty of the National University of Ireland. It is the intention of the government to appoint a minister to Paris soon.

Will Discuss Resolution

House To Debate Matter Of Binning and Loading Of Wheat

Ottawa. The unloading and binning in public elevators of certain grades of wheat is the subject of a resolution placed on the order paper of the House of Commons, by T. L. Donnelly, Liberal, Willow Bunch.

Mr. Donnelly proposes that "the grades of wheat known as Nos. 1, 2 and Northern, and 4, 5 and 6 wheat billed to terminal points should be unloaded and binned only in public terminal elevators, under such regulations as will prohibit mixing of the grades either in the elevator or when being loaded into boats or cars, or in transit for milling or export." The matter will come up for discussion in the House shortly.

PAYS TRIBUTE TO LEAGUE OF NATIONS' WORK

Ottawa.—"There is no royal road to peace, but there are many paths which lead in the direction of peace and the Briand-Kellogg treaty is one of those paths," Premier King said during the House of Commons debate on the Kellogg-Briand pact.

Premier King paused at this moment to pay tribute to the work of the League of Nations towards peace. Touching upon disarmament, Premier King said it was true that progress toward disarmament had not been as great as one would like, but considerable progress had been made. The pact created a solemn covenant binding nations not to go to war as a means of settling differences.

The Senate of Canada has already ratified the pact.

Mr. King sketched briefly the history of the treaty, which he said, had now been accepted by 62 nations. Its fundamental origin was "to be found in a feeling of revolt against war on the part of all nations which have had to do with war in the recent past."

The treaty did not pretend to establish machinery for the prevention of war, but it called forth from the nations of the world "a solemn renunciation of war as an instrument of national policy."

The League of Nations did not include within its membership all the nations of the world, said the prime minister, in pointing out some of the advantages of the treaty. The United States was not a member of the League of Nations, but it had signed the treaty for the renunciation of war. One or two other countries were in the same position.

Support of the treaty, coupled with a note of warning that there must be disarmament if peace is to be more than a dream, was the burden of the speech with which Hon. R. B. Bennett, Conservative leader, followed Mr. King.

Ramsay MacDonald Is Feeling Fit

Denies Reports That He Is Suffering From Failing Health

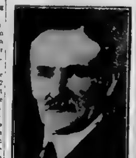
London, Eng.—Right Hon. Ramsay MacDonald, Labor Leader, has denied a report that he was finding his political responsibilities too heavy. It had been suggested that the Labor chieftain was in failing health.

He declared that as a matter of fact he was perfectly fit and was putting on weight.

Pirates!

No sailor, however, would be much alarmed if these pupils of Mary Isdale were at large upon the main. This bold bad group featured the second program at the Sea Music Festival recently held at the Vancouver under the auspices of the Canadian Pacific Railway.

CONSERVATIVE LEADER IN SENATE



Senator W. B. Willoughby, of Moose Jaw, on Feb. 8, was elected Conservative leader in the Senate at a caucus which was held in the capital.

Will Not Issue Invitation

But British Government Is Still Considering Naval Conditions

London, Eng.—Replying to a question, Sir Austen Chamberlain, British foreign secretary, told the House of Commons that the government had no intention of issuing invitation to a new conference on naval disarmament.

Sir Austen re-affirmed a previous announcement that all questions, concerning British relations with the U.S. and the naval conditions of the two countries are under consideration by the British Government.

"Our examination of this is being diligently prosecuted," he said. "As soon as it is concluded the first step will be to communicate with the Dominions."

The foreign secretary said the recent statement on disarmament in Washington made by Sir Esme Howard, the British Ambassador, was not made on the instructions of the British Government.

May Create Another Province

Tenth Province In Northern Area May Be Solution

Edmonton.—That the Dominion Government could scarcely be expected to extend the boundary of any one of three prairie provinces—Manitoba, Saskatchewan or Alberta—without dealing with all three and also with the whole of that area now administered by the Dominion as the North West Territories, was the statement of Premier J. E. Brownlee in the Legislature here.

The Premier said that while he did not wish to directly quote any person, he had gathered while in Ottawa that the disposition of the Dominion Government at present was rather to create another province from the territories than to divide them up between the other provinces.

The Premier said he was not inclined to take the reports of Saskatchewan's efforts in this direction seriously.

Will Meet In London

London, Eng.—The Marchioness of Aberdeen and Temair, who is president of the International Council of Women, is calling a conference of rural women to meet for a fortnight, in London, from April 30 to May 14, 1929. An appeal is being made especially to Canada to send some representative rural women—this because Canada is the pioneer in organizing rural women.

Airships Ready For Tests

British Machine Has Accommodation For One Hundred Passengers

Howden, Yorkshire.—The R 100, the biggest airship in the world, being built at Howden, will undergo its first tests shortly.

Only the finishing touches to the structure remain to be made, gas bags being almost ready for inflation.

A speed of 100 miles an hour is expected to be attained by the 4,200 h.p. engines of the airship. It has luxurious accommodation for a hundred passengers. It is intended to fly the Atlantic with a full complement of passengers after the tests have been completed.

Rationing Bread In Russia

People Are Using It To Feed Hungry Cattle

Moscow. Bread books issued by the government will govern purchase of bread after March 15, the Moscow Soviet or governing committee has decided.

The committee, which acts when the Soviet is not in session, was ordered in a resolution to work out details governing the distribution of bread under the new order.

The resolution, after stating that the red capital was amply supplied with baked bread, went on to say that the main difficulty lay in speculation and in feeding cattle with bread which was cheaper than fodder.

CONSTRUCTION OF A NATIONAL HIGHWAY URGED

Ottawa. The railway terminals situation in Montreal must be faced "and faced in a rather large way in the very near future," Hon. Charles A. Dunning, minister of railways and canals, informed the House of Commons. The minister was speaking during debate on the resolution of D. F. Kellner, (U.F.A., Athabaska), which calls upon the government to consider making a further federal grant for the next five years highway construction.

Mr. Dunning drew attention to the fact that Canada was the owner of a large railway transportation system, and that its needs must be considered when large expenditures from the federal treasury on highways were contemplated. He did not want himself placed on record as being opposed to the construction of a national highway.

"But I do say, we must always have regard to our over two billion dollar investment on railways in providing for the development progressively, over a period of years, of a form of transportation which will tend to reduce possibility of our railways earning their own way," warned the minister.

Mr. Dunning stressed the point that the provinces themselves prefer increased subsidies to grants which are earmarked for some specific purpose, such as highway construction. They were opposed to government grants with strings attached.

Later debate was productive of an amendment from A. M. Carmichael (Progressive, Kindersley), which favored the construction of a national highway from coast to coast as soon as possible.

The majority of speeches favored federal aid in the construction of highways. The advantages which would accrue to the Dominion through increased tourist traffic, and the additions to the federal treasury because of the purchase of more motor cars, were mentioned as arguments for the resolution.

E. J. Garland (Progressive, Bow River), said that nothing would serve as well as a national highway to bring the east and west together. It was repugnant to think that in crossing the country by auto, it was necessary to travel part of the way in the United States on account of the roads.

"There is not a prairie member," Mr. Garland declared, "who has not experienced a thrill by the sight of a motor car with a Quebec or better still a Nova Scotia license."

Dr. T. E. Kayser (Progressive Ontario), said the great need of the west was communication by good roads. He favored the resolution.

David Spence (Conservative, Parkdale), said he noticed that support of the resolution was only coming from his side of the house.

The members of the opposite side, Mr. Spence said, "especially the members from Saskatchewan, are sitting there as if puzzled."

In his opinion, good roads were a national welfare.

UNEMPLOYMENT INSURANCE PLAN TO BE PROBED

Ottawa, Ont.—Canada's unemployment situation, and the practicability of establishing a scheme of unemployment, sickness and invalidity insurance, will be matters for exhaustive investigation by the House of Commons committee of industrial and international relations. The committee sat for the first time during the present session, and laid the foundations for this research.

Henri Bourassa (Liberal-Labor) explained to the committee Canada's unique position as a nation where seasonal unemployment was always prevalent in winter, yet such are the demands of harvest time that in the summer thousands of United States laborers crossed the border and worked in Canadian fields, he said.

Co-operation of provincial governments will be sought by the committee to bring out figures which will eliminate the unemployment conditions in [illegible].

Experts will attend the next meeting of the committee to report on the family allowance and other related schemes, which is claiming the attention of the members.

Grading Of Beef

New Regulations Will Shortly Be Put Into Effect

Ottawa, Ont. The governor-general-in-council has approved regulations governing the voluntary grading of beef offered for sale in Canada. Hon. W. R. Motherwell, minister of agriculture, announces that the regulations will shortly be put into effect and graders appointed.

The regulations provide that brands shall not be applied to beef unless slaughtered in inspected abattoirs, and bearing the meat inspection stamp "Canada Approved." All brands must be registered with the minister of agriculture and before these brands are approved, an inspection will be made of the grading of beef at the establishments where the brands are to be used.

Failure to comply with the provisions of the regulations by any establishment in selling branded beef may result in the minister withdrawing the right for such establishments to use brands. When a retailer, through his practice in storing, displaying or selling may be reducing the eating quality of the beef, provision is made in the regulations for the minister to notify establishments supplying the beef to stop selling to that particular retailer.

Canada's New Destroyers

Details Are Completed For First War Vessels Ordered By Dominion

London, Eng. Commodore W. H. Rose, director of naval services of Canada, will return to the Dominion on the steamship Montclare, sailing for St. John, N.B., having concluded the final details for the two new destroyers for Canada.

The destroyers to be completed in two years, are of the latest British destroyer type of 1,350 tons, speed 37 knots and armed with four 4.7-inch guns and two two-pounder guns. They are the first war vessels ever ordered by Canada.

Radio Plans Completed

League Of Nations Will Conduct Broadcast Trials In March

Washington. The radio commission has received a communication from the secretariat of the League of Nations through the state department, announcing plans of the League to conduct [illegible] broadcast trials in March to Canada, the United States, South America, Japan and [illegible].

Speeches [illegible] world will [illegible]. The broadcast to America [illegible] conducted on March 12 [illegible] league station [illegible] length of 18 [illegible].

Will Visit Saskatoon

Saskatoon. Viscount and [illegible] Willingdon will pay an official visit to Saskatoon, April 1, according to notification sent to Mayor Norman. Plans will be made to give the vice-regal party a rousing reception.

Reindeer Shipped To Canada

Stockholm. A consignment of [illegible] live Swedish reindeer, the largest number ever exported at one time, has been shipped to Canada through a Norwegian port.

Canada Takes Leading Part Among Nations of the World In the Control of Narcotics

The following article was prepared at the direction of Dr. J. A. Amyot, Deputy Minister, Department of Pensions and National Health, by Mr. C. H. L. Sharman, Narcotic Division.

One of the most urgent social problems confronting the League of Nations is the world-wide illegal use of drugs, but long before the formation of the League, in the work of which Canada has taken an important part, the Dominion had enacted drastic measures for the control of the opium traffic and the elimination of the illicit use of narcotics within her boundaries.

The first Act dealing specifically with the subject in Canada was passed by the Dominion Parliament in 1908. This made it an offence to sell, offer for sale, possess, or manufacture opium prepared for smoking, or crude opium for other than medicinal purposes. Three years later in 1911 further enactment brought the three drugs—heroin, morphine, and cocaine—under control and on account of these statutes the Dominion was justly regarded at that time as having the most advanced legislation thereupon in the world. With a view to the international control of the opium traffic, Canada was represented at the subsequent conferences at the Hague in 1912 and 1913.

In addition to making it an offence to possess, manufacture, sell, or distribute the various derivatives of opium and cocaine, except for medicinal or scientific purposes the 1911 Act stipulated that these drugs should be sold only by a bona fide wholesale or retail druggist to physicians, veterinary surgeons, or dentists, or on prescriptions issued by members of these professions. As a matter of fact the Hague Conference agreements were to all intents and purposes already embodied in the Dominion's 1911 Act but these agreements were never ratified by other countries until after the conclusion of peace, when the Treaty of Versailles included a clause whereby the International Opium Convention was incorporated therein and brought into force.

In conformity with the ideals of the League of Nations a still more stringent act was passed by the Dominion Government in 1920, and in 1923 an amendment was made providing for the deportation of all aliens convicted of trafficking, irrespective of the length of their stay in Canada. Incidentally, between June, 1922, and January, 1928, 666 persons were deported. In 1923 another Act was passed, tightening up previous loopholes in the law, followed by further regulations and amendments in 1924, 1925, and 1926, which made the legislation on the subject as perfect as humanly possible. The Narcotic Act as it now stands specifies a maximum penalty of seven years imprisonment with a minimum of six months and a maximum fine of $1,000 with a minimum of $200 in case of trafficking, while in cases of sale of narcotics to a minor, the court is empowered to impose the lash in addition to any other punishment.

Owing to her strategic position between the East and West, Canada is one of the world's highways over which this traffic would naturally pass. Her alertness, therefore, in combating the narcotic evil not only conserves the health of the people of our greatest national resource—but also assists in maintaining the welfare, peace, and good order of the world.

Aid To Agriculture

Trees Are Of Benefit To Production On Prairies

The planting of trees on prairie farms in Western Canada is having an appreciably beneficial effect on the quality and variety of agricultural production in that part of Canada. The large and growing distribution of planting material made from the nursery stations of the department of the interior at Indian Head and Sutherland, Saskatchewan, is gradually changing the general appearance of the prairies in the provinces of Manitoba, Saskatchewan and Alberta, and the development of shelterbelts is being followed by the setting out of apple and small fruit orchards, gardens of fine vegetables, and by further beautification of prairie homes with shrubs, flower beds, and extensive lawns.

Alberta Poultry

A New High Mark For Industry Is Set During 1928

A new high mark in the value of the poultry industry in Alberta has been set during 1928, according to the annual report of the Poultry Commissioner, J. H. Hare. Figures arrived at with the co-operation of the Dominion Bureau of Statistics show that the numbers of the various kinds of poultry on Alberta farms in 1928 were as follows: 1-306,214 turkeys; 280,922 geese, 90,-258 ducks; 5,496,120 other fowl; a total of 6,213,706 as compared with 5,953,980 in 1927. A corresponding increase in the value of poultry is shown in the fact that this reached $6,666,290 in 1928, as against $4,-521,080 in 1927.

Plans For New Dominion

A movement to make Palestine a permanent part of the British empire as a Dominion, after expiration of the 25 year period of the mandate granted by the League of Nations, has been launched.

A tourist is a person who thinks a farmer wouldn't care if somebody took a dozen ears of corn.

[illegible] who has been appointed Industrial Agent, Manitoba district, in keeping with the policy of the Canadian National Railways to give assistance in the development of Western Canada by aiding the establishment of industries. Mr. Chambers will have his headquarters at Winnipeg.

Index To Growth Of Prairie Provinces

Acreage Under Production Shows Large Increase In Past Few Years

The rate of settlement in the prairie provinces has not kept pace with what it was before the war, but the expansion of acreage put into production has been marvellously accelerated.

The Ottawa publication, Natural Resources, shows this in a graph. In 1900, from when the great influx of settlers into the west may be said to date, 2,000,000 acres had been brought into production. In ten years more, heavy incoming settlement had increased that acreage to 13,007,000.

The acreage under production by 1913, when settlement reached the peak is not shown in the graph. But it is given for 1929. It had then more than doubled what it was in 1910. It had risen to 50,225,000 acres.

Though incoming settlement in the last ten years has not been looked upon as extensive, and often has been deplored as indicating an ebb, it is not the index to development in western agricultural production. For each of the last eight years, the prairie provinces together have increased their productive area by at least a million acres. Dominion statistics show the West had brought into agricultural production by last year 57,790,000 acres.

Named His Own Sentence

A Judge in Valence France, recently asked a prisoner, on trial for murder, to put himself on the judge's bench and imagine the judge was the culprit. "What sentence would you inflict upon me if you were in my place as judge and I were in yours?" the judge asked. "I have killed," the prisoner said. "I deserve to be killed. Kill me." He was sentenced to death.

World's Largest Carpet

What is claimed to be the largest carpet in the world has been laid in the tea lounge of the New Empire Theatre, London, England. The rug was woven in Czecho-Slovakia, there being no loom in this country big enough to handle it. The carpet cost 535 a square yard.

Brother, "I trust that you are happy with your husband, Mame?" Mamie: "Oh yes; as happy as one can expect to be with a man who is talking of himself half the time and of his first wife the other half."

"Mother, when the light goes out where does it go?"

"I don't know. You might just as well ask me where your father goes when he goes out!"

A good time doesn't always depend on the price you pay for it.

Winnipeg Newspaper Union

Fashion

Practical—Smart

If you have a little daughter of 6, 8, 10, 12 and 14 years in your house, you'll thoroughly appreciate design No. 186 consisting of a vestee and bloomers. These attractive undies can be made at a remarkably saving of durable fabrics that will give splendid wear. Elastic is inserted through a hem at top of bloomers and through a casing above knees forming frill. For the 8-year size, 1¾ yards of 40-inch material is sufficient to make both vestee and bloomers. Batiste, crepe de chine, rayon crepe, cross bar dimity, washable crepe silk, lawn and novelty cotton crepe are smart suggestions. Pattern price 20 cents in stamps or coin (coin preferred). Wrap coin carefully. We suggest that when you send for this pattern, you enclose 10 cents additional for a copy of our Fashion Magazine, showing all the most attractive Paris styles, embroidery etc.

MAKE SKIING POPULAR

Here we have five good reasons why Skiing is so popular now in Quebec. There are cross-country races for ladies, juniors and senior events and jumping for the experts. With its ice pageant, the most colorful winter event of the east, and the International Dog Sled Derby, Quebec City has become in winter even more of a popular resort than it is in the spring and summer.

Rates Of Seeding Grass and Legumes

Ten Pounds Of Alfalfa Seed Per Acre Is Recommended

In the growing of grasses and clovers it is important that in seeding reasonably correct amounts of seed be used. While in favourable seasons a comparatively light seeding may succeed well, seasons that are more adverse have to be considered at seeding time. At the Lacombe, Alberta, Experimental Station such crops as rye grass, timothy, alfalfa, sweet clover, and brome, were sown at different rates with wheat seeded on summer fallow as a nurse crop. The results of the work are shown in the report of the superintendent of the station, published by the Department of Agriculture at Ottawa. As between rye grass and timothy it is brought out that during the dryer years the rye grass made the heavier growth, while there was the case when there was an abundance of moisture available during the growing season. The yields produced by the different rates of seeding indicated that ten to 15 pounds of rye grass per acre was the most satisfactory. In the case of timothy, as low as two pounds of seed per acre gave the heaviest yields in a moist year, while a thicker seeding up to five pounds and over—gave the best results when the moisture was more scant. Mr. Reed, the superintendent of the station has reached the conclusion that there is little advantage in seeding more than 10 pounds of alfalfa per acre. Thicker seedings resulted in a woody hay crop and a coarser, unpalatable hay. In the case of sweet clover rather heavy seeding is required not only for the yield of crop but for its palatability. Seeding at the rate of five pounds per acre produced a much thinner stand and a very woody crop of coarse hay. Ten pounds of Sweet Clover to the acre is little enough and two or three pounds more gives better results, particularly in the fineness of the hay crop. Ten pounds of Brome seed per acre is reported to be very satisfactory. A five pound seeding resulted in a thin stand the first year, resulting in a coarse woody crop of hay. Thin seedings, however, usually thicken up sufficiently to give a good stand being the second season. With heavier seedings, up to 15 pounds per acre, the crop thickens up quickly, unless an excellent pasture and but soon becomes sod-bound if left for hay.

Increased Use Of Butter

Canadians Are the Largest Consumers Of Butter In the World

The people of Canada are the largest consumers of butter in the world. The per capita consumption has been put down at 27 pounds yearly, approximately 10 pounds more per head than the people of the United States, which holds second place on the list. The increased home consumption of butter and the supplies necessary to meet the demands of the growing tourist trade, have caused a drop in exports, not only of butter, but of other dairy products. Almost 15,000,000 pounds of butter are consumed annually by tourists in the Dominion.

While Ontario and Quebec are the largest producers of butter and other dairy products in Canada, the total of the three prairie provinces—Manitoba, Saskatchewan, and Alberta—approximately one-third of the total production of the Dominion. Fourteen years ago Western Canada was importing 200 cars of butter annually. Now it exports millions of pounds.

The Jack Knife Won

The other day I was teasing my young nephew aged 7, about his girl.

He was telling me how much he loved her. "I would not part with her for all the money in the world!"

I offered to give him $10,000 for her, but he shook his head very decidedly.

Finally in desperation, I said, "I will give you my old jack knife for your mother."

He hesitated for a moment, and then replied, "Let's have a look at your jack knife."

Not Just What He Meant

A young attorney, taking his first case, had been retained by a farmer to prosecute a railway company for killing 24 pigs.

He wanted to impress the jury with the magnitude of the injury. "Twenty-four pigs gentlemen. Twenty-four, twice the number in the jury box."

A man whose life was despaired of by a doctor when he was a boy, has just died at the age of 102. Doctors are generally right in the end.

He: "Football is my favorite game. What's yours?"

She: "Fried venison."

Auxiliary Schooner Is Built For Use of R.C.M.P. in Patrolling Canada's Far Flung Arctic Coast

Amounts To Large Sum

Waste In Small Ways Soon Runs Into Millions

In dealing with the question of extravagance and waste, a speaker on the floor of the British House of Parliament made the statement, says a writer in Tit-Bits: That every year more than four million bottles of medicine are wasted because the average tablespoon holds more than four drams, which is the usual dose.

Most of us, when we write a telegram in a postoffice use more than one form before we are satisfied with what we have written. We think nothing of this, but the G.P.O. complains that seventy million telegraph forms find their way into waste-paper baskets every year.

Gas companies lose tremendous quantities of gas through tiny leaks in the mains that cannot be traced or very small mistakes in registering meters. One gas company puts its loss on this account at three million therms a year.

How much water is wasted by a dripping tap? An answer was provided when New York decided to levy a fine of two dollars for every tap found leaking. In two years 10,000 million gallons of water were saved.

It seems absurd to worry about the amount of steam wasted when a locomotive blows a whistle. But Dr. Foley, of Indiana University, has calculated that 2,424,000 tons of coal are consumed annually in generating steam to blow United States locomotive whistles, and that if the whistles were moved slightly forward and adapted to a single high pitched note, more than a million pounds a year could be saved.

But this loss is small compared with that involved in throwing on the dustbin cinders that would still give a lot of heat. It is estimated that a third of the cinders thrown away retain from fifty to seventy per cent. of their heating value.

Started Centuries Ago

And Members Of Families Still Quarrel Over Things Of No Importance

Do you have family quarrels? Does brother squabble with brother, sister with sister or child with parent? Is there a constant strife between the mother-in-law on one side and the daughter-in-law on the other? Are there periods of "We don't speak" and periods of "We are a happy family" which keep recurring year after year?

Cain and Abel started it. Others keep it up: be they kings, politicians or laborers in the field or mine. Usually about nothing and usually disastrous to all.

We may live for eighty years and one little two-year period of coldness between members of family means a large slice from our short term together.

Two brothers are alive today (he may die within five years. One year of discord means twenty per cent. of their lives together thrown away. It's far too high a rate of interest to pay for the privilege of sticking your nose in the air so you will part a loved one on the street. Richard S. Bond.

Among the many activities of the Royal Canadian Mounted Police is included the maintenance of national prestige and the preservation of rights of life and property on Canada's far-flung Arctic coast.

From Herschel Island at the western boundary of Canada's coast line to Boothia Peninsula on the east is over 1,300 miles direct, but following the irregularities of the shore the distance is much greater. The whole region is far beyond the Arctic circle.

The native population is Eskimo. There are a few missionaries and some traders including the Hudson's Bay Co. Indian population does not extend northward to the coast.

There are six police detachments: Herschel Island, Aklavik, [illegible] Island, Cape Bathurst, Langton Bay, Bernard Harbor and Cambridge Bay on the great Arctic island of Victoria Land. This latter is 1,000 miles east of Herschel.

Communication is by dog-sled in the long winter and by water in the short summer.

Hitherto the police have depended upon the vessels of the Hudson's Bay Co. or other traders for summer inter-communication and the transportation of men and supplies. But during the past season the prestige and efficiency of the Arctic section of the police force was materially increased by the arrival of the auxiliary-powered schooner St. Roch, which hereafter will do patrol work and distribute supplies throughout the western Arctic during the season of open water. It will, in fact, be a floating police post.

Vessels coming into the Canadian Arctic from Bering Strait do not reach Herschel until some time after the waters eastward to Coronation Gulf and beyond have been open to navigation. In order to be sure of passing Point Barrow, Alaska, in safety on their way out to Bering Strait, vessels must leave Herschel early in September, although there is still several weeks of navigation to the eastward. By wintering in the Arctic the St. Roch will be able to take advantage of the whole of the season of navigation for the discharge of its patrol and other duties.

The St. Roche was built last winter in North Vancouver by the Burrard Dry Dock Co. Its length is 85 feet; beam, 24 feet; speed, 7 knots; cargo capacity, 175 tons. Besides a full equipment of sails, the St. Roch has Diesel engines of 125 horsepower.

She left Vancouver on June 26th and arrived at Herschel on July 20th. She sailed from Herschel on August 1st for Cambridge Bay and returned August 24th. She is now in winter quarters at Langton Bay 250 miles east of Herschel.

She has wireless equipment which communicates with Aklavik and through Edmonton to Ottawa, as for tuning in with Aklavik she was able to reach the Hudson's Bay Mauri of the Hudson's Bay Co., at Cambridge Bay, 800 miles distant. The Bay Maud reached Cape Hope's Advance on Hudson Strait and proceeded thence to Ottawa.

The detachment on the St. Roch comprises Sergt. Frederick Anderson, in charge, and nine men, including a wireless operator, all certified master mariners. The third officer is an ex-naval midshipman who saw service in Belgium during the war.

Owing to bars at the mouths of the several arms of the Mackenzie delta the St. Roch will not be able to reach Aklavik. But connection between Shingle point on the Arctic sea coast west of the delta and 75 miles from Aklavik can be maintained by small power-boats, of which many are used.

Having their own means of transportation with full efficiency the police are now equipped to give a measure of supervision all along the western Arctic coast to matters that were entirely beyond their reach in the conditions under which they had hitherto been working.

"You don't know how artistic my little son is. I know he will put the lovely flowers you have brought me in water as soon as they don't fade."—Vorthatbler, Berlin.

Only choice leaves grown at high altitudes go into the blending of Blue Ribbon Tea. That is why its flavour is so uniformly excellent. Insist upon getting it from your grocer—refuse substitutes of inferior quality.

BLEEDING GUMS

From their color which in health varies from a light pink to a dark pink, you would know at once that the gum tissues are richly supplied with blood.

Nature has planned it so purposely, thus giving the oral tissues high regenerative powers subject as it is daily to minor injuries and scrapings during the mastication of food.

Normally, gum tissue is firm and resistant and will tolerate much abuse, without bleeding. But should there be an undue tendency of the gums to bleed straightway this should be taken as a warning sign that something is wrong, and the family dentist consulted forthwith.

What then may be amiss?

Obviously these tissues are not in health, this being further manifested by a change in color from pink to red or to a purplish tinge, evidencing venous congestion.

Furthermore the gingivae may be swollen or again slightly shrunken at their crest though in the early stage of gingival disease, visible manifestation other than the tendency to bleed readily may not be present.

Perhaps the first intimation you have had of this condition was when one day performing your mouth toilet, you noticed blood welling up freely around the necks of one or more teeth as you scrubbed and rightly, the source of this haemorrhage was in the "pockets" underlying the free gum margin.

But why here?

The gum and gingival tissues are protected by a comparatively thick epithelial covering but which becomes progressively thinner as it lines the side of the pocket, until at its deepest point, this covering is extremely light, or may be missing altogether.

Here, then, is the most vulnerable point of attack on the part of the [illegible] organisms, which, gaining access to the tissues through some cause set up a mild degenerative process, with a consequent breaking down of the cell structure and extensive and weakening of the blood vessel walls.

So that with this condition present, even a mild stress on these weakened areas is sufficient to cause a hemorrhage.

There always is a reason for bleeding gums.

A PERFECT MEDICINE FOR LITTLE ONES

Baby's Own Tablets Should Be In Every Home Where There Are Children

The perfect medicine for little ones is found in Baby's Own Tablets. They are a gentle but thorough laxative which regulate the bowels, sweeten the stomach; drive out constipation and indigestion, break up colds and simple fever and promote healthful and refreshing sleep. It is impossible for Baby's Own Tablets to harm even the new-born babe as they are absolutely guaranteed free from opiates or any other injurious drug. Concerning them Mrs. Earl Taylor, Owen Sound, Ont., writes:—"I have four children and have always used Baby's Own Tablets. I am never without the Tablets in the house as they are the best medicine that I know of for little ones."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

THE CHRISTIAN CHURCH

Golden Text: "So we, who are many, are one body in Christ."—Romans 12.5.

Lesson: Matthew 16.13-20; Mark 4.26-32; Romans 12.4-8; Ephesians 1.15-23; 2.13-22; 4.4-6, 11-16, 5.22-27; 1 Timothy 3.15.

Devotional Reading: Ephesians 4.11-16.

Explanations and Comments

The Christian Church is a Growing Church, Mark 4.26-32. And Jesus said, "So is the Kingdom of God," that is, what you see to be God's method of working in Nature is also His method of working in the spiritual realm. The parables of Jesus show us that the term "the Kingdom of God" has to do with man's spiritual nature and possibilities, his inner life; it is the reign of God in the hearts of men. The Kingdom of God is as if a man should cast seed upon the earth as Jesus and the apostles and His later followers have implanted the word of God in the hearts of men. After having sown the seed, the planter sleeps by night and rises by day; that is, he leads his customary life and leaves the result of the sowing with God. And the seed springs up and grows, he knoweth not how.

"Flower in the crannied wall,
I pluck you out of the crannies;
Hold you here, root and all, in my hand,
Little flower; but if I could understand
What you are, root and all and all in all,
I should know what God and man is."—Tennyson.

The earth beareth fruit of herself.

"We plough the fields and scatter,
The good seed o'er the land,
But it is fed and watered
By God's Almighty hand.

The growth of the plant is gradual but marked by progressive stages—first the blade, then the ear, then the full grain in the ear. The same is true of spiritual growth.

"Nothing great is produced suddenly, not even a grape or a fig. If you say to me that you want a grape or a fig now, I will answer you that you cannot have it; a grape takes time. Let it flower first, then it will put forth its fruit, and then ripen. And would you have the fruit of a man's life and character all in a moment? Do not expect it."—Epictetus.

The Kingdom of God, then, is a growth. It begins with a seed. It grows on to the harvest. In this growth are three necessary elements, first, the beginning, the point of departure, second, a goal, a termination to which the progress is directed; and, third, the pathway between the beginning and the goal, leading from one to the other. This is the law of progress in all things, a "terminus ab quo," a "terminus ad quem," and a pathway between the two. He who remains in the present, anchored to it, does not progress. He who cuts himself apart from the present does not know progress. He only understands the law of progress who begins with the present, vitalizing the past, and proceeds out of that past and present toward the proposed future.—Lyman Abbott.

Arizona and New Mexico are the youngest states, having been admitted into the Union in 1912.

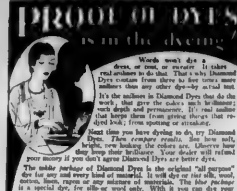
Elm trees around a field are [illegible] cut down because they [illegible] strength of the soil.

Muscular Rheumatism Subdued.—When one is a sufferer from muscular rheumatism he cannot do better than to have the region rubbed with Dr. Thomas' Eclectric Oil. Let the rubbing be brisk and continue until ease is secured. There is more virtue in a bottle of it than can be fully estimated.

The Death's Head moth now rarely seen emits squeaks almost as loud as those of a mouse.

Minard's Liniment prevents Flu.

Two can say "charge it" as cheaply as one.



Words won't dye a dress, or coat, or sweater. It takes real anilines to do that. That's why Diamond Dyes contain from three to five times more anilines than any other dye—by actual test.

It's the anilines in Diamond Dyes that do the work, that give the colors such brilliance; such depth and permanence. It's real aniline that keeps them from giving things that re-dyed look; from spotting or streaking.

Next time you have dyeing to do, try Diamond Dyes. *Then compare results.* See how soft, bright, new-looking the colors are. Observe how they keep their brilliance. Your dealer will refund your money if you don't agree Diamond Dyes are better dyes.

The *white package* of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye or *tint* silk, wool, cotton, linen, rayon or any mixture of materials. The *blue package* is a special dye, for silk or wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this. The *blue package* dyes silk or wool only. The *white package* will dye every kind of goods, including silk and wool. Your dealer has both packages.

Game Birds For Alberta

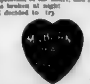
Mongolian and Chinese Ring-Necked Pheasants To Be Imported

Some 2,000 Mongolian and Chinese ring-necked pheasants will be imported during the coming summer by the Calgary Fish and Game Association. These birds will be liberated throughout the southern part of the provinces where 1,000 were placed last season as part of the Game Association's plan for re-stocking Alberta's game bird supply.

Heart Palpitated Nerves Bothered Her Sleep Was Broken

Mrs. Fred A. Pugsley, East Southampton, N.S., writes:—"I was bothered very much with my nerves and palpitation of the heart, and my sleep was broken at night.

I decided to try



and after I had taken six boxes I found that they had done me so much good I will gladly recommend them to all those who are troubled with sleeplessness caused by their heart and nerves."

Price 50c. per box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

The Thrifty Scot

One of every three persons in Scotland has a bankbook and the amount now saved in these books is 22 million pounds, according to a report by a Glasgow bank. The amount saved last year was over a million pounds, about £163,000 of this sum being saved in "home safes."

New Patient: And is your treatment completely successful?

Nerve Specialist: My dear sir, it's so successful that only last week one of my patients tried to borrow five hundred dollars from me.

Protect the child from the ravages of worms by using Mother Graves' Worm Exterminator. It is a standard remedy, and years of use have enhanced its reputation.

Brown: "You say you were classmates and yet you never saw him?"

Jones: "Yes, you see, this was a correspondence school."

Winnipeg Is Choice For Dairy Convention

Western Canada Association Will Meet There In 1929

The 1929 convention of the Western Canada Dairy Association will be held in Winnipeg, it was decided at the closing session of the annual meeting in Vancouver.

Championship prizes were awarded in the inter-provincial competitions. The Logan trophy, for the highest number of prizes for butter at fairs, was won by the Manitoba Co-operative Dairies, Brandon, A. L. Pearson, buttermaker, with a total of 151 points.

The Alberta Dairy Supplies prizes for the four highest scores in inter-provincial fairs went to the following: 1, Manitoba Co-operative Dairies, Brandon, 2, Crescent Creamery, Winnipeg, 3, Russell Creamery, Russell, Man., 4, Manitoba Co-operative Dairies, Winnipeg.

Production Of Foundation Seed

New Varieties Of Wheat Are Receiving a Great Deal Of Attention

The production of Foundation Seed of new promising varieties produced by the cereal division of the Dominion Department of Agriculture, occupies an important place among the activities of the latter. At present such new varieties as Garnet and Reward wheat are receiving much attention, while such older established varieties as Marquis wheat and Arthur peas are being rigorously re-selected with a view to fixing the type more definitely.

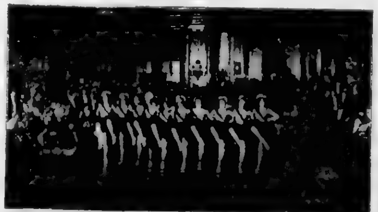
Minard's Liniment for Coughs and Colds.

Regular night flights for the benefit of tourists are now being made over Hamburg, Germany.

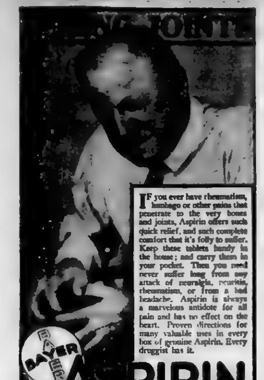
Castoria is a comfort when Baby is fretful. No sooner taken than the little one is at ease. If restless, a few drops soon bring contentment. No harm done, for Castoria is a baby remedy meant for babies. Perfectly safe to give the youngest infant; you have the doctors' word for that! It is a vegetable product and you could use it every day. But it's in an emergency that Castoria means most. Some night when constipation must be relieved—or colic pains—or other suffering. Never be without it; some mothers keep an extra bottle, unopened, to make sure there will always be Castoria in the house. It is effective for older children, too; read the book that comes with it.

CASTORIA

"EVERYTHING SHIP SHAPE"



No, it is not a farm stage scene. It's just an interior view of the giant Cunard liner "Berengaria" when some of England's leading stage people were guests aboard the Cunarder recently, and were royally entertained by sprightly dancing girls. This line, founded by the Canadian, Sir Samuel Cunard, operates a score of such floating palaces between British and Canadian and American ports, with economical quarters for the stream of settlers to the Canadian farm lands.



If you ever have rheumatism, lumbago or other pains that penetrate to the very bones and joints, Aspirin offers such quick relief, and such complete comfort that it's folly to suffer. Keep these tablets handy in the house; and carry them in your pocket. Then you need never suffer long from any attack of neuralgia, neuritis, rheumatism, or from a bad headache. Aspirin is always a marvelous antidote for all pain and has no effect on the heart. Proven directions for many valuable uses in every box of genuine Aspirin. Every druggist has it.

THE CRIMSON WEST

BY ALEX. PHILIP

[illegible]

CHAPTER XIV. Continued.

Donald stirred as Andy applied the water, and his one good eye opened slowly. "Did I win?" he questioned weakly.

"You bet your blinkin' life you did."

When Donald's gaze rested on Connie his face twisted into a wry smile. He reached for her hand and held it in a firm pressure. "Good little sport," he whispered through split lips.

Connie felt as though her heart would burst. Scorching tears ran down her face, and it was with the utmost difficulty that she controlled the suffocating sobs that filled her throat.

The sound of the big mill whistle smote their ears in a wild medley of short, sharp blasts, quite unlike the decorous tone that summoned and dismissed the men.

"What's that?" asked Donald, attempting to sit up.

"The engineer is celebrating, Donnie. The men 'ave returned to work. The strike is broken."

"Ah!" sighed Donald happily as he fell back on the pillows.

The distant hum of a gas car gradually increased to a series of staccato explosions, then died out suddenly. They heard the light rumble of wheels as it drew to a stop at the station below. There was the sound of quick foot-steps on the board sidewalk and the door opened to admit Dr. Paul. He crossed the room and took Donald's hand. "Is it true," he asked incredulously, "that you whipped Ole Hand?"

"Strike me pink if 'e didn't," Andy vouchsafed.

"I have patched up Hand's victims many times," the doctor stated, "but this is the first time that I have attended his victor, and I can assure you that it's a pleasure." He removed his coat and rolled up his sleeves. "I'll look you over," he added, then glanced significantly at Connie, who rose and left the room.

"A couple of cracked ribs, a fractured ulna, and a few hundred bruises," was the doctor's verdict a few minutes later.

The physician's deft hands soon bandaged the broken ribs and set the bone of the forearm.

"I'll go and patch up the fallen bully. I hope he's worse still," he chuckled as he left the room.

Andy stepped to the door and called in Connie.

"Don't look so frightened, Connie," smiled Donald. "I don't feel half as bad as I look."

"I'll have to go now," she said in a voice choked with emotion.

Andy accompanied her outside the door. "'Ave a bite to eat, Connie?" he invited.

Connie shook her head. Now that the excitement was over, the strain of the emotion she had experienced showed in the dark shadows under her eyes and in the droop of her slight shoulders. "Andy," she began, as she placed a small hand on his arm, "you—you won't say anything what—what—I——"

A flood of rose dyed her tanned cheeks and her blue eyes fell in embarrassment. Andy patted her shoulder reassuringly.

"I'll never s'y a blinkin word, Connie; an oyster's got nothin' on me."

Connie, visibly relieved, picked up her gun and started up the hill. Andy watched the pathetic little figure until she disappeared in the woods. For a moment he stood staring into nothingness, then, shaking his head sadly, he entered the cabin.

"She's a little brick, Andy," Donald spoke weakly from his bed.

Andy glared at him. "Brick!" he repeated sarcastically. "Is that all? You big, bone-'eaded, blinkin' sock!" He slammed the door as he went out to give emphasis to the remark.

"What the devil does he mean?" puzzled Donald. He turned painfully to his side, yawned equally as painfully, then fell into a sound sleep.

CHAPTER XV.

On the third day of Donald's convalescence he was able to leave his cabin. With his arm in a sling, his face patched with plaster, he made [illegible]

The men welcomed him with eager nods and smiles, many coming forward [illegible] sport. The big plant was now going at full blast. Belts flapped, logs thudded, planers snored loudly, and the great saw ripped shrilly through the big logs in a raising crescendo of sound.

Down at the siding an engine bumped noisily into a long string of flat-cars piled high with lumber. With arms akimbo, his wet undershirt clinging to his powerful torso, the mop of blond hair hanging damp on his brow, Gillis stood surveying the heavily-laden cars with an air of complacency. The lumber handlers sat about in positions of weariness, mopping their hot faces.

Gillis smiled cheerfully as Donald approached.

"Good news for you, Donnie," he said.

"What is it, Jack?"

"Last load for the big steamer," replied Gillis, as he pointed at the moving train.

"We're on time, then," cried Donald gladly.

"One day ahead," corrected Gillis.

The engineer came to the cab window as the engine passed, and pantomimed his congratulations by shaking hands with himself. The train gathered speed, and as the caboose rattled by, the conductor came to the rear platform.

"Good work, boys!" he shouted.

They stood watching the train until it struck the down grade and disappeared through the cut.

"Well, that's over," observed Gillis, as he sat down heavily and wiped the sweat from his face. He looked tired and worn, but the light of victory shone in his eyes.

"If it hadn't been for you, Jack," said Donald earnestly, "we would not have got that order away on time. You look all in; you'd better have a good sleep."

The big man's eyes brightened at Donald's praise.

"You don't look like you'd bin to a Sunday school picnic," replied Gillis with a chuckle.

As Donald walked up the hill the whistle blew for the noon-hour, and the men trooped past on their way to the dining-room. Blackie left the ranks and walked shamefacedly to Donald's side.

"I'm sorry for the part I took in the strike, boss, I——"

"It's all right, Blackie," interrupted Donald, "you more than made up for it. We'll forget all about that."

Blackie's face wore a relieved look as Donald gave his hand a friendly grip.

Meals in logging camps are eaten in silence and with a fixity of purpose. It is a business to be finished with as hurriedly as possible. From the time the men are seated until the chairs are pushed back, the clatter of dishes and an occasional "pass the butter" are the only sounds.

As Donald moved to his place at the table the men arose and clapped their hands. Someone called for a cheer, but Donald laughingly held up his hand.

"Men, I can't find words to tell you how much I appreciate your good work. Your long hours of labor enabled the Company to get an important order away on time, thereby saving their prestige in a big Eastern market. You will receive double pay for every hour you worked during the week."

A low murmur of applause followed this welcome announcement.

After lunch, feeling the need of exercise, Donald made his way slowly down the hill. The severe mauling and the days in bed had weakened him to such an extent that he was forced to take frequent rests. As he turned a curve in the trail, Hand and the man with whom Andy had fought crawled stealthily from the bush, looked furtively about them then followed Donald down the hill. He reached the open glade by the fairy nest to find Connie seated by the rippling stream, her chin resting in cupped hands, and staring dreamily into the flashing water.

"Ah!" he cried gaily. "I have caught my little dryad at her orisons."

At the sound of his voice Connie sprang to her feet, her heart racing madly. Hearing a sound behind him Donald turned to find the eyes of the Breed fixed on him in a malignant glare that chilled him to the marrow. For a short interval the dusky orbs of the Indian held his as though with a hypnotic power.

"Whew!" he ejaculated, as the Breed hobbled down the trail, "your guardian sure does give me an awful look. Why does he hate me, Connie?"

"Joe has peculiar ways," she parried.

"What were you dreaming about, Connie?" he asked interestedly.

A gay light danced momentarily in her shining eyes, and the red lips curved in a smile; "I was dreaming I was rich," she archly confessed.

"An old, old dream," smiled Donald as he stretched himself painfully on the moss.

Connie sat down near him.

As always, this spot gave Donald a restful feeling. The gentle zephyrs wafted from the woods about them were exceedingly delicious and the sparkling glacial stream that rippled through the glade sang its clear, sweet song. He closed his eyes wearily.

The proximity of the man she loved, lying there with his arm in a splint, his handsome face still bearing the marks of the blows he had suffered in her defence, thrilled Connie to the depths of her warm, impulsive heart. An almost overmastering desire to touch his hair possessed her.

"What would you do if you were rich, Connie?" he queried drowsily.

Connie sank back in the delicious moss and clasped her hands behind her golden head. "I'd buy a big trunk one of those kind with the bulgy top—and I'd fill it with silks, satins, brocades, velvets and all kinds of soft frilly things. Then I'd unpack it slowly one by one and hang them up all around the room and sit down and look at them. I'd buy a great, big stone house in London, and I'd walk down the wide marble stairs, trailing a long rustling silk gown, and I'd raise my lorgnette to my eyes and say, 'James, have my carriage at the door in half-an-hour.' I'd have a country place in Scotland, with hundreds of dogs and horses, thousands of birds, and acres of flowers."

She paused for a moment.

"I'd take Dad and Peggy with me everywhere I'd go," she went on softly, "and I'd buy Dad millions of books, and for Peggy I'd buy a solid gold-mounted bridle, and lots of warm blankets for winter instead of those old sacks. I'd buy lots of good things to eat, and lost of good clothes for all the poor kiddies in the world."

She looked up at the hills. "And six months out of every year," she continued, "I'd live right here in these mountains and come every day and sit beside—beside—this stream."

She raised herself slowly and looked down at Donald as he lay with closed eyes. Leaning forward until her golden curls almost brushed his dark hair, her eyes rested on a purple bruise on his brow. "And," she finished fiercely, "I'd kill every man like Ole Hand."

Donald laughed sleepily.

"Connie, you are a dear little girl," he said tenderly.

The endearing tone held a paternal ring, and Connie bit her lip in vexation.

"I'd like to have your father go with me to Vancouver some day. Will you go?"

First Turkish Dictionary

80,000 Words Listed In Newly Adopted Latin Characters

The first Turkish dictionary in the newly adopted Latin characters is to consist of 80,000 words. Spelling and phonetic pronunciation will be fixed and enforced by law. One letter has been assigned to each member of the linguistic commission entrusted with the task.

Stamboul University experts are composing a dictionary of scientific terms previously inexpressible in Turkish, and also a medical dictionary.

The first works in the new characters put in hand by the State printing department are four new scientific works and two novels.

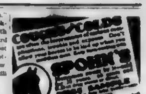
It is interesting to compare the new Turkish dictionary with the Oxford English Dictionary, the ten volumes of which contain 414,825 words.

His Preference

Brown was called to the police court to receive a reward for rescuing a woman from the water. "I am pleased to pin this medal to your breast," said the magistrate, "and also to lodge $25 to your credit in the bank as an acknowledgment of your great bravery."

Brown showed some little embarrassment, and then said: "If it's all the same to you, sir, I'd rather you'd pin the $25 to my breast and lodge the medal in the bank.

A boy judges his mother's greatness by her ability to make pies.



Little Helps For This Week

"Inasmuch as ye have done it unto one of the least of these, my brethren, ye have done it unto Me."—Matthew xxv. 40.

Still wheresoever pity shares
Its bread with sorrow, want, and sin,
And love the beggar's feast prepares,
The uninvited guest comes in.
Unheard, because our ears are dull,
Unseen, because our eyes are dim,
He walks our earth, The Wonderful;
And all good deeds are done to Him.
—John Greenleaf Whittier.

We can only do a deed to God by doing that deed for Him, only by offering ours as the hands with which it shall be done. Our human love for one another, and all our human help, is not less His for being ours. "God's tender mercy" is the name in heaven for what we call on earth "A drink of water." Many dear things of Providence He hands to His little ones by each other. Sometimes how can He reach them else? And sometimes whom can He use but you and me?—William Channing Gannett.

A Giant Thermometer

A giant thermometer, 71½ ft. high and 6½ ft. broad, has been placed on the tower of the German museum in Munich, where, illuminated, it is visible for a considerable distance.

"I don't wish Jim Judd, the town calamity howler, no hard luck," said Old Man Mums, "but I wish he'd climb one of the mountains he makes out of molehills and fall off."

Guard Against FLU — Sore Throat The First Warning.

Few families will escape. This epidemic constitutes a real danger. Health authorities everywhere warn the public of the danger of the common cold. "Flu" usually starts with Sore Throat. Unless the germs are killed by some antiseptic treatment a serious malady may develop.

A simple treatment is to gargle the throat three times daily with Nerviline. The antiseptic properties of Nerviline quickly destroy the germs in the throat. Of course if the chest is sore Nerviline should be rubbed over the affected area—lots of rubbing—it can't burn a blister, but will bring out the congestion and break up the cold.

To prevent "Flu" or colds from gaining headway Nerviline will prove most effective. It is hardly necessary to point out that the bowels should be stimulated, and the system purged of all waste materials. For this purpose Dr. Hamilton's Pills are recommended. They act without griping or discomfort of any kind. This combination treatment of Nerviline and Dr. Hamilton's Pills will prove a very satisfactory prevention for Grippe, Flu, etc.

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective, yet harmless. It has been the standard antacid for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet, the pain departs. You are happy again in five minutes.

Don't depend on crude methods. Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

WINDOLITE The Improved Glass Substitute

MADE IN ENGLAND

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness weighs about 125 to 130 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price $1.50 Per Square Yard, f.o.b., Toronto.

Use WINDOLITE and let
YOUR PLANTS
YOUR CHICKENS
YOUR CATTLE
Bask in 100% Sunlight
Send for booklet "WINDOLITE"

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

BABY CYCLONE A REAL COMEDY

This picture comes to Tofield as a guaranteed cure for the blues. This is not regular press agent stuff, but the positive assertion of one who has seen picture shows galore, but who has yet to see a better or more laughable comedy.

The story centres around cyclone—his picture will b shown, and has many ramifications that all end in a gale of laughter. The press agents say that this picture is for laughing purposes only, and you have the assurance of a qualified judge that it will make you laugh.

Don't miss it! Saturday night at 8:30.

The Battle of January:

January was a momentous month for wheat producers the world over. Canadian farmers had delivered nearly four hundred million bushels of wheat. Argentina and Australia were commencing the delivery of unusually large crops. There was an immense visible supply of wheat. The market commenced to sag. The one optimistic feature in a rather gloomy picture was the Canadian Wheat Pool. Just what the Pool stood for is told in candid language by George Broomhall, the British grain authority, in "Milling.":

"Prices were put down on the plea that Argentina must sell more of her new crop, and, in fact, shippers did put out lower offers, and some Canadian sellers followed the downward lead.

"But it was soon found that the Canadian Pool refused to offer or sell at the lower prices, and, of course, this gave Argentine shippers courage to work for a reaction.

"The action of the Canadian Pool also gave buyers confidence, and they not only found they needed wheat, but that they could pay better rates for it.

"As long as sellers were willing to "cut" prices, buyers were quite prepared to stand back and let them do still more "cutting," and quite possibly there might have been a bad slump had not the Canadian Pool taken a strong stand.

"The Canadian Pool Managers certainly deserve credit for courageous handling of a difficult situation, and their action proves that farmer members of the Pool would not agree to low prices at this period of the season.

"The lesson of the price movements of wheat in the past week is that emphasis must be given to the power of strong holders to maintain prices.

"Past experience showed that a crowd of weak holders was almost at the mercy of buyers in times of plenty.

"I think all must now recognize the commanding position of the Canadian Pool, and the readiness of Argentine shippers to follow a strong upward lead."

Alberta Wheat Pool

New Patent Slippers $2.95

In previous seasons, shoes at this price have been cotton lined and more or less unsatisfactory. For this spring, in the face of advancing shoe costs, we are able to offer two numbers with leather lining and insoles. A large cooperative purchase by 200 western merchants have made this possible. Available in the low heel, broad toe type or cuban heel on E. E. E. last. They have dull kid trim.

Mr. and Mrs McCauley Feted

One of the most notable gatherings ever held in Tofield, took place on Wednesday night when 125 people sat down to magnificently spread tables. The banquet was held in honor of ex-mayor McCauley, he having served ten years in the mayoral chair of Tofield.

During the evening he was presented with a purse and an illuminated address.

Many speeches were made and both Mr. and Mrs. McCauley praised greatly. A more detailed report of the event will appear next week.

LOCAL AND PERSONAL

Don't forget the big fancy dress carnival to be held at the Tofield Ice Palace on Friday night. Prizes and plenty of fun.

Jack Reed of Yorkton visited at the McCauley and Roger homes last week.

Mrs. Cecil Walsh of Shonts is ill in the Royal Alexandra hospital.

J. W. Chapman was a visitor to the city on Monday.

Mr. Thompson of the Pool elevator visited Edmonton this week.

Mrs. Hewey, sister of Mrs. McCauley was a visitor at the McCauley home and attended the big banquet on Wedesday.

Mr. J. Noland leaves for the coast on Thursday night's train.

The Ladies' Aid of United Church will hold a St. Patrick's tea and sale of homecooking and fancy work March 15th, at the home of Mrs. Firth.

There was an error in the publishing of the Suitus Bridge Club prizes last week. The following is correct: Mrs. Alex Ross, first prize and Mrs. Plum consolation. The meeting this week will be held on Friday at Mrs. Billy Webb's instead of Mrs. Pincott's.

Wesley Taylor met with a painful accident at the local skating rink on Wednesday night. He was standing behind the net during hockey practice and a shot from one of the players hit him on the nose, causing a fracture. Dr. Law was called and after rendering assistance, suggested that he be taken to a nose specialist in Edmonton, and accordingly Mr. Taylor took him up on the night train.

TOFIELD MINER KILLED BY TRAIN

Alex Zwock, 40, a Ukranian miner, commonly known here as Black Alex, was instantly killed when he walked in front of a freight train at a point about four hundred yards west of the local depot at one o'clock on Sunday morning.

The deceased man, who was employed as a miner by the Tofield Coal Company, Limited, was apparently on his way back to the mine after spending Saturday evening in town.

An inquest was held on Monday and the train crew exonerated from all blame. Coroner Dr. Law, conducted the enquiry.

The deceased had no relations in this country as far as can be ascertained.
